BEFORE DAY 1

A NOTE FROM SHIVAM BHAIYA

> *"The syllabus looks huge only when you look at all of it at once. Look at one Day at a time."*

Dear student,

Class 10 Social Science has four books, nineteen board chapters, dates, maps, terms and long answers. Open all of it at once and it feels like a mountain. That is why this book is not written chapter by chapter, but **Day by Day**. Every Day tells you exactly what to read, how many questions to solve and how long it should take. You do not have to plan anything. You only have to show up.

The notes are short on purpose. Sixty days do not leave room for everything, so every page keeps only what the board actually asks: the key points, the dates, the maps and the terms. Wherever a topic usually confuses students, you will find me in a bubble, explaining it the way an elder brother would, in our own language.

The practice questions after every Day are board-pattern questions with answers and short explanations. Solve them in your notebook before you check. When you get one wrong, do not feel bad; write it in your **Mistake Book**. That notebook will be worth more than any guide in the last week.

Some days you will not feel like studying. On those days, do just the warm-up and ten questions. A small Day is still a Day. Missed one completely? Day 41 is a buffer day, so you can catch up there. Just do not break the chain for long.

By Day 42 you will have finished the whole syllabus. Then come revision, three full mock tests in board timing and a calm last week. Follow the plan honestly, and on exam day you will walk in knowing that you have already done this paper three times.

Ab bas ek kaam: page palto aur Day 1 shuru karo. Main har page pe saath hoon.

Shivam Bhaiya

Shivam Kumar, Astra Series

MY 60-DAY PROMISE

I, _____, will finish one Day of this book every day.

Start date: _____ Day 42 (syllabus done) on: _____

Board exam on: _____ Signature: _____

58	Last 7	Mistake Book + Exam Alerts	243
59	Last 7	Half mock	245
60	Last 7	Calm last day	248

HOW TO USE THIS BOOK

THE 60-DAY MISSION

All 4 subjects
19 board chapters
3 full mocks

This book is not a book you read once from cover to cover. It is a **60-day plan**. Every chapter is broken into **Days**. Each Day tells you exactly what to read, how many questions to solve and how long it should take. Follow one Day a day, tick it off, and by **Day 42** the full syllabus is done. Days 43 to 60 are for revision, three full mock tests and a calm last week.

PHASE 1 | DAYS 1 TO 42

Learn all 19 chapters

One whole chapter at a time, in rotation: History, Geography, Civics, Economics. Revision days right after the chapters they cover. Each chapter ends with a chapter test.

PHASE 2 | DAYS 43 TO 53

Revise + 3 mocks

Second round of revision, Mistake Book days and three full papers in board timing.

PHASE 3 | DAYS 54 TO 60

Last 7 days

No new chapters. Recaps, maps, key dates and good sleep.

Your daily routine on a learn day

about 100 minutes, one sitting or two

1. Warm-up
10 min Without opening the book, write 5 points from your last Day.

2. Read notes
35 min Read today's pages. Underline key words, look at every image and caption.

3. Solve
35 min Solve today's questions in your notebook, without looking at the notes.

4. Check
10 min Check with the Day Answers box. Write every mistake in a Mistake Book.

5. Revise
10 min Re-read the Remember and Exam Alert boxes. Tick the Day complete line.

FOUR KINDS OF DAYS

Learn day

About 3 pages of notes, 10 to 15 questions, about 100 to 120 minutes.

Revision day

No new pages. Recall sheets, maps from memory and 25 to 30 mixed questions.

Mock day

One full paper in 3 hours at board timing, then check and note mistakes.

Last 7 days

One subject's recap a day, maps every day, sleep 7 to 8 hours.

IS BOOK KO KAISE PADHEIN

THE ROTATION PLAN

1 chapter at a time
History, Geography, Civics, Economics

This book moves **chapter by chapter**. You finish one whole chapter first, even if it takes 2 or 3 Days, and only then start the next subject's chapter: **History, then Geography, then Civics (Political Science), then Economics**, then the next History chapter. All four subjects move forward together, but a chapter is never broken in the middle.

> Pehle ek chapter poora khatam karo, chahe 2-3 din lagein. History ka chapter khatam hua, tab Geography ka chapter shuru. Phir Civics, phir Economics, phir History ka agla chapter. Aaj kya padhna hai, yeh har Day ke upar likha hai, tumhe kuch plan nahi karna.

THE CHAPTER CYCLE

STEP 1 History — one full chapter → **STEP 2** Geography — one full chapter → **STEP 3** Civics — Civics = Pol Science → **STEP 4** Economics — one full chapter

Phir History ka agla chapter. Yahi chakkar Day 1 se Day 39 tak chalta hai.

THE CHAPTER BLOCKS, IN ORDER

	HISTORY	GEOGRAPHY	CIVICS	ECONOMICS
Round 1	**Days 1 to 3** Nationalism in Europe	**Days 4 and 5** Resources and Development	**Day 6** Power-sharing	**Day 7** Development
Round 2	**Days 8 to 10** Nationalism in India	**Day 12** Forest and Wildlife	**Days 13 and 14** Federalism	**Days 15 and 16** Sectors of the Economy
Round 3	**Day 17** Making of a Global World	**Day 20** Water Resources	**Days 22 and 23** Gender, Religion and Caste	**Days 24 and 25** Money and Credit
Round 4	**Days 26 and 27** Print Culture	**Days 28 and 29** Agriculture	**Days 31 and 32** Political Parties	**Day 33** Globalisation
Round 5	History done	**Days 34 and 35** Minerals and Energy	**Day 37** Outcomes of Democracy	Economics done
Round 6	History done	**Days 38 and 39** Manufacturing Industries	Civics done	Economics done

Read each row left to right: History chapter, then Geography, then Civics, then Economics. Revision days sit between them (see next page).

WHY THIS WORKS

Deep focus

One chapter from start to end, with no other subject in between, so the whole story of the chapter stays in your head.

Ek chapter, poora focus. Beech mein todna nahi.

A fresh subject next

The moment a chapter ends, a new subject begins. The mind feels fresh again and boredom never builds up.

Chapter khatam, naya subject shuru. Bore hone ka sawal hi nahi.

All four move together

Every round touches History, Geography, Civics and Economics, so no subject is left for the end.

Charon subject saath chalte hain, koi peeche nahi rehta.

REVISION DAYS AND THE FINISH

Revision days come right after the chapters they cover: **Day 11** (History Ch1 and Ch2), **Days 18 and 19** (History board practice; then Federalism, Development, Sectors and the Global World), **Day 21** (Geography Ch1 to Ch3 and Power-sharing), **Day 30** (Agriculture, Gender-Religion-Caste and Money) and **Day 36** (Print, Minerals and Parties). **Day 40** is the Map Marathon.

History finishes first (Day 27), then Economics (Day 33). After that the cycle simply continues with the rest: Civics finishes on Day 37 and Geography on Day 39.

Days 41 to 60 stay the same: buffer day, syllabus recall, round-2 revision, three full mocks and the calm last 7 days.

SHIVAM BHAIYA SAYS

Order mat badalna. Jo chapter shuru kiya, use poora karke hi agle subject pe jaana. Koi din chhoot jaaye to skip mat karo, wahi Day agle din kar lo. **Day 41 buffer day** hai, sab cover ho jayega!

MY 60-DAY PLAN

Day 1 date _____ Day 42 date (syllabus done) _____

Day 60 date _____ My daily study time _____

My phone-free study place _____

Pehle hi dates likh lo, phir roz check karo ki tum plan ke saath chal rahe ho.

SHIVAM BHAIYA SAYS

Roz sirf ek Day. Na zyada, na kam. Ek din chhoot gaya to tension mat lo: **Day 41 buffer day** hai, wahan cover kar lena. Bas chain mat todna!

DAY 1 SE PEHLE

60 din, 4 subject, aaj to maza aa jayega!

60-DAY ROADMAP | PART 1

DAYS 1 TO 20

Tick the box the day you finish.
Chapter-wise: Hist, Geo, Civics, Eco.

☐ Learn day ☐ Revision / maps ☐ Full mock ☐ Last 7 days

60-DAY ROADMAP | PART 3

DAYS 41 TO 60

Syllabus done by Day 42.
Then revise, mock, repeat.

Day	Subject	Chapter and topic	Pages	Qs	Min	Done
41	Revision	Buffer day: finish backlog, redo any test below 70%	3	20	120	☐
42	Revision	Syllabus complete: all 19 chapters, recall-sheet walk	6	30	120	☐
43	History	Revision round 2: all History chapters + key dates	5	30	120	☐
44	Geography	Revision round 2: all Geography chapters + maps	5	30	120	☐
45	Mock	MOCK TEST 1: full paper, 3 hours, board timing + self-check	6	Full	180	☐
46	Pol Sci	Revision round 2: all Political Science chapters	6	30	120	☐
47	Economics	Revision round 2: all Economics chapters	5	30	120	☐
48	Revision	Mistake Book day: fix every error from Mock 1	4	25	120	☐
49	Mock	MOCK TEST 2: full paper, 3 hours + self-check	6	Full	180	☐
50	Revision	Assertion-Reason + case-based practice, all 4 subjects	4	40	120	☐
51	Revision	Long answers: History + Pol Sci, 5 timed answers	3	5	120	☐
52	Revision	Long answers: Geo + Eco, timed, plus one map round	4	5	120	☐
53	Mock	MOCK TEST 3: full paper, 3 hours + self-check	5	Full	180	☐
54	Last 7	History one-page recaps + timelines and dates	3	15	90	☐
55	Last 7	Geography one-page recaps + all maps one final time	4	15	90	☐
56	Last 7	Political Science one-page recaps + key terms	3	15	90	☐
57	Last 7	Economics one-page recaps + key terms	3	15	90	☐
58	Last 7	Mistake Book + every Exam Alert box in this book	3	20	90	☐
59	Last 7	Half mock (objective + maps) in 90 min, light evening	3	Half	90	☐
60	Last 7	Calm look at recall sheets, pack your kit, sleep by 10	1	0	45	☐

MOCK DAY DRILL

- Sit at board time, 3 hours, phone in another room.
- Objective questions first, map questions in the last 10 minutes.
- Check with the answer key and write every mistake in the Mistake Book.

LAST 7 DAYS RULES

- No new chapters. Only recaps, recall sheets, dates and maps.
- Maps for 15 minutes every single day.
- Sleep 7 to 8 hours; keep admit card and pens ready.

CBSE CLASS 10 SOCIAL SCIENCE | 2026-27

SYLLABUS, MARKS, PAPER PATTERN

Theory 80 + Internal 20
3 hours | 38 questions

Unit	Book (NCERT)	Board chapters in this book	Marks
History	India and the Contemporary World II	Ch1 The Rise of Nationalism in Europe; Ch2 Nationalism in India; Ch3 The Making of a Global World (only **The Pre-modern World**); Ch5 Print Culture and the Modern World	**20**
Geography	Contemporary India II	Ch1 Resources and Development; Ch2 Forest and Wildlife Resources; Ch3 Water Resources; Ch4 Agriculture; Ch5 Minerals and Energy Resources; Ch6 Manufacturing Industries	**20**
Political Science	Democratic Politics II	Ch1 Power-sharing; Ch2 Federalism; Ch3 Gender, Religion and Caste; Ch4 Political Parties; Ch5 Outcomes of Democracy	**20**
Economics	Understanding Economic Development	Ch1 Development; Ch2 Sectors of the Indian Economy; Ch3 Money and Credit; Ch4 Globalisation and the Indian Economy (board part: what is globalisation, factors that enabled it, India and the G20)	**20**
Theory paper (board exam)			**80**
Internal	Periodic Assessment 5 + Portfolio 5 + Interdisciplinary Project 5 + Subject Enrichment Activity (Project Work) 5		**20**
Total			**100**

⚠ NOT IN THE BOARD PAPER

1. History Ch4 The Age of Industrialisation: Periodic Assessment only.
2. History Ch3: the 19th century, inter-war economy and post-war era parts: Interdisciplinary Project only.
3. Geography Ch7 Lifelines of National Economy: Interdisciplinary Project only.
4. Economics Ch5 Consumer Rights: Project Work only.
5. Economics Ch4: production across countries, foreign trade, WTO, impact and fair globalisation: Interdisciplinary Project.

This book covers the board part only, so you do not waste a single day.

MAP WORK (5 MARKS)

1. **History (2):** INC sessions Calcutta (Sep 1920), Nagpur (Dec 1920), Madras (1927); Champaran, Kheda, Ahmedabad, Amritsar (Jallianwala Bagh), Dandi.
2. **Geography (3):** major soil types; dams; rice and wheat areas; major producer states of sugarcane, tea, coffee, rubber, cotton and jute; iron ore, coal and oil fields; thermal and nuclear power plants; cotton textile, iron and steel and software technology park centres.

All of these are practised on Day 40 (Map marathon) and again on Days 44, 52 and 55.

BOARD PAPER PATTERN: FOUR SECTIONS OF 20 MARKS EACH

A | History 20	B | Geography 20	C | Pol Science 20	D | Economics 20
Q1-4 MCQ, 1 each	**Q10-15** MCQ, 1 each	**Q20-23** MCQ / A-R, 1 each	**Q29-34** MCQ, 1 each
Q5 VSA, 2	**Q16** VSA, 2	**Q24-25** VSA, 2 each	**Q35-37** SA, 3 each
Q6 SA, 3	**Q17** LA, 5 (choice)	**Q26** SA, 3	**Q38** LA, 5 (choice)
Q7 LA, 5 (choice)	**Q18** Case-based, 4	**Q27** LA, 5 (choice)	
Q8 Case-based, 4	**Q19** Map, 3	**Q28** Case-based, 4	
Q9 Map, 2			

WORD LIMITS AND A NOTE

VSA about **40 words**, SA about **60 words**, LA about **120 words**. Answer each question in its own subject section. The pattern above follows the latest CBSE sample paper (2025-26); when CBSE releases the 2026-27 sample paper, check it once for any change.

MY MARKS TRACKER

Section	Max	My target	Mock 1	Mock 2	Mock 3
A | History	/20				
B | Geography	/20				
C | Pol Science	/20				
D | Economics	/20				
Total	/80				

Har mock ke baad marks likho. Jis section mein kam aaye, wahi subject pehle revise karo.

Disclaimer: A Promise to You

Dear student, this book was made with one simple wish: that you finish the full Class 10 Social Science syllabus in 60 days and walk into the exam hall without fear. Every Day in it follows the CBSE 2026-27 syllabus and the board exam pattern, with short notes, practice questions and answers. Still, we are human. If you ever spot a mistake, tell us, and it will be fixed in the next edition. Keep your NCERT textbooks beside you, follow one Day a day, solve every question honestly and revise with the Mistake Book. Do that, and the result will follow. We believe in you. Now it is your turn to believe in yourself. **Shivam Bhaiya**

Note

All disputes are subject to the jurisdiction of courts in Muzaffarpur, Bihar only. India and the Contemporary World II, Contemporary India II, Democratic Politics II and Understanding Economic Development are NCERT textbooks prescribed by CBSE; this is an independent study guide, not an official publication of CBSE or NCERT.

DAY 01

HISTORY | CHAPTER 1 | PART 1 OF 3

The French Revolution and the Idea of the Nation

The Rise of Nationalism in Europe

Aaj ka target (pages 14-17)

- [ ] French Revolution se nation ka idea samjho
- [ ] Napoleon aur liberalism apne words mein bolo
- [ ] 10 sawal lagao, galat wale Mistake box mein
- [ ] 100 min kaafi hain, phone doosre room mein

1.1 The Dream of a World of Nations

Fig. 1.1 *Frédéric Sorrieu, The Dream of Worldwide Democratic and Social Republics, 1848. The first of a series of four prints.*

- In **1848** the French artist **Frédéric Sorrieu** made four prints showing his dream of a world of **"democratic and social Republics"**.
- Peoples of Europe and America march past the **Statue of Liberty**, who holds the **torch of Enlightenment** and the **Charter of the Rights of Man**.
- On the ground lie the **shattered symbols of absolutist institutions**.
- The **USA and Switzerland** lead the march, as they were already nation-states. **France** comes next, then Germany.

KEY TERM: NATION-STATE

A state in which the majority of citizens, and not only the rulers, come to develop a **sense of common identity and shared history**. This identity was forged through struggles, the actions of leaders and the common people.

1.2 The French Revolution and the Idea of the Nation

The first clear expression of nationalism came with the **French Revolution in 1789**. Power passed from the monarchy to a body of French citizens. The revolutionaries said that from now on **the people** would constitute the nation and shape its destiny.

MEASURES THAT BUILT A COLLECTIVE IDENTITY

- Ideas of **la patrie** (the fatherland) and **le citoyen** (the citizen) stressed one community with equal rights under a constitution.
- A new French flag, the **tricolour**, replaced the former royal standard.
- The Estates General was elected by active citizens and renamed the **National Assembly**.
- New hymns were composed, oaths taken and martyrs commemorated, all in the name of the nation.
- A **centralised administrative system** made uniform laws for all citizens.
- Internal customs duties and dues were abolished; a **uniform system of weights and measures** was adopted.
- Regional dialects were discouraged; **French as spoken in Paris** became the common language.

Students and the educated middle classes in other cities of Europe set up **Jacobin clubs**. Their activities prepared the way for French armies, which moved into Holland, Belgium, Switzerland and much of Italy in the 1790s. The armies carried the idea of nationalism abroad.

EXAM ALERT!

"Measures taken by the French revolutionaries" is a **favourite 3 to 5 mark question**. Upar ke 7 points mein se koi 5 apne words mein likhna aana chahiye.

1.3 Napoleon and the Civil Code of 1804

Fig. 1.2 *Jacques-Louis David, Napoleon Crossing the Alps, 1801.*

Napoleon **destroyed democracy** in France, but in administration he made the system rational and efficient. The **Civil Code of 1804**, also called the **Napoleonic Code**, was taken to the regions under French control.

- It did away with all **privileges based on birth** and established **equality before the law**.
- It secured the **right to property**.
- Administrative divisions were simplified; the **feudal system was abolished** and peasants were freed from serfdom and manorial dues.
- In towns, **guild restrictions** were removed; transport and communication improved.

How people reacted: at first many welcomed the French armies as messengers of liberty. Soon this turned to hostility, because the new freedoms came with **increased taxation, censorship and forced conscription** into the French armies.

MEME SAMJHO Astra meme, fact inside

NAPOLEON'S CIVIL CODE, 1804

"Equality before law aur property ka right? Theek hai. Par political freedom ki guarantee deta hai?"

Asli baat: The Code gave equality before the law and the right to property, but under Napoleon there was **no democracy**: people faced censorship, heavy taxes and forced conscription.

1.4 The Making of Nationalism in Europe

In the mid-18th century there were no "nation-states" as we know them. Germany, Italy and Switzerland were divided into kingdoms, duchies and cantons. Eastern and Central Europe were under **autocratic monarchies**. The **Habsburg Empire** (Austria-Hungary) was a patchwork of regions and peoples: German-speaking Alpine areas, Italian-speaking **Lombardy and Venetia**, Magyar-speaking Hungary and Polish-speaking Galicia. The only tie binding them was **loyalty to the emperor**.

THE ARISTOCRACY

Socially and politically the dominant class. Owned estates and town houses, spoke **French** for diplomacy and high society, and was united by marriage. Small in number.

THE NEW MIDDLE CLASS

Industrialisation, which began in **England** in the second half of the 18th century, created a working class and a **middle class** of industrialists, businessmen and professionals. Among the educated liberal middle class, ideas of national unity became popular.

1.5 What Did Liberal Nationalism Stand For?

POLITICAL SPHERE

- Government by **consent**; end of autocracy and clerical privileges.
- A **constitution** and representative government through parliament.
- **Inviolability of private property**.
- But equality did not mean the vote for all: in revolutionary France only **property-owning men** could vote, and the Napoleonic Code reduced women to the status of a minor.

ECONOMIC SPHERE

- Freedom of markets; no state restrictions on the movement of goods and capital.
- In the **39 German states** each had its own currency and weights and measures. A merchant going from Hamburg to Nuremberg crossed **11 customs barriers**, paying about 5% duty at each.
- In **1834** the **Zollverein**, a customs union, was formed at the initiative of **Prussia**. It abolished tariff barriers and cut the number of currencies **from over thirty to two**.

MEME SAMJHO Astra meme, fact inside

PRUSSIA, 1834

"Germany ko jodna mushkil hai? Pehle customs barriers hata do. Business judega, to log bhi judenge."

Asli baat: The **Zollverein** joined most German states in one customs union. A network of **railways** followed, and this economic unity strengthened the wider wave of nationalist feeling.

SHIVAM BHAIYA SOCH RAHE HAIN

Liberalism comes from the Latin root **liber** = **free**. Bas ye ek word yaad rakho, poora concept khul jayega: individual ki freedom, sabke liye equality before law.

REMEMBER IN ONE LINE

1789 France gave the idea of the nation; Napoleon's 1804 Code carried equality before law across Europe; the liberal middle class wanted a constitution, a free market and a nation-state; the Zollverein (1834) joined Germany economically first.

Day 1 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **Read these statements about the Statue of Liberty and pick the correct option.**
(I) She carries the torch of Enlightenment and the Charter of the Rights of Man.
(II) Frédéric Sorrieu showed her in his print on "Democratic and Social Republics".
(III) The statue stands in France.
(IV) She is an allegory of the value of liberty. (1)

(a) (I) and (III) only **(b)** (II), (III) and (IV) only
(c) (I), (II) and (IV) only **(d)** (I), (II), (III) and (IV)

2 During the French Revolution, the idea of *la patrie* stood for: (1)

(a) the citizen **(b)** the monarchy
(c) the fatherland **(d)** the homeland

ASSERTION-REASON

3 **Assertion (A):** In the German states, cloth was measured in the elle, but one elle meant a different length in each region.
Reason (R): Each of the states had its own currency and its own weights and measures. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

MCQ

4 When Sorrieu made his 1848 print, which of these was **not** yet a united nation-state?
(I) Switzerland (II) Sicily (III) Ireland (IV) Germany (1)

(a) (IV) only **(b)** (I) and (II) only
(c) (III) and (IV) only **(d)** (II) and (III) only

5 Which revolution is regarded as the first clear expression of nationalism? (1)

(a) The Revolution of the Liberals, 1848
(b) The Glorious Revolution
(c) The Russian Revolution
(d) The French Revolution

6 Early 19th century: German merchants want internal customs duties removed and one currency, but rulers of some small principalities object. Could those rulers block the reform? (1)

(a) No, all German states were already politically united.
(b) Yes, each state ran its own economic policy.
(c) No, the Prussian-led Zollverein drove economic unification.
(d) Yes, merchants had no political influence then.

7 "Its members shared a way of life across regions, owned country estates and town houses, spoke French in diplomacy and high society, and were linked by marriage." Which class is this? (1)

(a) Capitalist class **(b)** Nobility
(c) Peasant class **(d)** Landed aristocracy

SHORT ANSWER

8 Who set up the Jacobin clubs? How did their activities help the French armies? (3)

LONG ANSWER

9 Describe the measures taken by the French revolutionaries to create a sense of collective identity among the French people. (5)

CASE-BASED

10 Read the source and answer the questions that follow. (4)

> *Out of many small principalities, Napoleon's changes had made a confederation of 39 states, each with its own currency and weights and measures. A merchant going from Hamburg to Nuremberg in 1833 crossed 11 customs barriers and paid about 5% duty at each. Even cloth was sold by the elle, which meant 54.7 cm in Frankfurt but 65.6 cm in Nuremberg.*

(i) Which statement best describes trade in this region? (1)

(a) Trade was easy but costly in one integrated market.
(b) Many standards made trade more profitable.
(c) Mixed standards kept the market stable.
(d) The market was split up because there was no single currency, weight or measure.

(ii) A customs barrier here means: (1)

(a) a physical wall between two cities
(b) a tax at airports to boost exports
(c) a check that limits trade across the borders of states
(d) a duty that lowered prices

(iii) What happened to this confederation of 39 states after the Treaty of Vienna, 1815? (1)

(iv) Give one way the Zollverein changed these trade conditions. (1)

Day 1 Answers with explanation

1 **(c)** (I), (II) and (IV). The real statue stands in the USA, not France; in Sorrieu's print she is an allegory of liberty.

2 **(c)** the fatherland. *Le citoyen* meant the citizen.

3 **(a)** Because every state kept its own weights and measures, the elle differed from region to region. R explains A.

4 **(a)** (IV) only. Germany was a group of divided states until 1871; Switzerland was already a nation-state.

5 **(d)** The French Revolution of 1789.

6 **(c)** Once most states joined the Prussian-led Zollverein (1834), small rulers could not block it.

7 **(d)** The landed aristocracy: small in number but socially and politically dominant.

8 Students and the educated middle classes set them up in European cities after news of the French Revolution spread. Their campaigns prepared the way for the French armies that moved into Holland, Belgium, Switzerland and much of Italy in the 1790s.

9 Any five: **la patrie and le citoyen**; the **tricolour**; Estates General renamed the **National Assembly**; new hymns, oaths and martyrs commemorated; centralised administration with **uniform laws**; internal customs duties abolished and **uniform weights and measures**; regional dialects discouraged, French of Paris as the common language.

10 (i) **(d)**. (ii) **(c)**. (iii) It was left untouched. (iv) It abolished tariff barriers and cut the number of currencies from over thirty to two.

DAY 1 COMPLETE? ☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 2, History: Nationalism in Europe II

DAY 02

HISTORY | CHAPTER 1 | PART 2 OF 3

Europe after 1815 and the Age of Revolutions

The Rise of Nationalism in Europe

Aaj ka target (pages 17-20)

- ☐ Vienna 1815 se 1848 tak ki kahani
- ☐ Mazzini ka naam aur kaam yaad karke hi uthna
- ☐ 10 sawal khud se, answer baad mein milana
- ☐ Lagbhag 100 min, beech mein 5 min ka break

2.1 The Age of Conservatism after 1815

After 1815 European governments were driven by **conservatism**: they believed that the traditional institutions of state and society, the monarchy, the Church, social hierarchies, property and the family, should be preserved. They did not want to go back to before the Revolution entirely; they saw that modern changes like a modern army and efficient bureaucracy could strengthen monarchies.

MEME SAMJHO Astra meme, fact inside

NAPOLEON TO EUROPE, 1815

"Devi aur sajjano, samay aa gaya hai aapse vida lene ka."

Asli baat: Napoleon was **defeated in 1815**. Britain, Russia, Prussia and Austria, who had together defeated him, met at **Vienna** to plan a new, conservative Europe.

Fig. 2.1 *Prince Metternich, Austrian Chancellor and host of the Congress of Vienna. Portrait by Sir Thomas Lawrence.*

TREATY OF VIENNA, 1815

The Congress was hosted by the Austrian Chancellor **Duke Metternich**. Its aim was to **undo most of the changes** made during the Napoleonic wars.

- The **Bourbon dynasty** was restored to power in France; France lost the territories Napoleon had annexed.
- States were set up on France's borders to stop future expansion: the **kingdom of the Netherlands** (with Belgium) in the north, and **Genoa added to Piedmont** in the south.
- **Prussia** got important new territories on its western frontiers; **Austria** got control of northern Italy.
- The German Confederation of **39 states** was left untouched. **Russia** got part of Poland and Prussia a portion of Saxony.

The conservative regimes were **autocratic**. They did not tolerate criticism, and most of them imposed **censorship laws** to control what was said in newspapers, books, plays and songs. The memory of the French Revolution still inspired liberals, and one of their main demands was **freedom of the press**.

2.2 The Revolutionaries: Mazzini

Fearing repression, many liberal-nationalists went underground into **secret societies** to train revolutionaries and spread their ideas. Being revolutionary meant opposing the monarchies set up after Vienna and fighting for liberty and freedom.

- **Giuseppe Mazzini**, born in **Genoa in 1807**, became a member of the secret society of the **Carbonari**.
- At 24 he was sent into exile in **1831** for attempting a revolution in Liguria.
- He founded **Young Italy** in **Marseilles** and then **Young Europe** in **Berne**. Like-minded young men from Poland, France, Italy and the German states joined.
- He believed nations were the natural units of mankind, so Italy could not remain a patchwork of small states.

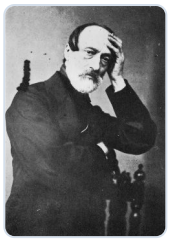

Fig. 2.2 *Giuseppe Mazzini, the Italian revolutionary.*

SHIVAM BHAIYA SAYS

Metternich ne Mazzini ko kaha tha **"the most dangerous enemy of our social order"**. Ye line answer mein likhoge to examiner ko pata chalega ki tumne chapter dhyan se padha hai.

2.3 The Age of Revolutions: 1830 to 1848

July 1830, France
Liberals overthrew the **Bourbon** kings; a constitutional monarchy under **Louis Philippe**.

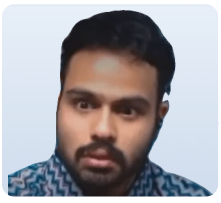

→

1830, Brussels
The July Revolution sparked an uprising; **Belgium broke away** from the United Kingdom of the Netherlands.

→

1821 to 1832, Greece
War of independence from the **Ottoman Empire**; the **Treaty of Constantinople, 1832**, recognised Greece.

MEME SAMJHO — Astra meme, fact inside

METTERNICH, 1830

"Bourbon gaye, Belgium alag ho gaya... Hain? Ye kaise ho gaya?"

Asli baat: Metternich once remarked, **"When France sneezes, the rest of Europe catches cold."** The July Revolution in France really did spread: it led to the Belgian uprising the same year.

Greece: Greece had been part of the Ottoman Empire since the 15th century. Its struggle began in **1821**. Greeks in exile and many West Europeans who admired ancient Greek culture supported it. Poets and artists praised Greece as the **cradle of European civilisation**; the English poet **Lord Byron** raised funds and went to fight, dying of fever in 1824.

CULTURE AND THE NATION: ROMANTICISM

Romantic artists and poets focused on emotions and a shared past. **Herder** said true German culture lay among the common people, **das volk**, in folk songs, poetry and dances. The **Grimm brothers** collected folktales to build a German identity. After the 1831 revolt in **Poland** was crushed, the clergy used the **Polish language** as a weapon of resistance against Russian rule. **Karol Kurpinski** turned the polonaise and mazurka into national symbols.

2.4 Hunger, Hardship and 1848

- The 1830s were years of hardship: a huge rise in population, more job seekers than jobs, crowded city slums, and cheap machine-made goods from England hurting small producers.
- **1845:** weavers in **Silesia** revolted against contractors who had drastically cut their payments.
- **1848, Paris:** food shortages and unemployment brought people onto the roads. **Louis Philippe was forced to flee**; a Republic gave the vote to all **adult males above 21** and guaranteed the right to work.

Fig. 2.3 *St Paul's Church, Frankfurt, where the Frankfurt Parliament met in 1848.*

1848: THE REVOLUTION OF THE LIBERALS

The educated middle classes demanded a constitution, freedom of the press and freedom of association, together with **national unification**. On **18 May 1848**, **831 elected representatives** took their places in the **Frankfurt Parliament** in the Church of St Paul.

- They drafted a constitution for a German nation headed by a monarchy subject to parliament.

- The crown was offered to **Friedrich Wilhelm IV, King of Prussia**. He **rejected it** and joined other monarchs against the assembly.
- Women were admitted only as **observers** in the visitors' gallery.

SHIVAM BHAIYA SOCH RAHE HAIN

Frankfurt Parliament fail kyun hua? **Do reasons** yaad rakho: (1) King, aristocracy aur army ne virodh kiya; (2) middle class ne workers aur artisans ki demands nahi maani, isliye unka support chala gaya.

REMEMBER: GAINS AFTER 1848

Conservative forces crushed the 1848 movements but could not restore the old order. Monarchs began granting changes: **serfdom and bonded labour were abolished** in the Habsburg dominions and in Russia, and the Habsburgs gave more autonomy to the **Hungarians in 1867**.

Day 2 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **Identify him: (I) Austrian Chancellor; (II) host of the Congress of Vienna; (III) he said, "When France sneezes, the rest of Europe catches cold." (1)**

(a) Otto von Bismarck **(b)** Duke Metternich
(c) Frédéric Sorrieu **(d)** Napoleon Bonaparte

ASSERTION-REASON

2 **Assertion (A):** The regimes set up in 1815 did not tolerate criticism and dissent.
Reason (R): The conservative regimes were autocratic. (1)

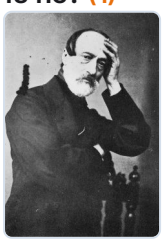

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

MCQ

3 **Which powers together defeated Napoleon in 1815? (1)**

(a) Britain, Russia, Netherlands and Germany
(b) Britain, Russia, Prussia and Austria
(c) Britain, Luxembourg, Germany and Italy
(d) Britain, Russia, Prussia and Australia

4 **Metternich called the man in this portrait "the most dangerous enemy of our social order". Who is he? (1)**

Portrait of a 19th-century revolutionary.

(a) Count Cavour **(b)** Garibaldi
(c) Giuseppe Mazzini **(d)** Duke Metternich

SHORT ANSWER

5 **What were the main provisions of the Treaty of Vienna, 1815? (3)**

MCQ

6 **The settlement that restored the Bourbons and took away the lands France had annexed under Napoleon was drawn up in: (1)**

(a) 1859 to 1870 **(b)** 1797 to 1802
(c) 1866 to 1871 **(d)** 1814 to 1815

7 **Which German philosopher said true German culture was to be found among the common people, *das volk*? (1)**

(a) Wilhelm Grimm **(b)** Johann Gottfried Herder
(c) Martin Luther **(d)** Johannes Gutenberg

8 **Which of these are true of the liberal revolutions of 1848?**
(I) A monarch abdicated. (II) Universal male suffrage was proclaimed. (III) Women got political rights. (IV) Freedom of the press was demanded. (1)

(a) Only (I) and (IV) **(b)** Only (I), (II) and (IV)
(c) Only (I) and (II) **(d)** Only (I), (II) and (III)

CASE-BASED

9 **Read the source and answer the questions that follow. (4)**

Europe's population grew enormously in the early 19th century, and job seekers far outnumbered jobs. Villagers crowded into city slums, and small producers struggled against cheap machine-made goods from England. Food shortages and unemployment finally brought the people of Paris out on the roads.

(i) Which ruler of France had to flee at this time? (1)
(ii) Did the people win any right after this revolt? Name one. (1)
(iii) Why are these years called years of great economic hardship? (2)

SHORT ANSWER

10 **Why is 1848 called the year of the revolution of the liberals? Explain.** (3)

Day 2 Answers with explanation

1 **(b)** Duke Metternich.

2 **(a)** Autocratic rulers do not allow dissent, so R explains A.

3 **(b)** Britain, Russia, Prussia and Austria; they then met at Vienna.

4 **(c)** Giuseppe Mazzini, founder of Young Italy.

5 Bourbons restored in France; France lost Napoleon's annexed lands; Netherlands (with Belgium) set up in the north and Genoa added to Piedmont in the south; Prussia got new western territories; Austria got northern Italy; Russia got part of Poland; the 39-state German Confederation left untouched. Aim: undo Napoleon's changes and restore monarchies.

6 **(d)** 1814 to 1815, the Treaty of Vienna.

7 **(b)** Johann Gottfried Herder.

8 **(b)** Women were **not** given political rights in 1848; they were only observers in the Frankfurt Parliament.

9 (i) Louis Philippe. (ii) Yes: suffrage for all adult males above 21, or the right to work. (iii) Population rose far faster than jobs, cheap English goods hurt small producers, and food shortages caused widespread poverty.

10 The educated middle classes combined demands for a **constitution**, **freedom of the press** and **freedom of association** with **national unification**. In Germany they elected the **Frankfurt Parliament** (May 1848), which drafted a constitution, though the King of Prussia rejected the crown.

DAY 2 IN ONE LOOK: KEY WORDS AND DATES

1815	Treaty of Vienna; Metternich hosts the Congress	**1832**	Treaty of Constantinople: Greece independent
Mazzini	Young Italy (Marseilles), Young Europe (Berne)	**Romanticism**	Herder, Grimm brothers: folk culture
July 1830	Liberals overthrow the Bourbons in France	**May 1848**	Frankfurt Parliament, Church of St Paul

DAY 03

HISTORY | CHAPTER 1 | PART 3 OF 3

Making Germany and Italy, and Picturing the Nation

The Rise of Nationalism in Europe

Aaj ka target (pages 20-25)

- ☐ *Germany aur Italy kaise bane, aaj clear*
- ☐ *Bismarck, Cavour, Garibaldi: teeno ki ek-ek line*
- ☐ *10 sawal, Balkans wala part ek baar aur*
- ☐ *110 min ka kaam hai, aaram se karo*

3.1 The Making of Germany

After 1848, nationalism moved away from democracy and revolution. Conservatives now used nationalist feeling to strengthen state power. After the failure of the Frankfurt Parliament, **Prussia** took the lead in uniting Germany.

- **Otto von Bismarck**, chief minister of Prussia, was the **architect** of unification, with the help of the Prussian army and bureaucracy.
- **Three wars over seven years**, with **Austria, Denmark and France**, ended in Prussian victory and completed unification.

- In **January 1871**, the Prussian king **William I** was proclaimed **German Emperor** at a ceremony in the Hall of Mirrors at **Versailles**.
- The new state gave strong emphasis to **modernising currency, banking, and the legal and judicial systems**.

Fig. 3.1 *Otto von Bismarck, chief minister of Prussia. Portrait by Franz von Lenbach.*

Fig. 3.2 *Anton von Werner, The Proclamation of the German Empire, Hall of Mirrors, Versailles, 18 January 1871.*

3.2 The Making of Italy

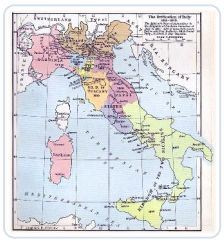

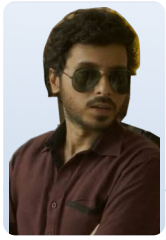

Fig. 3.3 *Map: the unification of Italy, 1815 to 1870.*

Italy was split into **seven states**. Only **Sardinia-Piedmont** was ruled by an Italian princely house. The north was under the **Austrian Habsburgs**, the centre under the **Pope**, and the south under the **Bourbon kings of Spain**. Even the Italian language had many regional forms.

- Mazzini wanted a united Italian Republic, but the revolts of **1831 and 1848** failed.
- **King Victor Emmanuel II** of Sardinia-Piedmont took up unification by war. His chief minister **Cavour** was neither a revolutionary nor a democrat.
- Through a clever alliance with **France**, Sardinia-Piedmont defeated Austria in **1859**.
- In **1860 Garibaldi** led his **Red Shirts** into South Italy and the Kingdom of the Two Sicilies and drove out the Spanish rulers with the help of local peasants.
- In **1861** Victor Emmanuel II was proclaimed **king of united Italy**.

MEME SAMJHO Astra meme, fact inside

PRUSSIA AT VERSAILLES, JANUARY 1871

"Teen war, saat saal, aur Emperor ka title France ke palace mein. Jalwa hai hamara!"

Asli baat: After defeating France, the German Empire was proclaimed in the **Hall of Mirrors at Versailles**, in France itself. William I of Prussia became the German Emperor.

MEME SAMJHO Astra meme, fact inside

CAVOUR TO FRANCE, 1859

"Austria ko akele nahi hara sakte. Humare liye kaam karoge?"

Asli baat: Cavour engineered a **diplomatic alliance with France**. With French help, Sardinia-Piedmont defeated the Austrian forces in **1859**, a key step towards a united Italy.

3.3 The Strange Case of Britain

In Britain the nation-state was not the result of a sudden revolution but of a **long-drawn-out process**. The English parliament, which had taken power from the monarchy in 1688, was the instrument through which a nation-state with England at its centre came about.

1707
Act of Union between England and Scotland formed the United Kingdom of Great Britain; Scotland's culture and institutions were suppressed.

→

1798
A failed revolt in Ireland led by **Wolfe Tone** and his United Irishmen.

→

1801
Ireland was forcibly incorporated into the United Kingdom.

→

Symbols
The British flag (Union Jack), the national anthem (God Save Our Noble King) and the English language.

3.4 Visualising the Nation

Artists in the 18th and 19th centuries represented a nation as if it were a person, usually a **female figure**. This is called an **allegory**: an abstract idea (like liberty or the nation) shown through a person or thing. In France the figure was named **Marianne**, shown with the red cap, the tricolour and the cockade; her statues stood in public squares and her image appeared on coins and stamps. In Germany the figure was **Germania**, who wears a **crown of oak leaves**, since the German oak stands for heroism.

Fig. 3.4 *Philipp Veit, Germania, 1848. It hung in St Paul's Church, where the Frankfurt Parliament met.*

Attribute	Meaning
Broken chains	Being freed
Breastplate with eagle	Symbol of the German empire: strength
Crown of oak leaves	Heroism
Sword	Readiness to fight
Olive branch around the sword	Willingness to make peace
Black, red and gold tricolour	Flag of the liberal-nationalists in 1848, banned by the Dukes of the German states
Rays of the rising sun	Beginning of a new era

SCORING TOPIC!

Germania ke symbols ka table = **free marks**. Image-based MCQ aur "what does it symbolise" wale questions isi table se bante hain.

3.5 Nationalism and Imperialism: the Balkans

By the last quarter of the 19th century nationalism had become a **narrow creed with limited ends**. The most serious source of tension after 1871 was the **Balkans**, a region of great geographical and ethnic variety: modern Romania, Bulgaria, Albania, Greece, Macedonia, Croatia, Bosnia-Herzegovina, Slovenia, Serbia and Montenegro. Its people were broadly known as the **Slavs**, and a large part of it was under the **Ottoman Empire**.

- As the Ottoman Empire broke up, Balkan peoples declared independence one by one, each claiming a right to nationhood from history.
- The Balkan states were **jealous of each other**; each hoped to gain more territory at the others' expense.
- The big powers, **Russia, Germany, England and Austro-Hungary**, competed for trade, colonies and military power here.
- This led to a series of wars and finally the **First World War in 1914**.

SHIVAM BHAIYA KA NOTE

Chapter 1 complete! Aaj raat 10 minute mein poore chapter ka ek flowchart khud banao: 1789 France se 1914 tak. Day 8 ke Warm-up mein yahi likhna hai.

Day 3 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **Prussia's three wars that completed German unification were fought against:** (1)

(a) Austria, England and France
(b) Austria, Poland and France
(c) Austria, Denmark and France
(d) Austria, Turkey and France

2 **A teacher says one Italian state was ruled by an Italian princely house and led the unification. Which state?** (1)

(a) Lombardy
(b) Sardinia-Piedmont
(c) Kingdom of the Two Sicilies
(d) Venetia

CASE-BASED

3 **Read the source and answer the questions that follow.** (3)

Some scholars call Great Britain the model of the nation-state. There, the nation-state did not come from a sudden revolution but from a long process. Before the 18th century there was no British nation; people saw themselves as English, Welsh, Scot or Irish, each with their own cultural and political traditions.

(i) How did British unification happen, according to the source? (1)

(a) Through a thirty-year war that left only the English unharmed
(b) As a purely political struggle
(c) Through the political and social subjugation of other groups by the English
(d) Through the king of England's plan to attack and conquer

(ii) Before Parliament took power in 1688, England was a _____ kingdom. (1)

(a) republican **(b)** monarchical
(c) democratic **(d)** directly ruled

(iii) Name the female allegory of this country. (1)

(a) Britannica **(b)** Melania
(c) Britannia **(d)** Alexandria

MCQ

4 **A historian studying this figure asks what her crown of oak leaves stands for. The answer is:** (1)

A female allegory, 1848.

(a) unity and democracy **(b)** cultural heritage
(c) heroism and strength **(d)** peace and prosperity

5 **An artist designing an emblem for a country making peace after years of conflict wants to show "willingness to make peace". Which symbol should he use?** (1)

(a) Broken chain
(b) Flag
(c) Breastplate with eagle
(d) Olive branch around the sword

6 **Which of these describe Cavour?**
(I) An Italian statesman. (II) He spoke French much better than Italian. (III) A tactful diplomat. (IV) He belonged to a royal family. (1)

(a) Only (II), (III) and (IV) **(b)** Only (I) and (II)
(c) Only (I), (II) and (III) **(d)** Only (I), (II) and (IV)

SHORT ANSWER

7 **How did female figures become allegories of the nation? Give examples.** (3)

MCQ

8 **Which statement about the Act of Union, 1707 is false?** (1)

(a) It formed the United Kingdom of Great Britain.
(b) It gave England control over Scotland.
(c) It was an agreement between England and Ireland.
(d) It was an agreement between England and Scotland.

9 **Find the odd one out.** (1)

(a) Croatia, Bosnia-Herzegovina, Romania
(b) Bohemia, Galicia, Austria, Hungary
(c) Slovenia, Serbia, Montenegro
(d) Bulgaria, Albania, Greece, Macedonia

LONG ANSWER

10 **Analyse the process of the unification of Germany.** (5)

Day 3 Answers with explanation

1 **(c)** Austria, Denmark and France, over seven years.
2 **(b)** Sardinia-Piedmont.
3 (i) **(c)**. (ii) **(b)** monarchical. (iii) **(c)** Britannia.

Day 3 Answers continued

4 **(c)** heroism and strength; the German oak stands for heroism.
5 **(d)** Olive branch around the sword.
6 **(c)** Cavour was the chief minister, not a royal.
7 Artists showed the nation as a person, usually a woman, to give an abstract idea a concrete form. France: **Marianne** (red cap, tricolour, cockade), on coins, stamps and statues in public squares. Germany: **Germania**, with a crown of oak leaves.
8 **(c)** The Act of Union was between England and Scotland; Ireland was added in 1801.
9 **(b)** The other options are Balkan states; Bohemia, Galicia, Austria and Hungary were parts of the Habsburg Empire.
10 After 1848 Prussia took the lead. Chief minister **Otto von Bismarck**, with the Prussian army and bureaucracy, fought **three wars in seven years** with **Austria, Denmark and France**, all won. In **January 1871** the Prussian king **William I** was proclaimed German Emperor at Versailles. The new state modernised its currency, banking, legal and judicial systems.

CHAPTER 1 TIMELINE: ONE LOOK BEFORE REVISION DAY

1789	French Revolution	**1848**	Revolutions in Europe; Frankfurt Parliament
1797	Napoleon invades Italy	**1859-70**	Unification of Italy
1804	Napoleonic Civil Code	**1861**	Victor Emmanuel II king of united Italy
1814-15	Fall of Napoleon; Vienna settlement	**1866-71**	Unification of Germany
1821	Greek struggle for independence begins	**Jan 1871**	German Empire proclaimed at Versailles
1832	Treaty of Constantinople: Greece independent	**1905**	Slav nationalism grows in the Balkans
1834	Zollverein formed	**1914**	First World War begins

EXAM ALERT: CHAPTER 1 QUESTIONS THAT KEEP COMING BACK

- Measures taken by the French revolutionaries to create a sense of collective identity. **(3 or 5)**
- Napoleonic Code: main changes, and why people turned hostile. **(3)**
- Role of Bismarck / Cavour / Garibaldi in unification. **(3 or 5)**
- How Britain became a nation-state; why the Balkans became the "powder keg" of Europe. **(5)**
- Allegory: Marianne and Germania, and what their symbols mean. **(1 or 3)**

Day 3 Extra Practice

6 more questions from this chapter | new, no repeats

MCQ

1 **Nationalism, which became a powerful force in nineteenth-century Europe, means:** (1)

(a) strong love for one's own country together with hatred for other countries
(b) equal devotion to all the countries of the world
(c) strong devotion to one's own country, its history and its culture
(d) strong devotion to one's own country with no regard at all for other nations

2 **What happened to Poland at the end of the eighteenth century?** (1)

(a) It won full independence.
(b) It was partitioned among Russia, Prussia and Austria.
(c) It became a part of East Germany.
(d) It came wholly under Russia and became a part of Russia.

3 **In the nineteenth century, a large part of the Balkan region was ruled by the:** (1)

(a) Habsburg rulers **(b)** German empire
(c) Russian empire **(d)** Ottoman empire

4 **Which of these correctly defines the term 'plebiscite'?** (1)

(a) a vote by a few chosen people of a region to accept or reject a proposal
(b) a direct vote in which all the people of a region are asked to accept or reject a proposal
(c) a vote in which only the women of a region accept or reject a proposal
(d) a vote by the women members of a matriarchal society

ASSERTION-REASON

5 **Assertion (A): In the early nineteenth century, Germany, Italy and Switzerland were divided into kingdoms, duchies and cantons, whose rulers had their own autonomous territories.**
Reason (R): The peoples of these territories were closely bound to each other in spite of being under separate rulers. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

LONG ANSWER

6 **Describe the revolt of the weavers of Silesia in 1845 against their contractors.** (5)

Day 3 Extra Practice: Answers

1. **(c)** Nationalism means a strong sense of devotion to one's own country, its history and its culture. It does not require hatred of other nations.
2. **(b)** At the end of the 18th century, Poland was partitioned by three Great Powers: Russia, Prussia and Austria. As a result, it stopped existing as an independent territory.
3. **(d)** A large part of the Balkans was under the Ottoman Empire. As Ottoman power weakened, nationalist feelings grew in the region.
4. **(b)** A plebiscite is a direct vote in which all the people of a region accept or reject a proposal. For example, plebiscites were used to join Italian states to the new kingdom of Italy.
5. **(c)** A is true. R is false because these diverse peoples spoke different languages, belonged to different ethnic groups and did not share a common identity or culture.
6. 1. Contractors supplied the weavers with raw material and gave them orders for finished cloth, but they drastically reduced the payments. 2. On 4 June 1845, a large crowd of weavers marched in pairs up to the mansion of their contractor and demanded higher wages. 3. They were treated with scorn and threats. A group of them forced their way into the house, smashed windows, furniture and porcelain, and plundered the stores of cloth. 4. The contractor fled with his family to a nearby village, which refused to shelter him. He returned 24 hours later with the army. 5. In the clash that followed, eleven weavers were shot. The revolt shows the hunger and hardship of the 1840s.

Next: Day 4, Geography: Resources and Development I

DAY 04

GEOGRAPHY | CHAPTER 1 | PART 1 OF 2

Resources, Planning and Land Use

Resources and Development

Aaj ka target (pages 25-29)

- ☐ Resources wala chapter shuru
- ☐ Resources ke types ka chhota chart khud banao
- ☐ 10 sawal, galti wale lal pen se ghero
- ☐ 100 min, YouTube baad mein

4.1 What is a Resource?

Everything in our environment that can be used to satisfy our needs is a **resource**, provided it is **technologically accessible, economically feasible and culturally acceptable**. Resources are not free gifts of nature: they are a function of **human activities**. Nature, technology and institutions work together to turn things into resources.

Basis	Types	Examples
On the basis of origin	**Biotic** (from the biosphere, have life) and **Abiotic** (non-living)	Biotic: humans, flora, fauna, fisheries. Abiotic: rocks, metals
On the basis of exhaustibility	**Renewable** (can be renewed by physical, chemical or mechanical processes) and **Non-renewable** (take millions of years to form)	Renewable: solar, wind, water, forests. Non-renewable: minerals, fossil fuels
On the basis of ownership	**Individual, Community, National, International**	Own land; village ponds, playgrounds; minerals, water, forests within political boundaries and oceans up to 12 nautical miles; ocean beyond 200 nautical miles (EEZ)
On the basis of status of development	**Potential, Developed, Stock, Reserves**	Solar and wind in Rajasthan and Gujarat (potential); hydrogen in water (stock); water in dams (reserves)

4.2 Development of Resources and Sustainable Development

Indiscriminate use of resources led to three major problems: **depletion** of resources to satisfy the greed of a few, **accumulation** of resources in a few hands (rich and poor divide), and **global ecological crises** such as global warming, ozone depletion, pollution and land degradation.

RIO DE JANEIRO EARTH SUMMIT, 1992

In **June 1992**, more than 100 heads of state met at the first International Earth Summit in Rio de Janeiro, Brazil, to address urgent problems of environmental protection and socio-economic development. They signed the Declaration on Global Climatic Change and Biological Diversity and adopted **Agenda 21**: an agenda to combat environmental damage, poverty and disease through global co-operation. Every local government should draw its own local Agenda 21.

MEME SAMJHO

Astra meme, fact inside

SUSTAINABLE DEVELOPMENT

"Resources kabhi khatam ho hi nahi sakte... agar aaj ki zarurat poori karke kal ke liye bacha lo."

Asli baat: Sustainable development means development without damaging the environment, and development in the present should not compromise the needs of **future generations**.

4.3 Resource Planning in India

India has enormous diversity in resources: some regions are rich in some resources but poor in others. **Jharkhand, Madhya Pradesh and Chhattisgarh** are rich in minerals and coal; **Arunachal Pradesh** has plenty of water but lacks infrastructure; **Rajasthan** has solar and wind energy but lacks water; the cold desert of **Ladakh** has a rich cultural heritage but lacks water, infrastructure and some vital minerals. So balanced **resource planning** is needed at national, state, regional and local levels.

Step 1
Identify and make an inventory of resources: surveying, mapping, qualitative and quantitative estimation.

→

Step 2
Evolve a planning structure with the right technology, skill and institutional set up.

→

Step 3
Match resource development plans with overall **national development plans**.

SHIVAM BHAIYA SOCH RAHE HAIN

Resource tabhi resource hai jab **technology + institutions** saath hon. Colonisers ne colonies ke resources isliye lute kyonki unke paas **better technology** thi. Ye line case-based mein bahut aati hai.

CONSERVATION OF RESOURCES: 4 NAMES, 4 DATES

Gandhiji: "There is enough for everybody's need and not for anybody's greed"; he wanted production **by the masses**, not mass production. **1968** Club of Rome: first systematic call for conservation. **1974** Schumacher, *Small is Beautiful*. **1987** Brundtland Commission Report: **sustainable development** (book *Our Common Future*). **1992** Rio Earth Summit: Agenda 21.

YAAD RAKHO: QUICK FACTS

- Resources are classified on four bases: **origin** (biotic, abiotic), **exhaustibility** (renewable, non-renewable), **ownership** (individual, community, national, international) and **status of development** (potential, developed, stock, reserves).

4.5 Land Resources and Land Use

Land supports natural vegetation, wildlife, human life, economic activities, transport and communication. It is a resource of **limited magnitude**, so it must be used with careful planning.

Relief	Share of area
Plains	About 43%: agriculture and industry
Mountains	About 30%: perennial rivers, tourism, ecology
Plateaus	About 27%: minerals, fossil fuels, forests

Fig. 4.1 *Terraced fields in Uttarakhand: even mountain land is put to use with care. (Photo: Wikimedia Commons, CC BY 2.0)*

LAND USE CATEGORIES

- **Forests**; **land not available for cultivation** (barren and waste land, and land put to non-agricultural uses such as buildings, roads, factories).
- **Other uncultivated land**: permanent pastures and grazing land; land under miscellaneous tree crops and groves; **culturable waste land** (left uncultivated for more than 5 agricultural years).
- **Fallow lands**: current fallow (one year or less) and other than current fallow (1 to 5 years).
- **Net sown area**; area sown more than once a year plus net sown area is the **gross cropped area**.

LAND USE PATTERN: FACTS TO QUOTE

Total geographical area of India is **3.28 million sq km**; land use data is available for only about **93%** of it. Net sown area is over **80%** in Punjab and Haryana but less than **10%** in Arunachal Pradesh, Mizoram, Manipur and the Andaman and Nicobar Islands. The National Forest Policy (1952) wants **33%** of the area under forests; we are far below that.

4.6 Land Degradation and Conservation

CAUSES

Mining (Jharkhand, Chhattisgarh, Madhya Pradesh, Odisha) leaves deep scars and overburden; **overgrazing** (Gujarat, Rajasthan, Madhya Pradesh, Maharashtra); **over-irrigation** causing waterlogging, salinity and alkalinity (Punjab, Haryana, western Uttar Pradesh); dust from mineral processing such as grinding limestone for cement; industrial effluents.

SOLUTIONS

Afforestation and proper management of grazing; planting **shelter belts**; stabilising sand dunes by growing **thorny bushes**; proper management of wastelands; control of mining activities; proper discharge and disposal of industrial effluents and wastes after treatment.

YAAD RAKHO: QUICK FACTS

- **Potential resource**: Rajasthan and Gujarat have huge wind and solar energy potential that is not yet fully developed.

SHIVAM BHAIYA KA NOTE

Exam trick: "State + cause" pairs yaad karo: Mining = Jharkhand, Odisha; Overgrazing = Gujarat, Rajasthan; Over-irrigation = Punjab, Haryana. 3-marker mein state ka naam likhoge to full marks pakke.

Day 4 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **Which statement best explains Gandhiji's words, "There is enough for everybody's need and not for anybody's greed"?**
I. Greedy, selfish individuals and the exploitative nature of modern technology are the root cause of resource depletion at the global level.
II. Resource development plans must be matched with overall national development plans.
III. Human beings are an essential part of resources because they transform materials.
IV. Forests are primary producers on which all other living beings depend. (1)

(a) Statement II only **(b)** Statement I only
(c) All the statements **(d)** Statements I, III and IV

2 **In which group of states is overgrazing named as one of the main causes of land degradation?** (1)

(a) Punjab, Haryana and western Uttar Pradesh
(b) Maharashtra and Uttar Pradesh
(c) Maharashtra and Gujarat
(d) Gujarat, Rajasthan, Madhya Pradesh and Maharashtra

3 **Read the two statements and choose the correct option.**
Statement I: Stocks are materials we cannot use at present because we lack the appropriate technology to access them.
Statement II: Potential resources are found in a region but have not yet been utilised. (1)

(a) Both statements are correct
(b) Only Statement I is correct
(c) Only Statement II is correct
(d) Neither statement is correct

4 **Which plateau region of India holds the richest reserves of minerals and fossil fuels?** (1)

(a) Shivalik ranges (b) Chotanagpur plateau
(c) Gangetic plain (d) Coastal plain

5 **Match the event or publication in List I with its year in List II.**
List I: A. Club of Rome advocates resource conservation B. *Small is Beautiful* by Schumacher C. Brundtland Commission Report D. Rio de Janeiro Earth Summit
List II: 1. 1987 2. 1968 3. 1992 4. 1974 (1)

(a) A-4, B-2, C-3, D-1 (b) A-1, B-4, C-2, D-3
(c) A-2, B-4, C-1, D-3 (d) A-2, B-1, C-4, D-3

6 **In 1992, world leaders met to address urgent problems of environmental protection and socio-economic development at the global level. Name this meeting.** (1)

(a) Montreal Protocol
(b) Rio de Janeiro Earth Summit
(c) Kyoto Protocol
(d) World Summit on Sustainable Development

ASSERTION-REASON

7 **Assertion (A):** **The net sown area differs greatly from one state to another.**
Reason (R): **The land under permanent pastures has decreased.** (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

8 **Read the source and answer the questions that follow.** (4)

The history of colonisation shows that the rich resources of colonies were the main attraction for foreign invaders. It was mainly the higher level of technological development of the colonising countries that helped them exploit the resources of other regions and rule over the colonies. So, resources can contribute to development only when they are accompanied by suitable technological development and institutional changes. India went through all this in different phases of colonisation. Hence, in India, development in general, and resource development in particular, involves not only the availability of resources but also technology, the quality of human resources and the historical experiences of the people.

(i) What mainly enabled the colonising countries to exploit the resources of their colonies? (1)

(ii) According to the source, when do resources contribute to development? (1)

(iii) Why does resource development in India involve more than just the availability of resources? Explain. (2)

SHORT ANSWER

9 **"In India, some regions are rich in certain types of resources but deficient in others." Do you agree? Support your answer with three examples.** (3)

LONG ANSWER

10 **Resource planning is a complex process. Explain the stages of resource planning in India and state why it is needed.** (5)

Day 4 Answers with explanation

1 **(b)** Gandhiji blamed greed and exploitative technology, not genuine need, for the depletion of resources worldwide.

2 **(d)** NCERT lists Gujarat, Rajasthan, Madhya Pradesh and Maharashtra for overgrazing. Punjab, Haryana and western UP suffer mainly from over-irrigation (waterlogging and salinity).

3 **(a)** Both match NCERT: stocks wait for technology (e.g. hydrogen from water), and potential resources such as Rajasthan's wind and solar energy are still under-used.

4 **(b)** Plateaus have rich reserves of minerals, fossil fuels and forests; the Chotanagpur plateau (Jharkhand region) is the best example.

5 **(c)** Club of Rome 1968, *Small is Beautiful* 1974, Brundtland Report (*Our Common Future*) 1987, Rio Earth Summit 1992.

6 **(b)** Over 100 heads of state met at Rio de Janeiro, Brazil, in June 1992; they signed the Declaration on Global Climatic Change and Biological Diversity and adopted Agenda 21.

Day 4 Answers continued

7 **(b)** Both are true facts from NCERT, but the fall in pasture land does not explain the state-wise difference in net sown area (that depends on relief, climate and soil, e.g. over 80% in Punjab and Haryana, under 10% in Arunachal, Mizoram, Manipur and Andaman and Nicobar).

8 (i) Their higher level of technological development. (ii) Only when they are accompanied by appropriate technological development and institutional changes. (iii) Availability alone is not enough: development also needs suitable technology, skilled and healthy human resources, and lessons from history; India's experience of colonisation showed that resources without technology get exploited by others.

9 Yes, India shows great diversity in the availability of resources.
1. Jharkhand, Madhya Pradesh and Chhattisgarh are rich in minerals and coal deposits.
2. Arunachal Pradesh has plenty of water resources but lacks infrastructure for development.
3. Rajasthan is well endowed with solar and wind energy but lacks water resources. (Also: Ladakh has a rich cultural heritage but is deficient in water, infrastructure and some vital minerals.)
Hence balanced resource planning is needed at national, state and local levels.

10 **Stages:**
1. **Identification and inventory of resources** across the regions of the country: surveying, mapping, and qualitative and quantitative estimation and measurement of resources.
2. **Evolving a planning structure** endowed with appropriate technology, skill and institutional set-up for implementing resource development plans.
3. **Matching resource development plans with overall national development plans.**
Why needed: resources are limited and unevenly distributed (some regions self-sufficient, others short), so planning ensures judicious use, reduces wastage and supports sustainable development. India has done this through the Five Year Plans since the First Five Year Plan.

DAY 4 COMPLETE? ☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 5, Geography: Resources and Development II

TONIGHT'S 2-MINUTE RECALL

Answer from memory, then check the notes

1. Name the four bases on which resources are classified.
2. Stock vs reserves: one example each.
3. Three stages of resource planning in India.
4. What did Agenda 21 aim at? Which year and city?
5. Which states lose land to mining, overgrazing and over-irrigation?

My mistakes from today's practice:

DAY 05

GEOGRAPHY | CHAPTER 1 | PART 2 OF 2

Soil as a Resource

Resources and Development

Aaj ka target (pages 29-35)

- ☐ Soil ki class aaj
- ☐ Soil map ek baar dekh ke, ek baar bina dekhe
- ☐ 15 sawal lagao, erosion wale dhyaan se
- ☐ 2 ghante lagenge, paani paas rakh lo

5.1 How Soil Forms

Soil is the most important **renewable natural resource**: the medium of plant growth that supports living organisms. It takes **millions of years** to form soil up to a few cm in depth. **Relief, parent rock (bed rock), climate, vegetation, other forms of life and time** are the factors of soil formation. Changes in temperature, running water, wind, glaciers and decomposers all help.

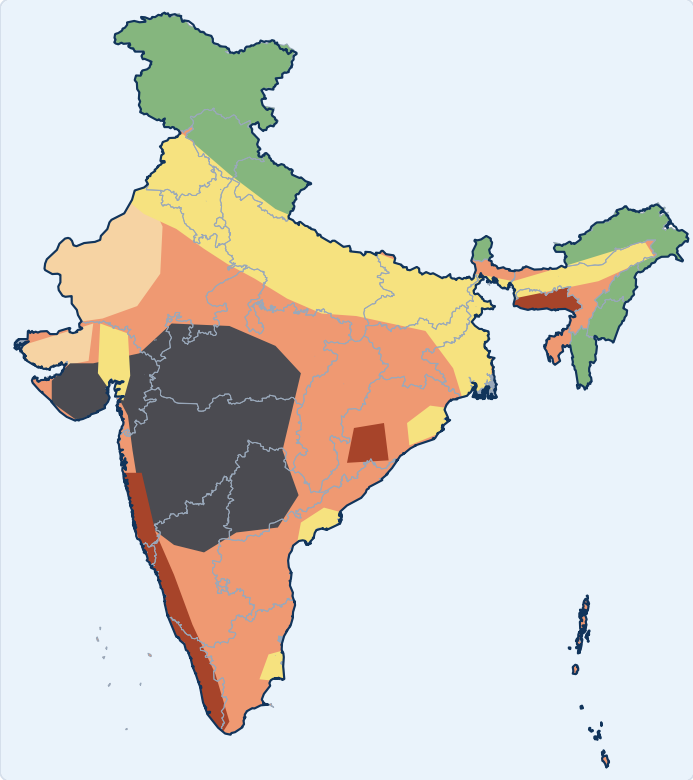

Fig. 5.1 *Major soil types of India (simplified, for identification practice). Drawn by Astra.*

Alluvial | Black (regur) | Red and yellow
Laterite | Arid | Forest and mountain

Soil	Where (map it!)
Alluvial	Northern plains (Indus, Ganga, Brahmaputra); Rajasthan and Gujarat corridor; eastern coastal deltas of Mahanadi, Godavari, Krishna, Kaveri
Black	Deccan trap: Maharashtra, Saurashtra, Malwa, Madhya Pradesh, Chhattisgarh; along Godavari and Krishna valleys
Red and yellow	Low-rainfall eastern and southern Deccan; Odisha, Chhattisgarh, southern middle Ganga plain, piedmont of Western Ghats
Laterite	Karnataka, Kerala, Tamil Nadu, Madhya Pradesh, hilly areas of Odisha and Assam
Arid	Western Rajasthan
Forest	Hilly and mountainous areas with enough rain forests

YAAD RAKHO: QUICK FACTS

- **Alluvial soil** covers the whole northern plains, reaches Rajasthan and Gujarat through a narrow corridor, and is found in the deltas of the Mahanadi, Godavari, Krishna and Kaveri.
- **Bangar** = old alluvium, more kanker nodules. **Khadar** = new alluvium, finer particles, more fertile.
- **Black soil (regur)** forms from Deccan trap basalt; best for cotton; rich in calcium carbonate, magnesium, potash and lime, but poor in phosphoric content.

5.2 Classification of Soils

ALLUVIAL SOIL

Most widespread and most important; deposited by the Himalayan rivers. Sand, silt and clay; coarse near the break of slope in **Duars, Chos and Terai**. **Bangar** (old) has more **kanker** nodules; **Khadar** (new) has more fine particles and is **more fertile**. Rich in potash, phosphoric acid and lime: ideal for **sugarcane, paddy, wheat**, cereals and pulses.

BLACK SOIL (REGUR)

Ideal for **cotton**, so called black cotton soil. Made of **lava (basalt) parent rock** and climate. Very fine clayey; **holds moisture** well. Rich in calcium carbonate, magnesium, potash and lime; **poor in phosphoric content**. Develops deep **cracks** in hot weather (self-aeration); sticky when wet, so tilled right after the first shower.

RED AND YELLOW SOIL

Develops on **crystalline igneous rocks** in areas of low rainfall. **Reddish** due to diffusion of **iron** in crystalline and metamorphic rocks; looks **yellow when hydrated**.

LATERITE SOIL

From Latin **"later" = brick**. Forms under high temperature and **heavy rainfall**; result of **intense leaching**. Low in humus; with manures and fertilisers it suits **tea and coffee** (Karnataka, Kerala, Tamil Nadu) and **cashew** (red laterite of Tamil Nadu, Andhra Pradesh, Kerala).

- **Arid soil:** red to brown; sandy and **saline** (salt is even obtained by evaporating water). Lacks humus and moisture. Lower horizons have **kankar** because calcium content rises downwards; kankar restricts infiltration. Can be cultivated after proper irrigation, as in western Rajasthan.
- **Forest soil:** loamy and silty on valley sides, coarse-grained on upper slopes. In snowy Himalayan areas it is **acidic with low humus**; fertile in lower valleys, river terraces and alluvial fans.

Fig. 5.2 *Thar desert, western Rajasthan: home of arid soil. (Wikimedia Commons, CC BY-SA 3.0)*

EXAM ALERT!
Map question mein soil ko **sirf identify** karna hota hai. Black = Maharashtra-Malwa-Saurashtra, Laterite = Western Ghats + Kerala, Arid = West Rajasthan. Ye teen kabhi galat mat karna.

5.3 Soil Erosion

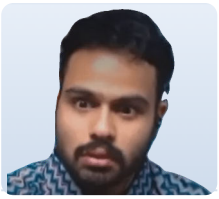

The **denudation of the soil cover and its washing down** is soil erosion. Soil formation and erosion go on together and are usually balanced; **human activities** (deforestation, overgrazing, construction, mining) and **natural forces** (wind, glaciers, water) disturb that balance.

- **Gully erosion:** running water cuts deep channels (gullies) in clayey soils; the land becomes unfit for cultivation: **bad land**. In the **Chambal basin** such lands are called **ravines**.
- **Sheet erosion:** water flows as a sheet over large areas down a slope and washes away the top soil.
- **Wind erosion:** wind blows loose soil off flat or sloping land.
- **Defective farming:** ploughing up and down the slope forms channels for quick flow of water.

Fig. 5.3 *Ravines of the Chambal basin, Rajasthan: gully erosion at its worst. (Wikimedia Commons, CC BY 3.0)*

MEME SAMJHO — Astra meme, fact inside

GULLY EROSION, CHAMBAL BASIN

"Pichhle saal yahan khet tha... aaj gehri khaaiyan? Hain? Ye kaise ho gaya?"

Asli baat: Running water cut through the clayey soil and made deep **gullies**. Such land becomes **bad land**; in the Chambal basin these are called **ravines**.

5.4 Soil Conservation

Method	How it saves soil
Contour ploughing	Ploughing along the contour lines slows the flow of water down the slopes.
Terrace cultivation	Steps cut out on slopes restrict erosion; well developed in the **western and central Himalayas**.
Strip cropping	Large fields divided into strips; **strips of grass** left between crops break the force of wind.
Shelter belts	Rows of trees break the force of wind; they helped **stabilise sand dunes** and the desert in western India.

SHIVAM BHAIYA SAYS
Soil chapter ka **sabse favourite 5-marker**: "Black soil ki 5 features" ya "Alluvial vs Black". Comparison table bana ke likho: parent material, colour, moisture, nutrients, crops. Examiner khush!

Day 5 Practice

15 board-pattern questions | solve first, then check

MCQ

1 **Which of these statements about Khadar soil is NOT correct?** (1)

(a) It is new alluvium.
(b) It is more fertile than Bangar.
(c) It contains fewer fine particles than Bangar.
(d) It has a lower concentration of kankar nodules.

2 **Study the table and identify soils A and B.**
A: develops on crystalline igneous rocks in areas of low rainfall.
B: found in hilly and mountainous areas where sufficient rainforests are available. (1)

(a) A: Black soil, B: Arid soil
(b) A: Laterite soil, B: Alluvial soil
(c) A: Red and yellow soil, B: Forest soil
(d) A: Alluvial soil, B: Red and yellow soil

3 A farmer wants soil that suits cotton. Which clue correctly describes that soil?
I. It has a high capacity to hold moisture.
II. It turns yellow when hydrated.
III. It contains kankar and bhangar nodules.
IV. It is well drained and loamy. (1)

(a) Clues I and III (b) Clue IV only
(c) Clues I and II (d) Clue I only

4 Complete the table.
Alluvial soil: sugarcane, paddy, wheat
(A): ideal for growing cotton
(B): suitable for cashew nut (1)

(a) A: Laterite, B: Black
(b) A: Black, B: Laterite
(c) A: Black, B: Red and yellow
(d) A: Red and yellow, B: Black

5 Which of the following statements about laterite soil are correct?
I. It develops under high temperature and heavy rainfall.
II. It is low in humus.
III. It is found mainly in Uttar Pradesh, Punjab and Bihar.
IV. It develops on crystalline igneous rocks. (1)

(a) II and III (b) I and IV
(c) I and II (d) III and IV

6 Which statement(s) do NOT describe arid soil?
I. It is reddish because iron is diffused in crystalline and metamorphic rocks.
II. Its salt content is so high that common salt is obtained by evaporating water.
III. Its lower horizons are occupied by kankar.
IV. It can be cultivated after proper irrigation. (1)

(a) I only (b) IV only
(c) All of these (d) I, III and IV

EXAM TIPS

- 3-mark answer: write **3 clear points**, one fact in each, with an example (state, river or place).

7 Identify the soil from these clues: it has varying proportions of sand, silt and clay; its particles become bigger as we move inland towards river valleys; it is coarse in piedmont plains such as the Duars, Chos and Terai. (1)

(a) Black soil (b) Yellow soil
(c) Laterite soil (d) Alluvial soil

8 Running water cuts through clayey soils and makes deep channels. What is this type of erosion called? (1)

(a) Sheet erosion (b) Rill erosion
(c) Gully erosion (d) Wind erosion

9 Terrace farming is well developed in which of these states? (1)

(a) Haryana (b) Plains of Uttar Pradesh
(c) Uttarakhand (d) Punjab

ASSERTION-REASON

10 **Assertion (A):** Alluvial soil is ideal for growing paddy, wheat, cereal and pulse crops.
Reason (R): Alluvial soil is best known for its capacity to hold moisture. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read the source and answer the questions that follow. (4)

Alluvial soil is the most widespread and important soil of India; the whole northern plains are made of it. It has been deposited by three great Himalayan river systems: the Indus, the Ganga and the Brahmaputra. It also extends into Rajasthan and Gujarat through a narrow corridor and is found in the deltas of the Mahanadi, Godavari, Krishna and Kaveri. It has varying proportions of sand, silt and clay. On the basis of age, alluvial soil is classified as old alluvium (Bangar) and new alluvium (Khadar). Bangar has a higher concentration of kankar nodules than Khadar.

(i) Which river systems deposited the alluvial soil of the northern plains? (1)

(ii) On the basis of age, into which two types is alluvial soil classified? (1)

(iii) State two differences between Bangar and Khadar. (2)

12 Read the source and answer the questions that follow. (4)

The removal of the soil cover and its washing down is called soil erosion. Soil formation and erosion go on together and are usually balanced. This balance is disturbed by human activities such as deforestation, overgrazing, construction and mining, and by natural forces like wind, glaciers and water. Running water cuts deep channels called gullies in clayey soils, and the land becomes unfit for cultivation, known as bad land; in the Chambal basin such lands are called ravines. When water flows as a sheet down a slope and washes away the top soil, it is sheet erosion. Defective farming, like ploughing up and down the slope, also causes erosion.

(i) What is soil erosion? (1)

(ii) Name any two human activities that lead to soil erosion. (1)

(iii) Why is soil considered a resource? Give two arguments. (2)

SHORT ANSWER

13 **Name the soil found widely in western Rajasthan. Give two characteristics that make it less suitable for cultivation.** (3)

14 **Describe three main features of black soil.** (3)

LONG ANSWER

15 **Analyse the methods used to check soil erosion caused by natural forces in different regions of India.** (5)

Day 5 Answers with explanation

1 **(c)** Khadar (new alluvium) has MORE fine particles and is more fertile than Bangar; Bangar has more kankar nodules.

2 **(c)** Red and yellow soils form on crystalline igneous rocks in the eastern and southern Deccan; forest soils occur in hilly, forested regions and change with altitude.

3 **(d)** Black (regur) soil is ideal for cotton and is known for holding moisture. Turning yellow when hydrated describes red soil; kankar nodules describe Bangar alluvium.

4 **(b)** Black soil is the cotton soil; laterite soil, after soil conservation, is useful for cashew nuts (Kerala, Tamil Nadu, Karnataka).

5 **(c)** Heavy rain leaches the soil and bacteria remove humus fast, so laterite is low in humus. UP, Punjab and Bihar have alluvium; crystalline igneous rocks give red soil.

6 **(a)** Statement I is the description of red soil. Arid soil is red to brown, sandy and saline, with kankar in the lower horizons, and becomes cultivable with irrigation (as in western Rajasthan).

7 **(d)** These are features of alluvial soil, deposited by the Indus, Ganga and Brahmaputra systems; it is coarse near the break of slope.

8 **(c)** Gullies make land unfit for cultivation (bad land); in the Chambal basin such land is called ravines.

9 **(c)** Terraces cut on hill slopes check erosion; the western and central Himalayas (e.g. Uttarakhand) have well developed terrace cultivation.

10 **(c)** A is true: alluvial soil is very fertile (rich in potash, phosphoric acid and lime). R is false: holding moisture for a long time is the special feature of black soil.

11 (i) The Indus, the Ganga and the Brahmaputra. (ii) Old alluvium (Bangar) and new alluvium (Khadar). (iii) Bangar is older and has more kankar nodules; Khadar is newer, has more fine particles and is more fertile.

12 (i) The denudation of the soil cover and its subsequent washing down. (ii) Any two: deforestation, overgrazing, construction, mining, defective methods of farming. (iii) Soil is the medium of plant growth and supports many living organisms on earth; it takes millions of years to form a few centimetres, so it must be used carefully like any other valuable resource.

13 **Arid soil.**
1. Sandy in texture and saline in nature; in some areas salt content is so high that common salt is obtained by evaporating the water.
2. Lacks humus and moisture because of the dry climate and high temperature.
3. Kankar in the lower horizons restricts the infiltration of water. (It becomes cultivable after proper irrigation.)

YAAD RAKHO: QUICK FACTS

- Black soil develops **deep cracks** in hot weather, which helps proper aeration; it is sticky when wet and hard to work.

Day 5 Answers continued

14 1. Black in colour, also called regur; made of extremely fine clayey material; ideal for cotton.
2. Well known for its capacity to hold moisture; rich in calcium carbonate, magnesium, potash and lime, but poor in phosphoric content.
3. Develops deep cracks in hot weather, which help aeration; sticky when wet, so it must be tilled just after the first shower.
Found in the Deccan trap (basalt) region: Maharashtra, Saurashtra, Malwa, MP, Chhattisgarh, and the Godavari and Krishna valleys.

15 1. **Contour ploughing:** ploughing along the contour lines slows the flow of water down the slopes.
2. **Terrace cultivation:** steps cut on slopes restrict erosion; common in the western and central Himalayas.
3. **Strip cropping:** strips of grass are left to grow between crops, breaking the force of the wind.
4. **Shelter belts:** rows of trees planted to check wind erosion; they helped stabilise sand dunes and the desert in western India.
5. **Plugging gullies** and checking the spread of bad land/ravines, e.g. in the Chambal basin, along with afforestation and controlled grazing.

Day 5 Extra Practice

9 more questions from this chapter | new, no repeats

MCQ

1 **In which of these states is black soil found?** (1)
(a) Gujarat **(b)** Jharkhand
(c) Rajasthan **(d)** Jammu and Kashmir

2 **According to the National Forest Policy (1952), what percentage of the geographical area of India should be under forests?** (1)
(a) 22.5 **(b)** 30 **(c)** 33 **(d)** 31

3 **In which part of India is red soil mostly found?** (1)
(a) Upper Ganga plains
(b) Eastern and southern parts of the Deccan plateau
(c) Parts of Jammu and Kashmir
(d) None of these

4 **Which of these is NOT a factor in the formation of soil?** (1)
(a) Parent rock **(b)** Duration of day
(c) Relief **(d)** Climate

ASSERTION-REASON

5 **Assertion (A): Land is a natural resource of the greatest importance.**
Reason (R): Land is used for many purposes, such as farming, forestry, mining, building roads and setting up industries. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

6 **What is a resource? When can something in our environment be called a resource? Give examples.** (3)

7 **Why is land under 'other than current fallow' cultivated only once or twice in two to three years? Give reasons.** (3)

8 **Name the three major relief features of India and state the share of each in the total land area.** (3)

LONG ANSWER

9 **Distinguish between biotic and abiotic resources, giving four points of difference.** (5)

Day 5 Extra Practice: Answers

1 **(a)** Black soil covers the Deccan plateau, including Maharashtra, Malwa, Madhya Pradesh, Chhattisgarh and the Saurashtra region of Gujarat.

2 **(c)** The policy set a goal of 33 per cent forest cover. India's actual forest area is far below this level.

3 **(b)** Red soil develops on crystalline igneous rocks in the low-rainfall areas of the eastern and southern Deccan plateau.

4 **(b)** Soil is formed by relief, parent rock, climate, vegetation, other life forms and time. Day length is not a factor.

5 **(a)** Land supports natural vegetation, wildlife, human life and economic activities. This wide use is exactly why it is so important.

6 1. A resource is anything in our environment that can be used to satisfy our needs. 2. To be called a resource, it must be technologically accessible, economically feasible and culturally acceptable. 3. Resources are created when humans interact with nature through technology and institutions. 4. Examples: soil, water, forests, minerals and fossil fuels.

Day 5 Extra Practice: Answers continued

7 1. Such land is left uncultivated for one to five agricultural years. 2. The land is often of poor quality and has low fertility. 3. The cost of cultivating it is very high compared to the returns. 4. Farmers therefore cultivate it only now and then, when conditions allow.

8 1. Plains cover about 43 per cent of the land area and provide facilities for agriculture and industry. 2. Mountains cover about 30 per cent; they keep rivers flowing all year and support tourism. 3. Plateaus cover about 27 per cent and hold rich reserves of minerals, fossil fuels and forests.

9 1. Biotic resources are obtained from the biosphere; abiotic resources are made of non-living things. 2. Biotic resources have life; abiotic resources do not. 3. Examples of biotic resources are plants, animals, fish, livestock and human beings; examples of abiotic resources are rocks, metals, land, water and air. 4. Biotic resources can reproduce and grow if they are managed well, while most abiotic resources such as metals cannot grow again once used up.

DAY 5 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 6, Political Science: Power-sharing

TONIGHT'S 2-MINUTE RECALL

Answer from memory, then check the notes

1. Which soil is called regur, and why is it good for cotton?
2. Bangar vs Khadar: which one is more fertile?
3. Laterite: meaning of the word and two crops it suits.
4. Gully erosion, sheet erosion, ravines: one line each.
5. Four methods of soil conservation.

My mistakes from today's practice:

DAY 06

POLITICAL SCIENCE | CHAPTER 1 | FULL CHAPTER IN ONE DAY

Power-sharing: Belgium, Sri Lanka and the Forms

Democratic Politics II, Chapter 1

Aaj ka target (pages 35-39)

- ☐ Power-sharing poora ek din mein
- ☐ Belgium vs Sri Lanka ka farak 2 line mein
- ☐ 15 sawal lagao, forms of power-sharing pakke
- ☐ 110 min bas, uske baad free

1.1 Two Stories: Belgium and Sri Lanka

Both countries have **more than one language community**. Belgium chose to **share power**; Sri Lanka chose **majority rule**. The results were opposite, and that is the whole lesson of this chapter.

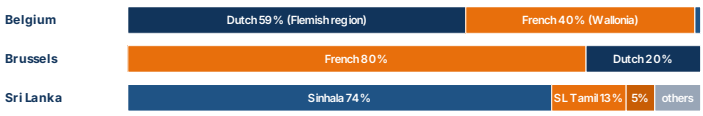

Fig. 6.1 *Who lives where. In Belgium about 1% speak German (the thin strip). In Sri Lanka, 5% are Indian Tamils (brought as plantation workers in the colonial period). Christians (about 7%) are both Tamil and Sinhala.*

BELGIUM: THE TENSION

The Dutch speakers were a majority in the country but a **minority in Brussels**, the capital. The French-speaking minority was **richer and more powerful**, which the Dutch speakers resented. Tension peaked in the 1950s and 1960s.

SRI LANKA: MAJORITARIANISM

Independent in **1948**. The Sinhala-majority government used its numbers to dominate: **1956 Act made Sinhala the only official language**, preference to Sinhalas in university places and government jobs, and the state was to **protect and foster Buddhism**.

1.2 The Belgian Model: 4 Smart Moves

Fig. 6.2 *Grand-Place, Brussels. Brussels has its own government with equal representation of Dutch and French speakers, and it is also the headquarters of the European Union. (Photo: Wikimedia Commons, CC0)*

- Constitution amended **four times between 1970 and 1993**. Rule: **Dutch and French-speaking ministers shall be equal** in the central government; no single community can take decisions alone.
- Many powers of the central government handed to the **state governments of the two regions**; state governments are **not subordinate** to the centre.
- **Brussels** has a separate government with **equal representation** of both communities (the French speakers accepted equality in Brussels because the Dutch accepted it at the centre).
- A third kind of government, the **community government**, is elected by people of one language community (Dutch, French, German) wherever they live; it handles **cultural, educational and language** issues.

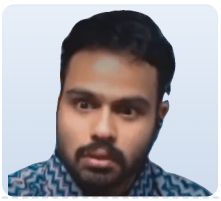

SHIVAM BHAIYA SOCH RAHE HAIN

Belgium = **"sab ko barabar ki seat"**. Sri Lanka = **"jiski sankhya zyada, uski chalegi"**. Answer mein ye contrast likho, 3-mark ka question khud ban jata hai. Bonus: **Brussels** was chosen as the headquarters of the **European Union**.

1.3 What Majoritarianism Did to Sri Lanka

1948	1956	Policies	Result	Civil war
Independence; Sinhala majority forms government	Act makes Sinhala the only official language	Preference in jobs, universities; Buddhism protected	Tamils feel alienated; parties demand autonomy, then Tamil Eelam	Thousands killed; it ended in 2009

MEME SAMJHO — Astra meme, fact inside

SRI LANKA AFTER 1956

"Sinhala only, jobs bhi Sinhala ko, Buddhism ko protection... aur ab Tamil naraz? Hain? Ye kaise ho gaya?"

Asli baat: Majoritarian measures **alienated the Sri Lankan Tamils**. Distrust grew into a demand for an independent **Tamil Eelam** and a civil war that ended only in **2009**.

1.4 Why Share Power? Two Reasons

PRUDENTIAL REASON (SMART CHOICE)

It **reduces the possibility of conflict** between social groups. Social conflict often leads to violence and political instability, so power sharing ensures the **stability of political order**. Majority rule oppresses the minority and in the long run harms the majority too.

MORAL REASON (RIGHT THING)

Power sharing is the **very spirit of democracy**. People affected by policies must be consulted and must have a say. A legitimate government is one where citizens, through participation, acquire a **stake in the system**.

1.5 Four Forms of Power Sharing

1. **Among organs of government** (horizontal): legislature, executive, judiciary at the same level check each other. **System of checks and balances**. Ministers answer to Parliament; judges are appointed by the executive but can check it.
2. **Among governments at different levels** (vertical): Union (central) government, state governments, local bodies. A general government for the whole country plus governments at provincial level is called **federal government**.
3. **Among social groups**: religious and linguistic groups, e.g. **community government in Belgium**, reserved constituencies for weaker sections in India.
4. **Among political parties, pressure groups and movements**: competition among parties, **coalition governments**, and interest groups (traders, farmers, workers) influencing decisions.

REMEMBER IN ONE LINE

Belgium shared power (equal ministers, regional, Brussels and community governments) and stayed united; Sri Lanka chose majoritarianism (1956 Sinhala-only Act) and faced civil war; power sharing is prudent (less conflict) and moral (spirit of democracy); 4 forms: organs, levels, social groups, parties and pressure groups.

EXAM ALERT!

Educart ka favourite trap: **Belgium mein power sharing horizontal bhi hai aur vertical bhi**, aur community government social groups wala form hai. "Belgium ne majoritarianism apnaya" wala option hamesha galat.

MEME SAMJHO

Astra meme, fact inside

THE BELGIAN LEADERS, 1970 TO 1993

"Ek community dominate hi nahi kar payegi... agar sabko power mein barabar hissa de do."

Asli baat: Belgium avoided a Sri Lanka-type civil war by **accommodating both communities**: equal ministers at the centre, regional and community governments, equality in Brussels.

Day 6 Practice: Chapter Test

15 board-pattern questions | solve first, then check

MCQ

1 **In Belgium, what was the main aim of the power sharing arrangements?** (1)

(a) Concentrating political control in the centre
(b) Making Belgium a unitary state
(c) Accommodating the interests of different language groups and regions
(d) Handing cultural and education matters to the Dutch alone

2 **Many countries of Europe came together to form the European Union. Which city became its headquarters?** (1)

(a) Paris **(b)** Zurich
(c) London **(d)** Brussels

3 **Look at the pairs: Belgium with its Dutch-speaking community, and Sri Lanka with its Sinhala-speaking community. What do the two groups have in common?** (1)

(a) Both are minorities
(b) Both are majority communities in their countries
(c) Both are majoritarian governments
(d) Both are ethnic minorities

4 **Which of these was NOT a part of the Belgian model?** (1)

(a) Dutch and French-speaking ministers are equal in the central government
(b) State governments got many powers of the centre
(c) A community government is elected by people of one language group
(d) Sinhala was declared the only official language

5 **Read the statements about Belgium and choose the incorrect ones.**
(I) 59% of Belgians live in the Flemish region and speak Dutch.
(II) 40% live in Wallonia and speak French.
(III) 1% of Belgians speak German.
(IV) In Brussels 80% speak Dutch and 20% speak French. (1)

(a) Only (IV) **(b)** (I) and (II)
(c) (III) and (IV) **(d)** (II) and (IV)

6 **Which step would have most likely prevented the civil war in Sri Lanka that ended in 2009?** (1)

(a) Jobs reserved only for Sinhala speakers
(b) Laws that accommodate the ethnic differences of citizens
(c) Dividing the country on linguistic lines
(d) Separating Indian Tamils from Sri Lankan Tamils

7 **Statement (I): Belgium has a vertical power sharing arrangement.**
Statement (II): India shows power sharing among different social groups. (1)

(a) Only (I) is correct **(b)** Only (II) is correct
(c) Both are incorrect **(d)** Both are correct

8 **Power shared among the legislature, executive and judiciary is called:** (1)

(a) Vertical distribution **(b)** Horizontal distribution
(c) Community government **(d)** Coalition government

ASSERTION-REASON

9 **Assertion (A):** Power sharing is good for democracy.
Reason (R): It helps reduce the possibility of conflict between social groups. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** In Sri Lanka, the Sinhala community tried to secure dominance over the government by virtue of its majority.
Reason (R): The 1956 Act recognised both Sinhala and Tamil as official languages. (1)
(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read the source and answer: *"In a democracy, citizens must have freedom to choose among various contenders for power. In contemporary democracies this takes the form of competition among different parties. Sometimes two or more parties form an alliance to contest elections."*
(i) Which form of power sharing is described? (1)
(ii) What is such a government of allied parties called? (1)
(iii) Name one other group, apart from parties, that shares power in this form. (2) (4)

SHORT ANSWER

12 State any two majoritarian measures adopted by the Sri Lankan government after independence. (2)

13 Give one prudential and one moral reason for power sharing. (2)

14 "Power sharing increases trust between groups." Support the statement with the example of Belgium. (3)

LONG ANSWER

15 Describe the four forms of power sharing in modern democracies with one example of each. (5)

Day 6 Answers with explanation

1 **(c)** Accommodating linguistic and regional interests, so the country stays united.
2 **(d)** Brussels.
3 **(b)** Dutch speakers (59%) in Belgium and Sinhalas (74%) in Sri Lanka are both majorities.
4 **(d)** Sinhala-only was Sri Lanka's majoritarian step, not Belgium's.
5 **(a)** Only (IV) is wrong: in Brussels 80% speak French and 20% Dutch. (I), (II), (III) are correct.
6 **(b)** Accommodating ethnic differences builds trust; the others deepen division.
7 **(d)** Both correct: Belgium shares power between centre and regions; India has reserved constituencies for social groups.
8 **(b)** Horizontal distribution: organs at the same level, with checks and balances.
9 **(a)** Reducing conflict is the prudential reason why power sharing is good, so R explains A.
10 **(c)** A is true. R is false: the 1956 Act made **only Sinhala** the official language.
11 (i) Power sharing among political parties, pressure groups and movements. (ii) A coalition government. (iii) Pressure groups or interest groups such as traders, businessmen, farmers or workers.
12 Any two: 1956 Act made Sinhala the only official language; preference to Sinhala applicants for university places and government jobs; the constitution said the state shall protect and foster Buddhism.
13 Prudential: it reduces conflict between social groups and keeps political order stable. Moral: it is the spirit of democracy; people affected by decisions must have a say.
14 Equal Dutch and French ministers at the centre, regional governments, equal representation in Brussels and community governments meant no group felt dominated. Both communities trusted the system and Belgium stayed united, unlike Sri Lanka.
15 (1) Organs of government: legislature, executive, judiciary (checks and balances). (2) Levels: Union, state, local governments (federal set-up). (3) Social groups: community government in Belgium, reserved seats in India. (4) Parties, pressure groups, movements: coalition governments, interest groups influencing decisions.

BOARD MEIN AISE LIKHO

Q. Why did Belgium succeed in keeping its country together while Sri Lanka slipped into civil war? (3 marks)

1. **Belgium shared power:** equal Dutch and French ministers at the centre, powers to the state governments, an equal-representation government for Brussels and community governments.
2. **Sri Lanka chose majoritarianism:** the 1956 Act made Sinhala the only official language, Sinhalas got preference in jobs and universities, and the state protected Buddhism.
3. **Result:** Belgium avoided civic strife, while Sri Lankan Tamils felt alienated, demanded Tamil Eelam, and a civil war followed that ended only in 2009.

BOARD MEIN AISE LIKHO

Tip: pehle dono countries ka step likho, phir result. Contrast hi marks dilata hai.

Day 6 Extra Practice

3 more questions from this chapter | new, no repeats

MCQ

1 **Which one of the following statements about power sharing is correct?** (1)

(a) Power sharing is not needed in any society.
(b) Power sharing suits only big countries that have regional divisions.
(c) Power sharing is needed only in societies that have religious, linguistic or ethnic divisions.
(d) Every society needs some form of power sharing, even a small society without social divisions.

2 **The word 'ethnic' refers to:** (1)

(a) a social division based on shared culture and common descent
(b) a violent conflict between opposing groups
(c) a careful calculation of gains and losses
(d) a group of people who follow different religions

3 **Proportionality in power sharing means giving groups a share in jobs, seats or representation in line with their place in society. Which of these is an example of proportionality?** (1)

(a) Roles and responsibilities are divided between the Central and State governments in India.
(b) About 24 per cent of Lok Sabha seats are reserved for members of the Scheduled Castes and Scheduled Tribes.
(c) Several political groups in Sri Lanka demanded an independent Tamil state.
(d) In Belgium, the French-speaking minority was richer and more powerful than the Dutch-speaking majority.

Day 6 Extra Practice: Answers

1 **(d)** Power sharing is not limited to divided or large societies. Every democracy shares power in some form, whatever its size or make-up.

2 **(a)** An ethnic group shares a culture and believes in a common descent. Its members need not have the same religion or nationality.

3 **(b)** Reserved constituencies give weaker social groups a fair share of seats in the legislature. This is power sharing among social groups.

DAY 6 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 7, Economics: Development

DAY 07

ECONOMICS | CHAPTER 1 | ONE-DAY CHAPTER + TEST

Development: Goals, Income and Comparing States

Understanding Economic Development

Aaj ka target (pages 39-44)

- ☐ Development wala chapter aaj khatam
- ☐ Per capita income aur HDI apne words mein
- ☐ 15 sawal lagao, galat wale Mistake box mein
- ☐ 110 min kaafi hain, phone side mein

1.1 What Development Promises: Different People, Different Goals

Who	What development means to them
Landless rural labourers	More days of work and better wages; a local school with quality education; no social discrimination.
Prosperous farmers from Punjab	Assured high income through higher support prices for crops and hard-working, cheap labourers.
A girl from a rich urban family	As much freedom as her brother; free to decide what to do in life, even study abroad.

- People have **different** developmental goals, because their life situations are different.

- Goals can also be **conflicting**: what is development for one may be **destruction** for another.
- Example: an industrialist wants a big dam for more electricity; people who would be **displaced** by the dam, like tribals, may oppose it.

Fig. 7.1 *Sardar Sarovar Dam on the Narmada, Gujarat. A dam brings electricity and irrigation for some, and displacement for others.*

- **Income and other goals:** people want regular work, better wages and a fair price for their crops, that is, more income.
- They also want things money cannot easily give: **equal treatment, freedom, security and respect**.
- If women are in paid jobs, their **dignity** in the household and society rises. A **safe and secure** environment lets more women take up jobs or run a business.
- So development means a mix of goals, not income alone.

EXAM ALERT!

"Development for one may be destruction for another" wali line yaad rakho. Dam ka example (bijli vs displaced log) 3 mark answer mein seedha fit hota hai.

1.2 National Development and How to Compare Countries

Ideas of national development also differ, so we need **fair ways to compare**. For countries, **income** is taken as one of the most important attributes: countries with higher income are more developed than those with less income.

KEY TERM: PER CAPITA INCOME

Average income = total income of the country / total population. It is also called **per capita income**. The **World Bank** uses it in its **World Development Reports** to classify countries. As per NCERT, countries with per capita income of **US$ 66,500** a year and above (2024) are **high income or rich**; about **US$ 2,300** or less are **low income**. India is a **low middle income** country.

Monthly income (Rs)	Country A	Country B
Citizen I to IV	9,500; 10,500; 9,800; 10,000	500 each
Citizen V	10,200	48,000
Average	10,000	10,000

Same average, very different lives. Country A is better: income is **equitably distributed**. Averages **hide disparities**.

MEME SAMJHO

Astra meme, fact inside

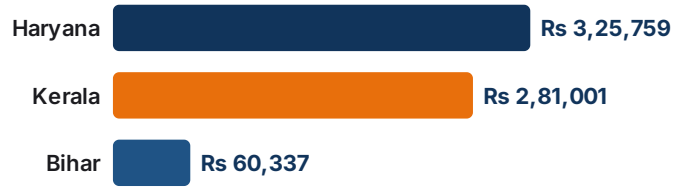

COMPARING COUNTRIES

"Average income dono ki 10,000? Pehle check karo, paisa baanta kaise hai."

Asli baat: Per capita income is useful for comparison, but it **does not tell us how income is distributed**. In Country B one person earns 48,000 while four earn 500 each.

1.3 Income and Other Criteria: Haryana, Kerala and Bihar

Per capita income of select states, 2023-24

Source: NCERT Table 1.3 (Economic Survey 2024-25)

State	IMR (2020)	Literacy % (2017-18)	Attendance (secondary)
Haryana	28	82	73
Kerala	6	94	94
Bihar	27	62	69

Source: NCERT Table 1.4. Attendance = Net Attendance Ratio per 100 children aged 15-17, 2017-18.

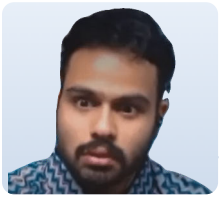

- **Haryana has the highest per capita income**, Bihar the lowest. But **Kerala does better on health and education**: its Infant Mortality Rate is 6, while Haryana's is 28, nearly **three times** more.
- In Bihar about **one-third** of children aged 15 to 17 are not attending secondary school.
- So income alone is **not a complete indicator** of the goods and services people are able to use.

THREE TERMS YOU MUST DEFINE

Infant Mortality Rate (IMR): number of children who die before the age of one year, as a proportion of 1,000 live children born in that year.
Literacy Rate: proportion of the literate population in the **7 and above** age group.
Net Attendance Ratio: children of a given age group attending school, as a percentage of all children of that age group.

MEME SAMJHO

Astra meme, fact inside

HARYANA VS KERALA

"Income Haryana ki zyada... par IMR Kerala ka sirf 6? Hain? Ye kaise ho gaya?"

Asli baat: Kerala has **adequate provision of basic health and educational facilities**. Money in your pocket cannot buy all the goods and services you need to live well.

1.4 Public Facilities

- Money cannot buy a **pollution-free environment** or make sure you get **unadulterated medicines**.
- It is **cheaper to provide collective facilities** than for each person to buy them: security, schools, health centres, clean water. Where the **PDS** works well, health and nutrition are better.
- **Body Mass Index (BMI)** = weight in kg / (height in m)^2. An adult with BMI **below 18.5** is undernourished, so nutrition is a goal beyond income.

1.5 Human Development Index (HDI)

Country	GNI per capita (2021 PPP $)	Life expectancy	Mean years of schooling (25+)	HDI rank
Sri Lanka	12,616	77.5	10.8	89
India	9,047	72	6.9	130
Myanmar	4,919	66.9	6.4	150
Pakistan	5,501	67.6	4.3	168
Nepal	4,726	70.4	4.5	145
Bangladesh	8,498	74.7	6.8	130

Source: NCERT Table 1.6, Human Development Report 2025 (UNDP), data for 2023.

- The **Human Development Report** of the **UNDP** compares countries on the **educational levels** of people, their **health status** and **per capita income**.
- The **World Bank** looks at income only; UNDP takes a wider view of well-being.
- **Life expectancy at birth** = average expected length of life of a person at the time of birth.

SHIVAM BHAIYA SAYS

HDI mein **rank ka number jitna chhota, utna better**. Sri Lanka 89, India 130: chhota padosi humse aage hai!

1.6 Sustainability of Development

- Development must also last for **future generations**; present levels of development may not be sustainable.
- **Groundwater** (renewable): about **300 districts** report a fall of over 4 metres in 20 years, and nearly **one-third** of the country overuses it.
- **Crude oil** (non-renewable, fixed stock): at the present rate, world reserves (2017) would last only about **47 years** (NCERT Table 1.7).

REMEMBER IN ONE LINE

Different people, different (even conflicting) goals; **per capita income** compares countries (World Bank) but hides inequality; Kerala beats Haryana on IMR and literacy because of **public facilities**; **HDI** (UNDP) = income + health + education; development must be **sustainable**.

Day 7 Practice

15 board-pattern questions | solve first, then check

MCQ

1 The average income of a person, found by dividing a country's total income by its total population, is called: (1)

(a) income of each female member
(b) per capita income
(c) income per state
(d) income of earning and non-earning members

2 To compare the development of different countries, the World Bank uses which criterion? (1)

(a) Population **(b)** Size of the territory
(c) Per capita income **(d)** Number of cities

3 Besides per capita income, the Human Development Report of the UNDP compares countries on:
(I) industrial growth and technology (II) military strength (III) educational levels and health status of people (IV) population size (1)

(a) (I) and (II) only **(b)** (III) only
(c) (II) and (IV) only **(d)** (I), (II), (III) and (IV)

4 Kerala has a much lower Infant Mortality Rate than Haryana. The main reason is that Kerala has: (1)

(a) adequate provision of basic health and educational facilities
(b) a higher per capita income than Haryana
(c) more large industries
(d) adequate technical and military facilities

5 In Haryana, the Net Attendance Ratio at the secondary stage is 73 per 100 children. How many children per 100 are **not** attending school? (1)

(a) 38 **(b)** 18 **(c)** 27 **(d)** 73

6 A government wants to know the nutrition level of individual adults to plan health schemes. Which indicator measures this most directly? (1)

(a) Per capita income **(b)** Mean years of schooling
(c) Human Development Index **(d)** Body Mass Index

7 An island has four residents earning Rs 2,000, Rs 2,000, Rs 2,000 and Rs 50,000 a month. The government reports an average income of Rs 14,000. The best reading of this data is: (1)

(a) Everyone earns Rs 14,000.
(b) Most residents are much poorer than the average suggests.
(c) All residents live comfortably.
(d) The island has perfect equality.

8 Which of these is **not** a feature of an under-developed country? (1)

(a) Mass illiteracy
(b) Agriculture as the main occupation
(c) High technological development
(d) Mass poverty

9 Which developmental goal is different in nature from the others? (1)

(a) Better facilities for employment
(b) Rise in incomes
(c) Equality among sexes
(d) Construction of dams and multipurpose projects

10 Amartya Sen saw development as the removal of "unfreedoms" such as poverty and lack of opportunity. Who among these is MOST "unfree"? (1)

(a) Afreen, a woman who is not allowed to study further
(b) Arvind, a shopkeeper who cannot move to a bigger flat
(c) Hiralal, a farmer with crop insurance
(d) Anjana, 15, who cannot vote yet

11 In a village many girls leave school at the secondary level because the school is far away. Which public facility is most likely missing? (1)

(a) Large shopping complexes
(b) Private tuition centres
(c) Safe and accessible school transport
(d) Mobile networks

12 Using the HDI table on this Day, which country has the best HDI rank? (1)

(a) India **(b)** Sri Lanka
(c) Bangladesh **(d)** Nepal

ASSERTION-REASON

13 **Assertion (A):** Development involves thinking about the ways in which we can work towards achieving goals of holistic growth.
Reason (R): Holistic growth means economic growth only. (1)

(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

ASSERTION-REASON

14 **Assertion (A): Besides better income, people also aspire for security, respect from others, equal treatment and freedom.**
Reason (R): Money, or the material things it can buy, is not all that we need to live well. (1)
(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

15 **How is the criterion used by the UNDP for measuring development different from the one used by the World Bank? Why is it considered better?** (3)

Day 7 Answers with explanation

1 **(b)** per capita income, also called average income.
2 **(c)** per capita income. The World Bank uses it in its World Development Reports.
3 **(b)** (III) only. HDI = income + education + health.
4 **(a)** Kerala's basic health and education facilities explain its low IMR, not its income.
5 **(c)** 100 minus 73 = 27. Do not confuse the attendance ratio with the absence ratio.
6 **(d)** BMI uses weight and height of each person, so it directly shows nutrition.
7 **(b)** One very high income pulls the average up and hides inequality.
8 **(c)** Under-developed countries usually lack advanced technology.
9 **(d)** Dams can displace people; the other three are goals that improve people's lives directly.
10 **(a)** Denial of education is an unfreedom of opportunity. Not voting at 15 is a legal age rule, not an unfreedom.
11 **(c)** Safe, reliable transport is a public facility that keeps girls in school.
12 **(b)** Sri Lanka, rank 89. Lower rank number = higher position.
13 **(c)** A is true. R is false: holistic growth is much more than economic growth.
14 **(a)** Both true; since money cannot buy everything, people aspire for non-material goals too.
15 **World Bank:** uses only **per capita income** to classify countries. **UNDP:** the Human Development Report compares countries on **per capita income, health status (life expectancy) and educational levels** (mean years of schooling). Better because income alone hides distribution and says nothing about health and education.

SHIVAM BHAIYA KA NOTE

Economics Chapter 1 complete! Aaj ka test 15 mein se kitna aaya? **11 se kam** aaya to sirf galat wale topics ke Remember box dobara padho. Agla Economics Day: Day 15, Sectors. Ek line yaad karke aana: **per capita income = total income / total population.**

BOARD MEIN AISE LIKHO

Q. Why is average income alone not a complete measure of development? (3 marks)

1. **Averages hide disparities:** A and B both average Rs 10,000, but in B one person earns Rs 48,000 and four earn Rs 500.
2. **Income misses quality of life:** Haryana earns more per head than Kerala, yet Kerala's IMR is 6 against 28.
3. **Money cannot buy everything:** a pollution-free environment or pure medicines need public provision.

Tip: har point ke saath ek NCERT example likho.

Day 7 Extra Practice

1 more questions from this chapter | new, no repeats

MCQ

1 **Which indicator measures the proportion of literate people in the age group of 7 years and above?** (1)
(a) Net Attendance Ratio (b) Literacy rate
(c) Enrolment rate (d) Drop-out ratio

Day 7 Extra Practice: Answers

1 **(b)** The literacy rate is the share of literate people in the population aged 7 years and above.

DAY 08

HISTORY | CHAPTER 2 | PART 1 OF 3

The First World War, Khilafat and Non-Cooperation

Nationalism in India

Aaj ka target (pages 44-47)

- ☐ WWI se Non-Cooperation tak
- ☐ Rowlatt Act aur Jallianwala ki date pakki
- ☐ 10 sawal, jo atke uska page number likh lo
- ☐ 100 min, notifications band

In India, as in other colonies, **modern nationalism grew with the anti-colonial movement**. People began to discover their unity in the struggle against colonial rule. Different groups felt the effects of colonialism differently, and the Congress under **Mahatma Gandhi** tried to bring them together into one movement.

2.1 The First World War and its Effects on India

Fig. 2.1 *Mahatma Gandhi in 1918, the year of the Kheda satyagraha (public domain).*

The war (1914 to 1918) created a **new economic and political situation**.

- **Defence expenditure** rose sharply; it was paid for by war loans and higher taxes. **Customs duties** were raised and **income tax** was introduced.
- **Prices doubled** between 1913 and 1918, causing great hardship for common people.
- Villagers were **forcibly recruited** into the army, which caused widespread anger.
- In **1918-19 and 1920-21 crops failed**, leading to food shortages, along with an **influenza epidemic**. As per the 1921 census, **12 to 13 million** people died of famines and the epidemic.

2.2 The Idea of Satyagraha

Gandhi returned to India in **January 1915** from South Africa, where he had fought racist rule with a new method of mass agitation called **satyagraha**.

- Satyagraha stressed **the power of truth** and the need to search for truth.
- If the cause is true and the fight is against injustice, **physical force is not needed**. Without being aggressive, a satyagrahi can win by **appealing to the conscience of the oppressor**.
- Gandhi believed this **dharma of non-violence** could unite all Indians.

1917 CHAMPARAN

In **Bihar**, Gandhi inspired peasants to struggle against the **oppressive plantation system** (indigo).

1917 KHEDA

In **Gujarat**, peasants hit by **crop failure and a plague epidemic** could not pay revenue and demanded that it be relaxed.

1918 AHMEDABAD

Gandhi organised a satyagraha movement among the **cotton mill workers**.

SHIVAM BHAIYA SOCH RAHE HAIN

Teen satyagraha, teen saal, teen kaam: **Champaran** = indigo kisan (Bihar), **Kheda** = revenue maafi (Gujarat), **Ahmedabad** = mill workers. Order yaad rakho: **C, K, A** = 1917, 1917, 1918.

2.3 The Rowlatt Act and Jallianwala Bagh, 1919

The **Rowlatt Act (1919)** was hurriedly passed by the Imperial Legislative Council **despite the united opposition of the Indian members**. It gave the government enormous powers to **repress political activities** and allowed **detention of political prisoners without trial for two years**.

- Gandhi launched a nationwide **satyagraha** against this unjust law, starting with a **hartal on 6 April 1919**. Rallies were held, railway workshop workers went on strike, shops closed.
- Alarmed by the spread, the British arrested local leaders in **Amritsar** and barred Gandhi from entering Delhi. On **10 April** police in Amritsar fired on a peaceful procession; **martial law** was imposed under **General Dyer**.

Fig. 2.2 *Bullet marks preserved on a wall at Jallianwala Bagh, Amritsar (photo: Wikimedia Commons, CC BY-SA 4.0).*

13 APRIL 1919: JALLIANWALA BAGH

- A large crowd gathered in the enclosed ground. Some came to protest, others for the annual **Baisakhi fair**; many villagers did not know about martial law.
- Dyer **blocked the exits and opened fire**, killing hundreds. His aim, he said later, was to **"produce a moral effect"**: to create terror in the minds of satyagrahis.

As news spread, crowds took to the streets in many north Indian towns. The government replied with brutal repression: satyagrahis were made to **rub their noses on the ground**, crawl on the streets and salute all sahibs; villages around **Gujranwala** in Punjab were bombed. Seeing violence spread, **Gandhi called off the movement**.

EXAM ALERT!
Jallianwala Bagh = **13 April 1919, Amritsar, General Dyer, Baisakhi**. 3 marks ke answer mein ye chaar cheezein aur "moral effect" wali line zaroor likhna.

2.4 The Khilafat Issue

The Rowlatt satyagraha was still **limited mostly to cities and towns**. Gandhi now wanted a **broad-based movement** and felt that no such movement could be organised without bringing **Hindus and Muslims** closer together. The **Khilafat issue** gave him that chance.

- The First World War ended with the **defeat of Ottoman Turkey**. There were rumours that a harsh peace treaty would be imposed on the Ottoman emperor, the spiritual head of the Islamic world (the **Khalifa**).
- To defend the Khalifa's temporal powers, a **Khilafat Committee** was formed in **Bombay in March 1919**. Young leaders like the brothers **Muhammad Ali and Shaukat Ali** discussed joint mass action with Gandhi.
- At the **Calcutta session of the Congress in September 1920**, Gandhi convinced other leaders to start a non-cooperation movement in support of **Khilafat as well as for swaraj**.

MEME SAMJHO
Astra meme, fact inside

ROWLATT ACT, 1919
"Council ke saare Indian members ne virodh kiya, phir bhi Act pass? Hain? Ye kaise ho gaya?"

Asli baat: The Act was rushed through the Imperial Legislative Council **despite the united opposition of the Indian members**. It allowed detention **without trial for two years**.

2.5 Why Non-Cooperation?

In his famous book **Hind Swaraj (1909)**, Gandhi declared that **British rule was established in India with the cooperation of Indians**, and had survived only because of this cooperation. If Indians refused to cooperate, British rule would collapse within a year and swaraj would come.

Stage 1
Surrender of titles awarded by the government.

→

Stage 2
Boycott of civil services, army, police, courts, legislative councils, schools and **foreign goods**.

→

Stage 3
If the government used repression, a **full civil disobedience** campaign would be launched.

Many in the Congress were worried: they did not want to boycott the **council elections of November 1920** and feared the movement could turn violent. Between September and December there was intense debate. Finally, at the **Nagpur session in December 1920**, a compromise was worked out and the **Non-Cooperation programme was adopted**.

REMEMBER IN ONE LINE

WW1 brought taxes, high prices and forced recruitment; Gandhi's satyagraha (Champaran, Kheda, Ahmedabad) led to the Rowlatt satyagraha and Jallianwala Bagh (1919); Khilafat joined Hindus and Muslims; Calcutta (Sep 1920) proposed and Nagpur (Dec 1920) adopted Non-Cooperation.

MEME SAMJHO

Astra meme, fact inside

HIND SWARAJ LOGIC, 1909

"British Raj chal raha hai Indians ke cooperation se. To cooperation hi band kar do."

Asli baat: Gandhi wrote in **Hind Swaraj (1909)** that British rule survived only because Indians cooperated. Non-cooperation was built on this idea.

Day 8 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **Which option best describes the Rowlatt Act of 1919?** (1)

(a) It gave Indians the right to elect members to the councils.
(b) It gave the government power to repress political activities and detain political prisoners without trial for two years.
(c) It imposed a tax on salt to meet the costs of the war.
(d) It allowed peasants to stop paying land revenue during famines.

2 **How did Indians view the Rowlatt Act with regard to their civil liberties?** (1)

(a) As a law that strengthened the rights of citizens
(b) As a law that severely curtailed the right to personal liberty
(c) As a welfare law meant for Indian peasants
(d) As a law that gave Indians more seats in the councils

3 **In 1919, a group of Indian lawyers and students plan peaceful meetings in several cities against a new law that allows arrest without trial. They believe the protest must stay non-violent. Their protest is closest to:** (1)

(a) The Swadeshi movement of 1905
(b) The Rowlatt satyagraha
(c) The Civil Disobedience Movement
(d) The Khilafat Committee's formation in Bombay

ASSERTION-REASON

4 **Assertion (A):** The Non-Cooperation Movement was adopted at the Madras session of the Congress in 1919.
Reason (R): Chauri Chaura was the place where the Non-Cooperation Movement was called off after a violent clash. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

ASSERTION-REASON

5 **Assertion (A):** According to Gandhi, a satyagrahi could win a battle without being aggressive.
Reason (R): A satyagrahi appeals to the conscience of the oppressor, so violence is not needed even when the other side uses it. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

6 **Why did Mahatma Gandhi organise a satyagraha in the Kheda district of Gujarat in 1917? Give the main reason.** (2)

7 **State any two reasons why the Khilafat Movement was started.** (2)

8 **Explain with examples how the First World War created economic problems in India.** (3)

9 **Describe the Jallianwala Bagh incident of 1919.** (3)

SOURCE-BASED

10 Read the source and answer.

> *The Rowlatt satyagraha had been a widespread movement, but it was still limited mostly to cities and towns. Mahatma Gandhi now felt the need to launch a more broad-based movement in India. But he was certain that no such movement could be organised without bringing the Hindus and Muslims closer together. One way of doing this, he felt, was to take up the Khilafat issue.*

(i) What was the main weakness of the Rowlatt satyagraha? (1)
(ii) Who was the Khalifa, and why were Indian Muslims worried about him after the war? (1)
(iii) How did Gandhi use the Khilafat issue to widen the national movement? (2) (4)

Day 8 Answers with explanation

1. **(b)** The Act let the government repress political activity and keep political prisoners in jail for two years without trial.
2. **(b)** Indians saw it as a direct attack on personal liberty and civil rights.
3. **(b)** The Rowlatt satyagraha of 1919 was a peaceful, nationwide protest against this law.
4. **(d)** A is false: Non-Cooperation was adopted at **Nagpur, December 1920**. R is true: it was withdrawn after Chauri Chaura (1922).
5. **(a)** Both true; appealing to the oppressor's conscience is exactly why a satyagrahi does not need aggression.
6. Peasants of Kheda were hit by **crop failure and a plague epidemic**. They could not pay the revenue and demanded that its collection be **relaxed**.
7. (1) After WW1, Ottoman Turkey was defeated and a **harsh treaty** on the Ottoman emperor (the Khalifa) was feared. (2) Muslims wanted to **defend the Khalifa's temporal powers**; the Khilafat Committee was formed in Bombay, March 1919.
8. (1) Huge **defence expenditure** met by war loans and higher taxes; customs duties raised, **income tax** introduced. (2) **Prices doubled** (1913 to 1918). (3) **Forced recruitment** of villagers. (4) Crop failures (1918-21) and food shortages.
9. On **13 April 1919** at Amritsar, a crowd (some protesting, some at the Baisakhi fair) gathered in the enclosed Jallianwala Bagh, unaware of martial law. **General Dyer** blocked the exits and fired, killing hundreds, to "produce a moral effect" of terror.
10. (i) It was confined mostly to **cities and towns**. (ii) The Khalifa was the **Ottoman emperor**, spiritual head of the Islamic world; a harsh peace treaty after WW1 was feared. (iii) By joining the Khilafat cause with swaraj in one non-cooperation movement, he **brought Hindus and Muslims together** in a broad-based struggle.

Next: Day 9, History: Nationalism in India II

DAY 09

HISTORY | CHAPTER 2 | PART 2 OF 3

Differing Strands and the Civil Disobedience Movement

Nationalism in India

Aaj ka target (pages 47-51)

- ☐ Salt March aur Civil Disobedience
- ☐ Simon Commission kyun aaya, kyun virodh hua
- ☐ 10 sawal, galti ho to tension nahi, likh lo
- ☐ Lagbhag 100 min, ek hi baithak

2.6 Differing Strands within the Movement

The **Non-Cooperation-Khilafat Movement began in January 1921**. Many social groups joined it, each with its own hopes. All of them answered the call of **swaraj**, but the word meant different things to different people.

MOVEMENT IN THE TOWNS

- The **middle class** led it: thousands of students left government schools, headmasters and teachers resigned, lawyers gave up their practices.
- **Council elections were boycotted** in most provinces, except **Madras**, where the Justice Party (of non-Brahmans) saw elections as a way to gain power.
- Foreign goods were boycotted, **liquor shops picketed** and foreign cloth burnt in huge bonfires. The import of foreign cloth **halved between 1921 and 1922**, from Rs 102 crore to Rs 57 crore. Indian mills and handlooms gained.

WHY DID IT SLOW DOWN IN THE CITIES?

(1) **Khadi** was often more expensive than mill cloth; poor people could not afford it. (2) Boycotting British institutions needed **Indian alternatives**, which came up slowly, so students and teachers went back to government schools and lawyers to courts.

REBELLION IN THE COUNTRYSIDE

PEASANTS OF AWADH

Led by **Baba Ramchandra**, a sanyasi who had been an indentured labourer in Fiji. Against talukdars and landlords who took very high rents and **begar**. Demands: **reduce revenue, abolish begar, social boycott** of oppressive landlords (nai-dhobi bandhs). **Oudh Kisan Sabha** set up by Nehru, Baba Ramchandra and others in Oct 1920.

TRIBALS OF GUDEM HILLS

In **Andhra Pradesh**, early 1920s, a militant guerrilla movement as forests were closed and grazing and fuelwood banned. **Alluri Sitaram Raju** praised Gandhi but believed swaraj could come by **force**. He was captured and executed in **1924**.

PLANTATION WORKERS OF ASSAM

The **Inland Emigration Act of 1859** did not let them leave the gardens without permission. For them swaraj meant the **right to move freely** and keep links with their village. Many left for home but were stranded by a railway and steamer strike and beaten by police.

SHIVAM BHAIYA SAYS

Exam mein aksar poochte hain: **"Different groups ke liye swaraj ka matlab kya tha?"** Teen jawab ready rakho: Awadh kisan = begar aur high rent se mukti; Gudem tribals = forest pe haq; Assam workers = aazaadi se aana-jaana.

2.7 Towards Civil Disobedience

- **February 1922, Chauri Chaura** (Gorakhpur): a peaceful demonstration turned into a violent clash with the police. Gandhi **withdrew the Non-Cooperation Movement**; he felt satyagrahis needed more training.
- **C.R. Das and Motilal Nehru** formed the **Swaraj Party** to return to council politics. Younger leaders like **Jawaharlal Nehru and Subhas Chandra Bose** pressed for radical mass agitation and full independence.
- The **worldwide economic depression** hit hard: agricultural prices began to fall from 1926 and **collapsed after 1930**.
- The **Simon Commission** arrived in **1928**. It had **no Indian member**, so it was greeted with the slogan **"Go back Simon"**.
- In October 1929 Viceroy **Lord Irwin** made a vague offer of **dominion status** and a Round Table Conference. At the **Lahore session, December 1929**, under Nehru, the Congress demanded **Purna Swaraj**; **26 January 1930** was celebrated as Independence Day.

MEME SAMJHO

Astra meme, fact inside

CHAURI CHAURA, FEBRUARY 1922

"Movement violent ho gaya? Non-Cooperation, samay aa gaya hai aapse vida lene ka."

Asli baat: After the violent clash at **Chauri Chaura** in 1922, Gandhi called off the Non-Cooperation Movement.

2.8 The Salt March and Civil Disobedience

Fig. 2.3 Gandhi at Dandi, 5 April 1930 (public domain).

- Gandhi found in **salt** a powerful symbol to unite the nation: it was eaten by **rich and poor alike**, and the tax on it and the government's monopoly over its production were oppressive.
- On **31 January 1930** he sent Lord Irwin a letter with **eleven demands**, the most stirring being the demand to **abolish the salt tax**. If they were not met by **11 March**, the Congress would launch civil disobedience.
- Irwin did not respond. Gandhi set out from **Sabarmati** with **78 volunteers** and walked **240 miles to Dandi** in **24 days**. On **6 April 1930** he ceremonially broke the law by making salt from boiling sea water.

This began the **Civil Disobedience Movement**. Unlike Non-Cooperation, people were now asked not only to refuse cooperation but also to **break colonial laws**: salt was made, foreign cloth

boycotted, liquor shops picketed, peasants refused to pay revenue and **chaukidari tax**, village officials resigned and forest people broke forest laws.

- The government arrested leaders. When **Abdul Ghaffar Khan** was arrested (April 1930), crowds in Peshawar faced police firing; when Gandhi was arrested, workers in **Sholapur** attacked police posts and government buildings.
- Gandhi called off the movement and signed the **Gandhi-Irwin Pact on 5 March 1931**: he agreed to attend the **Second Round Table Conference** in London, and the government agreed to **release political prisoners**.
- The conference failed (December 1931). Gandhi relaunched the movement, but by **1934** it had lost its momentum.

MEME SAMJHO

Astra meme, fact inside

DANDI, 6 APRIL 1930

"Ek mutthi namak se British salt law tod diya. Aaj to maza aa jayega!"

Asli baat: The march covered **240 miles in 24 days** with **78 volunteers**; making salt at Dandi started the Civil Disobedience Movement.

2.9 How Participants Saw the Movement

RICH PEASANTS

Patidars of Gujarat and **Jats** of UP grew commercial crops and were hit by falling prices. They wanted revenue cut; when the movement was called off in 1931 without this, many did not rejoin in 1932.

POOR PEASANTS

Many were tenants on rented land. They wanted **unpaid rent remitted**. The Congress, afraid of upsetting rich peasants and landlords, was unwilling to back **no-rent campaigns**.

BUSINESS CLASSES

Wanted protection against foreign goods. Formed the Indian Industrial and Commercial Congress (1920) and **FICCI (1927)**; led by **Purshottamdas Thakurdas and G.D. Birla**. Gave money and refused to sell foreign goods, but cooled after 1931.

WORKERS AND WOMEN

Industrial workers joined little, except in the **Nagpur** region. **Women** joined in large numbers: salt marches, picketing of liquor and cloth shops; many went to jail.

2.10 The Limits of Civil Disobedience

- **Dalits:** Gandhi called them **harijans** (children of God). **Dr B.R. Ambedkar** organised them into the **Depressed Classes Association in 1930** and demanded **separate electorates** at the Second Round Table Conference. Gandhi opposed this and went on a fast unto death.
- **Poona Pact, September 1932:** Depressed Classes got **reserved seats** in provincial and central legislative councils, but they were to be **voted in by the general electorate**.
- **Muslims:** after Non-Cooperation-Khilafat ended, many felt alienated as communal clashes grew. **M.A. Jinnah** was willing to drop separate electorates if Muslims got **reserved seats in the Central Assembly** and seats in proportion to population in Bengal and Punjab. The **1928 All Parties Conference** failed when M.R. Jayakar of the Hindu Mahasabha opposed it.

SHIVAM BHAIYA KA NOTE

NCM vs CDM ka difference 3 marks ka pakka sawaal hai. NCM = **sirf cooperation band** (titles, schools, courts, foreign goods). CDM = **colonial laws todna** (salt law, forest laws, revenue na dena).

Day 9 Practice

10 board-pattern questions | solve first, then check

MCQ

1 Arrange in chronological order: (I) Beginning of the Dandi March (II) Simon Commission arrives in India (III) Second Round Table Conference (IV) Chauri Chaura incident (1)

(a) (IV), (II), (III), (I) **(b)** (IV), (II), (I), (III)
(c) (II), (IV), (I), (III) **(d)** (I), (IV), (II), (III)

2 Put these in the correct order: (I) Gandhi-Irwin Pact (II) Formation of the Swaraj Party (III) Lahore session of the Congress (IV) Formation of the Depressed Classes Association (1)

(a) (II), (III), (IV), (I) **(b)** (III), (II), (I), (IV)
(c) (II), (IV), (III), (I) **(d)** (IV), (II), (III), (I)

3 Which of these were demands of the peasant movement in Awadh led by Baba Ramchandra? (I) Reduction of revenue (II) Abolition of begar (III) Social boycott of oppressive landlords (IV) Redistribution of land to the landless (1)

(a) (I) and (IV) only **(b)** (I), (II) and (III) only
(c) (II) and (IV) only **(d)** (I), (II), (III) and (IV)

4 What did the Gandhi-Irwin Pact of March 1931 settle? (1)

(a) Gandhi would accept dominion status for India.
(b) The government would give separate electorates to Dalits.
(c) Gandhi would take part in the Round Table Conference in London.
(d) The salt tax would be abolished at once.

5 Read the statements and choose the correct option.
(I) Non-Cooperation began with the surrender of titles and boycotts, while Civil Disobedience began with breaking colonial laws.
(II) Non-Cooperation demanded separate electorates for Dalits. (1)

(a) Only (I) is correct. **(b)** Only (II) is correct.
(c) Both are correct. **(d)** Neither is correct.

6 In which movement did women take part in large numbers, joining salt marches and picketing shops? (1)

(a) Swadeshi Movement
(b) Rowlatt Satyagraha
(c) Civil Disobedience Movement
(d) Khilafat Movement

7 Identify the **incorrect** statement. (1)

(a) Hindu Mahasabha leader M.R. Jayakar opposed the compromise at the 1928 All Parties Conference.
(b) Maulana Azad was the president of the Muslim League.
(c) Jinnah was ready to drop separate electorates for reserved seats in the Central Assembly.
(d) Communal clashes increased after the Non-Cooperation-Khilafat Movement declined.

SHORT ANSWER

8 What did swaraj mean to the plantation workers of Assam during the Non-Cooperation Movement? (2)

9 Why did the Non-Cooperation Movement slow down in the cities? Explain. (3)

SOURCE-BASED

10 Read the source and answer.

> *Mahatma Gandhi's letter was, in a way, an ultimatum. If the demands were not fulfilled by 11 March, the letter stated, the Congress would launch a civil disobedience campaign. Irwin was unwilling to negotiate. So Mahatma Gandhi started his famous salt march accompanied by 78 of his trusted volunteers.*

(i) To whom was the letter written, and when? (1)
(ii) Why was salt chosen as the main issue? (1)
(iii) How was the Civil Disobedience Movement different from the Non-Cooperation Movement? (2) (4)

Day 9 Answers with explanation

1 **(b)** Chauri Chaura 1922, Simon Commission 1928, Dandi March 1930, Second RTC 1931.

2 **(a)** Swaraj Party 1923, Lahore session Dec 1929, Depressed Classes Association 1930, Gandhi-Irwin Pact March 1931.

3 **(b)** Land redistribution was not among Baba Ramchandra's demands.

4 **(c)** Gandhi agreed to attend the Second Round Table Conference; prisoners were to be released.

5 **(a)** Separate electorates for Dalits were Ambedkar's demand at the Second RTC, not a Non-Cooperation demand.

6 **(c)** Women took part on a large scale in the Civil Disobedience Movement.

7 **(b)** Maulana Azad was a Congress leader, not president of the Muslim League.

8 Swaraj meant the **right to move freely** in and out of the confined tea gardens (barred by the Inland Emigration Act, 1859) and to **keep a link with the village** they came from.

9 (1) **Khadi** was costlier than mill cloth, so the poor could not afford it. (2) **Alternative Indian institutions** came up slowly, so students and teachers returned to government schools and lawyers to courts. (3) The boycott could not last without these.

10 (i) To Viceroy **Lord Irwin**, on **31 January 1930**. (ii) Salt was used by rich and poor alike; the **salt tax** and government monopoly hurt everyone. (iii) In CDM people were asked to **break colonial laws**, not just refuse cooperation as in NCM.

DAY 10

HISTORY | CHAPTER 2 | PART 3 OF 3

The Sense of Collective Belonging + Map Work

Nationalism in India

Aaj ka target (pages 51-55)

- ☐ Bharat Mata, flags, folklore aur maps
- ☐ Map ke saare items khud mark karo, dekh ke nahi
- ☐ Chapter test ke 15 sawal, timer laga ke
- ☐ 2 ghante, aur Chapter 2 khatam

2.11 The Sense of Collective Belonging

Nationalism spreads when people begin to believe they are all part of **the same nation**. This sense of collective belonging came partly through united struggles, and partly through **history and fiction, folklore and songs, popular prints and symbols**.

Fig. 2.4 *Abanindranath Tagore, Bharat Mata, 1905 (public domain).*

1. THE IMAGE OF BHARAT MATA

- The identity of India came to be visually linked with the image of **Bharat Mata**.
- In the **1870s**, **Bankim Chandra Chattopadhyay** wrote **"Vande Mataram"** as a hymn to the motherland. It was later included in his novel **Anandamath** and widely sung during the **Swadeshi movement** in Bengal.
- **Abanindranath Tagore** painted Bharat Mata as an **ascetic figure**: calm, composed, divine and spiritual.
- Later images showed her with a **trishul**, standing beside a **lion and an elephant**: symbols of **power and authority**. Devotion to this figure became a sign of nationalism.

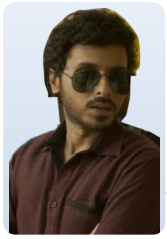

2. FOLKLORE

- Nationalists recorded folk tales sung by bards and toured villages to gather **folk songs and legends**. They believed these gave a **true picture of traditional culture** damaged by outside forces; preserving them was a way to **restore a sense of pride** in one's past.
- In Bengal, **Rabindranath Tagore** collected ballads, nursery rhymes and myths and led the folk revival. In Madras, **Natesa Sastri** published **The Folklore of Southern India**, a four-volume collection of Tamil folk tales.

3. ICONS, SYMBOLS AND FLAGS

- During the **Swadeshi movement** in Bengal, a **tricolour flag (red, green, yellow)** was designed with **eight lotuses** for eight provinces of British India and a **crescent moon** for Hindus and Muslims.
- By **1921**, **Gandhi designed the Swaraj flag**: a tricolour (**red, green, white**) with a **spinning wheel** in the centre, standing for the Gandhian ideal of **self-help**. Carrying the flag during marches became a symbol of **defiance**.

MEME SAMJHO Astra meme, fact inside

SWARAJ FLAG, 1921

"Beech mein charkha, haath mein tiranga. Flag uthaya matlab British ko seedha challenge. Jalwa hai hamara!"

Asli baat: Gandhi's Swaraj flag (red, green, white with a **spinning wheel**) stood for self-help; carrying it in marches was an act of **defiance**.

4. REINTERPRETATION OF HISTORY

- The British saw Indians as **backward and primitive**, unable to govern themselves. Indians began looking back to discover India's great achievements.
- They wrote about the glorious ancient past when **art and architecture, science and mathematics, religion and culture, law and philosophy, crafts and trade** had flourished. This was followed by a history of **decline under colonial rule**.
- Readers were urged to take pride in India's past and struggle to change their miserable present under British rule.

2.12 Map Work: Mark These Eight Places

Map 2.1 *Chapter 2 map items, 2026-27 list. Base map: Wikimedia Commons (CC BY-SA 3.0).*

1. Calcutta	INC session, Sep 1920
2. Nagpur	INC session, Dec 1920
3. Madras	INC session, 1927
4. Champaran	Bihar: indigo planters, 1917
5. Kheda	Gujarat: peasant satyagraha, 1917
6. Ahmedabad	Gujarat: mill workers, 1918
7. Amritsar	Punjab: Jallianwala Bagh, 1919
8. Dandi	Gujarat: Civil Disobedience, 1930

MAP TRICK

Gujarat mein **teen** points: **Ahmedabad** (1918), **Kheda** just south of it (1917) and **Dandi** on the coast (1930). Blank map pe 3 minute mein saare 8 mark karo.

SHIVAM BHAIYA SOCH RAHE HAIN

Dhyan do: ye efforts poore India ko jodne ke liye the, par jab past ko **Hindu iconography** ke saath glorify kiya gaya, to **doosre communities ke log khud ko left out** mehsoos karne lage. Ye "problem" wala point bhi answer mein likhna.

SHIVAM BHAIYA KA NOTE

Chapter 2 complete! Aaj raat ek timeline khud banao: **1915 se 1934** tak (Champaran, Rowlatt, Jallianwala, Calcutta, Nagpur, Chauri Chaura, Simon, Lahore, Dandi, Gandhi-Irwin, Poona Pact). Kal Day 11 pe History ka Revision Day hai.

Day 10 Practice

15 board-pattern questions | solve first, then check

MCQ

1 A later image of Bharat Mata shows her holding a trishul, standing beside a lion and an elephant. What do the lion and elephant stand for? (1)

(a) Peace and harmony (b) Spiritual devotion
(c) Power and authority (d) Wealth and trade

2 Which person is connected with collecting ballads, nursery rhymes and myths to revive folklore in Bengal? (1)

(a) Bankim Chandra Chattopadhyay
(b) Abanindranath Tagore
(c) Rabindranath Tagore
(d) Natesa Sastri

3 Why did Indian nationalists in the late 19th century record folk tales and songs? (1)

(a) To promote one uniform culture across all regions
(b) To restore a sense of pride in traditional culture
(c) To translate them into English for the British
(d) To earn money from publishing them

4 The Swaraj flag designed by Gandhi by 1921 had: (1)

(a) red, green and yellow bands with eight lotuses
(b) red, green and white bands with a spinning wheel
(c) saffron, white and green bands with the Ashoka Chakra
(d) a crescent moon on a green background

5 Which place on the map is linked with the 1917 movement of peasants against the indigo plantation system? (1)

(a) Kheda (b) Champaran
(c) Ahmedabad (d) Dandi

6 At which session of the Congress was the Non-Cooperation programme finally adopted? (1)

(a) Calcutta, September 1920 (b) Madras, 1927
(c) Nagpur, December 1920 (d) Lahore, December 1929

ASSERTION-REASON

7 **Assertion (A):** The Salt March became an effective tool of resistance against colonial rule. **Reason (R):** Salt was consumed by the rich and the poor alike, and the tax on it was seen as oppressive. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

8 Who organised the Dalits into the Depressed Classes Association? What compromise did the Poona Pact of 1932 make? (3)

9 What did Gandhi do for the upliftment of the Dalits? Give three points. (3)

10 How did Indian merchants and industrialists relate to the Civil Disobedience Movement? Explain. (3)

11 How did the tribal peasants of the Gudem Hills interpret Gandhi's message and the idea of swaraj? (3)

12 "Mahatma Gandhi used salt as a powerful symbol to unite the nation." Justify the statement. (3)

LONG ANSWER

13 Analyse the ways in which people of different communities developed a sense of collective belonging in India. (5)

MAP

14 On an outline map of India, locate and label: (a) the city where the Congress session of December 1920 was held; (b) the place of the Jallianwala Bagh incident; (c) the place where Gandhi broke the salt law. (3)

SOURCE-BASED

15 **Read the source and answer.**

> *A month later, when Mahatma Gandhi himself was arrested, industrial workers in Sholapur attacked police posts, municipal buildings, law courts and railway stations, all structures that symbolised British rule. A frightened government responded with a policy of brutal repression.*

(i) Which movement is being described? (1)
(ii) Name the leader whose arrest a month earlier led to protests in Peshawar. (1)
(iii) Why did Gandhi decide to call off this movement in 1931, and what did he agree to? (2)
(4)

Day 10 Answers with explanation

1 **(c)** Power and authority, unlike Abanindranath Tagore's calm, ascetic Bharat Mata.

2 **(c)** Rabindranath Tagore led the folk revival in Bengal; Natesa Sastri did this in Madras.

3 **(b)** Folklore was seen as a true picture of traditional culture; preserving it restored pride in the past.

4 **(b)** Red, green, white with a spinning wheel. Option (a) is the Swadeshi flag of Bengal.

5 **(b)** Champaran, in Bihar.

6 **(c)** Proposed at Calcutta (Sep 1920), adopted at Nagpur (Dec 1920).

7 **(a)** Because everyone ate salt, a tax on it united all classes; R explains A.

Day 10 Answers continued

8 **Dr B.R. Ambedkar**, in 1930. The **Poona Pact (Sep 1932)** gave Depressed Classes **reserved seats** in provincial and central councils, but they were to be **elected by the general electorate**.

9 (1) Called them **harijans**, children of God. (2) Organised **satyagraha** for their entry into temples and use of public wells, tanks, roads and schools. (3) Himself cleaned toilets to dignify the work of the bhangi (sweepers) and urged upper castes to give up untouchability.

10 (1) They wanted **protection against imports** and a rupee-sterling exchange ratio that discouraged imports; formed FICCI (1927) under Purshottamdas Thakurdas and G.D. Birla. (2) They **gave money** and refused to buy or sell imported goods. (3) After the failed RTC and the spread of militant activity they became **less enthusiastic**.

11 In the Gudem Hills (Andhra Pradesh) the government had closed forests, stopping grazing and collection of fuelwood. The tribals rebelled under **Alluri Sitaram Raju**, who spoke of Gandhi but felt India could be liberated only by **force**; they fought a **guerrilla war**. For them swaraj meant regaining their rights over the forests.

12 (1) Salt was eaten by **rich and poor alike**, one of the most essential foods. (2) The **salt tax and government monopoly** on its production hurt everyone. (3) The Dandi March (240 miles, 24 days) drew huge crowds and breaking the salt law began the **Civil Disobedience Movement**.

13 (1) **Bharat Mata** image and Vande Mataram (Bankim Chandra, Abanindranath Tagore). (2) **Folklore** collected by Rabindranath Tagore and Natesa Sastri. (3) **Flags**: Swadeshi tricolour and Gandhi's Swaraj flag (1921). (4) **Reinterpretation of history** showing India's glorious past. (5) United struggles; but Hindu-centred images made some communities feel left out.

14 (a) **Nagpur** (Maharashtra). (b) **Amritsar** (Punjab). (c) **Dandi** (Gujarat). See Map 2.1.

15 (i) The **Civil Disobedience Movement** (1930). (ii) **Abdul Ghaffar Khan**. (iii) The movement had turned violent and repression was brutal; under the **Gandhi-Irwin Pact (March 1931)** he agreed to attend the Second Round Table Conference and the government agreed to release political prisoners.

CHAPTER 2 TIMELINE: ONE LOOK BEFORE REVISION DAY

Jan 1915	Gandhi returns from South Africa	**Feb 1922**	Chauri Chaura: NCM withdrawn
1917	Champaran (Bihar), Kheda (Gujarat) satyagrahas	**1928**	Simon Commission: "Go back Simon"
1918	Ahmedabad mill workers' satyagraha	**Dec 1929**	Lahore session: Purna Swaraj
Mar 1919	Rowlatt Act; Khilafat Committee, Bombay	**6 Apr 1930**	Dandi: salt law broken, CDM begins
13 Apr 1919	Jallianwala Bagh, Amritsar	**5 Mar 1931**	Gandhi-Irwin Pact
Sep 1920	Calcutta session: NCM proposed	**Sep 1932**	Poona Pact
Dec 1920	Nagpur session: NCM adopted	**1934**	CDM loses momentum

Day 10 Extra Practice

3 more questions from this chapter | new, no repeats

MCQ

1 **In which month and year did the Non-Cooperation-Khilafat Movement actually begin?** (1)

(a) January 1921 **(b)** April 1919
(c) December 1929 **(d)** February 1922

2 **During the Non-Cooperation Movement, volunteers stood at the doors of shops selling foreign cloth and stopped people from going in. What is this form of protest called?** (1)

(a) Begar **(b)** Picketing
(c) Bandh **(d)** Boycott

3 **The council elections of 1921 were boycotted in most provinces. Which party did not boycott them and contested in Madras?** (1)

(a) Justice Party **(b)** Indian National Congress
(c) Muslim League **(d)** Swaraj Party

Day 10 Extra Practice: Answers

1 **(a)** The programme was adopted at the Nagpur session in December 1920, and the movement began in January 1921. It was withdrawn in February 1922.

2 **(b)** Picketing means blocking the entrance to a shop, factory or office as a form of protest.

3 **(a)** The Justice Party, the party of the non-Brahmans in Madras, felt that entering the council was a way to gain some power. Such power was usually open only to Brahmans.

DAY 11

REVISION DAY 1 | HISTORY CH1 + CH2

Revision 1: Nationalism in Europe and in India

No new pages today: recall from memory, then a 25-question sprint

Aaj ka target

- ☐ History ke Days 1, 2, 3, 8, 9, 10, pehle bina book khole recall
- ☐ 40 min recall, 40 min sprint, 40 min fix
- ☐ 25 MCQ ka sprint ek saans mein
- ☐ Score kitna aaya, yahin pencil se likh do

HOW TO USE A REVISION DAY

Step 1 (40 min): cover the recall sheet, write everything you remember about each card, then open and compare. **Step 2 (40 min):** solve the 25-question sprint in one sitting, no notes. **Step 3 (40 min):** check, and copy every wrong answer with the right fact into your Mistake Book.

R1 Recall sheet: The Rise of Nationalism in Europe

1789	French Revolution: sovereignty passes from the monarch to the people (the nation).
1804	Napoleonic Code (Civil Code): equality before law, right to property, end of feudal privileges.
1815	Napoleon defeated by Britain, Russia, Prussia and Austria; Congress of Vienna hosted by Metternich; conservative order restored.
1821 to 1832	Greek war of independence; Treaty of Constantinople (1832) recognises Greece.
1830 / 1848	July Revolution in France (Belgium breaks from the Netherlands); 1848 revolutions; Frankfurt Parliament (May 1848).
1859 to 1870	Unification of Italy (Victor Emmanuel II made king in 1861).
1866 to 1871	Unification of Germany; Kaiser William I proclaimed at Versailles, January 1871.

FRENCH REVOLUTION: BUILDING ONE NATION

- la patrie (fatherland) and le citoyen (citizen)
- new tricolour flag; Estates General renamed National Assembly
- centralised administration, uniform laws, weights and measures
- internal customs duties abolished; French of Paris made the common language

LIBERALISM (LATIN LIBER = FREE)

- individual freedom and equality before law
- government by consent; end of autocracy and clerical privilege
- economic side: freedom of markets, end of state restrictions on goods and capital
- Zollverein (1834): Prussia-led customs union, tariff barriers abolished, currencies cut from over 30 to 2

CONSERVATISM AFTER 1815

- Treaty of Vienna: Bourbons restored in France
- France lost lands annexed by Napoleon
- states set up on France's borders; Prussia, Austria, Russia gained
- autocratic regimes: censorship, no criticism or dissent

REVOLUTIONARIES AND CULTURE

- Giuseppe Mazzini: Young Italy (Marseilles), Young Europe (Berne); "the most dangerous enemy of our social order" (Metternich)
- Romanticism: emotions, folk culture; Herder: das volk
- Grimm brothers: folktales, German identity
- language: Russian imposed in Poland; Polish used in church and as resistance

GERMANY AND ITALY

- Germany: Prussia, Otto von Bismarck, "blood and iron"; three wars in 7 years with Austria, Denmark and France
- Italy: Mazzini, Count Cavour (Sardinia-Piedmont, alliance with France), Giuseppe Garibaldi (Red Shirts, 1860, South Italy and Two Sicilies)
- Victor Emmanuel II: king of united Italy, 1861

GERMANY AND ITALY

BRITAIN, ALLEGORIES, BALKANS

- Britain: Act of Union 1707 (England + Scotland), Ireland joined 1801; Union Jack, English language
- Marianne (France), Germania (Germany): oak leaves = heroism; broken chains = freedom; sword = readiness to fight
- Balkans: under the Ottoman Empire; ideas of romantic nationalism; rivalry of big powers; led to the First World War

R2 Recall sheet: Nationalism in India

1915 to 1918	Gandhiji returns from South Africa (Jan 1915); Champaran (1917), Kheda (1917), Ahmedabad mill workers (1918).
1919	Rowlatt Act; Jallianwala Bagh massacre, Amritsar, 13 April 1919.
1920	Khilafat issue joined with Non-Cooperation; INC Calcutta session (Sept) and Nagpur session (Dec).
1922	Chauri Chaura violence; Gandhiji withdraws Non-Cooperation (Feb 1922).
1927 to 1929	Simon Commission (arrives 1928); Madras session (1927); Lahore session (Dec 1929): Purna Swaraj, Nehru presiding.
1930 to 1932	Dandi March (12 March 1930); Civil Disobedience; Gandhi-Irwin Pact (March 1931); Second Round Table Conference; Poona Pact (Sept 1932).

NON-COOPERATION (1921 TO 1922)

- cities: boycott of foreign goods, schools, councils; liquor shops picketed; khadi
- Awadh peasants: Baba Ramchandra, Oudh Kisan Sabha (Nehru)
- Gudem Hills, Andhra: Alluri Sitaram Raju, guerrilla war
- Assam plantation workers: Inland Emigration Act 1859 broken

CIVIL DISOBEDIENCE (1930 TO 1934)

- 11 demands to Irwin; Salt March 240 miles, Sabarmati to Dandi
- rich peasants, poor peasants, business class (FICCI, Purshottamdas Thakurdas, G.D. Birla), women joined
- limited: Dalits (Ambedkar, Depressed Classes Association 1930), many Muslims stayed away
- Poona Pact 1932: reserved seats for Depressed Classes in councils

SATYAGRAHA

- the power of truth and the need to search for truth
- non-violent; appeal to the conscience of the oppressor
- first in South Africa, then Champaran, Kheda, Ahmedabad

SENSE OF COLLECTIVE BELONGING

- Bharat Mata: Bankim Chandra (Vande Mataram, Anandamath), painted by Abanindranath Tagore
- folklore: Rabindranath Tagore, Natesa Sastri
- swaraj flag (1921): red, green, white with a spinning wheel
- reinterpreting history: glory of ancient India

SHIVAM BHAIYA SOCH RAHE HAIN

Dates ka chakkar? Sirf **pairs** mein yaad karo: **1919** Rowlatt + Jallianwala, **1920** Calcutta + Nagpur, **1922** Chauri Chaura, **1930** Dandi, **1932** Poona Pact. Europe mein **1815** Vienna, **1848** liberals, **1871** Germany. Bas itna pakka, aadha paper aasaan.

Day 11 Sprint

25 MCQs | 30 min | 22+ excellent, below 17 redo on Day 41

EUROPE (CH1)

1 Arrange in correct order: (I) Greek war of independence begins (II) Treaty of Vienna (III) Napoleonic wars begin (IV) Germany unified (1)

(a) (I), (III), (II), (IV) **(b)** (II), (III), (I), (IV)
(c) (III), (II), (I), (IV) **(d)** (III), (I), (II), (IV)

2 The main aim of the Treaty of Vienna (1815) was to: (1)

(a) undo most of the changes made during the Napoleonic wars
(b) unify the German states
(c) set up the Zollverein
(d) spread liberal ideas across Europe

3 **Which group formed the majority of the population of Europe in the mid-18th century? (1)**

(a) Industrial working class
(b) Landed aristocracy
(c) Middle-class professionals
(d) Peasantry

4 **In the allegory of Germania, the oak leaves stand for: (1)**

(a) freedom **(b)** peace
(c) readiness to fight **(d)** heroism

5 **Who founded the secret societies Young Italy and Young Europe? (1)**

(a) Giuseppe Mazzini **(b)** Count Cavour
(c) Giuseppe Garibaldi **(d)** Victor Emmanuel II

6 **The Zollverein of 1834, formed at the initiative of Prussia, was a: (1)**

(a) parliament **(b)** peace treaty
(c) secret society **(d)** customs union

7 **Who was proclaimed the German Emperor at Versailles in January 1871? (1)**

(a) Kaiser William I of Prussia
(b) Victor Emmanuel II
(c) Friedrich Wilhelm IV
(d) Otto von Bismarck

8 **Which treaty recognised Greece as an independent nation in 1832? (1)**

(a) Treaty of Paris **(b)** Treaty of Vienna
(c) Treaty of Constantinople **(d)** Treaty of Versailles

9 **"When France sneezes, the rest of Europe catches cold." Who said this? (1)**

(a) Metternich **(b)** Bismarck
(c) Mazzini **(d)** Napoleon

10 **Romantic artists and poets tried to build a sense of nationhood mainly through: (1)**

(a) a shared collective heritage, folk culture and emotions
(b) free trade
(c) military victories
(d) reason and science

11 **Which statement about the Act of Union, 1707 is correct? (1)**

(a) It gave Scotland a separate parliament
(b) It united England and Ireland
(c) It formed the United Kingdom of Great Britain by uniting England and Scotland
(d) It ended the British monarchy

12 **Which of the following was NOT a feature of the Napoleonic Code of 1804? (1)**

(a) Universal adult franchise
(b) Right to property
(c) Abolition of feudal privileges
(d) Equality before the law

INDIA (CH2)

13 **Why did Gandhiji call off the Non-Cooperation Movement in February 1922? (1)**

(a) The Gandhi-Irwin Pact was signed
(b) The Rowlatt Act was withdrawn
(c) The Simon Commission arrived
(d) Violence broke out at Chauri Chaura

14 **The Jallianwala Bagh incident took place in: (1)**

(a) Amritsar, 13 April 1919 **(b)** Delhi, 1919
(c) Lahore, 1920 **(d)** Amritsar, 1922

15 **Who organised the peasants of Awadh against talukdars and landlords in 1920? (1)**

(a) Baba Ramchandra **(b)** C.R. Das
(c) Sardar Patel **(d)** Alluri Sitaram Raju

16 **The Simon Commission was boycotted because: (1)**

(a) it had no Indian member **(b)** it banned the Congress
(c) it raised land revenue **(d)** it supported the Khilafat

17 **Under the Inland Emigration Act of 1859, plantation workers in Assam: (1)**

(a) could vote in elections
(b) could form trade unions
(c) were not allowed to leave the tea gardens without permission
(d) were given free land

18 **At which session did the Congress formalise the demand for Purna Swaraj in December 1929? (1)**

(a) Madras **(b)** Calcutta
(c) Nagpur **(d)** Lahore

19 **The Salt March went from Sabarmati Ashram to: (1)**

(a) Chauri Chaura **(b)** Kheda
(c) Champaran **(d)** Dandi

20 **Which statement about the Poona Pact (September 1932) is correct? (1)**

(a) It was signed between Gandhiji and Irwin
(b) It gave reserved seats to the Depressed Classes in provincial and central councils, voted in by the general electorate
(c) It ended the Civil Disobedience Movement
(d) It gave separate electorates to Dalits

21 **Who wrote "Vande Mataram" as a hymn to the motherland?** (1)

(a) Rabindranath Tagore
(b) Bankim Chandra Chattopadhyay
(c) Abanindranath Tagore
(d) Natesa Sastri

22 **Satyagraha emphasised:** (1)

(a) armed struggle
(b) the power of truth and non-violence
(c) violence against officials
(d) boycott of elections only

23 **Which group of business people founded FICCI in 1927 and supported Civil Disobedience at first?** (1)

(a) Shaukat Ali and Muhammad Ali
(b) Motilal Nehru and C.R. Das
(c) Alluri Sitaram Raju and Baba Ramchandra
(d) Purshottamdas Thakurdas and G.D. Birla

24 **Match: (I) Champaran (II) Kheda (III) Ahmedabad. A: cotton mill workers; B: indigo planters; C: peasants hit by crop failure** (1)

(a) I-C, II-A, III-B **(b)** I-B, II-C, III-A
(c) I-B, II-A, III-C **(d)** I-A, II-B, III-C

25 **Who led the Khilafat Committee formed in Bombay in March 1919?** (1)

(a) Jawaharlal Nehru
(b) Muhammad Ali and Shaukat Ali
(c) B.R. Ambedkar
(d) Lord Irwin

Day 11 Answers with explanation

1 **(c)** Napoleonic wars 1797, Vienna 1815, Greek war 1821, Germany 1871.

2 **(a)** Vienna aimed to undo Napoleonic changes and restore monarchies.

3 **(d)** Peasants were the majority; the aristocracy was small but dominant.

4 **(d)** Oak leaves = heroism; the sword = readiness to fight.

5 **(a)** Mazzini founded Young Italy in Marseilles and Young Europe in Berne.

6 **(d)** A customs union that abolished tariff barriers among German states.

7 **(a)** William I was proclaimed Kaiser in the Hall of Mirrors, Versailles.

8 **(c)** The Treaty of Constantinople (1832) recognised Greece.

9 **(a)** Metternich said it, after the July Revolution of 1830.

10 **(a)** Romantics used folk songs, poetry and emotions, not reason alone.

11 **(c)** England and Scotland united in 1707 as the United Kingdom of Great Britain.

12 **(a)** The Code did not give everyone the vote; it gave equality before law and property rights.

13 **(d)** Chauri Chaura (Feb 1922) violence made Gandhiji withdraw the movement.

14 **(a)** 13 April 1919, Amritsar, under General Dyer.

15 **(a)** Baba Ramchandra, a sanyasi, led the Awadh peasants.

16 **(a)** It was an all-white commission with no Indian member.

17 **(c)** Workers could not leave the gardens without permission.

18 **(d)** Lahore session, December 1929, presided over by Nehru.

19 **(d)** The 240-mile march ended at Dandi, where Gandhiji made salt.

20 **(b)** Reserved seats for Depressed Classes, but voted in by the general electorate.

21 **(b)** Bankim Chandra wrote it in the 1870s; it was later included in Anandamath.

22 **(b)** Satya + agraha: insistence on truth, non-violently.

23 **(d)** Thakurdas and Birla were among the industrialists who set up FICCI.

24 **(b)** Champaran: indigo; Kheda: crop failure and revenue; Ahmedabad: mill workers.

25 **(b)** The Ali brothers led the Khilafat movement.

Next: Day 12, Geography: Forest and Wildlife Resources

DAY 12

GEOGRAPHY | CHAPTER 2 | FULL CHAPTER + TEST

Forest and Wildlife Resources

Contemporary India II

Aaj ka target (pages 58-64)

☐ Forest aur Wildlife poora chapter
☐ Wildlife Act 1972 aur forest ke types yaad

☐ 15 sawal, test samajh ke solve karo ☐ 110 min, jaldi-jaldi nahi

12.1 Why Forests and Wildlife Matter

We share this planet with millions of other living beings. **Biodiversity** is immensely rich and closely integrated with our lives. Forests are **primary producers** on which all other living beings depend. India is one of the world's richest countries in biological diversity, with nearly **8 per cent** of the world's species.

Conservation **preserves ecological diversity** and our life support systems: water, air and soil. It also preserves the **genetic diversity** of plants and animals for better growth of species and breeding.

Fig. 12.1 *A Bengal tiger in Kanha National Park, Madhya Pradesh. (Wikimedia Commons, CC BY 4.0)*

12.2 Conservation of Forest and Wildlife in India

INDIAN WILDLIFE (PROTECTION) ACT, 1972

In the 1960s and 1970s conservationists demanded a national wildlife protection programme. The **Act of 1972** brought: an **all-India list of protected species**, a **ban on hunting**, legal protection to their habitats and **restrictions on trade in wildlife**. Central and many state governments set up **national parks and wildlife sanctuaries**, and projects for specific animals such as the tiger, the one-horned rhinoceros, the Kashmir stag (hangul), crocodiles and the Asiatic lion.

12.3 Types and Distribution of Forests

Type	What it means	Where it is high
Reserved forests	More than **half** of the total forest land; regarded as the **most valuable** for conservation of forest and wildlife	Jammu and Kashmir, Andhra Pradesh, Uttarakhand, Kerala, Tamil Nadu, West Bengal, Maharashtra
Protected forests	Almost **one-third** of the total forest area; protected from any further depletion	Bihar, Haryana, Punjab, Himachal Pradesh, Odisha, Rajasthan
Unclassed forests	Other forests and wastelands belonging to both **government and private** individuals and communities	North-eastern states and parts of Gujarat

- **Project Tiger** was launched in **1973**, one of the most well-publicised wildlife campaigns in the world.
- Tiger reserves: **Corbett** (Uttarakhand), **Sunderbans** (West Bengal), **Bandhavgarh** (Madhya Pradesh), **Sariska** (Rajasthan), **Manas** (Assam), **Periyar** (Kerala).
- Tigers are threatened by poaching for trade in skins and bones, shrinking habitat and a depleting prey base.

MEME SAMJHO

Astra meme, fact inside

THE CHEETAH IN INDIA

"Shikaar badha, ghaas ke maidan ghatey... Samay aa gaya hai aapse vida lene ka."

Asli baat: The cheetah was **declared extinct in India in 1952**, mainly due to hunting and loss of habitat. That is why the 1972 Act banned hunting.

REMEMBER

Reserved and protected forests together are called **permanent forest estates**: they are maintained for timber, other forest produce and protection. **Madhya Pradesh** has the largest area under permanent forests, about **75%** of its total forest area.

SHIVAM BHAIYA SOCH RAHE HAIN

Reserved = **R**ichest (half se zyada), **P**rotected = **P**art (one-third), **U**nclassed = **U**nder sabka (govt + private). Bas itna yaad rakho.

12.4 Community and Conservation

- **Sariska Tiger Reserve** (Rajasthan): villagers fought against mining by citing the Wildlife Protection Act.
- **Alwar district** (Rajasthan): inhabitants of 5 villages declared about 1,200 hectares of forest as the **Bhairodev Dakav "Sonchuri"**, with their own rules that ban hunting.
- **Chipko movement** in the Himalayas resisted deforestation and showed that community afforestation with indigenous species can succeed.
- **Beej Bachao Andolan** (Tehri) and **Navdanya**: diversified crop production without synthetic chemicals is possible and economically viable.
- **Joint Forest Management (JFM)**: involves local communities in managing and restoring degraded forests. **Odisha** passed the first JFM resolution in **1988**. Members get non-timber forest produce and a share in timber from successful protection.
- **Sacred groves**: nature worship keeps virgin forests untouched. Mundas and Santhals of Chota Nagpur worship **mahua and kadamba**; tribals of Odisha and Bihar worship **tamarind and mango** trees during weddings; peepal and banyan are sacred to many.
- In **Bishnoi** villages of Rajasthan, herds of **blackbuck (chinkara), nilgai and peacocks** roam freely as part of the community.

SHIVAM BHAIYA KA NOTE

Chapter 2 is **short**, isliye aaj hi poora chapter + test. Community examples (Sariska, Chipko, JFM, Bishnoi) se **case-based** aur 3-marker dono banate hain. Har example ke saath state ka naam likhna.

Day 12 Practice

15 board-pattern questions | solve first, then check

MCQ

1 **Which state has the largest area under permanent forests, making up about 75% of its total forest area?** (1)

(a) Odisha **(b)** Madhya Pradesh
(c) Uttar Pradesh **(d)** Chhattisgarh

2 **Study the table and choose the correct pair for A and B.**
A: forest land protected from any further depletion
Reserved forests: the most valuable forests for conservation, where human activity is strictly limited
B: other forests and wastelands belonging to both government and private individuals and communities (1)

(a) A: Sacred groves, B: Permanent forests
(b) A: Protected forests, B: Unclassed forests
(c) A: Unclassed forests, B: Permanent forests
(d) A: Protected forests, B: Sacred groves

3 **Read these statements about Joint Forest Management (JFM) and choose the correct ones.**
I. It involves local communities in managing and restoring degraded forests.
II. It has been formally in existence since 1980.
III. Jharkhand passed the first resolution for it.
IV. Members get benefits such as non-timber forest produce and a share of the timber harvested. (1)

(a) II and III **(b)** III and IV
(c) I and IV **(d)** I and II

4 **Which of these is NOT a provision of the Indian Wildlife (Protection) Act, 1972?** (1)

(a) Ban on hunting of protected species
(b) Setting up of wildlife sanctuaries and national parks
(c) Total ban on trade in every animal species without exception
(d) Licences for sale, transfer and possession of some wildlife species

5 The number of gharials in India fell by about 58% between 1997 and 2006 because of fishing with gill nets and loss of habitat. Of about 5,000 young gharials released into the wild, only around 200 survived to adulthood. In which category can the gharial NOT be placed? (1)

(a) Endangered **(b)** Extinct
(c) Vulnerable **(d)** Endemic

6 Pick the odd one out. (1)

(a) Chipko Movement **(b)** Joint Forest Management
(c) Beej Bachao Andolan **(d)** Navdanya

7 At an environmental meeting, you must propose protection for one species that is **rare** and one that is **endemic**. Which pair fits? (1)

(a) Asiatic elephant and Gangetic dolphin
(b) Blackbuck and Himalayan deer
(c) Himalayan brown bear and Andaman teal
(d) Asiatic cheetah and Indian rhino

8 Match List I with List II.
List I: A. Bishnoi villagers of Rajasthan B. Tribals of Odisha and Bihar C. Farmers and citizens of Tehri D. Asiatic cheetah
List II: 1. Beej Bachao Andolan 2. Fastest land mammal 3. Protect blackbuck, chinkara, nilgai and peacocks 4. Worship tamarind and mango trees at weddings (1)

(a) A-3, B-1, C-4, D-2 **(b)** A-4, B-3, C-1, D-2
(c) A-3, B-4, C-1, D-2 **(d)** A-2, B-4, C-1, D-3

ASSERTION-REASON

9 **Assertion (A):** Reserved forests make up more than half of the total forest land in India.
Reason (R): Reserved forests are regarded as the least valuable forests for conservation. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** The population of blackbucks has been rising in recent times.
Reason (R): Blackbucks are hunted and poached in the wild. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read the source and answer the questions that follow. (4)

In some parts of India, local communities are working with government officials to conserve habitats, because they know their own long-term livelihood depends on it. In the Sariska Tiger Reserve in Rajasthan, villagers have fought against mining by citing the Wildlife Protection Act. In many areas, villagers protect habitats themselves and reject government involvement. The people of five villages in the Alwar district of Rajasthan have declared 1,200 hectares of forest as the Bhairodev Dakav 'Sonchuri', with their own rules that do not allow hunting, and they protect the wildlife against outside encroachment.

(i) In which state is the Sariska Tiger Reserve located? (1)

(ii) How have villagers near Sariska helped conserve the forest? (1)

(iii) Explain the importance of the Bhairodev Dakav 'Sonchuri' for wildlife conservation. (2)

SHORT ANSWER

12 Explain how large-scale development projects have contributed to the loss of forests in India. (3)

13 "Nature worship, an age-old tribal belief, has preserved several virgin forests in their pristine form." Support this statement with examples. (3)

14 Distinguish between vulnerable species and endangered species, with examples. (3)

LONG ANSWER

15 "Forests and wildlife are vital to the quality of life and the environment." Justify the statement with suitable reasons. (5)

Day 12 Answers with explanation

1 **(b)** NCERT: Madhya Pradesh has the largest area under permanent forests, 75% of its total forest area.

2 **(b)** Protected forests (about one-third of forest area) are protected from further depletion; unclassed forests belong to the government, private individuals and communities.

3 **(c)** JFM began formally in 1988 when Odisha passed the first resolution; village institutions protect degraded forest land and share the benefits.

4 **(c)** The Act banned hunting, gave legal protection to habitats and restricted (not totally banned) trade in wildlife.

5 **(b)** The gharial still survives in Indian rivers, so it cannot be called extinct; its population is critically low.

6 **(b)** JFM is a government programme run with villagers; the other three are people's movements for conservation.

7 **(c)** NCERT lists the Himalayan brown bear as rare and the Andaman teal as endemic. The Asiatic elephant and Gangetic dolphin are vulnerable; the blackbuck is endangered.

8 **(c)** Bishnois protect blackbuck and other animals; Odisha and Bihar tribals worship tamarind and mango; Tehri farmers ran Beej Bachao Andolan; the Asiatic cheetah is the world's fastest land mammal (declared extinct in India in 1952).

9 **(c)** A is true. R is false: reserved forests are regarded as the MOST valuable as far as conservation of forest and wildlife is concerned.

10 **(d)** A is false: the blackbuck is listed as endangered because its numbers have fallen. R is true: hunting and poaching are a major cause.

11 (i) Rajasthan. (ii) They fought against mining in the reserve by citing the Wildlife Protection Act. (iii) Villagers of five villages in Alwar declared 1,200 hectares as a community sanctuary with their own rules: no hunting and protection from outside encroachment. It shows community-led conservation that protects habitats and biodiversity while securing local livelihoods.

12 1. Since 1951, over 5,000 sq km of forest has been cleared for river valley projects.
2. Clearing still continues with projects like the Narmada Sagar Project in Madhya Pradesh, which would inundate about 40,000 hectares of forest.
3. Mining is another major cause: e.g. the Buxa Tiger Reserve in West Bengal is threatened by ongoing dolomite mining, which disturbs habitats and migration routes.

13 1. Such untouched forest patches are called **sacred groves** (forests of gods and goddesses); any interference in them is banned.
2. The Mundas and Santhals of the Chota Nagpur region worship mahua and kadamba trees; tribals of Odisha and Bihar worship tamarind and mango trees during weddings.
3. Peepal and banyan are considered sacred by many; in Bishnoi villages of Rajasthan, blackbuck, chinkara, nilgai and peacocks are protected as part of the community.

Day 12 Answers continued

14 **Vulnerable:** species whose population has declined to a level from where it is likely to move into the endangered category in the near future if the negative factors continue. Examples: blue sheep, Asiatic elephant, Gangetic dolphin.
Endangered: species in danger of extinction; their survival is difficult if the negative factors that led to the decline continue. Examples: blackbuck, crocodile, Indian wild ass, Indian rhino, lion-tailed macaque, sangai (brow-antlered deer of Manipur).

15 1. **Ecological balance:** forests are primary producers on which all other living beings depend; they are a major part of the food web.
2. **Life support systems:** conservation of forests preserves water, air and soil; forests clean the air and regulate the water cycle.
3. **Genetic diversity:** they preserve the genetic diversity of plants and animals for better growth and breeding (e.g. traditional crop varieties, fisheries).
4. **Resources and livelihood:** they provide timber, fuel, fodder, fruits, medicinal plants and other produce; many tribal and forest-dwelling communities depend on them directly.
5. **Cultural value:** nature worship, sacred groves and community traditions are tied to forests and wildlife. Hence their loss lowers the quality of life of people and the health of the environment.

Day 12 Extra Practice

12 more questions from this chapter | new, no repeats

MCQ

1 **In which region has teak monoculture damaged the natural forests?** (1)

(a) Ganga Plain **(b)** Brahmaputra Plain
(c) South India **(d)** None of the above

2 **Roughly what percentage of the total number of species in the world is found in India?** (1)

(a) 10 **(b)** 2 **(c)** 8 **(d)** 5

3 **In which year was 'Project Tiger' launched in India?** (1)

(a) 1971 **(b)** 1973 **(c)** 1970 **(d)** 1972

4 **In which of these states is a very high share of the forests managed by local communities?** (1)

(a) Himachal Pradesh **(b)** Andhra Pradesh
(c) Jammu and Kashmir **(d)** Arunachal Pradesh

ASSERTION-REASON

5 **Assertion (A):** Neglect of the environment has caused many species of animals and plants to become extinct.
Reason (R): Shrinking forest cover is a major cause of the destruction of species. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

6 **Assertion (A):** A tree is a unique living being of unlimited kindness.
Reason (R): A tree makes no demands for its own upkeep and generously gives the products of its life to others. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

7 Read the source and answer the questions that follow. (4)

The tiger is a key species in the food web. In 1973, officials found that India's tiger population had fallen to just 1,827 from an estimated 55,000 at the start of the twentieth century. The major threats include poaching for trade, shrinking habitat, loss of prey species and a growing human population. Trade in tiger skins and the use of tiger bones in traditional medicines, especially in Asian countries, pushed the tiger close to extinction. India and Nepal provide habitat to about two-thirds of the world's surviving tigers, so these two countries became major targets of poaching and illegal trade. 'Project Tiger', one of the best-known wildlife campaigns in the world, was launched in 1973. Tiger conservation is seen not only as an effort to save an endangered species but also as a way of preserving large natural habitats (biotypes). Corbett National Park in Uttarakhand, Sunderbans National Park in West Bengal, Bandhavgarh National Park in Madhya Pradesh, Sariska Wildlife Sanctuary in Rajasthan, Manas Tiger Reserve in Assam and Periyar Tiger Reserve in Kerala are some of the tiger reserves of India.

(i) What led to the launch of Project Tiger in India? (1)
(ii) State any two major threats to the tiger population. (1)
(iii) Why did India and Nepal become major focal points of poaching? Why is tiger conservation said to be more than saving one species? (2)

SHORT ANSWER

8 Name four animals and two plants of India that are on the verge of extinction. (3)

9 Mention six factors that have led to the decline of India's biodiversity. (3)

10 State four important causes of environmental destruction. (3)

11 "The destruction of biodiversity is closely linked with the loss of cultural diversity." Support the statement with four facts. (3)

12 Suggest measures for the conservation of forests. (3)

Day 12 Extra Practice: Answers

1 **(c)** NCERT states that teak monoculture has damaged the natural forest in South India. In the Himalayas, Chir Pine plantations have replaced oak and rhododendron forests.

2 **(c)** India is among the world's richest countries in biodiversity. It has nearly 8 per cent of the world's species, out of an estimated 1.6 million.

3 **(b)** Project Tiger was launched in 1973 after the tiger population was found to have fallen to only 1,827.

4 **(d)** The north-eastern states, such as Arunachal Pradesh, have a very high percentage of unclassed forests. These forests are managed by local communities.

5 **(a)** Loss of forests destroys the habitats of plants and animals. This loss of habitat is a main reason why species die out.

6 **(a)** These lines are attributed to Gautama Buddha. The tree asks for nothing and protects all beings, even giving shade to the axe-man who cuts it, so R explains A.

Day 12 Extra Practice: Answers continued

7 (i) The tiger population had fallen sharply, from about 55,000 at the start of the century to only 1,827 in 1973. This alarming fall led to the launch of the project. (ii) Any two of these: poaching for trade, shrinking habitat, loss of prey species, and a growing human population. (iii) India and Nepal hold about two-thirds of the world's surviving tigers, and there is demand for tiger skins and bones in traditional medicine, so poachers target these two countries. Protecting tigers also protects the large habitats they live in, along with the many other plants and animals found there.

8 Animals: the cheetah, the pink-headed duck, the mountain quail and the forest spotted owlet. Plants: Madhuca insignis (a wild variety of mahua) and Hubbardia heptaneuron (a species of grass). Such species are called 'critical' because they may soon disappear.

9 1. Habitat destruction. 2. Hunting. 3. Poaching. 4. Over-exploitation of plants and animals. 5. Environmental pollution and poisoning. 6. Forest fires.

10 1. Unequal access to resources. 2. Inequitable consumption of resources. 3. Differential sharing of responsibility for environmental well-being. 4. Over-population, which is often blamed. However, NCERT notes that an average American consumes about 40 times more resources than an average Somali, so heavy consumption by the rich also harms the environment.

11 1. Many tribal and forest-dependent communities depend on forests for food, fuel, medicine and livelihood, so losing forests weakens their way of life. 2. Their customs, beliefs and traditional knowledge are tied to forests, and these fade when forests disappear. 3. Women are hit hardest: they must walk longer to collect fuel, fodder and water, which leads to health problems and neglect of home and children. 4. Deforestation-induced droughts and floods hurt the poor the most, which pushes them into poverty.

12 1. Controlled felling: the government should enforce strict rules to stop uncontrolled cutting of trees. 2. Afforestation: plant trees on a large scale and also at home, and encourage people to do so. 3. Protection from forest fires: ban careless campfires and smoking in forests, and spread awareness on putting out fires. 4. Involve local communities in protecting forests, as done in Joint Forest Management.

DAY 12 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 13, Political Science: Federalism I

TONIGHT'S 2-MINUTE RECALL

Answer from memory, then check the notes

1. Three provisions of the Wildlife (Protection) Act, 1972.
2. Reserved, protected, unclassed: which covers more than half?
3. Which state has the most permanent forest area?
4. Bhairodev Dakav Sonchuri is in which district?
5. Which state passed the first JFM resolution, and when?

My mistakes from today's practice:

DAY 13

POLITICAL SCIENCE | CHAPTER 2 | PART 1 OF 2

What is Federalism? India as a Federal Country

Democratic Politics II, Chapter 2

Aaj ka target (pages 64-67)

- ☐ Federalism ka pehla part
- ☐ Union, State, Concurrent list: ek-ek example
- ☐ 10 sawal, baaki part kal (Day 14)
- ☐ Lagbhag 100 min, chai ke baad shuru

2.1 Federalism in One Line

KEY TERM: FEDERALISM

A system of government in which **power is divided between a central authority and its various constituent units**. Usually two levels: one government for the **entire country** (common national interest) and governments at the level of **provinces or states** (day-to-day administration of their area). Both levels **enjoy power independent of each other**.

In a **unitary system** there is only one level of

government, or sub-units are subordinate to the centre, which can pass orders to them. In a federal system the centre **cannot order** a state government. **Sri Lanka** is essentially unitary; **Belgium** became federal in 1993.

2.2 7 Key Features of Federalism

- **Two or more levels** (tiers) of government.
- Each tier governs the **same citizens** but has its own **jurisdiction** in legislation, taxation and administration.
- Jurisdictions are **specified in the constitution**, so each tier's authority is guaranteed.
- Fundamental provisions **cannot be changed by one level alone**; both must agree.
- **Courts** interpret the constitution and act as **umpire** in disputes between levels.
- Sources of revenue are clearly specified for **financial autonomy**.
- Dual objective: **safeguard the unity** of the country and **accommodate regional diversity**.

2.3 Two Routes to a Federation

COMING TOGETHER

Independent states **come together on their own** to form a bigger unit, pooling sovereignty while keeping identity. Units usually have **equal power** and are strong.
Examples: USA, Switzerland, Australia.

HOLDING TOGETHER

A large country **decides to divide its power** between the constituent states and the national government. The central government tends to be **more powerful**; units may have **unequal powers** (some get special powers).
Examples: India, Spain, Belgium.

MEME SAMJHO

Astra meme, fact inside

HOW USA, SWITZERLAND, AUSTRALIA WERE FORMED

"Alag-alag chhote rahenge to kamzor... milkar ek federation bana lo, identity bhi bachi rahegi."

Asli baat: That is the **coming together** route: independent states pool sovereignty. India, Spain and Belgium took the **holding together** route instead.

2.4 What Makes India Federal

Fig. 13.1 The three tiers. The Constitution originally had two tiers; the third tier was added in 1992.

The Constitution declared India a **Union of States**. It is based on federal principles and gives a **three-fold distribution of legislative powers**:

Union List	**National importance**: defence, foreign affairs, banking, communications, currency. Only the **Union** makes laws.
State List	**State and local importance**: police, trade, commerce, agriculture, irrigation. Only **states** make laws.
Concurrent	**Both**: education, forest, trade unions, marriage, adoption, succession. In a conflict, the **Union law prevails**.
Residuary	Subjects in no list, e.g. **computer software**. The **Union** legislates.

SHIVAM BHAIYA SAYS

Lists yaad karne ki trick: **Union = desh ki suraksha aur paisa** (defence, foreign affairs, banking, currency), **State = roz ka kaam** (police, agriculture, irrigation, trade), **Concurrent = parivar aur padhai** (marriage, adoption, education). Clash ho to **Union law jeetega**.

- Not all states have identical powers: some states like **Assam, Nagaland, Arunachal Pradesh and Mizoram** enjoy special powers (Article 371) because of their peculiar historical circumstances, e.g. protection of land rights of indigenous peoples and preferential employment.
- Sharing of power **cannot be changed unilaterally**: an amendment to the basic structure must be passed by **both Houses of Parliament with at least a two-thirds majority** and ratified by **at least half of the State legislatures**.
- The **judiciary** (High Courts and Supreme Court) settles disputes about division of powers. Union and states can **raise resources by levying taxes**.

EXAM ALERT!

"India is a **holding together** federation" aur "Concurrent List mein **Union law prevails**" ye do lines MCQ aur A-R dono mein aati hain.

REMEMBER IN ONE LINE

Federalism = power divided between a centre and units, each independent in its own field; USA, Switzerland, Australia came together; India, Spain, Belgium hold together; India has Union, State and Concurrent lists, residuary powers with the Union; key changes need Parliament (2/3) plus half the states.

Day 13 Practice

10 board-pattern questions | solve first, then check

MCQ

1 Fill the boxes: **Central authority** handles defence, foreign affairs, currency, railways; **(A)** handles police, agriculture, public health, trade; **(B)** handles education, forests, marriage. (1)

(a) (A) Concurrent List; (B) State Government
(b) (A) State Government; (B) Concurrent List
(c) (A) Local Government; (B) Union List
(d) (A) Union List; (B) State List

2 Which group of countries are **coming together** federations? (1)

(a) India, Belgium, Spain
(b) India, USA, Belgium
(c) USA, Switzerland, Australia
(d) USA, Spain, Australia

3 Which list has subjects like banking, communications and currency? (1)

(a) State List **(b)** Union List
(c) Concurrent List **(d)** Residuary subjects

4 If a law of the Union and a law of a state conflict on a Concurrent List subject, then: (1)

(a) the state law prevails
(b) the Union law prevails
(c) both laws become void
(d) the Supreme Court makes a new law

5 Assam, Nagaland, Arunachal Pradesh and Mizoram enjoy special provisions. Which reasons justify them?
(I) Their historical circumstances are peculiar.
(II) They protect land rights of indigenous peoples.
(III) There is little water for agriculture.
(IV) They give preferential employment in government services. (1)

(a) (I), (II) and (III) **(b)** (I), (II) and (IV)
(c) (II), (III) and (IV) **(d)** (I) and (III)

6 Computer software, which came up after the Constitution was made, falls under: (1)

(a) Union List **(b)** State List
(c) Concurrent List **(d)** Residuary subjects

ASSERTION-REASON

7 **Assertion (A):** In a federal system, the central government cannot order the state government to do something.
Reason (R): The state government has powers of its own for which it is not answerable to the central government. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

8 **Assertion (A):** Changes to the power-sharing arrangement in India can be made by the Parliament alone.
Reason (R): The Constitution clearly gives a three-fold distribution of legislative powers. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

9 Distinguish between "coming together" and "holding together" federations with one example each. (3)

LONG ANSWER

10 Describe any five key features of federalism. (5)

Day 13 Answers with explanation

1 **(b)** (A) State Government; (B) Concurrent List.
2 **(c)** USA, Switzerland, Australia. India, Spain and Belgium hold together.
3 **(b)** Union List: subjects of national importance.
4 **(b)** The Union law prevails.
5 **(b)** (I), (II) and (IV). Water shortage is not the reason.
6 **(d)** Residuary subjects, on which the Union government legislates.
7 **(a)** Because states have their own constitutionally guaranteed powers, the centre cannot order them. R explains A.
8 **(d)** A is false: changes need Parliament (two-thirds in both Houses) plus ratification by at least half the state legislatures. R is true.

9 Coming together: independent states pool sovereignty, units equally strong (USA, Switzerland, Australia). Holding together: a big country divides power, centre stronger (India, Spain, Belgium).

10 Any five: two or more tiers; own jurisdiction over the same citizens; jurisdictions fixed by the constitution; changes need both levels; courts as umpire; specified revenue sources; unity plus diversity.

TONIGHT'S 2-MINUTE RECALL

1. Federalism: power divided between a **centre and its constituent units**
2. Coming together: **USA, Switzerland, Australia**
3. Holding together: **India, Spain, Belgium**
4. Clash on a Concurrent subject: **Union law prevails**
5. Residuary subjects (e.g. computer software): **Union legislates**
6. Changing power sharing: **both Houses (2/3) + half the states**
7. Umpire in disputes between levels: **the courts**
8. Third tier (Panchayats, Municipalities) added in **1992**

DAY 13 COMPLETE? ☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 14, Political Science: Federalism II

DAY 14

POLITICAL SCIENCE | CHAPTER 2 | PART 2 OF 2

How Federalism is Practised and Decentralisation

Democratic Politics II, Chapter 2

Aaj ka target (pages 67-71)

- ☐ Federalism khatam + decentralisation
- ☐ Panchayat ke 3 level ka diagram khud banao
- ☐ 15 sawal, language policy wale zaroor
- ☐ 110 min, phone silent

2.5 Linguistic States

The **creation of linguistic states** was the first and a major test for democratic politics in India. After independence the boundaries of several old states were changed so that people who spoke the same language lived in the same state. Some states were also created on the basis of **culture, ethnicity or geography**, e.g. **Nagaland, Uttarakhand and Jharkhand**.

- Many leaders feared it would lead to **disintegration**, and the Central government resisted for some time.
- Experience shows it made the country **more united** and made **administration easier**; it also helped Indian languages to develop.

2.6 Language Policy

- The Constitution **did not give the status of national language** to any one language. Hindi was identified as the **official language**, but Hindi is the mother tongue of less than half of Indians.
- Besides Hindi, there are **22 languages recognised as Scheduled Languages** (Eighth Schedule). A candidate in a Central government examination may opt to write it in any of these. States too have their own official languages.
- English was to stop being used for official purposes in **1965**, but many non-Hindi states (especially **Tamil Nadu**, where the movement turned violent) demanded it continue. The Centre agreed to **continue English along with Hindi**. Promotion of Hindi continues, but the government cannot impose it.

SHIVAM BHAIYA SOCH RAHE HAIN

Sri Lanka ne **ek language thopi** to civil war hua. India ne **22 languages ko jagah di** aur Hindi impose nahi ki. Yahi flexibility India ko united rakhti hai. Ye comparison case-based question mein bahut kaam aata hai.

2.7 Centre-State Relations

For a long time the **same party ruled** both at the Centre and in most states, so states did not use their rights as autonomous federal units. When a different party ruled a state, the Centre sometimes **undermined** its power, often misusing the Constitution to dismiss rival state governments. After **1990**, regional parties grew and the era of **coalition governments** began at the Centre. Since no single party got a majority, major national parties had to ally with regional parties. This led to a **new culture of power sharing and respect for the autonomy of state governments**, supported by a major Supreme Court judgement that made it difficult to dismiss state governments arbitrarily.

2.8 Decentralisation: The Third Tier

KEY TERM: DECENTRALISATION

When power is **taken away from the Central and State governments and given to local government**. Basic idea: many problems are best settled at the local level, people know their local needs, and it allows **direct participation** of people in decision-making.

A major step was taken in **1992** when the Constitution was amended to make the third tier more powerful and effective:

1. It is now **constitutionally mandatory** to hold regular elections to local government bodies.
2. Seats are **reserved** in the elected bodies and executive heads for **Scheduled Castes, Scheduled Tribes and Other Backward Classes**.
3. **At least one-third** of all positions are reserved for **women**.
4. An independent **State Election Commission** in each state conducts panchayat and municipal elections.
5. State governments must **share some powers and revenue** with local bodies; the nature of sharing varies from state to state.

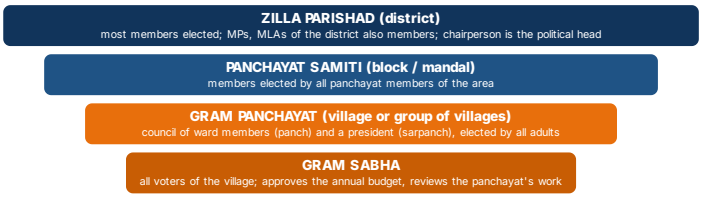

Fig. 14.1 *Rural local government (Panchayati Raj). In towns: municipalities, and in big cities municipal corporations, both headed by elected representatives; the political head of a municipal corporation is the mayor.*

REMEMBER IN ONE LINE

Linguistic states made India stronger; no national language, Hindi official plus 22 scheduled languages, English continued; coalition era after 1990 respected state autonomy; 1992 amendment: regular elections, SC/ST/OBC reservation, 1/3 women, State Election Commission, sharing of powers and revenue.

MEME SAMJHO

Astra meme, fact inside

AFTER THE 1992 AMENDMENT

"Har 5 saal pakka chunav, one-third seats women ke liye, apna State Election Commission... aaj to maza aa jayega!"

Asli baat: The 1992 amendment made local elections mandatory, reserved at least 1/3 seats for women and created State Election Commissions. Problems remain: **gram sabhas are not held regularly** and most state governments **have not transferred significant powers and resources**.

Day 14 Practice: Chapter Test

15 board-pattern questions | solve first, then check

MCQ

1 **Which states were created to recognise differences based on culture, ethnicity or geography?**
(I) Nagaland (II) Uttarakhand (III) Jharkhand (IV) Andhra Pradesh (1)

(a) (I), (II) and (IV) **(b)** (II), (III) and (IV)
(c) (I), (II) and (III) **(d)** All four

2 **Which statements about forming states on the basis of language are correct?**
(I) It made the country more united.
(II) It made administration easier.
(III) It weakened the federal structure.
(IV) It helped Indian languages develop. (1)

(a) Only (I), (II) and (IV) **(b)** Only (I), (II) and (III)
(c) Only (II), (III) and (IV) **(d)** Only (I), (III) and (IV)

3 **A student checks pairs of languages against the Eighth Schedule. Which pair is not in it?** (1)

(a) Bodo and Maithili (b) Sindhi and Urdu
(c) Pali and Tulu (d) Nepali and Oriya

4 **The Panchayati Raj system works at the:** (1)
(a) village and state levels
(b) village, district and state levels
(c) village, block and district levels
(d) village, state and union levels

5 **Which principle is closest to the idea behind the third tier of government?** (1)
(a) Separation of power among legislature, executive and judiciary
(b) Division of power among central, state and local governments
(c) The right of individuals to form political parties
(d) Reservation for women in the highest law-making bodies

6 **Pick the correctly matched pair.** (1)
(a) Women: one-fourth of seats reserved in local bodies
(b) Australia: holding together federation
(c) Commerce: Union List
(d) Bodo: scheduled language

7 **Statement (I): Constitutional status for local government has deepened democracy in India. Statement (II): It has uprooted democracy at the local level.** (1)
(a) (I) correct, (II) incorrect
(b) (I) incorrect, (II) correct
(c) Both incorrect
(d) Both correct

8 **Who conducts panchayat and municipal elections in a state?** (1)
(a) Election Commission of India
(b) State Election Commission
(c) The Governor
(d) The Gram Sabha

9 **Decentralisation in India is needed because it:** (1)
(a) concentrates all power in the centre
(b) reduces the role of state governments only
(c) allows local people to take part directly in decisions
(d) ends the need for elections

ASSERTION-REASON

10 **Assertion (A): The Constitution of India did not give the status of national language to any one language.**
Reason (R): Hindi is the mother tongue of less than half of Indians and other languages had to be protected. (1)
(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

11 **Assertion (A): After 1990, the era of coalition governments began at the Centre.**
Reason (R): No single party got a clear majority in the Lok Sabha, so national parties allied with regional parties. (1)
(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

12 **Read and answer:** ***"The Constitution was amended in 1992 to make the third tier of democracy more powerful and effective. Now it is mandatory to hold regular elections to local bodies, and at least one-third of all positions are reserved for women."***
(i) What is the third tier called? (1)
(ii) Which body conducts these elections? (1)
(iii) Give two steps of the 1992 amendment other than those in the passage. (2) (4)

SHORT ANSWER

13 **How did the language policy of India strengthen its federation? Give three points.** (3)

14 **Explain how centre-state relations changed after 1990.** (3)

LONG ANSWER

15 **"Decentralisation is a major step towards deepening democracy." Explain the steps taken in 1992 and two problems that remain.** (5)

Day 14 Answers with explanation

1 **(c)** Nagaland, Uttarakhand and Jharkhand. Andhra Pradesh was a linguistic state.
2 **(a)** (III) is wrong: the federal structure became stronger, not weaker.
3 **(c)** Pali and Tulu are not scheduled languages.
4 **(c)** Village (gram panchayat), block (panchayat samiti) and district (zilla parishad).
5 **(b)** Division of power among central, state and local governments.

6 **(d)** Bodo is scheduled. Women get one-third (not one-fourth) seats; Australia came together; commerce is in the State List.

7 **(a)** (I) is correct; (II) is the opposite of what happened.

8 **(b)** The independent State Election Commission.

9 **(c)** Local problems are settled best by local people, with direct participation.

10 **(a)** Since Hindi is the mother tongue of less than half the people, no language was made national. R explains A.

11 **(a)** The lack of a majority forced alliances; R explains A.

12 (i) Local government (Panchayati Raj in villages, municipalities in towns). (ii) The State Election Commission. (iii) Reservation of seats for SC, ST and OBC; state governments must share powers and revenue with local bodies.

13 No national language imposed; Hindi official plus 22 scheduled languages; exams can be written in any scheduled language; English continued along with Hindi after 1965 protests; states have their own official languages. So no group felt dominated.

14 Before: one party ruled the Centre and most states, and the Centre sometimes dismissed rival state governments. After 1990: rise of regional parties, coalition governments at the Centre, new culture of power sharing and respect for state autonomy, helped by a Supreme Court judgement against arbitrary dismissal.

15 Steps: regular elections mandatory; reserved seats for SC, ST, OBC; at least one-third for women; State Election Commission; sharing of powers and revenue. Problems: gram sabhas not held regularly; states have not transferred significant powers and resources.

SHIVAM BHAIYA KA NOTE

Chapter 2 complete! India mein ab **lakhs of elected representatives** local level par hain, jinme women ki badi sankhya hai. Answer likhte waqt "largest experiment in democracy" line zaroor yaad rakhna.

DECENTRALISATION
Power taken from the central and state governments and given to local government.

GRAM SABHA
All the voters of the village. It meets to approve the annual budget and review the gram panchayat.

GRAM PANCHAYAT
Village council of ward members (panch) and a president (sarpanch), working under the gram sabha.

PANCHAYAT SAMITI
A group of gram panchayats forms a block or mandal level panchayat samiti.

ZILLA PARISHAD
All panchayat samitis of a district; its chairperson is the political head of the zilla parishad.

MUNICIPAL CORPORATION
Local government of big cities; its political head is the mayor.

TONIGHT'S 2-MINUTE RECALL

1. India has **no national language**; Hindi is an official language
2. Linguistic states made the country **more united**, not weaker
3. After 1990: era of **coalition governments** at the Centre
4. 1992 amendment: **at least one-third** seats for women in local bodies
5. Each state has a **State Election Commission** for local polls
6. Local elections are now **constitutionally mandatory**

Day 14 Extra Practice

3 more questions from this chapter | new, no repeats

MCQ

1 **The Census of India held in 2011 recorded more than _____ distinct languages that people named as their mother tongues.** (1)

(a) 1200 **(b)** 500 **(c)** 200 **(d)** 1300

2 **As per the 2011 Census data on Scheduled Languages, which language has the second-highest share of speakers after Hindi?** (1)

(a) Bengali **(b)** Urdu **(c)** Telugu **(d)** Tamil

3 According to the 2011 Census, what percentage of Indians reported English as their mother tongue? (1)

(a) 5% **(b)** 20% **(c)** 0.02% **(d)** 0.5%

Day 14 Extra Practice: Answers

1 **(d)** The 2011 Census listed more than 1300 distinct mother tongues. These were grouped under major languages, which shows India's great linguistic diversity.

2 **(a)** Hindi is spoken by about 44 per cent of people. Bengali comes next with about 8 per cent, ahead of Marathi and Telugu.

3 **(c)** Only 0.02 per cent of Indians recorded English as their mother tongue. Many more people use it as a second or third language.

Next: Day 15, Economics: Sectors of the Economy I

DAY 15

ECONOMICS | CHAPTER 2 | PART 1 OF 2

The Three Sectors and How They Compare

Sectors of the Indian Economy

Aaj ka target (pages 71-73)

- ☐ Primary, secondary, tertiary samjho
- ☐ GDP mein double counting kyun nahi karte
- ☐ 10 sawal, sectors ka table yaad karke
- ☐ Lagbhag 100 min, aaram se

2.1 Sectors of Economic Activities

PRIMARY SECTOR

Uses **natural resources** directly: farming, dairy, fishing, forestry, mining. Also called the **agriculture and related sector**.

SECONDARY SECTOR

Natural products are changed into other forms by **manufacturing**: cotton to yarn, sugarcane to sugar. Also called the **industrial sector**.

TERTIARY SECTOR

Activities that **help** the other two: transport, storage, communication, banking, trade. Also teachers, doctors, IT. Called the **service sector**.

- The three sectors are **interdependent**. If farmers refuse to sell sugarcane to a mill, the mill must shut down: the secondary sector depends on the primary.
- A truck strike stops goods moving, so farmers cannot sell and factories cannot get raw material: the tertiary sector supports both others.
- Over history, **primary** came first; with new methods of manufacturing, **secondary** grew; in the last 100 years **tertiary** became the most important in developed countries.

Primary	→	Secondary	→	Tertiary
Cotton grown by a farmer		Spun into yarn, woven into cloth		Transported, sold in a shop

2.2 Comparing the Three Sectors: GDP

KEY TERM: GROSS DOMESTIC PRODUCT (GDP)

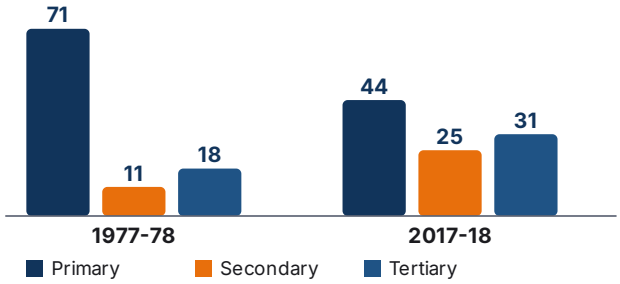

The **value of all final goods and services produced within a country during a particular year**. It shows **how big the economy is**. In India the task of measuring GDP is done by a central government ministry, with the help of state and union territory departments. **Exam trap:** adding intermediate goods means **double counting**.

- **Only final goods and services are counted.** Goods like wheat and flour are **intermediate goods**: they are used up in making the final good.
- Example (NCERT): flour worth Rs 25 goes into biscuits sold for Rs 80. The Rs 80 **already includes** the flour, so counting wheat, flour and biscuits separately would count the same thing many times.

2.3 Primary, Secondary and Tertiary Sectors in India

- Over forty years (1977-78 to 2017-18) production grew in all three sectors, but **most in the tertiary sector**. It became the **largest producing sector**, replacing the primary sector.
- **Why tertiary grew:** basic services (hospitals, schools, post, police, courts, banks) are the government's duty; growth of agriculture and industry needs transport, trade and storage; higher incomes raise demand for eating out, tourism, private schools and hospitals; new services like **IT** grew fast.

Share of sectors in employment (%)

Source: NCERT Graph 3. The primary sector's share in jobs fell, but it is still the largest employer.

MEME SAMJHO
Astra meme, fact inside

TERTIARY SECTOR, 2017-18

"Production mein number 1, IT bhi apna, tourism bhi apna... aaj to maza aa jayega!"

Asli baat: In forty years the **tertiary sector grew the most** and became the **largest producing sector** in India. But it did not create jobs at the same speed.

JOBS DID NOT SHIFT WITH PRODUCTION

- Production in industry went up more than **nine times** but employment only about **three times**; in services, production rose **14 times**, employment about **five times**.
- So **more than half of workers** are still in the primary sector, mainly agriculture, producing only about **one-sixth** of the GVA.
- **Underemployment / disguised unemployment:** people seem to be working, but all are made to work less than their potential. In a small farm run by **Laxmi's family** of five, two can leave for other work and production does not fall.

SHIVAM BHAIYA SAYS

Disguised unemployment = **chhupi hui berozgari**. Sab kaam karte dikhte hain, par 2 log hata do to bhi output same.

REMEMBER IN ONE LINE

Primary uses nature, secondary manufactures, tertiary serves; **GDP counts only final goods** made in a year; tertiary is now the **largest producing** sector, but primary is still the **largest employer**, full of **disguised unemployment**.

2.4 How to Create More Employment

- **Cheap credit** for a well or irrigation, so farmers can grow a second crop.
- **Dams, canals, roads and transport** in rural areas; **storage** like cold storages; **banks** giving credit at reasonable rates.
- Agro-processing (honey, vegetables, pulses), **tourism**, regional crafts and IT. A Planning Commission study says improving tourism can give jobs to more than **35 lakh** people every year.

MGNREGA 2005

The **Mahatma Gandhi National Rural Employment Guarantee Act, 2005** made the **Right to Work** real. All who were able to, and in need of, work in rural areas were guaranteed **100 days of employment in a year**. If the government failed, it would give **unemployment allowances**.

Day 15 Practice
10 board-pattern questions | solve first, then check

MCQ

1 Economic activities are grouped into primary, secondary and tertiary sectors on the basis of: (1)

(a) ownership of enterprises
(b) the nature of the economic activity
(c) the number of workers employed
(d) employment conditions

2 Which statement about GDP is correct? (I) It adds up intermediate goods too. (II) It counts only goods, not services. (III) It includes goods made by Indians abroad. (IV) It is the value of final goods and services produced within the country in a year. (1)

(a) (I) and (III)
(b) (II) only
(c) (IV) only
(d) (I), (II) and (IV)

3 In 2017-18, which sector had the largest share in production in India? (1)

(a) Primary (b) Secondary
(c) Agriculture (d) Tertiary

4 **Five family members work on a plot that three could manage; if two leave, output does not fall. This is:** (1)

(a) seasonal unemployment (b) disguised unemployment
(c) open unemployment (d) educated unemployment

5 **A shoe factory gets leather by truck and sends its shoes to shops by rail. This shows that:** (1)

(a) the primary sector depends only on itself
(b) the secondary sector does not need services
(c) the tertiary sector helps the development of the other sectors
(d) the tertiary sector produces goods

6 **Arrange in the correct order: (I) Cloth is sold in a shop (II) A farmer grows cotton (III) Yarn is spun in a mill (IV) Cloth is carried by truck to the market** (1)

(a) (II), (III), (IV), (I) (b) (III), (II), (I), (IV)
(c) (II), (IV), (III), (I) (d) (I), (II), (III), (IV)

7 **Which pair is correctly matched?** (1)

(a) Secondary sector: milk vendor
(b) Primary sector: flower cultivator
(c) Tertiary sector: fisherman
(d) Secondary sector: gardener

8 **If a nationwide transport strike stops all trucks for a week, which sectors are hit?** (1)

(a) Only the tertiary sector
(b) Only the primary sector
(c) Primary and secondary only
(d) All three sectors

ASSERTION-REASON

9 **Assertion (A): Not every good or service that is produced and sold needs to be counted to know the total production in each sector.**
Reason (R): The value of final goods already includes the value of all the intermediate goods used in making them. (1)

(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

ASSERTION-REASON

10 **Assertion (A): GDP shows how big a country's economy is.**
Reason (R): GDP is the value of all intermediate goods and services produced within a country during a year. (1)

(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

Day 15 Answers with explanation

1 **(b)** the nature of the economic activity.
2 **(c)** (IV) only: final goods and services, within the country, in one year.
3 **(d)** Tertiary. It replaced the primary sector as the largest producing sector.
4 **(b)** Disguised unemployment: everyone looks busy, but extra workers add nothing to output.
5 **(c)** Transport is a tertiary activity that supports manufacturing.
6 **(a)** Primary (cotton), secondary (yarn), tertiary (transport, then sale).
7 **(b)** Flower cultivation uses natural resources directly.
8 **(d)** All sectors are interdependent; farm goods and factory goods both stop moving.
9 **(a)** Counting intermediate goods would mean double counting, so R explains A.
10 **(c)** A is true. R is false: GDP counts final goods and services, not intermediate ones.

TONIGHT'S 2-MINUTE RECALL

1. GDP counts only **final goods and services**
2. Adding intermediate goods causes **double counting**
3. Still the largest employer: **primary sector**
4. All work less than their potential: **disguised unemployment**

DAY 15 COMPLETE? ☐ Notes read
☐ 10 questions solved ☐ Answers checked
☐ Mistakes noted

Next: Day 16, Economics: Sectors of the Economy II

DAY 16

ECONOMICS | CHAPTER 2 | PART 2 OF 2 + TEST

Organised vs Unorganised, Public vs Private

Sectors of the Indian Economy

Aaj ka target (pages 74-77)

- [ ] Organised vs unorganised, public vs private
- [ ] Dono comparisons bina dekhe likh ke dekho
- [ ] 15 sawal + chapter test, poora
- [ ] 110 min, ek glass paani aur shuru

2.5 Division of Sectors as Organised and Unorganised

ORGANISED SECTOR

- Enterprises or places of work where the terms of employment are **regular**; people have **assured work**.
- Registered by the government; follow laws like the **Factories Act, Minimum Wages Act, Payment of Gratuity Act, Shops and Establishments Act**.
- Workers get **job security**, fixed hours (overtime is paid extra), **paid leave**, holidays, provident fund, gratuity, medical benefits, pension.

UNORGANISED SECTOR

- Small and scattered units, **largely outside government control**.
- Rules exist but are **not followed**.
- Jobs are **low-paid and often not regular**; no overtime, paid leave, holidays or leave due to sickness.
- **No job security**: people can be asked to leave without any reason; when work is less, some are asked to leave.

Fig. 16.1 *Women construction workers. Most such workers are in the unorganised sector: daily wages, no paid leave, no security.*

- Kanta works in an office: fixed hours, salary every month, provident fund, medical allowance, paid leave. She is in the **organised** sector.
- Kamal is a daily wage labourer: he works only when there is work, gets no leave and no benefits. He is in the **unorganised** sector.
- Many workers are hired by organised-sector companies on contract, without benefits; their jobs are also unorganised in nature.

SHIVAM BHAIYA SAYS

Railways aur post office **public sector**; TISCO aur Reliance **private sector**. Ownership dekho, profit nahi: sarkari company bhi kabhi profit kama sakti hai.

MEME SAMJHO

Astra meme, fact inside

UNORGANISED SECTOR EMPLOYER

"Humare liye kaam karoge? Leave nahi, PF nahi, aur kal aana hai ya nahi, hum batayenge."

Asli baat: In the unorganised sector there is **no job security**, no paid leave, no provident fund. Workers can be asked to leave without any reason.

2.6 How to Protect Workers in the Unorganised Sector

- **Rural areas:** landless agricultural labourers, small and marginal farmers, sharecroppers and artisans (weavers, blacksmiths, carpenters, goldsmiths).
- **Urban areas:** workers in small-scale industry, casual workers in construction, trade and transport, street vendors, head-load workers, garment makers, rag pickers.
- Most workers from **scheduled castes, tribes and backward communities**, and many women, are in this sector.
- The government can fix **minimum wages and working hours** and make sure they are followed.
- Small farmers need support for **seeds, fertilisers, credit, storage and marketing**.
- Small industries need help with **raw material and marketing**.
- Casual workers need protection through **regular jobs, health and social security**.

EXAM ALERT!

"Organised vs unorganised" ka **difference table** aur "unorganised workers ko protect kaise karein" dono **3 to 5 mark** ke regular questions hain. Points ratt nahi, examples ke saath likho.

2.7 Sectors in Terms of Ownership: Public and Private

	Public sector	Private sector
Who owns	**Government** owns most of the assets and provides services	Ownership of assets and delivery of services is with **private individuals or companies**
Main motive	Not just profit; **welfare** of people	**Earning profits**
Examples	Railways, post office	Tata Iron and Steel Company Limited, Reliance Industries Limited

- The government raises money through **taxes** to run public facilities.
- Some activities need huge spending that private firms will not take up: roads, bridges, railways, harbours, power, dams. The government also sells **electricity** at lower rates to support small industries.
- It supports farmers by buying **wheat and rice at a fair price** and selling them at lower prices through ration shops.
- Running proper schools and providing quality education, health facilities and nutrition are also its duties.

REMEMBER IN ONE LINE

Organised = registered, regular job, benefits; **unorganised** = scattered, no security, needs protection; **public** = government owns, welfare motive; **private** = individuals own, profit motive.

Day 16 Practice

15 board-pattern questions | solve first, then check

MCQ (WHOLE CHAPTER TEST)

1 **Fill in the blanks. Bharat Petroleum Corporation Limited (BPCL) is an example of the ___ sector, and Reliance Industries is an example of the ___ sector.** (1)

(a) organised, unorganised **(b)** public, private
(c) private, public **(d)** tertiary, primary

2 **Rohit works in a big hotel. He has fixed hours, a monthly salary, paid leave and medical benefits. Rohit works in the:** (1)

(a) unorganised sector **(b)** primary sector
(c) organised sector **(d)** informal sector

3 **In the table "Primary, secondary, tertiary: nature of economic activity; Organised, unorganised: ___; Public, private: ownership", what fills the blank?** (1)

(a) Size of the enterprise
(b) Nature of employment conditions
(c) Number of products
(d) Location of the unit

4 **Identify the sector: (I) it is classified on the basis of who owns the assets; (II) the assets are owned by private individuals or companies; (III) its main aim is to earn profit.** (1)

(a) Public sector **(b)** Unorganised sector
(c) Primary sector **(d)** Private sector

5 **Under MGNREGA 2005, if the government failed to provide work to a person who asked for it, the person would get:** (1)

(a) a free plot of land **(b)** a loan from a bank
(c) an unemployment allowance **(d)** a government job for life

6 **Which worker is in the unorganised sector?** (1)

(a) A clerk in a bank with provident fund
(b) A teacher in a government school
(c) A daily wage head-load worker in a market
(d) An engineer in Indian Railways

7 **Underemployment is a situation where:** (1)

(a) people have no work at all
(b) more people work than are actually needed
(c) people work only in cities
(d) workers are paid overtime

8 **Match the activity with its sector. (A) Dairy farming (B) Making sugar from sugarcane (C) Banking (D) Fishing**
(I) Primary (II) Secondary (III) Tertiary (1)

(a) (A)-(I), (B)-(II), (C)-(III), (D)-(I)
(b) (A)-(II), (B)-(I), (C)-(III), (D)-(I)
(c) (A)-(I), (B)-(III), (C)-(II), (D)-(I)
(d) (A)-(I), (B)-(II), (C)-(I), (D)-(III)

ASSERTION-REASON

9 **Assertion (A):** **Workers in the unorganised sector need protection.**
Reason (R): **Their jobs are low-paid and irregular, with no paid leave, no job security and no social security.** (1)

(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

ASSERTION-REASON

10 **Assertion (A):** The main motive of the public sector is to earn profits.
Reason (R): The government provides services like railways and supplies electricity at low rates to support small industries. (1)
(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read the case and answer. *Kanta works in an office from 9.30 a.m. to 5.30 p.m. She gets her salary every month, along with provident fund, medical allowance and paid leave. Kamal is a daily wage labourer in a small shop; he is paid only for the days he works.*
(i) Name the sector each works in. (ii) Give two benefits Kanta gets that Kamal does not. (iii) Suggest one way to protect workers like Kamal. (3)

SHORT ANSWER

12 Distinguish between the organised and the unorganised sectors on any three points. (3)

13 "The government should spend on public facilities." Give three reasons why the public sector is needed. (3)

14 Why is the tertiary sector becoming so important in India? Give three reasons. (3)

LONG ANSWER

15 Suggest ways in which more employment can be created in rural areas. (5)

Day 16 Answers with explanation

1 **(b)** public, private. BPCL is government-owned; Reliance is owned by private individuals.
2 **(c)** organised sector: regular job with benefits.
3 **(b)** nature of employment conditions.
4 **(d)** Private sector: private ownership with a profit motive.
5 **(c)** an unemployment allowance.
6 **(c)** Head-load workers have no regular job or benefits.
7 **(b)** More people work than needed; also called disguised unemployment.
8 **(a)** Dairy and fishing use natural resources (primary); sugar making is manufacturing (secondary); banking is a service (tertiary).
9 **(a)** Low pay and no security are exactly why they need protection.
10 **(d)** A is false: the public sector aims at welfare, not just profit. R is true.
11 (i) Kanta: organised; Kamal: unorganised. (ii) Any two: monthly salary, provident fund, medical allowance, paid leave, fixed hours. (iii) Fix and enforce minimum wages and working hours, or give health and social security.
12 **Organised:** registered with the government; regular, assured jobs; follows laws like the Factories Act; benefits such as paid leave, PF, gratuity. **Unorganised:** small, scattered, outside government control; low-paid, irregular jobs; no paid leave or security; workers can be removed any time.
13 Some activities need huge spending that private firms will not take up (roads, railways, dams, power); the government sells electricity cheaply to support small industries; it buys grain at a fair price and sells it cheap in ration shops; schools, health and nutrition must reach the poor.
14 Basic services like hospitals, schools, police and courts are the government's duty; growth of agriculture and industry needs transport, trade and storage; rising incomes raise demand for services like eating out, tourism and private schools; new IT-based services have grown fast.
15 Cheap credit for wells and irrigation; build dams, canals and rural roads; cold storage and transport for crops; banks giving credit at fair rates; promote agro-processing, tourism, regional crafts and IT; schemes like MGNREGA that guaranteed 100 days of work.

SHIVAM BHAIYA KA NOTE

Economics Chapter 2 complete! 15 mein se 11+ aaye to badhiya. Warna bas do cheezein dobara: **organised vs unorganised table** aur **public sector kyun zaroori hai**. Agla Economics Day: Day 24, Money and Credit.

BOARD MEIN AISE LIKHO

Q. Why is the public sector needed when the private sector exists? (3 marks)

BOARD MEIN AISE LIKHO

1. **Huge spending:** roads, railways, harbours, power and irrigation need investment private firms avoid.
2. **Affordable prices:** government supplies electricity or foodgrains at reasonable rates, bearing part of the cost.
3. **Welfare duties:** schools, hospitals, health and nutrition; motive is welfare, not profit.

Tip: pehle motive likho (public = welfare, private = profit), phir 3 points.

TONIGHT'S 2-MINUTE RECALL

1. Regular job, registered, follows laws: **organised**
2. Small, scattered, outside govt control: **unorganised**

Day 16 Extra Practice

5 more questions from this chapter | new, no repeats

MCQ

1 **In India, which body collects data on employment and unemployment through large sample surveys held every few years?** (1)

(a) Census of India
(b) National Sample Survey Office (NSSO)
(c) International Labour Organisation (ILO)
(d) MGNREGA 2005

2 **In what way do big private companies help in the development of a country?** (1)

(a) By increasing the country's production of industrial goods
(b) By providing private hospitals for the rich
(c) By raising their own profits
(d) By pushing up demand for their products through advertisements

3 **NITI Aayog took the place of which earlier government body?** (1)

(a) Union Public Service Commission
(b) Election Commission
(c) University Grants Commission
(d) Planning Commission

ASSERTION-REASON

4 **Assertion (A): Rakesh, an educated and skilled worker in a private bank in a city, earns a high monthly salary.**
Reason (R): Every part of India's service sector is growing fast, so everyone doing any tertiary activity earns a high income. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

5 **Distinguish between the primary and secondary sectors of the economy.** (3)

Day 16 Extra Practice: Answers

1 **(b)** The NSSO carries out large-scale sample surveys on employment and unemployment. India's employment figures are based on these surveys.

2 **(a)** Large private firms add to the nation's output of manufactured goods. This raises production and creates jobs. Earning profit is their own aim, not their contribution to the nation.

3 **(d)** NITI Aayog replaced the Planning Commission. NCERT notes that the Planning Commission (now NITI Aayog) estimated nearly 20 lakh jobs could be created in education alone.

4 **(c)** Only a limited number of services employ skilled workers at good pay. A very large number of small shopkeepers, repair persons and transport workers barely earn a living, so R is false.

5 1. Primary sector: goods are produced by directly using natural resources, for example agriculture, dairy, fishing, forestry and mining. It is also called the agriculture and related sector. 2. Secondary sector: natural products are changed into other forms through manufacturing, in a factory, workshop or at home. It is also called the industrial sector. 3. The primary sector gives the raw materials, and the secondary sector processes them. For example, growing cotton is primary, while spinning yarn and weaving cloth in a mill is secondary. Similarly, mining iron ore is primary, while making steel is secondary.

Next: Day 17, History: Making of a Global World

DAY 17

HISTORY | CHAPTER 3 | BOARD PART + CHAPTER TEST

The Pre-modern World

The Making of a Global World

Aaj ka target (pages 78-82)

- [ ] Pre-modern World, sirf board wala part
- [ ] Silk routes, food, disease: ek-ek example
- [ ] 15 sawal, potato aur smallpox wale yaad
- [ ] 110 min, TV band

BOARD SCOPE 2026-27

Only **The Pre-modern World** comes in the board paper; the rest of this chapter (1815 onwards) is for the **Inter-disciplinary Project**. So today covers the whole board part.

3.1 How Human Societies Got Linked

- **Travellers, traders, priests and pilgrims** crossed vast distances for **knowledge, opportunity and spiritual fulfilment**, or to **escape persecution**.
- They carried **goods, money, values, skills, ideas, inventions**, and even **germs and diseases**.
- As early as **3000 BCE**, an active **coastal trade linked the Indus valley civilisation** with present-day West Asia.
- For more than a thousand years, **cowries** (Indian money) from the **Maldives** found their way to **China and East Africa**.
- Germs travelled too: traced back to the **7th century**, an unmistakable link by the **13th**.

3.2 The Silk Routes Link the World

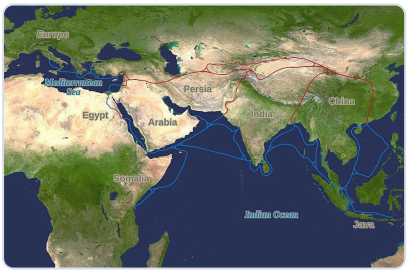

Fig. 3.1 *The silk routes: a web of land and sea routes linking China with Central and West Asia, India, Europe and northern Africa.*

- The name points to the importance of **West-bound Chinese silk cargoes** along these routes.
- There were **several silk routes, over land and by sea**, knitting together vast regions of Asia and linking Asia with **Europe and northern Africa**.
- They existed **before the Christian Era** and thrived almost till the **15th century**.

TRADE ON THE ROUTES

- **Chinese pottery** also travelled the same routes.
- **Textiles and spices** from India and South-east Asia went out.
- In return, **gold and silver** flowed from Europe to Asia.

CULTURE ON THE ROUTES

- **Buddhism** emerged from eastern India and spread in several directions through the silk routes.
- Early **Christian missionaries** used them to reach Asia.
- A few centuries later, **Muslim preachers** took the same routes.

EXAM ALERT!

Silk cargoes **West-bound** thi, East-bound nahi. A-R mein yahi trap aata hai. Aur "silk routes = vibrant pre-modern trade and cultural links" pe 3-marker: **1 trade + 1 culture example** zaroor likho.

3.3 Food Travels: Spaghetti and Potato

- Traders and travellers brought **new crops** to the lands they visited. Noodles are believed to have travelled west from **China** to become **spaghetti**; perhaps **Arab traders** took pasta to 5th-century **Sicily** (now in Italy).
- Many of our common foods, **potatoes, soya, groundnuts, maize, tomatoes, chillies, sweet potatoes**, were unknown to our ancestors until about five centuries ago.
- They reached Europe and Asia only after **Christopher Columbus** accidentally discovered the Americas. They came from America's original inhabitants, the **American Indians**.
- **New crops could mean life or death.** With the humble potato, Europe's poor began to **eat better and live longer**.
- Ireland's poor peasants became so dependent on potatoes that when disease destroyed the crop in the **mid-1840s**, **hundreds of thousands died** of starvation (the Irish Potato Famine, 1845 to 1849).

3.4 Conquest, Disease and Trade

In the **16th century** European sailors found a **sea route to Asia** and also crossed the western ocean to **America**. The pre-modern world **shrank** greatly. For centuries before this, the **Indian subcontinent** had been central to the busy trade of the Indian Ocean; now these flows were redirected towards Europe.

- America's vast lands, abundant crops and minerals began to **transform trade and lives everywhere**.

- **Precious metals, especially silver**, from mines in present-day **Peru and Mexico** increased Europe's wealth and financed its trade with Asia.
- Legends of fabled wealth spread in 17th-century Europe; many expeditions set out in search of **El Dorado**, the fabled city of gold in South America.
- The **Portuguese and Spanish** conquest and colonisation of America was decisively under way by the **mid-16th century**.

HOW EUROPE BECAME THE CENTRE OF WORLD TRADE

Europe, till the 19th century
Poverty, hunger, crowded cities, deadly diseases; religious dissenters were persecuted.

→

Flight to America
Thousands fled to America; slaves captured in Africa grew **cotton and sugar** on plantations for European markets.

→

Asia steps back
China and India were among the **richest** countries till the 18th century, but from the 15th century **China restricted overseas contacts**.

→

Result
The rising importance of the Americas moved the centre of world trade **westwards: Europe**.

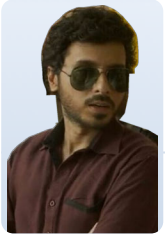

SHIVAM BHAIYA SOCH RAHE HAIN

Spanish conquerors ka sabse powerful weapon? **Bandook nahi, germs! Smallpox** continent mein Europeans se bhi aage pahunch gaya, kyonki Americans ke paas **long isolation** ki wajah se **immunity nahi** thi. Poore communities khatam ho gaye.

MEME SAMJHO

Astra meme, fact inside

CHINA AND INDIA, TILL THE 18TH CENTURY

"Asian trade ke king? Jalwa hai hamara."

Asli baat: Until well into the 18th century, China and India were among the world's richest countries and pre-eminent in Asian trade. After China's isolation and the rise of the Americas, Europe became the centre of world trade.

REMEMBER IN ONE LINE

Travellers linked societies (3000 BCE Indus trade, cowries); silk routes carried West-bound silk, pottery, spices and Buddhism, Christianity and Islam; American crops like the potato changed diets (Irish famine, 1840s); smallpox and silver helped Europe conquer America and become the centre of world trade.

Day 17 Practice

15 questions | chapter test for Chapter 3

MCQ

1 **Buddhism began in eastern India and spread in many directions. Which of these helped it spread?**
(I) Cultural exchange (II) The silk routes (III) Trade and travellers (IV) European efforts (1)

(a) (I), (II) and (IV) only **(b)** (II), (III) and (IV) only
(c) (I), (II) and (III) only **(d)** (I) and (IV) only

2 **Which statement about the silk routes is not correct?** (1)

(a) They were named after the trade in Chinese silk to the West.
(b) Trade on them was only in luxury goods like silk and gold, never in common goods.
(c) Buddhism, Christianity and Islam spread along them.
(d) They existed before the Christian Era and thrived till about the 15th century.

3 **A person who refuses to accept established beliefs and practices is called a:** (1)

(a) Devotee **(b)** Disciple
(c) Demolisher **(d)** Dissenter

4 Goods from the Indian subcontinent began reaching European markets in large amounts because: (1)

(a) Asian merchants had to go to Europe after a famine.
(b) European sailors found a sea route to Asia.
(c) Asia had no traders of its own.
(d) Europe invaded Asia as America was not yet known.

5 Identify the country: (I) Till the 18th century it was among the world's richest countries. (II) It was pre-eminent in Asian trade. (III) It was central to Indian Ocean trade flows and a key point in their networks. (1)

(a) China **(b)** America **(c)** India **(d)** Europe

6 Identify the continent: (I) It had long been cut off from regular contact. (II) Its people had no immunity to outside diseases. (III) Its vast lands, crops and minerals began to transform trade everywhere. (1)

(a) America **(b)** Africa **(c)** Asia **(d)** Europe

7 In the 17th century, many Europeans set out to find a fabled city of gold in South America. Its name was: (1)

(a) Shangri-La **(b)** El Dorado
(c) Atlantis **(d)** Troy

8 In the 19th century, thousands of people fled from Europe to America mainly because of: (1)

(a) an outbreak of plague
(b) a war between nations
(c) poverty and widespread deadly diseases
(d) a natural calamity

9 Match the columns.
(A) Silk routes (B) Food exchange (C) Conquest and disease
(I) Potato and maize transformed diets (II) Long-distance routes linking Asia, Europe and Africa (III) Smallpox helped European conquest of America (1)

(a) (A)-(I), (B)-(II), (C)-(III)
(b) (A)-(III), (B)-(I), (C)-(II)
(c) (A)-(II), (B)-(III), (C)-(I)
(d) (A)-(II), (B)-(I), (C)-(III)

ASSERTION-REASON

10 **Assertion (A):** The name "silk routes" points to the importance of East-bound Chinese silk cargoes.
Reason (R): Historians have found several silk routes, over land and by sea, linking vast regions of Asia. (1)

(a) Both true, R explains A
(b) Both true, R does not explain A
(c) A true, R false
(d) A false, R true

11 **Assertion (A):** The pre-modern world shrank greatly in the sixteenth century.
Reason (R): European sailors found a sea route to Asia and also crossed the western ocean to America. (1)

(a) Both true, R explains A
(b) Both true, R does not explain A
(c) A true, R false
(d) A false, R true

CASE-BASED

12 Read the source and answer the questions that follow. (4)

> *By the mid-16th century the Portuguese and Spanish conquest of America was well under way. Their success did not come only from better guns. Their deadliest weapon was the germs, such as smallpox, that they carried. Cut off from the rest of the world for a long time, America's original people had no immunity to these diseases. Smallpox spread deep into the continent, even ahead of the Europeans, and wiped out whole communities.*

(i) How did European diseases, especially smallpox, help the Spanish and Portuguese conquer America? (2)
(ii) How did the long isolation of America's original inhabitants affect their ability to resist? (2)

SHORT ANSWER

13 "The silk routes are a good example of vibrant pre-modern trade and cultural links between distant parts of the world." Support this with examples. (3)

14 "Sometimes the new crops could make the difference between life and death." Explain. (3)

LONG ANSWER

15 What do we mean when we say the world "shrank" in the 1500s? How did the rise of the Americas shift the centre of world trade to Europe? (5)

Day 17 Answers with explanation

1. **(c)** (I), (II) and (III). Buddhism spread through cultural exchange, the silk routes, traders and travellers; Europeans had no role.
2. **(b)** Pottery, textiles and spices also moved on the silk routes, not just luxury goods.
3. **(d)** Dissenter. Religious dissenters were persecuted in Europe and many fled to America.
4. **(b)** The new sea route to Asia redirected Indian Ocean trade towards Europe.
5. **(c)** India: rich, pre-eminent in Asian trade and central to Indian Ocean networks.
6. **(a)** America.
7. **(b)** El Dorado.
8. **(c)** Poverty, hunger and deadly diseases (and religious persecution) pushed people out of Europe.
9. **(d)** (A)-(II), (B)-(I), (C)-(III).
10. **(d)** A is false: the silk cargoes were **West-bound**. R is true.
11. **(a)** The new sea routes to Asia and America are exactly why the world "shrank". R explains A.
12. (i) Smallpox spread ahead of the Europeans and wiped out whole communities, so resistance collapsed. (ii) Long isolation meant no immunity, so they died in large numbers and could not resist.
13. Land and sea routes linked Asia, Europe and northern Africa. **Trade:** Chinese silk and pottery, Indian and South-east Asian textiles and spices went west; gold and silver came east. **Culture:** Buddhism spread from eastern India; Christian missionaries and later Muslim preachers used the same routes.
14. With the potato, Europe's poor ate better and lived longer. But Irish peasants depended on it so much that when disease destroyed the crop in the mid-1840s, hundreds of thousands starved.
15. **Shrank:** new sea routes made far lands reachable; foreign goods, crops and ideas reached local markets. **Shift:** silver from Peru and Mexico enriched Europe; plantations of cotton and sugar (slave labour) grew trade; China withdrew from overseas contact; so the centre of world trade moved west to Europe.

Day 17 Extra Practice

5 more questions from this chapter | new, no repeats

MCQ

1. **When people talk of 'globalisation', they usually mean an economic system that has developed over roughly the last:** (1)
   (a) 100 years **(b)** 50 years
   (c) 25 years **(d)** 75 years

2. **For more than a thousand years, which of these, taken from the Maldives to China and East Africa, was used as a form of currency?** (1)
   (a) Cowries (seashells) **(b)** Paper notes
   (c) US dollars **(d)** Barter of goods

3. **In the pre-modern period, the word 'America' was used to refer to:** (1)
   (a) South America only
   (b) North America only
   (c) The Caribbean only
   (d) North America, South America and the Caribbean

4. **By what name were the original inhabitants of America known?** (1)
   (a) Indian Americans **(b)** Indian Europeans
   (c) American Indians **(d)** Americans

SHORT ANSWER

5. **"From ancient times, travellers, traders, priests and pilgrims covered vast distances in search of knowledge, opportunity and spiritual fulfilment, or to escape persecution." Support this statement with suitable examples.** (3)

Day 17 Extra Practice: Answers

1. **(b)** NCERT says globalisation usually refers to an economic system that has emerged over the last 50 years or so. Its roots, however, go back much further in history.
2. **(a)** Cowries (Hindi cowdi), a kind of seashell, were used as money. They travelled from the Maldives to China and East Africa for over a millennium.
3. **(d)** In the pre-modern period, 'America' was a broad term. It covered North America, South America and the Caribbean together.
4. **(c)** The original inhabitants of the Americas were called American Indians.

5 1. As early as 3000 BCE, an active coastal trade linked the Indus valley civilisation with present-day West Asia. 2. For more than a millennium, cowries from the Maldives, used as a form of money, reached China and East Africa. 3. The silk routes carried goods, people, ideas and religions such as Buddhism across Asia, Europe and northern Africa. 4. Disease-carrying germs also spread over long distances, which can be traced back to the seventh century. This shows how far people travelled.

Next: Day 18, Board practice: History Ch1-3

DAY 18

REVISION DAY | HISTORY CH1, CH2, CH3

Board-Pattern Practice: History Ch1 to Ch3

Assertion-Reason, source-based and 3-mark answers, exactly as the board asks

Aaj ka target

- ☐ History Ch1 se Ch3, board pattern mein
- ☐ 30 sawal: 60 min solve, 30 check, 30 rewrite
- ☐ A-R aur source wale dhyaan se padhna
- ☐ 2 ghante, exam jaisa baitho

BOARD ANSWER RULES FOR TODAY

A-R: first decide if A is true, then R, then ask "does R explain A?". **Source-based:** every answer must use a word or idea from the source. **3 marks:** 3 clear points, about 60 words. **5 marks:** 5 points, about 120 words, one line of conclusion.

CH3 THE PRE-MODERN WORLD: QUICK RECALL

- Silk routes: link Asia, Europe and North Africa; carried silk, pottery, textiles, spices, and also Buddhism, Christianity and Islam
- Food travels: noodles from China may have become spaghetti; potatoes, maize, tomatoes, chillies, sweet potatoes came from America after Columbus
- Ireland: poor peasants depended on potatoes; the potato blight of the mid-1840s caused famine and about a million deaths

CONQUEST, DISEASE AND TRADE (16TH CENTURY)

- Europeans reached America; precious metals, especially silver from mines in Peru and Mexico, enlarged Europe's wealth
- Spanish conquerors' strongest weapon was germs: smallpox killed huge numbers of Native Americans with no immunity
- cowries (seashells) from the Maldives were used as money in many places
- until the 18th century, China and India were among the world's richest countries

Day 18 Practice

30 board-pattern questions | 90 minutes

OPTIONS FOR EVERY ASSERTION-REASON QUESTION BELOW

(a) Both A and R are true, and R is the correct explanation of A. **(b)** Both A and R are true, but R is not the correct explanation of A. **(c)** A is true, but R is false. **(d)** A is false, but R is true.

ASSERTION-REASON

1. **Assertion (A):** The Frankfurt Parliament failed to unify Germany in 1848.
Reason (R): The Prussian King Friedrich Wilhelm IV rejected the crown offered by the Parliament and opposed the elected assembly. (1)

2. **Assertion (A):** Gandhiji withdrew the Non-Cooperation Movement in February 1922.
Reason (R): He felt satyagrahis needed proper training before mass struggles, after the violence at Chauri Chaura. (1)

3. **Assertion (A):** The Balkan region became a source of tension after 1871.
Reason (R): Each Balkan state was jealous of the others and wanted more territory, while big powers competed for control. (1)

4. **Assertion (A):** Dalits supported the Civil Disobedience Movement wholeheartedly.
Reason (R): Dr B.R. Ambedkar organised the Depressed Classes Association in 1930 and demanded separate electorates. (1)

5 **Assertion (A):** In 1815 the Congress of Vienna restored the Bourbon dynasty to power in France.
Reason (R): The Congress wanted to undo most of the changes that had come about during the Napoleonic wars. (1)

6 **Assertion (A):** The Simon Commission was greeted with the slogan "Go back, Simon".
Reason (R): The Commission had no Indian member. (1)

7 **Assertion (A):** The potato became a staple food of poor peasants in Ireland.
Reason (R): The potato blight of the mid-1840s led to the death of about a million people in Ireland. (1)

8 **Assertion (A):** The Zollverein helped the economic unification of the German states.
Reason (R): It abolished tariff barriers and reduced the number of currencies from over thirty to two. (1)

MCQ

9 Who among these led the "Red Shirts" volunteers in the unification of Italy? (1)
(a) Victor Emmanuel II **(b)** Count Cavour
(c) Giuseppe Mazzini **(d)** Giuseppe Garibaldi

10 Arrange in order: (I) Lahore session demands Purna Swaraj (II) Jallianwala Bagh (III) Dandi March (IV) Chauri Chaura (1)
(a) (IV), (II), (I), (III) **(b)** (II), (IV), (I), (III)
(c) (II), (I), (IV), (III) **(d)** (II), (IV), (III), (I)

11 Which crop reached Europe and Asia from America only after Columbus? (1)
(a) Barley **(b)** Wheat **(c)** Potato **(d)** Rice

12 The silk routes are an example of pre-modern: (1)
(a) European colonial wars
(b) industrial production
(c) famines in Asia
(d) trade and cultural links between distant parts of the world

13 "Hind Swaraj" (1909) says British rule survived in India because: (1)
(a) Indians were divided into castes only
(b) the British army was invincible
(c) the British had more money
(d) Indians cooperated with it

14 What was the most powerful "weapon" of the Spanish conquerors in America? (1)
(a) Gunpowder **(b)** Navies
(c) Germs such as smallpox **(d)** Horses

15 Which statement about the Gandhi-Irwin Pact (March 1931) is correct? (1)
(a) It was signed at the Lahore session
(b) Gandhiji agreed to attend the Second Round Table Conference
(c) It ended British rule over salt
(d) It gave separate electorates to Dalits

16 Which of these was NOT a reason for the 1848 revolution of the liberals? (1)
(a) Universal adult franchise including women in all countries
(b) Creation of nation-states based on parliamentary principles
(c) Freedom of the press and association
(d) Demand for a constitution

SOURCE-BASED

17 Read the source and answer the questions that follow. (4)

Giuseppe Mazzini was born in Genoa in 1807 and became a member of the secret society of the Carbonari. After being sent into exile in 1831 for attempting a revolution in Liguria, he founded two more underground societies: Young Italy in Marseilles and then Young Europe in Berne, whose members were like-minded young men from Poland, France, Italy and the German states. Mazzini believed that God had intended nations to be the natural units of mankind, so Italy could not remain a patchwork of small states and kingdoms.

(i) Name the two societies founded by Mazzini and where. (1)
(ii) Why did Mazzini oppose monarchy? (1)
(iii) Why did Metternich call him "the most dangerous enemy of our social order"? (2)

18 Read the source and answer the questions that follow. (4)

On 31 January 1930, Mahatma Gandhi sent a letter to Viceroy Irwin stating eleven demands. The most stirring of all was the demand to abolish the salt tax. Salt was something consumed by the rich and the poor alike, and it was one of the most essential items of food. If the demands were not fulfilled by 11 March, the Congress would launch a civil disobedience campaign. Irwin was unwilling to negotiate. So Gandhiji started his famous salt march accompanied by 78 of his trusted volunteers.

(i) Why did Gandhiji pick the salt tax? (1)
(ii) From where to where did the march go, and how long was it? (1)
(iii) How was the Civil Disobedience Movement different from Non-Cooperation? (2)

19 Read the source and answer the questions that follow. (4)

> *Food offers many examples of long-distance cultural exchange. It is believed that noodles travelled west from China to become spaghetti. Many of our common foods such as potatoes, soya, groundnuts, maize, tomatoes, chillies and sweet potatoes were not known to our ancestors until about five centuries ago. They came to Europe and Asia only after Christopher Columbus accidentally discovered the vast continent that would later be called the Americas.*

(i) Which food is believed to have travelled from China to the West? (1)
(ii) Name any two foods that came from America. (1)
(iii) How did new crops make "the difference between life and death"? Explain with the example of Ireland. (2)

SHORT ANSWER (3 MARKS)

20 Describe any three ways in which the French revolutionaries created a sense of collective identity among the French people. (3)

21 Why was salt chosen as a symbol of the Civil Disobedience Movement? Give three reasons. (3)

22 Explain three features of the silk routes. (3)

23 Explain three ways in which culture helped in creating the idea of the nation in Europe. (3)

24 How did the discovery of the Americas transform the pre-modern world? Give three points. (3)

25 How did the Treaty of Vienna (1815) try to restore conservatism in Europe? Give three points. (3)

26 Why did different social groups join the Non-Cooperation Movement? Explain with three examples. (3)

27 What was the Rowlatt Act (1919)? Why did Indians oppose it? Give three points. (3)

28 "The first clear expression of nationalism came with the French Revolution." Justify with three points. (3)

LONG ANSWER (5 MARKS)

29 Explain the process of unification of Germany. (5)

30 Explain the limitations of the Civil Disobedience Movement. (5)

Day 18 Answers and marking points

1 **(a)** The king, aristocracy and army opposed it, and it lost the support of workers too; R explains A.

2 **(a)** Chauri Chaura violence led to the withdrawal; R gives the reason.

3 **(a)** Rivalry among Balkan states and among European powers made it explosive.

4 **(d)** Many Dalits stayed away from the movement, so A is false; R is true.

5 **(a)** The restoration of the Bourbons was one of the ways of undoing Napoleon's changes.

6 **(a)** An all-white commission to decide India's constitutional future angered Indians.

7 **(b)** Both true, but the blight does not explain why potatoes became a staple; it was cheap and filling.

8 **(a)** Free movement of goods and fewer currencies tied the economies together.

9 **(d)** Garibaldi led the Red Shirts into South Italy and the Kingdom of the Two Sicilies in 1860.

10 **(b)** 1919, 1922, Dec 1929, March 1930.

11 **(c)** Potatoes, maize, tomatoes and chillies came from the Americas.

12 **(d)** They carried goods as well as religions and ideas across Asia, Europe and North Africa.

13 **(d)** Gandhiji argued that if Indians refused to cooperate, British rule would collapse within a year.

14 **(c)** Native Americans had no immunity to smallpox, which spread ahead of the conquerors.

15 **(b)** Gandhiji agreed to participate in the Round Table Conference in London; the government agreed to release prisoners.

16 **(a)** Women were not given political rights by the liberals of 1848.

17 (i) Young Italy in Marseilles, Young Europe in Berne. (ii) He believed nations, not kings, were the natural units of mankind; Italy had to be a unified republic. (iii) His ideas of united democratic republics threatened the conservative monarchies restored in 1815; his societies spread revolution across Europe.

18 (i) Salt was used by everyone, rich and poor; taxing it hurt all. (ii) Sabarmati Ashram to Dandi, about 240 miles in 24 days. (iii) People were now asked not only to refuse cooperation but also to break colonial laws (salt law, forest laws); boycott and non-payment of taxes.

19 (i) Noodles (which may have become spaghetti). (ii) Any two: potato, maize, tomato, chilli, groundnut, sweet potato, soya. (iii) The potato let Europe's poor eat better and live longer; Irish peasants depended on it so much that the potato blight of the mid-1840s caused famine and about a million deaths.

20 la patrie and le citoyen; tricolour flag; National Assembly; hymns, oaths, martyrs; uniform laws, weights and measures; French as the common language (any three).

21 Salt was consumed by rich and poor alike; the tax and government monopoly on salt hit everyone; it could unite all classes; breaking the salt law was simple and non-violent.

22 Linked China with Central Asia, West Asia, Europe and North Africa; carried Chinese silk, pottery, Indian textiles and spices, precious metals back; carried religions and ideas (Buddhism, Christianity, Islam); existed before the Christian era and thrived till the 15th century.

23 Romantic art and poetry built a shared heritage; folk songs and folktales (Grimm brothers, Herder's das volk); language as a tool of resistance (Polish in church and schools); music (Karol Kurpinski's operas).

24 New crops (potato, maize, tomato, chilli) changed diets in Europe and Asia; silver from Peru and Mexico enriched Europe and financed trade with Asia; Europeans conquered and colonised America; smallpox killed huge numbers of natives.

25 Bourbons restored; France lost Napoleon's annexed territories; buffer states (Netherlands with Belgium, Genoa added to Piedmont); Prussia, Austria and Russia gained lands; old monarchies back in power.

26 Middle class: swaraj and boycott of foreign goods; Awadh peasants: against talukdars, high rents, begar; tribal people of Gudem Hills: forest laws; Assam plantation workers: freedom to move (any three, with their own meaning of swaraj).

27 It gave the government huge powers to repress political activity; allowed detention of political prisoners without trial for two years; passed despite united opposition of Indian members; led to hartals, rallies and the Jallianwala Bagh massacre.

28 Sovereignty passed from the king to the citizens; ideas of la patrie and le citoyen; reforms gave equal rights and uniform laws; Jacobin clubs and French armies spread nationalism abroad.

29 Liberal attempt of 1848 failed; Prussia took the lead; Bismarck and the army and bureaucracy; three wars in seven years with Austria, Denmark and France; Prussian victory; William I proclaimed German Emperor at Versailles in January 1871; strong currency, banking, legal and judicial reforms followed.

30 Dalits largely stayed away (Ambedkar, separate electorates, Poona Pact); many Muslims felt alienated after Non-Cooperation, communal clashes; industrial workers joined only in parts; Congress reluctant to include workers' demands; poor peasants' rent demands not supported; business class withdrew after the Round Table failure.

SHIVAM BHAIYA KA NOTE

3-marker mein **3 alag points**, har point ek line. 5-marker mein **5 points + 1 line conclusion**. Lamba essay mat likho, examiner points gin ke number deta hai.

DAY 18 COMPLETE? ☐ 30 questions solved
☐ Answers checked
☐ 3 weak answers rewritten ☐ Mistakes noted
Next: Day 19, Revision 2: Pol Sci, Eco, History

DAY 19

REVISION DAY 2 | POL SCI CH2 + ECO CH1-2 + HISTORY CH3

Revision 2: Federalism, Development, Sectors and the Pre-modern World

Recall sheets and a 25-question mixed set

Aaj ka target

- ☐ Days 7, 13, 14, 15, 16, 17 revise: Pol Sci, Eco, History
- ☐ 25 mixed sawal, timer on
- ☐ Recall sheet pehle, book sirf atakne pe
- ☐ 2 ghante, kal fresh chapter

R1 Political Science Ch2 Federalism: recall sheet

FEDERALISM BASICS

- Two or more levels of government, each with its own jurisdiction, guaranteed by the constitution
- Coming together (USA, Switzerland, Australia) vs holding together (India, Spain, Belgium)
- Changes to basic structure need consent of both levels; courts act as umpire
- Union List (97 subjects at the start, e.g. defence, banking), State List (police, agriculture), Concurrent List (education, forests); residuary with the Union

FEDERALISM IN PRACTICE, DECENTRALISATION

- Linguistic states (from 1950s; Andhra Pradesh 1953 first); language policy: no national language, Hindi official, 21 other scheduled languages (22 in all)
- Centre-state relations improved after 1990: coalition governments
- 1992 amendment: elections every 5 years, one-third seats for women, SC/ST reservation, State Election Commission, Gram Sabha
- Panchayati Raj: Gram Panchayat (sarpanch), Panchayat Samiti, Zila Parishad; urban: municipalities, mayor

R2 Economics Ch1 Development and Ch2 Sectors: recall sheet

DEVELOPMENT

- Different people, different goals; conflicting goals (dam: electricity vs displaced people)
- Average (per capita) income = total income of country divided by total population; World Bank uses it to classify countries
- HDI (UNDP): per capita income + education (literacy, years of schooling) + health (life expectancy)
- Kerala vs Bihar/UP: low IMR, high literacy due to public facilities (PDS, schools, health)
- Sustainability: groundwater over-use, non-renewable resources

SECTORS OF THE ECONOMY

- Primary (agriculture), secondary (manufacturing), tertiary (services); GDP = value of final goods and services
- Tertiary is now the largest in GDP; primary still the largest employer
- Disguised unemployment: more people than needed; MGNREGA 2005: 100 days of work
- Organised (rules, regular jobs, benefits) vs unorganised (small, scattered, no security)
- Public sector (government owns, e.g. railways) vs private sector (profit motive, e.g. TISCO, Reliance)

R3 History Ch3 The Pre-modern World: recall sheet

SILK ROUTES AND FOOD

- Silk routes linked Asia with Europe and North Africa; carried goods, people, religions (Buddhism, Christianity, Islam)
- Noodles from China may have become spaghetti
- Potatoes, maize, tomatoes, chillies came from America after Columbus
- Irish potato famine (mid-1840s): about a million deaths

CONQUEST, DISEASE AND TRADE

- 16th century: Europeans reach the Americas
- Silver from Peru and Mexico enriched Europe
- Smallpox, carried by the Spanish, killed huge numbers of Native Americans
- Cowries from the Maldives used as money; China and India among the richest till the 18th century

SHIVAM BHAIYA SOCH RAHE HAIN

Economics ke 3 numbers pakke karo: **per capita income** = total income / population, **IMR** = per 1000 live births, **MGNREGA** = 100 din kaam. Aur federalism mein **3 lists**: Union, State, Concurrent. Bas!

FORMULA CORNER

Per capita income = total income of the country / total population. **Literacy rate** = literate population aged 7+ / total population of that age group x 100. **IMR** = deaths before age one per 1000 live births.

Day 19 Practice

25 questions | solve first, then check

MCQ

1 Which is the most common method to compare the development of countries? (1)

(a) Total population
(b) Per capita (average) income
(c) Literacy rate
(d) Total income

2 Which of these is a "holding together" federation? (1)

(a) Switzerland (b) India
(c) USA (d) Australia

3 Which of these is an example of a public sector enterprise? (1)

(a) Infosys
(b) Indian Railways
(c) Tata Iron and Steel Company
(d) Reliance Industries

4 Subjects like defence, foreign affairs and banking are in the: (1)

(a) State List (b) Union List
(c) Concurrent List (d) Residuary List

5 More people working in a job than needed, so that removing some does not reduce output, is called: (1)

(a) Disguised unemployment (b) Seasonal unemployment
(c) Open unemployment (d) Structural unemployment

6 Which sector is the largest employer in India? (1)

(a) Secondary (b) Primary
(c) Tertiary (d) Quaternary

7 Under MGNREGA 2005, the government guarantees work for how many days a year? (1)

(a) 100 (b) 365 (c) 50 (d) 150

8 The 1992 constitutional amendment reserved at least how many seats in local bodies for women? (1)

(a) One-third (b) One-half
(c) Two-thirds (d) One-fourth

9 Infant Mortality Rate means the number of children who die before the age of one year per: (1)

(a) 10,000 live births (b) 1000 live births
(c) 100 live births (d) 1,00,000 people

10 The head of a municipal corporation is called the: (1)

(a) Collector (b) Sarpanch
(c) Mayor (d) Pradhan

11 Spanish conquerors' most powerful weapon in the Americas was: (1)

(a) ships (b) gunpowder
(c) cavalry (d) smallpox germs

12 Which crop reached Asia from the Americas after Columbus? (1)

(a) Wheat (b) Chillies
(c) Rice (d) Barley

13 Human Development Index is published by: (1)

(a) WTO (b) UNDP
(c) World Bank (d) IMF

14 Education, forests, trade unions, marriage, adoption and succession are in the: (1)

(a) Residuary subjects (b) State List
(c) Concurrent List (d) Union List

CASE-BASED

15 Read the source and answer the questions that follow. (4)

The 1992 amendment made local government more powerful. Regular elections to local bodies are now compulsory. Seats are reserved for SCs, STs and OBCs, and at least one-third of all positions for women. A State Election Commission in each state conducts panchayat and municipal elections.

(i) Which body conducts panchayat elections? (1)
(ii) What share of seats is reserved for women? (1)
(iii) Give two reasons why decentralisation is good for democracy. (2)

OPTIONS FOR EVERY ASSERTION-REASON QUESTION BELOW

(a) Both A and R are true, and R is the correct explanation of A. **(b)** Both A and R are true, but R is not the correct explanation of A. **(c)** A is true, but R is false. **(d)** A is false, but R is true.

ASSERTION-REASON

16 **Assertion (A):** The tertiary sector has grown the most in India.
Reason (R): Development of agriculture and industry leads to demand for transport, trade and storage. (1)

17 **Assertion (A):** Kerala has a lower infant mortality rate than many richer states.
Reason (R): Kerala has adequate provision of basic health and educational facilities. (1)

18 **Assertion (A):** India is a federal country.
Reason (R): The Constitution clearly lays down the powers of the Union and state governments in three lists. (1)

19 **Assertion (A):** Per capita income is a complete measure of development.
Reason (R): It hides inequalities in the distribution of income. (1)

20 **Assertion (A):** Workers in the unorganised sector enjoy job security.
Reason (R): The unorganised sector is largely outside government control and rules. (1)

SHORT ANSWER

21 Explain any three key features of federalism. (3)

22 Why is per capita income not a good measure of development? Give three reasons. (3)

23 Distinguish between the organised and unorganised sectors (three points). (3)

24 How did the discovery of the Americas change food habits across the world? Give three points. (3)

25 Explain any three functions of the Gram Sabha. (3)

Day 19 Answers with explanation

1 **(b)** The World Bank compares countries using per capita income.

2 **(b)** India, Spain and Belgium: a large country divides power between states and centre.

3 **(b)** Railways are owned and run by the government.

4 **(b)** These need a uniform national policy, so they are in the Union List.

5 **(a)** Common in agriculture: everyone appears busy but some are not needed.

6 **(b)** Agriculture (primary) still employs the largest share of workers.

7 **(a)** 100 days of work; if not provided, an unemployment allowance is paid.

8 **(a)** At least one-third of all positions are reserved for women.

9 **(b)** IMR is measured per 1000 live children born in that year.

10 **(c)** The mayor heads the municipal corporation; the sarpanch heads the gram panchayat.

11 **(d)** Natives had no immunity to smallpox, which killed huge numbers.

12 **(b)** Chillies, potatoes, maize and tomatoes came from the Americas.

13 **(b)** UNDP's Human Development Report uses income, education and health.

14 **(c)** Both the Union and state governments can make laws on Concurrent List subjects.

15 (i) State Election Commission. (ii) At least one-third. (iii) Local problems solved by local people; direct participation in decisions (any two).

16 **(a)** Services support other sectors and grow with them.

17 **(a)** Public facilities, not just income, improve health; R explains A.

18 **(a)** Three-fold distribution of powers is a key federal feature.

19 **(d)** A is false: averages hide disparity and ignore health, education; R is true.

20 **(d)** A is false; R is true: unorganised workers have little security.

21 Two or more levels of government over the same citizens; jurisdiction in the constitution; basic changes need consent of both levels; courts interpret and settle disputes; separate sources of revenue (any three).

22 It is an average and hides inequality; ignores health, education and other public facilities; does not show sustainability or quality of life.

23 Organised: registered, rules followed, regular jobs, paid leave, PF; unorganised: small scattered units, low pay, no job security or benefits.

24 Potato, maize, tomato, chilli, groundnut reached Europe and Asia; diets of the poor improved; dependence on potato led to the Irish famine.

25 All voters of the village are members; meets at least twice or thrice a year; approves the annual budget of the gram panchayat; reviews the panchayat's performance.

Next: Day 20, Geography: Water Resources

DAY 20

GEOGRAPHY | CHAPTER 3 | FULL CHAPTER + TEST

Water Resources

Contemporary India II

Aaj ka target (pages 89-94)

- [ ] Water Resources aaj khatam
- [ ] 8 dams map pe khud lagao, do baar
- [ ] 15 sawal, galat wale Mistake box mein
- [ ] 2 ghante, phone kisi aur ko de do

20.1 Water Scarcity

Three-fourth of the earth's surface is covered with water, but only a small part is fresh water. Fresh water is a **renewable** resource thanks to the **hydrological cycle**. Still, many regions face scarcity. Water scarcity is **not only about less water**: it can also be about **poor quality** water, polluted by domestic and industrial wastes, chemicals, pesticides and fertilisers.

CAUSES OF SCARCITY

Over-exploitation, excessive use and **unequal access** among social groups. A large and growing population needs more water for food and domestic use. **Irrigated agriculture** (many farmers have their own wells and tube-wells), and rapid **industrialisation and urbanisation** (industries also need hydel power) add to the pressure.

WHAT WE MUST DO

Conserve and manage water: safeguard ourselves from health hazards, ensure **food security**, continue livelihoods and productive activities, and prevent degradation of natural **ecosystems**. Over-exploitation and mismanagement may lead to ecological crisis.

20.2 Multi-purpose River Projects

A **dam** is a barrier across flowing water that obstructs, directs or retards the flow, often creating a reservoir, lake or impoundment. Dams are built for **irrigation, electricity generation, water supply, flood control, recreation, inland navigation and fish breeding**; hence the name **multi-purpose projects**.

- **Jawaharlal Nehru** proudly called dams the **"temples of modern India"**.
- **Bhakra Nangal** (Sutlej): water for both hydel power and irrigation.
- **Hirakud** (Mahanadi): conservation of water with flood control.

Fig. 20.1 *Bhakra Dam on the Sutlej, Himachal Pradesh. (Wikimedia Commons, public domain)*

WHY BIG DAMS FACE OPPOSITION

- Regulating and damming rivers affects their natural flow: **excessive sedimentation** at the bottom of the reservoir, rockier stream beds and poorer habitats for aquatic life.
- Dams **fragment rivers**, making it hard for aquatic fauna to migrate, especially for spawning. Reservoirs **submerge** existing vegetation and soil.
- Movements such as the **Narmada Bachao Andolan** (against Sardar Sarovar, Gujarat) and the **Tehri Dam Andolan** began over the **large-scale displacement** of local people, who rarely get the benefits.
- **Inter-state disputes** over sharing costs and benefits, e.g. the **Krishna-Godavari dispute**: Karnataka and Andhra Pradesh objected to Maharashtra diverting more water at **Koyna**.
- Irrigation changed cropping patterns towards **water-intensive and commercial crops**, causing salinisation of soil. Dams also cause earthquakes, water-borne diseases, pests and pollution.

MEME SAMJHO

Astra meme, fact inside

BIG DAMS AND FLOODS

"Flood control ke liye itna bada dam? Theek hai. Par flood na aane ki guarantee deta hai?"

Asli baat: Ironically, dams built to control floods have **triggered floods** due to sedimentation in the reservoir. Release of water from dams during heavy rain worsened the floods in **Maharashtra and Gujarat in 2006**.

Fig. 20.2 *The 8 dams in the CBSE map list. Drawn by Astra; locations to scale.*

Dam	River | State
Salal	Chenab | Jammu and Kashmir
Bhakra Nangal	Sutlej | Himachal Pradesh
Tehri	Bhagirathi | Uttarakhand
Rana Pratap Sagar	Chambal | Rajasthan
Sardar Sarovar	Narmada | Gujarat
Hirakud	Mahanadi | Odisha
Nagarjuna Sagar	Krishna | Telangana / Andhra Pradesh
Tungabhadra	Tungabhadra | Karnataka

Fig. 20.3 *Hirakud Dam on the Mahanadi, Odisha. (Wikimedia Commons, CC BY 3.0)*

MAP ALERT!

Map trick, **north se south**: **S**alal, **B**hakra, **T**ehri, **R**ana Pratap, **S**ardar Sarovar, **H**irakud, **N**agarjuna, **T**ungabhadra. Bolo: **"Sab Bachche Time pe Roz School Hi Nahi, Tuition** bhi jaate hain."

20.3 Rainwater Harvesting

Ancient India had sophisticated hydraulic structures: in the **1st century B.C.** Sringaverapura near Prayagraj channelled the flood water of the Ganga; tanks and dams were built at Kalinga, Nagarjunakonda, Bennur and Kolhapur; in the 11th century **Bhopal Lake**, one of the largest artificial lakes of its time, was built; in the 14th century **Iltutmish** built the tank in **Hauz Khas**, Delhi.

Region	Traditional system
Hills and mountains (Western Himalayas)	Diversion channels called **guls or kuls** for agriculture
Rajasthan (drinking water)	**Rooftop rainwater harvesting**
Flood plains of Bengal	**Inundation channels** to irrigate fields
Arid and semi-arid Rajasthan	**Khadins** (Jaisalmer) and **Johads**: rain-fed storage that keeps soil moist for crops
Bikaner, Phalodi, Barmer	Underground tanks (**tankas**) linked to the roof; rainwater or **palar pani** is the purest form of natural water

- **Gendathur** (Mysuru, Karnataka): about 200 households have rooftop harvesting.
- **Shillong** (Meghalaya): acute water shortage despite Cherrapunjee and Mawsynram being only about 55 km away; nearly every household harvests rooftop water.
- **Tamil Nadu** is the first state in India to make rooftop rainwater harvesting **compulsory** for all houses.
- **Bamboo drip irrigation** in Meghalaya is about **200 years old**: 18 to 20 litres of stream water enter the bamboo pipes and reach the plant as only **20 to 80 drops per minute**.

Fig. 20.4 *Rooftop rainwater collected in storage tanks. (Wikimedia Commons, CC BY-SA 2.0)*

YAAD RAKHO: QUICK FACTS

- **96.5%** of the world's water is in the oceans and only **2.5%** is freshwater; nearly 70% of that freshwater is locked in ice sheets and glaciers.

SHIVAM BHAIYA SAYS

Rainwater harvesting ke examples **place ke saath** likho: kuls = Western Himalaya, khadins = Jaisalmer, tankas = Bikaner, bamboo drip = Meghalaya. Place ke bina answer adhoora lagta hai.

Day 20 Practice

15 board-pattern questions | solve first, then check

MCQ

1 Match the place or term in List I with the water-harvesting practice in List II.
List I: A. Barmer B. Jaisalmer C. Palar pani D. Meghalaya
List II: 1. Rainwater 2. Bamboo drip irrigation 3. Khadins 4. Tankas (1)
(a) A-1, B-3, C-4, D-2 **(b)** A-4, B-3, C-1, D-2
(c) A-4, B-1, C-3, D-2 **(d)** A-3, B-4, C-1, D-2

2 In which state or region is the practice of rooftop rainwater harvesting on the decline? (1)
(a) Tamil Nadu **(b)** Haryana
(c) Western Rajasthan **(d)** Uttar Pradesh

3 Which of these are NOT causes of water scarcity?
I. Growing population
II. Growing water-intensive crops
III. Expansion of irrigation facilities
IV. Individual wells and tube wells on farms
V. Water harvesting techniques
VI. Industries
VII. Rooftop harvesting systems (1)
(a) I, II and IV **(b)** V and VII
(c) III and IV **(d)** I, II and VII

4 Jawaharlal Nehru called dams the 'temples of modern India'. Which option BEST explains this? (1)
(a) Dams would be religious sites where rivers are worshipped.
(b) Dams would integrate the development of agriculture and the village economy with the urban economy.
(c) Dams would be spiritual places where local communities settle down.
(d) Dams would bring aquatic fauna and vegetation together for biodiversity.

5 Which state made rooftop rainwater harvesting compulsory for all houses? (1)
(a) Punjab **(b)** Assam
(c) Haryana **(d)** Tamil Nadu

6 The Krishna-Godavari dispute arose from objections by Karnataka and Andhra Pradesh to the diversion of more water at Koyna by a multipurpose project of which state? (1)
(a) Madhya Pradesh **(b)** Kerala
(c) Maharashtra **(d)** Tamil Nadu

7 Ankur, who lives in Rajasthan, installed a submersible pump that can draw groundwater from 250-300 m deep. Such pumps are becoming popular across the state. What will this trend MOST LIKELY lead to in the near future? (1)
(a) More waterborne diseases
(b) Reduced monsoon water
(c) Water scarcity from over-use of groundwater
(d) Decline only in groundwater quality

8 The Bhopal Lake, built in the 11th century, was one of the largest artificial lakes of its time. In which present-day place is it? (1)
(a) Nagarjunakonda **(b)** Bhopal
(c) Bennur **(d)** Kolhapur

ASSERTION-REASON

9 **Assertion (A):** Johads and khadins are modern methods of water harvesting in India.
Reason (R): Johads and khadins are found in western India, particularly in Rajasthan. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** Water is a renewable resource.
Reason (R): Freshwater comes mainly from surface run-off and groundwater, which are continually renewed and recharged through the hydrological cycle. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 **Read the source and answer the questions that follow.** (4)

In the semi-arid and arid regions of Rajasthan, especially Bikaner, Phalodi and Barmer, almost every house traditionally had an underground tank, or tanka, for storing drinking water. Tankas were part of a well-developed rooftop rainwater harvesting system, built inside the house or courtyard and connected to the sloping roof by a pipe. The first spell of rain was usually not collected, as it cleaned the roofs and pipes; water from later showers was stored. Rainwater, or palar pani, is considered the purest form of natural water here. Many houses built underground rooms next to the tanka to beat the summer heat.

(i) Why was the first spell of rain not collected? (1)

(ii) What is 'palar pani'? (1)

(iii) Apart from storing water, how did tankas help people? Why were they a reliable source of water? (2)

SHORT ANSWER

12 **"Water may be available in sufficient quantity, yet an area can still suffer from water scarcity." Support the statement with suitable examples.** (3)

13 **Explain any three problems faced by local communities because of the construction of large dams.** (3)

LONG ANSWER

14 **Rainwater harvesting is a viable way to conserve water. Describe the different rainwater harvesting techniques practised in various parts of India.** (5)

15 **"Multipurpose river projects have changed the face of modern India." Explain how these projects have been a boon for the country.** (5)

Day 20 Answers with explanation

1 **(b)** Barmer (with Bikaner and Phalodi) had underground tankas; Jaisalmer has khadins; palar pani is the local name for rainwater; Meghalaya uses bamboo drip irrigation.

2 **(c)** NCERT: in western Rajasthan, rooftop harvesting is declining because plenty of water is now available from the perennial Rajasthan (Indira Gandhi) Canal.

3 **(b)** Water harvesting and rooftop harvesting save water and recharge groundwater; all the others increase pressure on water.

4 **(b)** Nehru believed dams would integrate agriculture and the village economy with rapid industrialisation and growth of the urban economy.

5 **(d)** Tamil Nadu is the first state in India to make rooftop rainwater harvesting compulsory for all houses, with legal provisions against defaulters.

6 **(c)** The Koyna project is in Maharashtra; diverting more water there would reduce downstream flow in Karnataka and Andhra Pradesh.

7 **(c)** Over-exploitation of groundwater lowers the water table and leads to scarcity.

8 **(b)** Bhopal (Madhya Pradesh). Nagarjunakonda (Andhra Pradesh), Bennur (Karnataka) and Kolhapur (Maharashtra) are known for ancient irrigation works.

9 **(d)** A is false: they are traditional systems (agricultural fields that store rainwater and moisten the soil). R is true: khadins in Jaisalmer and johads in other parts of Rajasthan.

10 **(a)** All water moves within the hydrological cycle, which keeps renewing it; that is exactly why water is renewable.

11 (i) It washed the dirt off the rooftops and pipes, so only clean water from later showers was stored. (ii) Rainwater, considered the purest form of natural water in western Rajasthan. (iii) Rooms built next to the tanka stayed cool in summer. The water could be stored till the next rainfall, so it was drinking water even when all other sources had dried up in summer.

12 1. **Qualitative scarcity:** water may be available but polluted by domestic and industrial wastes, chemicals, pesticides and fertilisers, making it unfit for use.
2. **Over-exploitation and excessive use:** large populations, water-intensive crops and industries use up water faster than it is recharged; private wells and tube wells lower the water table.
3. **Unequal access:** different social groups get unequal shares, so many people face shortage even in areas of plenty (e.g. urban slums in water-rich cities).

13 1. **Displacement:** large numbers of people lose their land and livelihood, with little share in the project's benefits.
2. **Unequal benefits:** the gains (irrigation, power) go mostly to landowners and large farmers and urban areas, widening the gap between rich and poor.
3. **Environmental and health problems:** submergence of land and forests, sedimentation, floods when reservoirs overflow, water-borne diseases and soil salinity from over-irrigation. Such issues led to movements like the Narmada Bachao Andolan and the Tehri Dam Andolan.

14 1. **Guls or kuls:** diversion channels in the hills and mountains of the western Himalayas, used for agriculture.
2. **Rooftop harvesting with tankas:** in Bikaner, Phalodi and Barmer (Rajasthan), rainwater from sloping roofs is stored in underground tanks for drinking.
3. **Inundation channels:** in the floodplains of Bengal, people built channels to irrigate their fields.
4. **Khadins and johads:** in arid Rajasthan (khadins in Jaisalmer), rain-fed storage structures that moisten the soil for cultivation.
5. **Bamboo drip irrigation:** a 200-year-old system in Meghalaya that brings stream water to plants through bamboo pipes, drop by drop. Modern examples: rooftop harvesting in Shillong (Meghalaya) and Gendathur village (Karnataka); Tamil Nadu has made rooftop harvesting compulsory for all houses.

Day 20 Answers continued

15 1. **Irrigation:** water from reservoirs has made agriculture possible in rain-starved areas, supporting food security (e.g. Bhakra Nangal for irrigation and hydel power).
2. **Electricity:** they generate hydroelectric power, a clean and renewable source of energy for industries and homes.
3. **Water supply:** they supply water for domestic and industrial use.
4. **Flood control:** reservoirs store excess monsoon water and regulate river flow.
5. **Other uses:** inland navigation, fish breeding and recreation. Nehru called dams the 'temples of modern India' because they would integrate agriculture and the village economy with rapid industrialisation and urban growth.

Day 20 Extra Practice

11 more questions from this chapter | new, no repeats

MCQ

1 In whose time were dams, lakes and irrigation systems built on a large scale in ancient India? (1)

(a) Chandragupta Maurya **(b)** Akbar
(c) Ashoka **(d)** None of these

2 About how much of the earth's surface is covered with water? (1)

(a) Two-third **(b)** Three-fourth
(c) One-fourth **(d)** One-half

3 Most of the earth is covered with water, yet freshwater makes up only about what share of the total? (1)

(a) 3.5% **(b)** 0.5% **(c)** 5.5% **(d)** 2.5%

4 What percentage of the world's total volume of water is estimated to be in the oceans? (1)

(a) 96.5% **(b)** 95% **(c)** 96% **(d)** 95.5%

5 Hydroelectric power makes up about what share of the total electricity produced in India? (1)

(a) 40% **(b)** 50% **(c)** 22% **(d)** 30%

6 In Gendathur village, about how many households have set up rooftop rainwater harvesting systems? (1)

(a) 200 households **(b)** 225 households
(c) 150 households **(d)** 175 households

7 In the fourteenth century, the tank in Hauz Khas, Delhi, was built to supply water to the Siri Fort area. Who built it? (1)

(a) Babur **(b)** Ibrahim Lodi
(c) Akbar **(d)** Iltutmish

8 Which remote, backward village near Mysuru in Karnataka has installed rooftop rainwater harvesting in its households? (1)

(a) Kallahalli **(b)** Chilkunda
(c) Gendathur **(d)** Vanasthalipuram

SHORT ANSWER

9 About what share of the world's total precipitation does India receive? Briefly explain what this figure tells us. (3)

10 Where does India rank in the world in water availability per person per year? By which year are large parts of India expected to face absolute water scarcity? (3)

LONG ANSWER

11 What is a dam? How does a dam function, and on what basis are dams classified into different types? (5)

Day 20 Extra Practice: Answers

1. **(a)** NCERT notes that dams, lakes and irrigation systems were built extensively in the time of Chandragupta Maurya.
2. **(b)** About three-fourth of the earth's surface is covered with water.
3. **(d)** Only about 2.5% of the world's total water is freshwater.
4. **(a)** About 96.5% of the world's water lies in the oceans. Only a small part is freshwater.
5. **(c)** NCERT states that hydroelectric power contributes about 22% of India's total electricity.
6. **(a)** Nearly 200 households in Gendathur have installed the system, so the village is known as rich in rainwater.

Day 20 Extra Practice: Answers continued

7. **(d)** NCERT states that the Hauz Khas tank was built by Iltutmish to supply water to the Siri Fort area.
8. **(c)** Villagers of Gendathur harvest rooftop rainwater to meet their household water needs.
9. India receives nearly 4 per cent of the global precipitation. This sounds like a good amount, but India also has a very large and growing population, so the water available per person is low. Rainfall also varies a lot between seasons and regions, so many areas still face water shortage.
10. India ranks 133rd in the world in water availability per person per annum. It is predicted that by 2025, large parts of India will join the countries or regions facing absolute water scarcity. This shows the urgent need to conserve and manage water.
11. 1. A dam is a barrier across flowing water that blocks, directs or slows down the flow, often creating a reservoir, lake or impoundment. 2. The word 'dam' refers to the reservoir rather than the structure itself. 3. Functioning: most dams have a section called a spillway or weir, over or through which water flows from time to time or all the time. 4. Dams are classified according to their structure, intended purpose or height. 5. By structure and materials used, they are timber dams, embankment dams or masonry dams, with several subtypes. By height, they are large or major dams, or low, medium height and high dams.

DAY 20 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 21, Revision 3: Geo Ch1-3, Pol Ch1

TONIGHT'S 2-MINUTE RECALL

Answer from memory, then check the notes

1. Two reasons why water is scarce even where it is plentiful.
2. Why did Nehru call dams "temples of modern India"?
3. Three objections to big dams.
4. Guls, khadins, tankas: where is each used?
5. Which state first made rooftop harvesting compulsory?

My mistakes from today's practice:

DAY 21

REVISION DAY 3 | GEOGRAPHY CH1-3 + POL SCI CH1

Revision 3: Resources, Forests, Water and Power-sharing

Recall sheets, maps from memory and a 25-question set

Aaj ka target

- ☐ Days 4, 5, 6, 12, 20, notes band karke shuru
- ☐ Soils aur 8 dams memory se map pe
- ☐ 25 sawal ek baithak mein
- ☐ 2 ghante, beech mein uthna mana

R1 Geography Ch1 to Ch3: recall sheet

RESOURCES AND DEVELOPMENT

- Resources by origin (biotic, abiotic), exhaustibility (renewable, non-renewable), ownership (individual, community, national, international), development (potential, developed, stock, reserves)

RESOURCES AND DEVELOPMENT

- Rio Earth Summit 1992: Agenda 21; Club of Rome 1968; Brundtland Report 1987
- Gandhiji: "enough for everybody's need, not for anybody's greed"
- Land: plains 43%, mountains 30%, plateaus 27%; net sown area about 54%

SOILS AND CONSERVATION

- Alluvial (most widespread; khadar new, bangar old), Black (regur, cotton, Deccan), Red and Yellow (iron, igneous rocks), Laterite (heavy rain, leaching, tea and coffee), Arid (sandy, kankar), Forest (hills)
- Erosion: gullies, ravines (Chambal), sheet erosion, wind erosion
- Conservation: contour ploughing, terrace farming, strip cropping, shelter belts

FOREST AND WILDLIFE

- Categories (IUCN): normal, endangered, vulnerable, rare, endemic, extinct
- Reserved forests (over half), protected forests, unclassed forests
- Wildlife Protection Act 1972; Project Tiger 1973
- Community: Chipko movement; Sariska (Rajasthan) villagers; Bishnois; Joint Forest Management, Odisha 1988; sacred groves

WATER RESOURCES

- Scarcity: over-use, large and growing population, unequal access, pollution
- Multi-purpose projects: Nehru called dams "temples of modern India"; problems: displacement, siltation, floods, inter-state disputes; Narmada Bachao Andolan
- Rainwater harvesting: guls or kuls (Western Himalayas), rooftop (Rajasthan, Shillong), bamboo drip irrigation (Meghalaya), tankas

SHIVAM BHAIYA SAYS

Soil pe trick: **colour = clue**. Black = cotton, red = iron, laterite = leaching se bani. Aur Belgium vs Sri Lanka ko ek table mein yaad karo: **accommodation vs majoritarianism**. Board ka favourite comparison yahi hai!

R2 Political Science Ch1 Power-sharing: recall sheet

BELGIUM VS SRI LANKA

- Belgium: Dutch 59%, French 40%, German 1%; Brussels: 80% French; accommodation through 4 constitutional changes (1970 to 1993)
- equal ministers, state governments, Brussels shared government, community government
- Sri Lanka: Sinhala 74%, Tamils 18%; 1956 Act made Sinhala the only official language; majoritarianism led to civil war

WHY AND HOW POWER IS SHARED

- Prudential reason: reduces conflict; moral reason: the spirit of democracy
- Horizontal: legislature, executive, judiciary (checks and balances)
- Vertical: Union, state, local governments (federal)
- Among social groups (community government, reserved seats); among parties, pressure groups (coalitions)

MAPS FROM MEMORY (2 MARKS OF TODAY'S 25)

Soil zones: alluvial (northern plains), black (Deccan: Maharashtra, Gujarat, MP), red and yellow (eastern and southern plateau), laterite (Western Ghats, Odisha hills). Dams: **Salal** (J and K), **Bhakra Nangal** (Punjab-HP), **Tehri** (Uttarakhand), **Rana Pratap Sagar** (Rajasthan), **Sardar Sarovar** (Gujarat), **Hirakud** (Odisha), **Nagarjuna Sagar** (Telangana-AP), **Tungabhadra** (Karnataka).

Day 21 Practice

25 questions | solve first, then check

MCQ

1 Rooftop rainwater harvesting is commonly practised to store drinking water in: (1)

(a) Shillong and Rajasthan **(b)** Gangetic plains
(c) Punjab **(d)** Kerala only

2 The majority community in Sri Lanka is: (1)

(a) Dutch **(b)** Sinhala **(c)** Tamil **(d)** French

3 The Chipko movement was mainly against: (1)

(a) dams **(b)** mining
(c) tourism **(d)** deforestation

4 **Which soil is called regur and is ideal for cotton? (1)**

(a) Arid soil **(b)** Alluvial soil
(c) Black soil **(d)** Laterite soil

5 **Species whose numbers have declined to a level where they are likely to become endangered are called: (1)**

(a) Rare species **(b)** Extinct species
(c) Endemic species **(d)** Vulnerable species

6 **Which relief feature holds the richest reserves of minerals and fossil fuels? (1)**

(a) Chotanagpur plateau **(b)** Shivalik hills
(c) Coastal plain **(d)** Gangetic plain

7 **Which organisation first advocated resource conservation in a systematic way in 1968? (1)**

(a) UNESCO **(b)** Club of Rome
(c) Earth Summit **(d)** Brundtland Commission

8 **Terrace cultivation is practised mainly in: (1)**

(a) Plains of Uttar Pradesh **(b)** Haryana
(c) Uttarakhand **(d)** Punjab

9 **Agenda 21 was signed at: (1)**

(a) Montreal Protocol, 1987
(b) Kyoto, 1997
(c) Club of Rome, 1968
(d) Rio de Janeiro Earth Summit, 1992

10 **Joint Forest Management began in 1988 in: (1)**

(a) Odisha **(b)** Kerala
(c) Rajasthan **(d)** Assam

11 **Who described dams as the "temples of modern India"? (1)**

(a) Sardar Patel **(b)** Jawaharlal Nehru
(c) B.R. Ambedkar **(d)** Mahatma Gandhi

12 **In heavy rainfall areas, which soil forms by intense leaching and is low in nutrients? (1)**

(a) Laterite soil **(b)** Desert soil
(c) Alluvial soil **(d)** Red soil

OPTIONS FOR EVERY ASSERTION-REASON QUESTION BELOW

(a) Both A and R are true, and R is the correct explanation of A. **(b)** Both A and R are true, but R is not the correct explanation of A. **(c)** A is true, but R is false. **(d)** A is false, but R is true.

ASSERTION-REASON

13 **Assertion (A):** In Belgium, the French-speaking minority was relatively rich and powerful.
Reason (R): The Dutch-speaking community got the benefit of economic development and education much later. (1)

14 **Assertion (A):** Power sharing is good for democracy.
Reason (R): It helps to reduce the possibility of conflict between social groups. (1)

15 **Assertion (A):** Black soil needs a lot of irrigation all the time.
Reason (R): Black soil has a high capacity to hold moisture. (1)

16 **Assertion (A):** Sri Lanka adopted majoritarian measures after independence in 1948.
Reason (R): The Sinhala community wanted to secure dominance over the government by virtue of being the majority. (1)

17 **Assertion (A):** Multi-purpose projects have often been opposed by local communities.
Reason (R): Large dams cause displacement of people and loss of livelihood. (1)

CASE-BASED

18 **Read the source and answer the questions that follow. (4)**

Belgium is a small country in Europe, smaller in area than the state of Haryana. It has borders with France, the Netherlands, Germany and Luxembourg. Of the country's total population, 59 per cent lives in the Flemish region and speaks Dutch. Another 40 per cent lives in the Wallonia region and speaks French. The remaining one per cent speak German. In the capital city Brussels, 80 per cent people speak French while 20 per cent are Dutch-speaking.

(i) Which language group is the majority in Belgium as a whole? (1)
(ii) Why was Brussels a special problem? (1)
(iii) Give two ways in which Belgium accommodated its communities. (2)

SHORT ANSWER

19 **Explain any three steps of resource planning in India. (3)**

20 **How can soil erosion be checked in hilly and desert areas? Give three methods. (3)**

21 **Describe any three ways in which communities have helped conserve forests and wildlife. (3)**

22 **Why are large dams opposed? Give three reasons. (3)**

23 **Distinguish between horizontal and vertical distribution of power.** (3)

MAPS FROM MEMORY

24 **Draw a quick outline of India and mark the four main soil zones (alluvial, black, red and yellow, laterite).** (1)

25 **On the same outline, mark any four of the eight board dams.** (1)

Day 21 Answers with explanation

1 **(a)** Rajasthan (tankas) and Shillong use rooftop harvesting.

2 **(b)** Sinhala speakers are about 74% of the population.

3 **(d)** Villagers in the Himalayas hugged trees to stop felling.

4 **(c)** Black soil (regur) is clayey, holds moisture and suits cotton.

5 **(d)** Vulnerable: likely to move into the endangered category soon (e.g. blue sheep, Asiatic elephant).

6 **(a)** The Chotanagpur plateau is rich in iron ore, coal and other minerals.

7 **(b)** The Club of Rome, 1968; the Brundtland Report came in 1987.

8 **(c)** Terraces are cut on hill slopes, as in Uttarakhand, to check erosion.

9 **(d)** Rio Earth Summit 1992 adopted Agenda 21 for sustainable development.

10 **(a)** Odisha passed the first JFM resolution in 1988.

11 **(b)** Nehru, because dams would integrate agriculture, industry and the village economy.

12 **(a)** Laterite soil forms from leaching in high temperature and heavy rain.

13 **(a)** Earlier development of the French speakers made them richer; R explains A.

14 **(a)** This is the prudential reason; R explains A.

15 **(d)** A is false: black soil holds moisture, so it needs less frequent irrigation.

16 **(a)** The 1956 Act and preferential policies came from this aim.

17 **(a)** Narmada Bachao Andolan is an example; R explains A.

18 (i) Dutch speakers (59%). (ii) Dutch were the national majority but a minority in Brussels. (iii) Equal Dutch and French ministers; powers to state governments; separate Brussels government; community government (any two).

19 Identify and survey resources (inventory, maps); build a planning structure with technology, skills and institutions; match resource plans with national development plans.

20 Contour ploughing and terrace farming on slopes; strip cropping; shelter belts of trees in deserts.

21 Sariska villagers fought mining; Chipko movement; Bishnois protect blackbuck and trees; Joint Forest Management; sacred groves.

22 Displacement of people; submergence of land and forests; siltation and floods; inter-state disputes; benefits go mostly to the rich.

23 Horizontal: among organs at one level (legislature, executive, judiciary) with checks and balances. Vertical: among levels (Union, state, local).

24 Check with the Day 5 soil map.

25 Check with the Day 20 dam map.

DAY 21 COMPLETE? ☐ Recall from memory ☐ 25 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 22, Political Science: Gender, Religion and Caste I

DAY 22

POLITICAL SCIENCE | CHAPTER 3 | PART 1 OF 2

Gender and Politics

Gender, Religion and Caste

Aaj ka target (pages 97-100)

- ☐ Gender and Politics
- ☐ Sexual division of labour ek line mein
- ☐ 10 sawal, women in politics wale data yaad
- ☐ 100 min, dhyaan sirf yahan

3.1 Public and Private Division

Gender division is a form of **hierarchical social division** seen everywhere, but it is rarely recognised in the study of politics. It is not based on biology but on **social expectations and stereotypes**.

KEY TERM: SEXUAL DIVISION OF LABOUR

A system in which **all work inside the home** is either done by the women of the family or organised by them through domestic helpers. Boys and girls are brought up to believe that the main responsibility of women is **housework and bringing up children**.

- Women do all the work inside the home: cooking, cleaning, washing, tailoring, looking after children. Men do these jobs too, but **outside the home** and for money (cooks in hotels, tailors).
- Women also work outside the home (fetching water, collecting fuel, working in fields; in cities, poor women work as domestic helpers). But much of their work is **not valued and does not get recognition**.
- Result: the **public sphere** (politics, decision-making) is dominated by men, and women are confined to the **private sphere**.

3.2 Feminist Movements

Women in different parts of the world organised and agitated for **equal rights**: voting rights (suffrage), and later, enhancing their **political and legal status** and improving **educational and career opportunities**. More radical women's movements aimed at equality in **personal and family life** as well. These movements are called **feminist movements**; a feminist is a woman or man who believes in equal rights and opportunities for women and men.

Today women work as scientists, doctors, engineers, lawyers, managers and university teachers. In **Scandinavian countries** such as Sweden, Norway and Finland, the participation of women in public life is very high.

3.3 Where Women Still Lag Behind in India

Literacy Literacy rate among women is only **54%**, compared with **76%** among men. A smaller proportion of girls go for higher studies, as parents prefer to spend on boys' education.

SHIVAM BHAIYA SOCH RAHE HAIN

Yaad rakho: gender division **biology se nahi, society ki soch se** banti hai. Ghar ka kaam "free" lagta hai kyunki uska koi paisa nahi milta, isliye wo count hi nahi hota.

Jobs and pay The proportion of women among the well-paid and valued jobs is still very small. On average an Indian woman works **one hour more than an average man** every day, yet much of her work is unpaid. The **Equal Remuneration Act, 1976** says equal wages for equal work, but in almost all areas women are paid less than men.

Sex ratio Parents prefer sons and find ways to have the girl child aborted. This **sex-selective abortion** has brought the child sex ratio down to **919 girls per thousand boys** (2011 Census) and much lower in some places.

Safety Women face harassment, exploitation and violence, at home and outside. Urban areas have become particularly unsafe for them.

3.4 Women's Political Representation

Fig. 22.1 *Women voters queue at a polling booth in New Delhi in the first general election, 1952. (Photo: Wikimedia Commons, public domain)*

- Issues of women's well-being are not given adequate attention because women are poorly represented in legislatures. In the Lok Sabha, women's share crossed **14.36%** of its total strength for the first time in **2019**; their share in state assemblies is less than 5%.
- One way out: make it **legally binding** to have a fair proportion of women in elected bodies. In **Panchayati Raj**, **one-third of seats** in local government bodies (panchayats and municipalities) are reserved for women; there are more than **10 lakh elected women representatives** in rural and urban local bodies.
- In **2023** Parliament passed the **Women's Reservation Act (Nari Shakti Vandan Adhiniyam)**, which provides for one-third of seats in the Lok Sabha and State Legislative Assemblies to be reserved for women.

REMEMBER IN ONE LINE

Gender division is social, not biological; sexual division of labour keeps women in the private sphere; feminist movements fought for equal rights; women lag in literacy (54% vs 76%), pay, sex ratio (919) and safety; one-third seats reserved in local bodies, and the 2023 Act provides for one-third in Lok Sabha and assemblies.

EXAM ALERT!

73rd Amendment se reservation **local bodies** (Panchayat, Zila Parishad) mein mila tha, Lok Sabha mein nahi. Ye MCQ trap hai. Gender division politics ka issue tabhi bana jab **women ne political struggle kiya**.

Day 22 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **A woman professional is paid less than a male colleague doing the same job. Which law ensures equal pay for equal work?** (1)

(a) Wages Act **(b)** Equal Wages Act
(c) Equal Remuneration Act **(d)** Labour Code

2 **Which is the true meaning of "equal treatment of women" as part of a democratic society?** (1)

(a) Women are always treated with dignity
(b) Most societies across the world are still male dominated
(c) Women are now treated as equals in politics
(d) It has become easier for women to struggle for their rights

3 **Reservation of seats for women through the 73rd Amendment applies at which level?** (1)

(a) Lok Sabha **(b)** Rajya Sabha
(c) State Assembly **(d)** Zilla Panchayat

4 **Statement (I): Feminist movements favour giving women more rights and opportunities.**
Statement (II): Radical women's movements aimed at equality in personal and family life too. (1)

(a) (I) correct, (II) incorrect
(b) (I) incorrect, (II) correct
(c) Both incorrect
(d) Both correct

5 **In a village, many girls leave school early because of early marriage, housework and lack of money. What does this suggest about dropout rates of girls?** (1)

(a) Lower than boys **(b)** Higher than boys
(c) Higher than 50% **(d)** Lower than 50%

6 **"All work inside the home is done by the women of the family or organised by them." This describes:** (1)

(a) Feminism **(b)** Patriarchy
(c) Sexual division of labour **(d)** Social change

ASSERTION-REASON

7 **Assertion (A): In India, women are still way behind men despite some improvements since independence.**
Reason (R): The literacy rate among women is only 54% compared with 76% among men. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

8 **Assertion (A): The child sex ratio in India has fallen to 919 girls per thousand boys.**
Reason (R): Many parents prefer sons and get the girl child aborted. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

9 **What is meant by sexual division of labour? How does it affect women's role in public life?** (3)

LONG ANSWER

10 **"Women in India still face discrimination and oppression in various ways." Support with five facts.** (5)

Day 22 Answers with explanation

1 **(c)** The Equal Remuneration Act, 1976.

2 **(b)** Equal treatment is still an ideal: most societies remain male dominated, so democracy has to work towards it.

3 **(d)** Zilla Panchayat: the 73rd Amendment reserved seats in rural local bodies.

4 **(d)** Both are correct.

5 **(b)** Higher than boys; fewer girls reach higher studies.

6 **(c)** Sexual division of labour.

7 **(a)** Low female literacy is one proof that women still lag behind, so R explains A.

8 **(a)** Son preference and sex-selective abortion caused the fall; R explains A.

9 Housework and child care are treated as women's responsibility. So women are confined to the private sphere and the public sphere of politics and decision-making is dominated by men; their work is unpaid and unrecognised.

10 Any five: literacy 54% vs 76%; fewer girls in higher studies; few women in well-paid jobs; unequal pay despite the 1976 Act; women work an hour more daily but much of it unpaid; sex ratio 919; harassment and violence; low share in legislatures.

MEME SAMJHO

Astra meme, fact inside

EQUAL REMUNERATION ACT, 1976

"Equal kaam ke liye equal pay ka kanoon to hai... par poori salary ki guarantee deta hai?"

Asli baat: The law says equal wages for equal work, but in almost all areas, from sports and cinema to factories and fields, **women are paid less than men**, even when both do exactly the same work.

GENDER DIVISION

A hierarchical social division based on social expectations and stereotypes, not on biology.

SEXUAL DIVISION OF LABOUR

All work inside the home is done by the women of the family or organised by them.

FEMINIST

A woman or man who believes in equal rights and opportunities for women and men.

PATRIARCHY

Literally rule by father: a system that values men more and gives them power over women.

CHILD SEX RATIO

Number of girls per thousand boys; in India it fell to 919 (2011 Census).

PUBLIC SPHERE

Politics and decision-making, dominated by men while women stay in the private sphere.

TONIGHT'S 2-MINUTE RECALL

1. Literacy: women **54%**, men **76%**
2. Equal Remuneration Act, **1976**: equal wages for equal work
3. Women in Lok Sabha crossed **14.36%** first in 2019
4. Women's Reservation Act, **2023**: one-third seats in Lok Sabha and assemblies

DAY 22 COMPLETE?

☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 23, Political Science: Gender, Religion and Caste II

DAY 23

POLITICAL SCIENCE | CHAPTER 3 | PART 2 OF 2

Religion, Communalism and Caste in Politics

Gender, Religion and Caste

Aaj ka target (pages 100-104)

- ☐ *Religion, communalism aur caste*
- ☐ *Secular state ke points ungliyon pe gino*
- ☐ *15 sawal, caste wale A-R dhyaan se*
- ☐ *110 min, phone aaj bhi side mein*

3.5 Religion and Politics: What is Fine

Gandhiji said religion can never be separated from politics; by religion he meant **moral values** common to all religions, not any particular faith. Expressing religious needs and interests in politics is acceptable, as long as the **state treats every religion equally** and family laws of all religions are fair, so that women are not discriminated against.

KEY TERM: COMMUNALISM

When **beliefs of one religion are presented as superior** to those of other religions, when the demands of one religious group are formed in opposition to another, and when **state power is used to establish the domination** of one religious group over the rest. Communal politics is based on the idea that religion is the principal basis of social community.

3.6 Four Forms of Communalism in Politics

1. **Everyday beliefs**: religious prejudices, stereotypes of religious communities, belief in the superiority of one's religion over others.
2. **Majoritarian dominance**: a desire to dominate by the majority community; for minorities it can take the form of a desire to form a **separate political unit**.
3. **Political mobilisation on religious lines**: use of sacred symbols, religious leaders, emotional appeal and plain fear to bring followers of one religion together in politics.
4. **Communal violence, riots and massacre**: India and Pakistan suffered some of the worst communal riots at the time of the **Partition**.

3.7 India: A Secular State

- There is **no official religion** for the Indian state, unlike the status of Buddhism in Sri Lanka, Islam in Pakistan and Christianity in England.
- The Constitution provides **freedom to all** to profess, practise and propagate any religion, or not to follow any.
- It **prohibits discrimination** on grounds of religion.
- It allows the state to **intervene in the matters of religion** to ensure equality within religious communities, e.g. it **bans untouchability**.

MEME SAMJHO

Astra meme, fact inside

A COMMUNAL LEADER AT ELECTION TIME

"Vote mangne aaye hain... dharm ke naam pe humare liye kaam karoge?"

Asli baat: That is **political mobilisation on religious lines**, a form of communalism. In a secular democracy, people should vote on issues, and the state must treat **all religions equally**.

3.8 Caste Inequalities

Caste division is special to India. In most societies occupations pass from one generation to another, but in the caste system it was taken to the extreme: members of the same caste group formed a social community that practised the same occupation, married within the group and did not eat with members of other castes. Caste was based on **exclusion of and discrimination against the "outcaste" groups**, who were subjected to untouchability.

- Reformers like **Jotiba Phule, Gandhiji, B.R. Ambedkar and Periyar Ramaswami Naicker** worked for a society free of caste inequality.
- **Urbanisation, growth of literacy and education, occupational mobility** and the weakening of landlords' position in villages have broken down caste hierarchy to a great extent.
- The Constitution **prohibits caste-based discrimination**. Yet caste has not disappeared: most people still marry within their caste, and untouchability has not ended completely despite the ban.

3.9 Caste in Politics and Politics in Caste

CASTE IN POLITICS

Parties choose candidates keeping in mind the **caste composition of the electorate**. Parties and candidates make appeals to caste sentiment. Universal adult franchise and **one-person-one-vote** forced leaders to win the support of all, and brought new consciousness among castes kept in an inferior position. But **no constituency has a clear majority of one caste**, and voters do not vote only on caste lines.

POLITICS IN CASTE

Politics also influences caste: each caste group tries to become bigger by **incorporating neighbouring castes**, enters coalitions with other castes, and new kinds of groups come up such as "backward" and "forward" castes. Caste politics helped Dalits and OBCs gain better **access to decision-making**; but exclusive attention to caste can divert attention from poverty, development and corruption, and can lead to tensions.

REMEMBER IN ONE LINE

Communalism = religion as the basis of political community, shown as beliefs, majoritarian dominance, mobilisation and violence; India is secular (no official religion, freedom of religion, no discrimination, state can intervene); caste hierarchy weakened by urbanisation and education but not gone; caste shapes politics and politics reshapes caste.

Day 23 Practice: Chapter Test

15 board-pattern questions | solve first, then check

MCQ

1 **India is called a secular state because:** (1)

(a) it promotes one religion as the national religion
(b) it does not establish any official religion and treats all religions equally
(c) it gives special privileges to the majority religion
(d) it discourages religious freedom

2 **Which of these is not true of the Indian Constitution?** (1)

(a) It gives official status to one religion
(b) It prohibits discrimination on grounds of religion
(c) It gives freedom to profess any religion
(d) It allows the state to intervene to ensure equality within religions

3 **Which country's state religion is Buddhism?** (1)

(a) England **(b)** Pakistan
(c) Sri Lanka **(d)** Nepal

4 **Who among these worked to establish a society free of caste inequality?** (1)

(a) Jotiba Phule **(b)** Rabindranath Tagore
(c) Jawaharlal Nehru **(d)** Sardar Patel

5 **Using sacred symbols, religious leaders and emotional appeal to bring followers of one religion together in politics is called:** (1)

(a) Secularism
(b) Political mobilisation on religious lines
(c) Majoritarianism
(d) Feminism

6 **Which factor has not helped weaken the caste system?** (1)

(a) Urbanisation
(b) Growth of literacy
(c) Occupational mobility
(d) Marrying within one's own caste

7 **Statement (I): No parliamentary constituency in India has a clear majority of one single caste. Statement (II): Voters always vote only on caste lines.** (1)

(a) (I) correct, (II) incorrect
(b) (I) incorrect, (II) correct
(c) Both correct
(d) Both incorrect

8 **Where did India and Pakistan suffer some of the worst communal riots?** (1)

(a) At the time of Partition
(b) During the First World War
(c) In the 1990s only
(d) During the Emergency

ASSERTION-REASON

9 **Assertion (A):** Communal politics is based on the idea that religion is the principal basis of social community.
Reason (R): Followers of a particular religion must belong to one community and their fundamental interests are the same. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** Caste has disappeared from contemporary India.
Reason (R): Untouchability has been banned by the Constitution. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read and answer: *"Caste has not disappeared from contemporary India. Even now most people marry within their own caste or tribe. Untouchability has not ended completely, despite constitutional prohibition."*
(i) What does the Constitution say about untouchability? (1)
(ii) Give one sign that caste still exists. (1)
(iii) Name two factors that have weakened caste hierarchy. (2) (4)

SHORT ANSWER

12 **Mention any three constitutional provisions that make India a secular state.** (3)

13 **Describe the various forms communalism takes in politics.** (3)

14 **Explain "politics in caste" with two examples.** (2)

LONG ANSWER

15 "Caste alone cannot determine election results in India." Explain with suitable arguments. (5)

Day 23 Answers with explanation

1 **(b)** No official religion; all religions treated equally.
2 **(a)** India gives no official status to any religion.
3 **(c)** Sri Lanka.
4 **(a)** Jotiba Phule (also Gandhiji, Ambedkar, Periyar).
5 **(b)** Political mobilisation on religious lines.
6 **(d)** Marrying within the caste keeps caste alive; the other three weakened it.
7 **(a)** (I) is correct; voters do not vote only on caste lines.
8 **(a)** At the time of Partition.
9 **(a)** R states the belief on which communal politics rests, so it explains A.
10 **(d)** A is false: caste still exists. R is true.
11 (i) It prohibits untouchability (and caste-based discrimination). (ii) Most people still marry within their own caste. (iii) Urbanisation, literacy and education, occupational mobility (any two).
12 No official religion; freedom to profess, practise and propagate any religion; no discrimination on grounds of religion; the state may intervene to ensure equality, e.g. banning untouchability (any three).
13 Everyday beliefs and prejudices; majoritarian dominance or demand for a separate unit; political mobilisation using religious symbols and leaders; communal violence and riots.
14 Castes enlarge by incorporating neighbouring castes; they form coalitions with other castes; new groups like "backward" and "forward" castes enter politics.
15 No constituency has a clear majority of one caste; parties field candidates from the same caste, so voters have to choose on other grounds; ruling parties and sitting MPs often lose; voters also weigh performance, leadership, party and issues; poor and rich of the same caste vote differently.

FLASH REVISION: KEY TERMS

Communalism: religion used as the basis of a political community

Secular state: no official religion; all religions equal

Caste hierarchy: ladder-like order of castes, outcastes at the bottom

Urbanisation: shift of people to cities; weakened caste

Occupational mobility: shift from one occupation to another

Untouchability: banned by the Constitution

WRITE IT RIGHT: 5-MARK ANSWER ON "CASTE AND POLITICS"

1. One line: caste plays different roles in politics and is also changed by politics.
2. Caste in politics: candidates chosen by caste composition; appeals to caste sentiment; one-person-one-vote gave new consciousness.
3. Politics in caste: castes absorb neighbouring sub-castes; caste coalitions; "backward" and "forward" groups.
4. Limits: no constituency has one caste majority; voters judge performance too.
5. Conclude: caste politics gave Dalits and OBCs a voice, but must not divert attention from poverty and corruption.

SHIVAM BHAIYA SAYS

Exam mein ye do headings alag likhna: **"caste in politics"** (party caste dekh ke ticket deti hai) aur **"politics in caste"** (castes milkar bade groups banati hain). Dono ke 3-3 points = full 5 marks.

EXAM ALERT!

Secular state ka matlab ye nahi ki state religion se door rahe. India state ko untouchability jaise mamlon mein **intervene** karne deta hai. Ye A-R mein bahut aata hai.

BOARD MEIN AISE LIKHO

Q. How has the caste hierarchy weakened in modern India? (3 marks)

1. **Reformers:** Jotiba Phule, Gandhiji, B.R. Ambedkar and Periyar Ramaswami Naicker worked for a society free of caste inequality.
2. **Social change:** urbanisation, growth of literacy and education, occupational mobility and the weakening of landlords in villages broke down the old hierarchy.
3. **Constitution:** it prohibits caste-based discrimination. Yet caste has not disappeared: most people still marry within their caste.

Tip: last point mein "caste has not disappeared" zaroor likho, balance dikhta hai.

TONIGHT'S 2-MINUTE RECALL

1.

TONIGHT'S 2-MINUTE RECALL

Gandhiji: religion means **moral values** that guide politics

2. India has **no official religion**
3. State **can intervene** in religion, e.g. to end untouchability
4. No constituency has a **clear majority of one caste**

Day 23 Extra Practice

3 more questions from this chapter | new, no repeats

MCQ

1 **According to the women's movement, what is common to the family laws of all religions in India?** (1)

(a) They are neutral towards both men and women
(b) They discriminate against women
(c) They discriminate against men
(d) They discriminate against both men and women

CASE-BASED

2 **Read the source and answer the questions that follow.** (4)

Unlike gender and religion, caste division is special to India. All societies have some kind of social inequality and some form of division of labour, and in most societies occupations pass from one generation to the next. The caste system is an extreme form of this. What makes it different is that here the hereditary division of occupations was sanctioned by rituals. Members of the same caste group were expected to form a social community that followed the same or similar occupation, married within the caste group and did not eat with members of other caste groups.

(i) In the caste system, what gave approval to the hereditary division of occupations? (1)
(ii) What is meant by caste hierarchy? (1)
(iii) How is the caste system different from social divisions found in other societies? Give two points. (2)

SHORT ANSWER

3 **"Caste continues to be closely linked to economic status." Examine the statement.** (3)

Day 23 Extra Practice: Answers

1 **(b)** Family laws deal with marriage, divorce, adoption and inheritance. The women's movement points out that the family laws of all religions discriminate against women.

2 (i) Rituals sanctioned the hereditary division of occupations. (ii) Caste hierarchy is a ladder-like formation in which all caste groups are placed from the 'highest' to the 'lowest' castes. (iii) (1) Occupations were passed on by birth, and rituals sanctioned this division. (2) Each caste formed a closed community: its members married within the group and did not eat with members of other castes.

3 1. On average, the upper castes are the best off, while Dalits and Adivasis are the worst off. The backward classes fall in between. 2. A much larger share of people from the lowest castes live below the poverty line than people from the upper castes. 3. Every caste now has some poor and some rich members, but the link between caste and economic status has not disappeared.

Next: Day 24, Economics: Money and Credit I

DAY 24

ECONOMICS | CHAPTER 3 | PART 1 OF 2

Money: From Barter to Banks

Money and Credit

Aaj ka target (pages 104-107)

- ☐ Money: barter se bank tak
- ☐ Double coincidence of wants ek example se
- ☐ 10 sawal, demand deposits wala clear karo
- ☐ Lagbhag 100 min, chill

3.1 Money as a Medium of Exchange

Fig. 24.1 *Trade without money: goods exchanged for goods. A 16th-century woodcut by Olaus Magnus.*

- In a **barter system**, goods are exchanged directly for goods, without money.
- It needs a **double coincidence of wants**: what one person wants to sell is exactly what the other wants to buy, and the other way round.
- Example: a shoe maker wants wheat. He must find a wheat farmer who not only sells wheat but also wants shoes in exchange.
- Money removes this problem. It acts as an **intermediate in the exchange process**, so it is called a **medium of exchange**. The shoe maker sells shoes for money, then buys wheat with money.

MEME SAMJHO

Astra meme, fact inside

BARTER SYSTEM

"Double coincidence dhoondte dhoondte thak gaye... samay aa gaya hai aapse vida lene ka."

Asli baat: Money works as a **medium of exchange**: anyone can sell for money and buy with money, so a **double coincidence of wants** is no longer needed.

DEPOSITS WITH BANKS AND CHEQUES

People keep extra cash in bank accounts and earn an **interest**. They can withdraw it whenever they need, so these are called **demand deposits**.
A **cheque** is a paper instructing the bank to pay a specific amount from the person's account to the person in whose name the cheque has been issued. Since payments can be made by cheque, demand deposits share the essential feature of money: a medium of exchange. Today people also pay digitally through bank transfers, ATM and credit cards, POS machines and UPI QR codes.

3.2 Modern Forms of Money

- Before coins, Indians used **grains and cattle** as money. Then came **metallic coins** of gold, silver and copper, a phase that continued well into the last century.
- Modern money is **paper notes and coins**. Unlike gold or silver, it has no use of its own; it is accepted because it is **authorised by the government**.
- In India, the **Reserve Bank of India (RBI)** issues currency notes **on behalf of the central government**. No other individual or organisation can issue currency.
- The law **legalises the rupee** as a medium of payment. No individual in India can legally refuse a payment made in rupees.

Fig. 24.2 *Coins of the Indian rupee.*

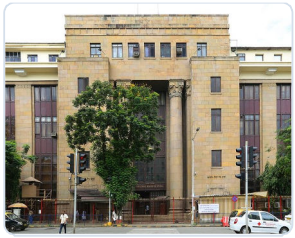

Fig. 24.3 *Reserve Bank of India headquarters, Mumbai.*

SHIVAM BHAIYA SOCH RAHE HAIN

Money supply mein do cheezein: **currency** jo public ke paas hai, aur **demand deposits** jo banks mein hain. Cheque khud money nahi, wo deposit ko **transfer karne ka order** hai.

3.3 Loan Activities of Banks

Depositors
Keep money in banks and earn interest

→

Bank
Keeps only about 5% of deposits as cash for withdrawals

→

Borrowers
Get loans from the rest, pay higher interest

REMEMBER IN ONE LINE

Barter needs a **double coincidence of wants**; money is a **medium of exchange**; RBI issues notes for the central government; **demand deposits** and cheques work like money; banks keep about **5%** as cash and lend the rest.

- Banks hold about **5 per cent** of their deposits as cash, because on any day only a few depositors come to withdraw.
- They use the **major portion** of deposits to give **loans**. So banks **mediate** between those with surplus funds (depositors) and those in need of funds (borrowers).
- Banks charge a **higher interest rate on loans** than they offer on deposits. This **difference** is the main source of income for banks.

EXAM ALERT!

"Banks deposits ka kya karte hain?" Answer mein **5 per cent cash**, **loans**, aur **interest ka difference = bank ki income**, teeno likhna hai.

Day 24 Practice

10 board-pattern questions | solve first, then check

MCQ

1 In India, currency notes are issued on behalf of the central government by: (1)

(a) the State Bank of India **(b)** the Ministry of Finance
(c) the Reserve Bank of India **(d)** commercial banks

2 These days, banks in India hold about what share of their deposits as cash? (1)

(a) 20 per cent **(b)** 10 per cent
(c) 12 per cent **(d)** 5 per cent

3 Deposits in bank accounts that can be withdrawn whenever the account holder wants are called: (1)

(a) demand deposits **(b)** fixed deposits
(c) collateral **(d)** time deposits

4 A shoe maker wants wheat, and a wheat farmer wants shoes. Both agree to exchange directly. This shows: (1)

(a) a medium of exchange
(b) double coincidence of wants
(c) terms of credit
(d) a debt trap

5 Why do banks keep a small part of their deposits as cash? (1)

(a) To pay salaries of bank staff
(b) To give loans to the government
(c) To pay depositors who may come to withdraw money
(d) To buy gold

6 Before metallic coins, which of these were used as money in early India? (1)

(a) Paper notes **(b)** Grains and cattle
(c) Cheques **(d)** Plastic cards

7 No individual in India can legally refuse a payment made in rupees because: (1)

(a) the rupee is made of precious metal
(b) the law legalises the rupee as a medium of payment
(c) banks pay interest on rupees
(d) the rupee is used only in India

8 A paper that instructs a bank to pay a specific amount from a person's account to the person named on it is a: (1)

(a) currency note **(b)** passbook
(c) cheque **(d)** loan form

ASSERTION-REASON

9 **Assertion (A):** Banks use the major portion of their deposits to give loans.
Reason (R): On any given day only some depositors come to withdraw cash. (1)

(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

10 Why are demand deposits considered a part of money in the modern economy? (3)

Day 24 Answers with explanation

1 **(c)** the Reserve Bank of India.
2 **(d)** about 5 per cent (NCERT 2026-27).
3 **(a)** demand deposits: withdrawable on demand.

4 **(b)** Each wants what the other sells: a double coincidence of wants.
5 **(c)** The cash is a provision for depositors who come to withdraw.
6 **(b)** Grains and cattle, then metallic coins.

7 **(b)** The rupee is authorised by law as a medium of payment.
8 **(c)** a cheque.
9 **(a)** Because only a few withdraw on a day, banks can safely lend most deposits. R explains A.

10 Demand deposits can be withdrawn whenever needed; payments can be made from them by **cheque** (and digitally) instead of cash; so they are widely accepted as a **medium of exchange**, the essential feature of money. Along with currency, they form the money supply.

TONIGHT'S 2-MINUTE RECALL

1. Barter needs a **double coincidence of wants**
2. Banks keep as cash about **5% of deposits**

DAY 24 COMPLETE?

☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 25, Economics: Money and Credit II

DAY 25

ECONOMICS | CHAPTER 3 | PART 2 OF 2 + TEST

Credit: Terms, Sources and Self Help Groups

Money and Credit

Aaj ka target (pages 107-111)

- ☐ *Credit aur SHG, chapter khatam*
- ☐ *Formal vs informal loan ki table khud banao*
- ☐ *15 sawal + test, terms of credit pakka*
- ☐ *110 min, phir Eco Ch3 done*

3.4 Credit: Two Different Situations

SALIM: CREDIT HELPS

A shoe manufacturer gets a big order before a festival. He takes a loan for **working capital** (raw material, wages), finishes the order on time and earns a profit. **Credit plays a vital and positive role.**

SWAPNA: CREDIT BECOMES A TRAP

A small farmer takes a loan from a moneylender for cultivation. Pests destroy the crop; she cannot repay and takes a fresh loan. She sells part of her land. This is a **debt trap**: credit pushed her into a worse situation.

Credit (loan) is an agreement in which the lender supplies the borrower with money, goods or services in return for the promise of future payment. Whether credit helps or hurts depends on the **risks** in a situation and whether there is **support** in case of loss.

3.5 Terms of Credit

- **Interest rate** the borrower must pay along with the principal.
- **Collateral:** an asset the borrower owns (land, building, vehicle, livestock, bank deposits) used as a **guarantee** to the lender until the loan is repaid. If the borrower fails to repay, the lender can sell it.
- **Documentation** needed, and the **mode of repayment**.
- Together these are called the **terms of credit**. They vary with the lender and the borrower.

SHIVAM BHAIYA SAYS

Collateral = **guarantee wali property**. Gareeb ke paas collateral nahi hota, isliye bank loan nahi milta aur wo moneylender ke paas jaata hai.

REMEMBER IN ONE LINE

Credit can help (Salim) or trap (Swapna); **terms of credit** = interest, collateral, documents, repayment; **formal** (banks, cooperatives, RBI-supervised) vs **informal** (moneylenders, no supervision); **SHGs** give the poor credit without collateral.

3.6 Formal and Informal Sources of Credit

FORMAL SECTOR

- Loans from **banks and cooperatives**.

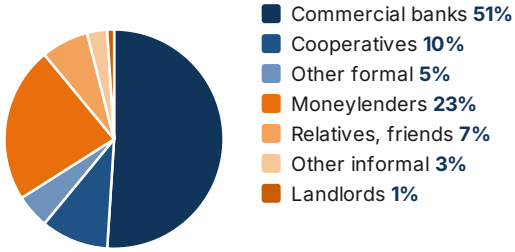

FORMAL SECTOR

- **RBI supervises** them: banks must keep a minimum cash balance and report whom they lend to and at what interest rate.
- Lower interest, but need collateral and documents.

INFORMAL SECTOR

- Moneylenders, traders, employers, relatives and friends.
- **No organisation supervises** them; they lend at whatever rate they choose.
- Higher interest, which can lead to a **debt trap**.

Sources of credit in rural India, 2019 (%)

Source: NCERT Graph 1 (All India Debt and Investment Survey 2019).

- About **two-thirds** of rural credit (51 + 10 + 5 = 66%) now comes from **formal** sources; about one-third still from informal lenders, mostly moneylenders.
- **Poor households** depend largely on informal sources; richer households get most of their loans from formal sources.
- Cheap and affordable credit is crucial for development: banks and cooperatives must **lend more, especially to the poor**, so that dependence on informal credit falls.

MEME SAMJHO

Astra meme, fact inside

FORMAL CREDIT, RURAL INDIA 2019

"Gaon ke loan mein do-tihai hissa ab banks aur cooperatives ka. Jalwa hai hamara!"

Asli baat: In 2019, banks (51%), cooperatives (10%) and other formal lenders (5%) gave about **66%** of rural credit. Moneylenders still gave **23%**.

3.7 Self Help Groups (SHGs) for the Poor

Fig. 25.1 *Members of a women's Self Help Group selling goods they produce.*

- A typical SHG has **15 to 20 members**, usually from one neighbourhood, who meet and save regularly; saving per member is **Rs 25 to Rs 100 or more**.
- Members take small loans **from the group itself**, at an interest lower than the moneylender's.
- After a year or two of regular saving, the group can get a **bank loan** in its name, **without collateral**, for self-employment.
- Decisions on savings and loans are taken **by the group members**. SHGs are the **building blocks of organisation of the rural poor** and help women become financially self-reliant.

GRAMEEN BANK OF BANGLADESH

Started in the 1970s as a small project; in 2018 it had over **9 million members** in about **81,600 villages**, almost all of them **women**. Its founder, **Professor Muhammad Yunus**, received the Nobel Peace Prize in 2006.

Day 25 Practice

15 board-pattern questions | solve first, then check

MCQ (WHOLE CHAPTER TEST)

1 **Miss S had to give the bank the papers of her house as a guarantee until her loan is repaid. This asset is called:** (1)

(a) principal **(b)** collateral
(c) interest **(d)** working capital

2 **Interest rate, collateral, documentation and the mode of repayment together make up the:** (1)

(a) terms of credit **(b)** debt trap
(c) money supply **(d)** demand deposits

3 **Ravi, a small farmer, wants a cheap loan. Farmers in his village have pooled their resources into a society that lends to members. Ravi should borrow from the:** (1)

(a) moneylender **(b)** trader
(c) cooperative society **(d)** landlord

4 **In a Self Help Group, most decisions about savings and loans are taken by:** (1)

(a) the bank manager (b) the members of the group
(c) the village moneylender (d) the RBI

5 **Professor Muhammad Yunus is the founder of:** (1)
(a) the Reserve Bank of India
(b) the World Bank
(c) a cooperative bank in India
(d) the Grameen Bank of Bangladesh

6 **Asha took a loan from a bank at an interest rate fixed under RBI supervision. Her loan is from the:** (1)
(a) informal sector (b) formal sector
(c) unorganised sector (d) private moneylender

7 **A shoe manufacturer borrows to buy leather and pay wages to finish an order. This money is his:** (1)
(a) fixed capital (b) collateral
(c) working capital (d) demand deposit

8 **Which of these is not a part of the terms of credit?** (1)
(a) Interest rate on the loan
(b) Collateral demanded
(c) Mode of repayment
(d) Interest the bank pays on savings deposits

9 **From the NCERT graph of rural credit (2019), about what share came from formal sources?** (1)
(a) 34 per cent (b) 51 per cent
(c) 66 per cent (d) 23 per cent

10 **Swapna's crop fails and she takes a fresh loan to repay the old one, then sells part of her land. This situation is called:** (1)
(a) a debt trap
(b) double coincidence of wants
(c) collateral
(d) a formal loan

ASSERTION-REASON

11 **Assertion (A):** Loans from the formal sector are generally cheaper than loans from moneylenders.
Reason (R): The RBI supervises the functioning of formal sources of loans. (1)
(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

ASSERTION-REASON

12 **Assertion (A):** Rich households depend mostly on informal sources of credit.
Reason (R): Informal lenders often charge very high rates of interest. (1)
(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

13 **Why do most poor households depend on informal sources of credit? Give three reasons.** (3)

14 **How do Self Help Groups help the rural poor, especially women? Explain any three points.** (3)

LONG ANSWER

15 **Distinguish between formal and informal sources of credit. Why should formal credit be expanded in rural India?** (5)

Day 25 Answers with explanation

1 (b) collateral.
2 (a) terms of credit.
3 (c) cooperative society: members pool deposits and lend at reasonable rates.
4 (b) the members of the group.
5 (d) Grameen Bank of Bangladesh; Nobel Peace Prize 2006.
6 (b) formal sector: banks work under RBI supervision.
7 (c) working capital: raw material and money for wages.
8 (d) Interest on savings is not a condition of a loan.
9 (c) 51 + 10 + 5 = 66 per cent.
10 (a) a debt trap.
11 (a) RBI supervision keeps formal interest rates reasonable, so R explains A.
12 (d) A is false: rich households borrow mostly from formal sources. R is true.
13 They lack **collateral**; banks need documents they may not have; banks are absent or far in many villages; moneylenders know them personally and lend quickly, even without collateral.

14 Members save regularly and take small loans from the group at lower interest than moneylenders; the group gets bank loans without collateral for self-employment; regular meetings give a platform to discuss social issues like health, nutrition and domestic violence, and women become financially self-reliant.

15 **Formal:** banks and cooperatives, supervised by RBI, lower interest, need collateral and documents. **Informal:** moneylenders, traders, relatives, no supervision, high interest, can cause debt traps. **Why expand:** cheaper credit raises incomes, lets people invest in farming and small business, reduces exploitation and debt traps, and reaches the poor who now depend on moneylenders.

SHIVAM BHAIYA KA NOTE

Economics Chapter 3 complete! Do cheezein pakki karo: **terms of credit ke 4 parts** aur **formal vs informal** ka table. SHG ka "15 to 20 members, bina collateral loan" wala point case-based mein bahut aata hai. Agla Economics Day: Day 33, Globalisation.

CREDIT

Lender gives money, goods or services now; borrower promises to pay later.

COLLATERAL

An asset (land, building, vehicle, deposits) the borrower pledges as a guarantee until the loan is repaid.

TERMS OF CREDIT

Interest rate, collateral, documentation and the mode of repayment.

DEBT TRAP

Failure to repay forces fresh loans, often by selling assets: credit makes life worse.

FORMAL SOURCES

Banks and cooperatives, supervised by the RBI; cheaper but need collateral.

SELF HELP GROUP

15 to 20 members, mostly women, who save regularly and lend to each other.

BOARD MEIN AISE LIKHO

Q. How does the RBI supervise the formal sources of loans? (3 marks)

1. **Cash balance:** it checks that banks actually keep the minimum cash balance out of the deposits they receive.
2. **Lending to all:** it sees that banks lend not just to profit-making businesses and traders but also to small cultivators, small-scale industries and small borrowers.
3. **Reports:** banks must tell the RBI how much they lend, to whom, and at what interest rate.

Tip: informal lenders par aisi koi supervision nahi, isliye unka interest itna zyada. Ye contrast likhoge toh examiner khush.

Day 25 Extra Practice

2 more questions from this chapter | new, no repeats

MCQ

1 **What is the chief source of a bank's income?** (1)

(a) The difference between the interest charged from borrowers and the interest paid to depositors
(b) Large amounts of money that the Government of India gives banks every year
(c) Charges that depositors pay the bank for keeping their money safe
(d) Profits earned by investing depositors' money in company shares

LONG ANSWER

2 **"Deposits with banks are useful for the depositors as well as for the country." Examine the statement.** (5)

Day 25 Extra Practice: Answers

1 **(a)** Banks charge a higher rate of interest on loans than they pay on deposits. This difference is their main source of income.

2 1. Depositors: their money stays safe with the bank, and the bank pays them interest on it. 2. Depositors: they can withdraw money whenever they need it. Demand deposits also let them make payments by cheque without using cash. 3. Depositors: in times of need, they can also borrow from the bank. 4. Country: banks keep only a small part (about 15 per cent) of deposits as cash. They use the major portion to give loans to farmers, traders, businesses and industries for many economic activities. 5. Country: banks act as a link between people who have surplus funds and people who need funds. This supports production, jobs and economic development.

Next: Day 26, History: Print Culture I

DAY 26

HISTORY | CHAPTER 5 | PART 1 OF 2

The First Printed Books and Print in Europe

Print Culture and the Modern World

Aaj ka target (pages 111-114)
- ☐ Print Culture shuru: China, Japan, Gutenberg
- ☐ Gutenberg ka press kab aur kaise, ek line
- ☐ 10 sawal, Diamond Sutra wala yaad
- ☐ 100 min, notes ke saath

5.1 The First Printed Books: China

- **China, Japan and Korea** developed the earliest print technology: a system of **hand printing**.
- From about **AD 594**, books in China were printed by **rubbing paper against the inked surface of woodblocks**. Both sides of the thin, porous sheet could not be printed, so the traditional Chinese **"accordion book"** was folded and stitched at the side.
- For a long time the **imperial state** was the major producer of printed material: it printed **textbooks in vast numbers** for the **civil service examination** that recruited its huge bureaucracy.
- By the **17th century**, as **urban culture bloomed**, the uses of print diversified: **merchants** used print in everyday life to collect trade information; **reading became a leisure activity** (fiction, poetry, autobiographies, romantic plays); **rich women** read, and many published poetry and plays; wives of scholar-officials and courtesans wrote about their lives.
- In the **late 19th century** Western printing techniques and the **mechanical press** came in as Western powers set up outposts. **Shanghai** became the hub of the new print culture, catering to Western-style schools.

5.2 Print in Japan

Fig. 5.1 *Opening page of the Diamond Sutra, printed in AD 868 with a woodcut picture and text. (This copy was found at Dunhuang, China.)*

- **Buddhist missionaries from China** brought hand-printing to Japan around **AD 768 to 770**.
- NCERT line to learn: the **oldest Japanese book**, printed in **AD 868**, is the Buddhist **Diamond Sutra**: six sheets of text with woodcut illustrations.
- Pictures were printed on **textiles, playing cards and paper money**. Books were cheap and abundant.
- In late 18th-century **Edo** (Tokyo), illustrated books showed urban life; bookshops sold books on women, music, tea ceremony, flower arrangement, etiquette and cooking.
- **Kitagawa Utamaro** (born Edo, 1753) was famous for **ukiyo** ("pictures of the floating world"), scenes of ordinary urban life.

5.3 Print Comes to Europe

11th century
Chinese **paper** reached Europe via the **silk route**; scribes could now copy manuscripts on paper.

→

1295
Marco Polo returned to Italy from China with the knowledge of **woodblock printing**.

→

Then
Italians began making books with woodblocks, and the technology spread across Europe.

- **Luxury editions** were still handwritten on very expensive **vellum** for aristocrats and rich monastic libraries, who scoffed at printed books as cheap vulgarities. **Merchants and university students** bought the cheaper printed copies.
- As demand grew, booksellers exported books and held **book fairs**. **Scribes** (skilled handwriters) were now employed by booksellers too; one bookseller could employ **more than 50 scribes**.
- **Manuscripts could not meet the demand**: copying was expensive, laborious and slow; manuscripts were fragile, awkward to handle and could not be carried around or read easily.
- By the early 15th century, **woodblock printing** was widely used in Europe for textiles, playing cards and religious pictures with short texts.

EXAM ALERT!
Manuscripts kyun fail hue? **4 words yaad rakho: expensive, slow, fragile, hard to carry.** 2-mark question mein bas ye 4 points likh do, poore marks.

5.4 Gutenberg and the Printing Press

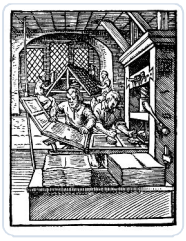

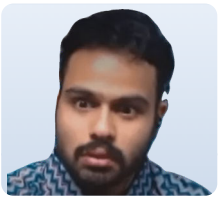

Fig. 5.2 A printing workshop, woodcut by Jost Amman, 1568. Types are set in the back while a sheet is pressed in front.

- **Johann Gutenberg** of Strasbourg, son of a merchant, grew up on a large agricultural estate and had seen **wine and olive presses**.
- He became a **master goldsmith** and could make lead moulds for trinkets.
- He **adapted the olive press** and used his moulds to cast **metal types** for the letters of the alphabet.
- By **1448** he perfected the system. His first book was the **Bible**: about **180 copies in 3 years**, fast for that time.
- Early printed books **looked like manuscripts**: metal letters copied ornamental handwriting; borders were **illuminated by hand** and pictures painted. Space for decoration was left blank, so **each copy was different**.
- Between **1450 and 1550** printing presses were set up in most countries of Europe. In the second half of the 15th century, **20 million copies** of printed books flooded Europe; in the 16th century, about **200 million**.
- This shift from hand printing to **mechanical printing** led to the **print revolution**.

5.5 The Print Revolution and Its Impact

- **A new reading public:** the cost of books came down; time and labour per book fell; books reached an ever-growing readership. Earlier, reading was for elites; common people lived in an **oral culture** (they heard texts read out, ballads and folk tales). Now a **hearing public became a reading public**.
- As literacy was still low, printers published **popular ballads and folk tales with pictures**, sung and recited at village and tavern gatherings. Oral culture entered print, and the line between the two blurred.
- **Fear of print:** many feared that without control over what was printed and read, **rebellious and irreligious thoughts** might spread. Religious authorities, monarchs and many writers and artists shared this fear.

MEME SAMJHO Astra meme, fact inside

A SCRIBE MEETS THE GUTENBERG PRESS, 1450S

"Hain? 180 Bibles sirf 3 saal mein? Ye kaise ho gaya?"

Asli baat: Gutenberg's press printed about 180 copies of the Bible in three years. A scribe copying by hand was far slower, which is why the press changed everything.

Fig. 5.3 *Martin Luther, portrait by Lucas Cranach the Elder, 1529.*

- In **1517** the religious reformer **Martin Luther** wrote **Ninety Five Theses** criticising practices and rituals of the **Roman Catholic Church**; a printed copy was posted on a church door in **Wittenberg**.
- His writings were printed in vast numbers. This led to a division in the Church and the start of the **Protestant Reformation**. His New Testament sold **5,000 copies** in a few weeks.
- Luther: **"Printing is the ultimate gift of God and the greatest one."**
- **Menocchio**, a 16th-century Italian miller, gave his own reading of the Bible and was executed. From **1558** the Church kept an **Index of Prohibited Books**.

MEME SAMJHO

Astra meme, fact inside

THE ROMAN CATHOLIC CHURCH, 16TH CENTURY

"Sab log khud Bible padhenge aur sawal nahi uthayenge? Guarantee deta hai?"

Asli baat: Print let people read and interpret religious texts themselves (Luther, Menocchio). Worried, the Church controlled publishers and booksellers and kept an Index of Prohibited Books from 1558.

SHIVAM BHAIYA KA NOTE

Gutenberg ke 3 numbers ratt lo: **1448** system perfect, **Bible** pehli book, **180 copies in 3 years**. Aur Luther ka **1517**, Ninety Five Theses. MCQ mein ye pakka aate hain.

REMEMBER IN ONE LINE

China printed with woodblocks from AD 594 (accordion books, exam textbooks, Shanghai later); Japan got print around AD 768-770 (Diamond Sutra, AD 868); paper and woodblocks reached Europe via the silk route and Marco Polo; Gutenberg perfected the press by 1448; print made a reading public and also spread dissent (Luther 1517), so the Church banned books from 1558.

Day 26 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **Around AD 768 to 770, Buddhist missionaries from China introduced hand-printing into:** (1)

(a) Korea **(b)** India **(c)** Japan **(d)** Vietnam

2 **Read the statements and choose the correct option.**

Statement I: **Western printing techniques and the mechanical press were imported into China in the late 19th century as Western powers set up outposts.**

Statement II: **Beijing became the hub of the new print culture, catering to Western-style schools.** (1)

(a) Both I and II are correct.
(b) I is incorrect and II is correct.
(c) Both I and II are incorrect.
(d) I is correct and II is incorrect.

3 **Kitagawa Utamaro is best described as:** (1)

(a) (A) a famous Chinese painter; (B) known for paintings of the sky
(b) (A) a well-known Japanese artist; (B) known for the art form *ukiyo*
(c) (A) an Indian sitar player; (B) known for his musical notes
(d) (A) a sportsperson; (B) known for chess

4 **Identify the person: (I) Grew up on a large agricultural estate among wine and olive presses. (II) Was a master goldsmith. (III) Changed the printing industry for ever. (IV) Printed about 180 copies of the Bible.** (1)

(a) Martin Luther **(b)** Johann Gutenberg
(c) Christopher Columbus **(d)** Leonardo da Vinci

5 **Which statement about books printed on Gutenberg's press is not true?** (1)

(a) Their borders were illuminated by hand and pictures were painted.
(b) Their metal letters imitated ornamental handwriting.
(c) No space was left on the printed page for decoration.
(d) They looked like handwritten manuscripts in appearance and layout.

6 **Why was reading manuscripts not easy? (I) Manuscripts were very cheap. (II) They were widely available. (III) They were written in English. (IV) They were fragile.** (1)
(a) Only (I) is right.
(b) Only (IV) is right.
(c) (I), (II) and (III) are right.
(d) Only (III) is right.

ASSERTION-REASON

7 **Assertion (A):** Every page of each copy printed on Gutenberg's press was different.
Reason (R): In every copy, the borders were designed, painted and illuminated by hand by artists. (1)
(a) Both true, R explains A
(b) Both true, R does not explain A
(c) A true, R false
(d) A false, R true

8 **Assertion (A):** A new reading public emerged with the printing press.
Reason (R): Printing increased the cost of books, so they became easily available. (1)
(a) Both true, R explains A
(b) Both true, R does not explain A
(c) A true, R false
(d) A false, R true

SHORT ANSWER

9 **"By the 17th century, as urban culture bloomed in China, the uses of print diversified." Explain with examples.** (3)

10 **In 16th-century Europe, a religious scholar publicly challenged the practices of the Roman Catholic Church through a set of printed arguments, and this led to a major religious movement. Name the scholar and the movement and explain the role of print in it.** (3)

Day 26 Answers with explanation

1 **(c)** Japan.
2 **(d)** I is correct. II is wrong: **Shanghai**, not Beijing, became the hub.
3 **(b)** Utamaro (born Edo, 1753) is known for *ukiyo*, pictures of ordinary urban life.
4 **(b)** Johann Gutenberg.
5 **(c)** Space for decoration was kept blank so each buyer could get it decorated.
6 **(b)** Manuscripts were fragile (and costly, awkward to carry, in varied scripts).
7 **(a)** Hand-done borders and paintings made each copy unique. R explains A.
8 **(c)** A is true; R is false because printing **reduced** the cost of books.
9 Print was no longer only for scholar-officials. **Merchants** used it for trade information; **reading became a leisure activity** (fiction, poetry, autobiographies, romantic plays); **rich women** read and published poetry and plays; wives of scholar-officials and courtesans wrote about their lives.
10 **Martin Luther**, **Ninety Five Theses** (1517); the **Protestant Reformation**. Print reproduced his writings in vast numbers, so his ideas reached many readers quickly; his New Testament sold 5,000 copies in weeks. The Church split. He called printing the greatest gift of God.

QUICK DATES FOR REVISION

AD 594 China prints with woodblocks. **768 to 770** hand-printing reaches Japan. **868** Diamond Sutra. **11th century** paper reaches Europe. **1295** Marco Polo returns to Italy. **1448** Gutenberg perfects the press. **1517** Luther's Ninety Five Theses. **1558** Index of Prohibited Books.

DAY 27

HISTORY | CHAPTER 5 | PART 2 OF 2 + CHAPTER TEST

Reading Mania, India and the World of Print

Print Culture and the Modern World

Aaj ka target (pages 114-121)
- ☐ Print ka India wala part, chapter khatam
- ☐ Vernacular Press Act ka saal aur wajah
- ☐ 15 sawal + test, who-wrote-what pakka
- ☐ 110 min, last mein dates box dekhna

5.6 The Reading Mania in Europe

- In the 17th and 18th centuries **literacy rose**: churches set up village schools for peasants and artisans. By the end of the 18th century literacy was **60 to 80 per cent** in some parts of Europe.
- Booksellers employed **pedlars** who roamed villages with little books: **almanacs** (ritual calendars), **ballads and folktales**.
- England: **penny chapbooks**, sold for a penny by petty pedlars called **chapmen**, so even the poor could buy. France: **Bibliotheque Bleue**, low-priced small books on poor paper with cheap blue covers. Also **romances** (4 to 6 pages) and **histories** (stories about the past).
- From the early 18th century the **periodical press** mixed current affairs with entertainment. Ideas of scientists and philosophers spread: **Isaac Newton**, **Thomas Paine, Voltaire, Rousseau**.

MEME SAMJHO

Astra meme, fact inside

A BOOKSELLER IN 18TH-CENTURY ENGLAND

"Gaon gaon jaake penny chapbooks bechoge? Humare liye kaam karoge?"

Asli baat: Booksellers hired pedlars to carry cheap books to villages. In England these sellers of penny chapbooks were called chapmen.

SHIVAM BHAIYA SOCH RAHE HAIN

Mercier ne kaha: **"Tremble, therefore, tyrants of the world! Tremble before the virtual writer!"** Yahan **tyrants = absolute monarchs aur Church**. Usne press ko **"the most powerful engine of progress"** bhi kaha. Dono lines MCQ mein aati hain.

5.7 Print Culture and the French Revolution

- Print **popularised Enlightenment ideas** (Voltaire, Rousseau) that attacked tradition, superstition and despotism and argued for the **rule of reason**.
- It created a **new culture of dialogue and debate**; values, norms and institutions were re-evaluated.
- By the 1780s, writings and **cartoons mocked the royalty**, showing the monarchy lost in pleasures while common people suffered.
- But print did not shape minds directly; it **opened the possibility of thinking differently**. People also read royal and Church propaganda.

5.8 The Nineteenth Century

- **Children:** primary education became compulsory in the late 19th century; a **children's press** began in France in **1857**. The **Grimm Brothers** collected peasant folk tales and published them in **1812**, leaving out anything "unsuitable".
- **Women** became readers and writers: penny magazines, manuals on behaviour and housekeeping; novelists **Jane Austen, the Brontë sisters, George Eliot**.
- **Lending libraries** in England educated white-collar workers, artisans and lower-middle-class people; some workers wrote political tracts and autobiographies.
- **New presses:** by the mid-19th century **Richard M. Hoe** of New York perfected the power-driven **cylindrical press** (8,000 sheets an hour, good for newspapers); late 19th century, the **offset press** printed up to six colours. Novels were serialised, cheap **Shilling Series** came in the 1920s, and **cheap paperbacks** sold during the 1930s Depression.

5.9 India and the World of Print

- India had a rich tradition of **handwritten manuscripts** in Sanskrit, Arabic, Persian and vernaculars, copied on **palm leaves** or handmade paper. They were **expensive and fragile**, and the varied scripts made them hard to read.
- The **printing press came to Goa** with **Portuguese missionaries** in the mid-16th century; Jesuit priests printed in **Konkani**. Catholic priests printed the first **Tamil** book in **1579** at Cochin and the first **Malayalam** book in **1713**. By 1710 Dutch Protestant missionaries had printed 32 Tamil texts.

Fig. 5.4 *A page of Hicky's Bengal Gazette, 1780.*

- From **1780**, **James Augustus Hickey** edited the **Bengal Gazette**, a weekly that called itself "a commercial paper open to all, but influenced by none". It carried advertisements (even of slaves) and **gossip about senior Company officials**.
- Governor-General **Warren Hastings persecuted Hickey** and encouraged officially approved papers.
- The first Indian newspaper: the weekly **Bengal Gazette** of **Gangadhar Bhattacharya**, close to Rammohun Roy.

RELIGIOUS REFORM AND PUBLIC DEBATES

- Print carried fierce debates on widow immolation, monotheism, Brahmanical priesthood and idolatry. **Rammohun Roy** published **Sambad Kaumudi** from **1821**; Hindu orthodoxy replied with **Samachar Chandrika**. In 1822 came two Persian papers, **Jam-i-Jahan Nama** and **Shamsul Akhbar**, and the Gujarati **Bombay Samachar**.
- The **Deoband Seminary** (1867) published thousands of **fatwas**. The first printed **Ramcharitmanas** came from **Calcutta in 1810**; from the 1880s the **Naval Kishore Press** (Lucknow) and **Shri Venkateshwar Press** (Bombay) printed religious texts in vernaculars. Newspapers carried news across regions and built **pan-Indian identities**.

Fig. 5.5 *Shakuntala and her friends, a print from the Ravi Varma Press.*

- **New forms:** the **novel**, lyrics, short stories and essays on social and political matters.
- **Raja Ravi Varma** made images for mass circulation; cheap prints and calendars were sold in bazaars.
- By the **1870s**, **caricatures and cartoons** commented on social and political issues: some **ridiculed** educated Indians' love of Western tastes and clothes, others showed fear of social change.

WOMEN, THE POOR AND PRINT

- **Rashsundari Debi**, a young married girl in an orthodox household, learnt to read in the secrecy of her kitchen and wrote her autobiography **Amar Jiban** (1876). From the 1860s **Kailashbashini Debi** wrote about women's lives; in the 1880s **Tarabai Shinde** and **Pandita Ramabai** wrote with anger about the lives of upper-caste Hindu women, especially **widows**. In 1926 **Begum Rokeya Sakhawat Hossein** condemned men for denying women education in the name of religion.
- **Ram Chaddha**'s fast-selling **Istri Dharm Vichar** taught women to be obedient wives. **Battala** in Calcutta printed cheap popular books.
- **Jyotiba Phule** wrote about the injustices of caste in **Gulamgiri** (1871); later **E.V. Ramaswamy Naicker (Periyar)** did the same in Madras. Kanpur millworker **Kashibaba** wrote **Chhote Aur Bade Ka Sawal** (1938) on caste and class exploitation; **Sudarshan Chakr**'s poems came out as **Sacchi Kavitayan** (1935).

WHO WROTE WHAT: 1-MARK GOLD

Martin Luther: Ninety Five Theses (1517). **Hickey:** Bengal Gazette (1780). **Rammohun Roy:** Sambad Kaumudi (1821). **Jyotiba Phule:** Gulamgiri (1871). **Rashsundari Debi:** Amar Jiban (1876). **Ram Chaddha:** Istri Dharm Vichar. **Sudarshan Chakr:** Sacchi Kavitayan (1935). **Kashibaba:** Chhote Aur Bade Ka Sawal (1938). **Tilak:** Kesari.

5.10 Print and Censorship

- Early colonial controls were aimed at **Englishmen** criticising Company rule. In **1835** Governor-General **Bentinck** agreed to revise press laws; **Thomas Macaulay** restored the earlier freedoms.
- After the **Revolt of 1857** the attitude changed. As vernacular papers became assertively nationalist, the **Vernacular Press Act, 1878** (modelled on the **Irish Press Laws**) gave the government extensive rights to **censor reports and editorials**. A "seditious" paper was **warned**; if it ignored the warning, the press could be **seized and the machinery confiscated**.
- Nationalist papers still grew. When Punjab revolutionaries were deported in **1907**, **Bal Gangadhar Tilak** wrote with sympathy about them in **Kesari**; he was jailed in **1908**, which set off protests all over India.

REMEMBER IN ONE LINE

Reading mania (chapbooks, chapmen, Bibliotheque Bleue) and Enlightenment books helped the French Revolution; the 19th century brought children, women and workers into reading and faster presses; in India print came with missionaries, carried reform debates and women's and caste writings, built nationalism, and faced censorship (Vernacular Press Act 1878, Tilak 1908).

MEME SAMJHO

Astra meme, fact inside

VERNACULAR PRESS ACT, 1878

Government to a "seditious" press: "Samay aa gaya hai aapse vida lene ka."

Asli baat: Under the 1878 Act a paper judged seditious was first warned; if it ignored the warning, its press could be seized and its printing machinery confiscated.

Day 27 Practice

15 questions | chapter test for Chapter 5

MCQ

1 Who published the Bengali weekly *Sambad Kaumudi*? (1)

(a) Tarabai Shinde **(b)** Ram Chaddha
(c) Rashsundari Debi **(d)** Raja Rammohun Roy

2 Who said that "the printing press is the most powerful engine of progress and public opinion is the force that will sweep despotism away"? (1)

(a) Louise-Sebastien Mercier **(b)** James Mill
(c) Johann Gutenberg **(d)** Martin Luther

3 Mercier wrote, "Tremble, therefore, tyrants of the world! Tremble before the virtual writer!" The "tyrants" here are: (1)

(a) the authors of new books
(b) the printing press
(c) absolutist institutions like the monarchy and the Church
(d) educated classes who wanted social change

4 By the mid-19th century, who perfected the power-driven cylindrical press? (1)

(a) Johann Gutenberg **(b)** Menocchio
(c) Richard M. Hoe **(d)** The Grimm Brothers

5 Which statement suggests that print culture was **not** the only cause of the French Revolution?
(I) Print spread ideas of reason and questioning.
(II) Print created a new public culture of debate.
(III) Print roused hostility against the monarchy.
(IV) Print opened up the possibility of thinking differently but did not directly shape people's minds. (1)

(a) (IV) only **(b)** (I) only
(c) (I) and (II) only **(d)** (I) and (IV) only

6 Which statement is **not** true? (1)

(a) The Bibliotheque Bleue were cheap books printed on poor paper.
(b) Penny chapbooks were introduced in France for wealthy readers.
(c) The periodical press gave news of wars and trade along with entertainment.
(d) Romances and histories were short stories for entertainment.

7 Who wrote *Gulamgiri* (1871) about the injustices of the caste system? (1)

(a) Raja Rammohun Roy **(b)** Bankim Chandra
(c) Jyotiba Phule **(d)** Bal Gangadhar Tilak

8 What was common to the writings of Kailashbashini Debi, Tarabai Shinde and Pandita Ramabai? (1)

(a) They demanded economic equality for the masses.
(b) They highlighted the experiences of women.
(c) They raised awareness about cultural heritage.
(d) They called Indians to fight for freedom.

9 Match the authors with their works.
(A) Rashsundari Debi (B) Sudarshan Chakr (C) Kashibaba (D) Bal Gangadhar Tilak
(I) Chhote Aur Bade Ka Sawal (II) Kesari (III) Amar Jiban (IV) Sacchi Kavitayan (1)

(a) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
(b) (A)-(I), (B)-(III), (C)-(II), (D)-(IV)
(c) (A)-(IV), (B)-(I), (C)-(III), (D)-(II)
(d) (A)-(III), (B)-(I), (C)-(IV), (D)-(II)

10 **Statement I:** From 1780, James Augustus Hickey edited the Bengal Gazette, which called itself "a commercial paper open to all, but influenced by none".
Statement II: Hickey also published a lot of gossip about the Company's senior officials in India. (1)

(a) I is correct, II is incorrect.
(b) Both I and II are correct.
(c) I is incorrect, II is correct.
(d) Both I and II are incorrect.

11 **Arrange in chronological order: (I) Print culture helped create conditions for the French Revolution. (II) Luther's writings began the Protestant Reformation. (III) Menocchio gave his own reading of the Bible. (IV) Gutenberg perfected his printing press.** (1)

(a) (III), (II), (I), (IV) **(b)** (IV), (II), (III), (I)
(c) (II), (IV), (III), (I) **(d)** (IV), (III), (I), (II)

12 **Statement I: By the 1870s, caricatures and cartoons in Indian journals and newspapers commented on social and political issues. Statement II: Some caricatures praised educated Indians' fascination with Western tastes and clothes.** (1)

(a) Both I and II are correct.
(b) I is incorrect, II is correct.
(c) I is correct, II is incorrect.
(d) Both I and II are incorrect.

CASE-BASED

13 **Read the source and answer the questions that follow.** (4)

"Krishnaji Trimbuck Ranade, inhabitant of Poona, intends to publish a Newspaper in the Marathi language with a view of affording useful information on every topic of local interest. It will be open for free discussion on subjects of general utility, scientific investigation ..." (Bombay Telegraph and Courier, 1849)
"The task of the native newspapers and political associations is identical to the role of the Opposition in the House of Commons ... that is, of critically examining government policy to suggest improvements ..." (Native Opinion, 1870)

(i) Why did Krishnaji want to publish his newspaper? (1)
(ii) How was the task of native newspapers like that of the Opposition? (1)
(iii) Give two reasons why newspapers became popular in 19th-century India. (2)

SHORT ANSWER

14 **Why did some people fear easily available printed books? Give one example from Europe and one from India.** (3)

LONG ANSWER

15 **Why did the colonial government pass the Vernacular Press Act in 1878? How did it affect vernacular newspapers?** (5)

Day 27 Answers with explanation

1 **(d)** Raja Rammohun Roy, from 1821.
2 **(a)** Louise-Sebastien Mercier, 18th-century French novelist.
3 **(c)** Absolute monarchs and the Church, which tried to control thought.
4 **(c)** Richard M. Hoe of New York: 8,000 sheets an hour. (Educart's stem says mid-18th century; NCERT says mid-19th.)
5 **(a)** Only (IV) says print did not shape minds directly.
6 **(b)** Penny chapbooks were from **England** and were meant for the **poor**.
7 **(c)** Jyotiba Phule.
8 **(b)** They wrote about women's lives: kept at home, in ignorance, with hard labour; widows' misery.
9 **(a)** (A)-(III), (B)-(IV), (C)-(I), (D)-(II).
10 **(b)** Both are correct; Warren Hastings persecuted Hickey.
11 **(b)** Gutenberg (1448), Luther (1517), Menocchio (later 16th century), French Revolution (1789).
12 **(c)** I is correct. II is wrong: such caricatures **ridiculed** that fascination.
13 (i) To give useful information on local topics and allow free discussion of science, history and other subjects. (ii) Both critically examine government policy and suggest improvements. (iii) Any two: cheap and widely available; spread reform debates and news across regions; exposed colonial misrule and built nationalist feeling.
14 People feared rebellious and irreligious ideas would spread without control. **Europe:** the Roman Catholic Church feared dissent after Luther's writings and Menocchio, and kept an Index of Prohibited Books (1558). **India:** the colonial government feared nationalist papers and passed the Vernacular Press Act (1878); orthodox groups also feared reformist writings.
15 **Why:** after 1857 the British turned hostile to the native press; vernacular papers became assertively nationalist and criticised colonial rule. **Act:** modelled on the Irish Press Laws; gave the government extensive rights to censor reports and editorials. **Effect:** papers were tracked regularly; a seditious paper was warned, then its press seized and machinery confiscated. Yet nationalist papers grew; Tilak's Kesari (1907) and his jailing in 1908 led to protests across India.

PRINT IN INDIA: TIMELINE

1579 first Tamil book, Cochin. **1713** first Malayalam book. **1780** Hickey's Bengal Gazette. **1810** Ramcharitmanas printed, Calcutta. **1821** Sambad Kaumudi. **1822** Jam-i-Jahan Nama, Shamsul Akhbar, Bombay Samachar. **1835** Bentinck revises press laws. **1867** Deoband Seminary. **1871** Gulamgiri. **1876** Amar Jiban. **1878** Vernacular Press Act. **1908** Tilak jailed. **1938** Chhote Aur Bade Ka Sawal.

SHIVAM BHAIYA KA NOTE

Chapter 5 complete! Aaj raat "Who wrote what" box 2 baar bol ke padho aur 1517 se 1908 tak ki ek timeline khud banao. Day 36 revision mein yahi kaam aayega.

Day 27 Extra Practice

13 more questions from this chapter | new, no repeats

MCQ

1 **Among Indians, who was the first to bring out a newspaper, the weekly Bengal Gazette?** (1)

(a) Raja Rammohun Roy **(b)** Madan Mohan Malaviya
(c) Bal Gangadhar Tilak **(d)** Gangadhar Bhattacharya

2 **In Europe, merchants and university students bought the cheaper printed books. What kind of books did aristocratic circles still prefer?** (1)

(a) Books engraved on copper plates
(b) Books written on papyrus leaves
(c) Handwritten books on very costly vellum, a parchment made from animal skin
(d) Handwritten books on silk

3 **Printed books in early modern Europe could be read only by the literate. In the chapter, literacy rates are said to have stayed very low till the twentieth century in most:** (1)

(a) Asian countries **(b)** European countries
(c) Australian countries **(d)** American countries

4 **From which century had lending libraries been in existence in Europe?** (1)

(a) Sixteenth century **(b)** None of these
(c) Seventeenth century **(d)** Fifteenth century

5 **Which of these was NOT a reason why scientific ideas became popular among common people in eighteenth-century Europe?** (1)

(a) The printing press had developed
(b) The ideas of Isaac Newton were printed
(c) People took a growing interest in science and reason
(d) Traditional aristocratic groups supported these ideas

6 **Match the terms with their meanings. (A) Ballad (B) Ulama (C) Heretical (D) Seditious. (I) Action, speech or writing that is seen as opposing the government (II) A historical account or folk tale in verse, usually sung or recited (III) Beliefs that do not follow the accepted teachings of the Church (IV) Legal scholars of Islam and the Sharia** (1)

(a) (A)-(II), (B)-(IV), (C)-(III), (D)-(I)
(b) (A)-(IV), (B)-(II), (C)-(I), (D)-(III)
(c) (A)-(III), (B)-(IV), (C)-(II), (D)-(I)
(d) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)

ASSERTION-REASON

7 **Assertion (A):** Handwritten manuscripts could not meet the ever-growing demand for books in Europe.
Reason (R): Paper made in China reached Europe through the silk routes. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

8 **Assertion (A):** Children became an important category of readers in Europe.
Reason (R): Primary education became compulsory from the late nineteenth century. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

9 **Assertion (A):** In nineteenth-century India, social and religious reformers and the Hindu orthodoxy debated issues like widow immolation, monotheism, Brahmanical priesthood and idolatry.
Reason (R): The Deoband Seminary, founded in 1867, published thousands of fatwas telling Muslim readers how to conduct themselves in everyday life and explaining Islamic doctrines. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

10 How did print culture help the growth of nationalism in India? Explain. (3)

LONG ANSWER

11 Describe any five strategies that printers and publishers developed in the nineteenth and twentieth centuries to sell their books. (5)

12 "Print not only encouraged the publication of conflicting opinions among communities, but also connected communities and people in different parts of India." Examine the statement. (5)

13 Explain any five effects of the spread of print culture on poor people in India. (5)

Day 27 Extra Practice: Answers

1 **(d)** The first Indian newspaper was the weekly Bengal Gazette, brought out by Gangadhar Bhattacharya, who was close to Rammohun Roy.

2 **(c)** Luxury editions for aristocrats and rich monastic libraries were still handwritten on expensive vellum. These buyers looked down on printed books as cheap and vulgar.

3 **(b)** NCERT notes that literacy rates in most European countries were very low till the twentieth century. So printers published popular ballads and folk tales, which were often read aloud to listeners.

4 **(c)** Lending libraries existed from the seventeenth century. In the nineteenth century they helped educate white-collar workers, artisans and lower-middle-class people in England.

5 **(d)** Print carried the ideas of scientists like Newton to a wide public that was interested in science and reason. The aristocracy did not promote these ideas; it was among the authorities that people began to question.

6 **(a)** A ballad is a folk tale or historical account in verse. The ulama are Islamic legal scholars, heretical beliefs go against Church teachings, and seditious acts oppose the government.

Day 27 Extra Practice: Answers continued

7 **(b)** Both statements are true. Manuscripts fell short because copying was slow, costly and laborious, not because of how paper reached Europe.

8 **(a)** Compulsory primary education made many more children literate. So children grew into a large group of readers, and books and presses for children were set up.

9 **(b)** Both statements are true and both show print being used in religious debates. However, the Deoband fatwas do not explain the Hindu reform debates.

10 (1) Vernacular newspapers reported colonial misrule and criticised government policies, which built public opinion against British rule. (2) Newspapers, journals and books carried nationalist ideas across regions and linked people in different parts of India. (3) Even after the Vernacular Press Act of 1878, nationalist papers kept growing and kept encouraging nationalist activity. For example, Tilak wrote with sympathy about deported Punjab revolutionaries in Kesari in 1908 and was imprisoned, which led to widespread protests.

11 (1) Important novels were serialised in nineteenth-century periodicals, which also gave rise to a particular style of writing. (2) In the 1920s in England, popular works were sold in a cheap series called the Shilling Series. (3) During the Great Depression of the 1930s, publishers feared a fall in book sales, so they brought out cheap paperback editions to keep people buying. (4) The dust cover or book jacket, introduced in the twentieth century, made books more attractive. (5) Publishers targeted new groups of readers, such as children, women and workers, and lending libraries helped books reach a much wider public.

12 (1) From the early nineteenth century, reformers and the Hindu orthodoxy debated widow immolation, monotheism, Brahmanical priesthood and idolatry through printed tracts and newspapers. (2) Rammohun Roy's Sambad Kaumudi supported reform, while the orthodox Samachar Chandrika opposed it, so different views reached the public. (3) The Deoband Seminary printed fatwas, and Muslim reformers and their opponents used cheap lithographic presses to spread their views. (4) Religious texts such as the Ramcharitmanas were printed in vernacular languages and read widely, even aloud to groups. (5) Newspapers carried news from one place to another, creating pan-Indian identities and linking people across regions.

Day 27 Extra Practice: Answers continued

13 (1) Very cheap small books were sold at crossroads in nineteenth-century Madras towns, so the poor could also buy them. (2) Public libraries set up from the early twentieth century, mostly in cities and towns and sometimes in prosperous villages, gave the poor access to reading. (3) Reformers such as Jyotiba Phule in Gulamgiri, and later B.R. Ambedkar and E.V. Ramaswamy Naicker, wrote powerfully against the caste system and their writings were read across India. (4) Factory workers began writing about their own lives; for example, Kashibaba wrote on the links between caste and class exploitation. (5) Mill workers in Bangalore set up libraries to educate themselves, following the example of Bombay workers, which raised their awareness of their rights.

Next: Day 28, Geography: Agriculture I

DAY 28

GEOGRAPHY | CHAPTER 4 | PART 1 OF 2

Types of Farming and Cropping Seasons

Agriculture

Aaj ka target (pages 121-124)

- ☐ Agriculture shuru: farming ke types
- ☐ Rabi, kharif, zaid ki fasal aur mahine pakke
- ☐ 10 sawal, crops ke naam spelling ke saath
- ☐ 100 min, khana khaake baitho

India is an **agriculturally important** country: about two-thirds of its population is engaged in agricultural activities. Agriculture is a primary activity that produces most of the food we eat, and raw materials for industries.

28.1 Types of Farming

1. PRIMITIVE SUBSISTENCE FARMING

- Practised on small patches of land with **primitive tools** (hoe, dao, digging sticks) and family or community labour; depends on monsoon and natural fertility of soil.
- **Slash and burn**: farmers clear a patch by felling and burning trees, grow crops, and move to a new patch when fertility falls. Nature replenishes the soil.
- Called **jhumming** in Assam, Meghalaya, Mizoram and Nagaland; **Pamlou** in Manipur; **Dipa** in Bastar (Chhattisgarh) and the Andaman and Nicobar Islands.

Fig. 28.1 *Jhum (slash and burn) fields in the Nokrek area, Meghalaya. (Wikimedia Commons, CC BY 2.0)*

2. INTENSIVE SUBSISTENCE

In areas of **high population pressure** on land. Labour-intensive; high doses of **biochemical inputs** and irrigation. The **right of inheritance** keeps dividing land holdings into smaller, uneconomical plots.

3. COMMERCIAL

Higher doses of **modern inputs**: HYV seeds, chemical fertilisers, insecticides, pesticides. Degree of commercialisation varies: **rice** is a commercial crop in **Punjab and Haryana** but a subsistence crop in **Odisha**.

3. COMMERCIAL

PLANTATION

A type of commercial farming: a **single crop** on a large area, with capital and migrant labour, linked to industry and markets. **Tea** in Assam and North Bengal, **coffee** in Karnataka; also rubber, sugarcane, banana.

YAAD RAKHO: QUICK FACTS

- **Primitive subsistence farming** is slash and burn: **jhumming** in Assam, Meghalaya, Mizoram and Nagaland, **Pamlou** in Manipur, **Dipa** in Bastar (Chhattisgarh) and the Andaman and Nicobar Islands.
- **Rabi**: sown October to December, harvested April to June; wheat, barley, peas, gram, mustard. Western temperate cyclones help these crops.

OTHER NAMES OF SLASH AND BURN (ONE-MARK FAVOURITE)

India: bewar or dahiya (Madhya Pradesh), podu or penda (Andhra Pradesh), pama dabi or koman or bringa (Odisha), kumari (Western Ghats), valre or waltre (south-east Rajasthan), khil (Himalayan belt), kuruwa (Jharkhand). **World:** milpa (Mexico and Central America), conuco (Venezuela), roca (Brazil), masole (Central Africa), ladang (Indonesia), ray (Vietnam).

SHIVAM BHAIYA SOCH RAHE HAIN

Ek hi crop alag jagah alag type ka farming ho sakta hai. **Rice:** Punjab mein **commercial**, Odisha mein **subsistence**. Ye example A-R aur MCQ dono mein aata hai.

28.2 Cropping Pattern: Three Seasons

Season	Sown and harvested	Main crops	Notes
Rabi	Sown in winter (October to December); harvested in summer (April to June)	Wheat, barley, peas, gram, mustard	Punjab, Haryana, Himachal Pradesh, Jammu and Kashmir, Uttarakhand, Uttar Pradesh. Winter rain from **western temperate cyclones** helps.
Kharif	Sown with the **onset of monsoon**; harvested in September to October	Paddy, maize, jowar, bajra, tur (arhar), moong, urad, cotton, jute, groundnut, soyabean	Rice belt: Assam, West Bengal, coastal Odisha, Andhra Pradesh, Telangana, Tamil Nadu, Kerala, Konkan coast, Uttar Pradesh, Bihar. Assam, West Bengal, Odisha grow three paddy crops: **Aus, Aman, Boro**.
Zaid	A short season **between rabi and kharif**, in summer	Watermelon, muskmelon, cucumber, vegetables, fodder crops	**Sugarcane** takes almost a year to grow.

MEME SAMJHO

Astra meme, fact inside

KHARIF SEASON BEGINS

"Monsoon aa gaya, khet taiyaar, dhaan ki buwai shuru... aaj to maza aa jayega!"

Asli baat: Kharif crops are sown with the **onset of the monsoon** and harvested in **September to October**: paddy, maize, jowar, bajra, cotton, jute, groundnut, soyabean.

YAAD RAKHO: QUICK FACTS

- **Kharif**: sown with the onset of monsoon, harvested September to October; paddy, maize, jowar, bajra, tur, moong, urad, cotton, jute, groundnut, soyabean.

SHIVAM BHAIYA KA NOTE

Season yaad karne ka shortcut: **Rabi = Rajai** (winter mein boya), **Kharif = Kheti monsoon wali**, **Zaid = Zara si** (short summer season, tarbooz-kakdi).

Day 28 Practice

10 board-pattern questions | solve first, then check

MCQ

1 In which type of farming are high doses of modern inputs such as HYV seeds, chemical fertilisers, insecticides and pesticides used to get higher productivity? (1)

(a) Plantation farming
(b) Commercial farming
(c) Primitive subsistence farming
(d) Zero budget farming

2 Raju works as a mason in Pune for most of the year, but every monsoon he goes back to his village and farms his small family plot till the end of November. Which type of farming does he most likely practise? (1)

(a) Mixed farming
(b) Plantation farming
(c) Intensive subsistence farming
(d) Commercial grain farming

3 Which of the following does NOT describe intensive subsistence farming? (1)

(a) It is labour-intensive.
(b) It is a type of commercial farming.
(c) It is practised in densely populated areas.
(d) Biochemical inputs and irrigation are used in large amounts.

4 Read the two statements about slash and burn agriculture.
Statement I: In Madhya Pradesh it is called 'Bewar' or 'Dahiya'.
Statement II: In Manipur it is called 'Dipa'. (1)

(a) Both I and II are correct.
(b) Both I and II are incorrect.
(c) I is correct but II is incorrect.
(d) I is incorrect but II is correct.

5 A farmer wants to grow muskmelon so that it gets the right climate and water. In which season should it be grown? (1)

(a) Kharif **(b)** Zaid
(c) Rabi **(d)** All three seasons

6 Which one of the following is a rabi crop? (1)

(a) Cotton **(b)** Millets **(c)** Gram **(d)** Rice

ASSERTION-REASON

7 **Assertion (A):** Intensive subsistence farming uses large doses of biochemical inputs and irrigation.
Reason (R): These inputs are used to obtain higher production from a small piece of land. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

8 Read the source and answer the questions that follow. (4)

In plantation farming, a single crop is grown over a large area. A plantation links agriculture with industry. Plantations spread over large tracts of land, use capital-intensive inputs and depend on migrant labourers. All their produce goes as raw material to the related industries. Tea, coffee, rubber, sugarcane and banana are important plantation crops in India; tea in Assam and North Bengal and coffee in Karnataka are well-known examples. As the output is mainly for the market, a good network of transport and communication joining plantations, processing industries and markets is essential.

(i) Plantation farming described in the source is a kind of: (1)

(a) Intensive agriculture
(b) Slash and burn agriculture
(c) Commercial agriculture
(d) Primitive agriculture

(ii) Which of these is NOT a plantation crop? (1)

(a) Banana **(b)** Coffee
(c) Silk **(d)** Sugarcane

(iii) Which statement best supports the idea that a plantation is an interface of agriculture and industry? (1)

(a) The entire produce is meant for the market as industrial raw material.
(b) Plantations cover large tracts of land.
(c) A single crop is grown on a large area.
(d) Plantations use transport facilities.

(iv) Which state is the leading producer of coffee in India? (1)

(a) Maharashtra **(b)** Karnataka
(c) Kerala **(d)** Goa

SHORT ANSWER

9 **State any three features of commercial farming in India.** (3)

LONG ANSWER

10 **A friend wants to start farming and asks you about the cropping seasons of India. Name the three seasons and describe each with its sowing and harvesting time and examples of crops.** (5)

Day 28 Answers with explanation

1 **(b)** Heavy use of modern inputs for higher output is the main feature of commercial farming.

2 **(c)** A small plot, family labour and produce mainly for the family's own needs point to intensive subsistence farming.

3 **(b)** Intensive subsistence farming is for the family's needs, not for the market, so it is not commercial farming.

4 **(c)** In Manipur it is 'Pamlou'; 'Dipa' is the name used in Bastar (Chhattisgarh) and the Andaman and Nicobar Islands.

5 **(b)** Muskmelon, watermelon and cucumber are zaid crops, grown in the short summer season between rabi and kharif.

Day 28 Answers continued

6 **(c)** Gram is sown in winter (October to December) and harvested in summer (April to June). Rice, millets and cotton are kharif crops.

7 **(a)** Holdings are small and population pressure is high, so farmers use more inputs and irrigation to raise output; R explains A.

8 (i) **(c)** Plantation is a type of commercial farming. (ii) **(c)** Silk is obtained by rearing silkworms (sericulture), not grown in plantations. (iii) **(a)** The crop goes straight to industries, which links farm and factory. (iv) **(b)** Coffee is mainly grown in Karnataka.

9 (1) Higher doses of modern inputs are used: HYV seeds, chemical fertilisers, insecticides and pesticides, to get higher productivity.
(2) Production is mainly for sale in the market, not for the farmer's own use.
(3) The degree of commercialisation differs from region to region; for example, rice is a commercial crop in Punjab and Haryana but a subsistence crop in Odisha.
(4) Plantation is a type of commercial farming in which a single crop is grown on a large area.

10 **1. Rabi:** sown in winter from October to December and harvested in summer from April to June. Crops: wheat, barley, peas, gram, mustard. Winter rain from western temperate cyclones helps these crops; Punjab, Haryana, Himachal Pradesh, J and K, Uttarakhand and UP are important for wheat.
2. Kharif: sown with the onset of the monsoon and harvested in September-October. Crops: paddy, maize, jowar, bajra, tur (arhar), moong, urad, cotton, jute, groundnut, soyabean. In Assam, West Bengal and Odisha three paddy crops (Aus, Aman, Boro) are grown.
3. Zaid: a short season in the summer months between rabi and kharif. Crops: watermelon, muskmelon, cucumber, vegetables and fodder crops; sugarcane is planted but takes almost a year to grow.

DAY 28 COMPLETE? ☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 29, Geography: Agriculture II + crop map

TONIGHT'S 2-MINUTE RECALL Answer from memory, then check the notes

1. Jhumming is called what in Manipur and in Bastar?
2. Intensive vs commercial farming: two differences.
3. Rice is commercial in which states and subsistence in which?
4. Rabi, kharif, zaid: sowing time and two crops each.
5. Name the three paddy crops of Assam, West Bengal and Odisha.

My mistakes from today's practice:

DAY 29

GEOGRAPHY | CHAPTER 4 | PART 2 OF 2 + TEST

Major Crops, Reforms and Challenges

Agriculture

Aaj ka target (pages 125-131)

- [ ] Crops, reforms, challenges: chapter khatam
- [ ] Crop map ek baar khud bana ke check karo
- [ ] 15 sawal, chapter test samjho
- [ ] 2 ghante, beech mein stretch kar lo

29.1 Food Crops

Crop	Climate and soil	Main areas or producers
Rice (kharif)	Above 25°C, high humidity, rainfall above 100 cm; irrigation where rain is less. India is the 2nd largest producer after China	Plains of north and north-east, coastal and deltaic regions; with canals and tubewells also Punjab, Haryana, western Uttar Pradesh, parts of Rajasthan
Wheat (rabi)	Cool growing season and bright sunshine at ripening; 50 to 75 cm rainfall evenly spread	Two zones: **Ganga-Satluj plains** (north-west) and the black soil region of the Deccan. Punjab, Haryana, Uttar Pradesh, Madhya Pradesh, Bihar, Rajasthan
Millets	Jowar: rain-fed, moist areas. Bajra: sandy and shallow black soils. Ragi: dry regions, red, black, sandy, loamy soils; very rich in **iron, calcium**, micronutrients, roughage	Jowar: Maharashtra (largest). Bajra: Rajasthan (largest). Ragi: Karnataka (largest), Tamil Nadu
Maize	Food and fodder; 21°C to 27°C; old alluvial soil; also a rabi crop in Bihar	Karnataka, Madhya Pradesh, Uttar Pradesh, Bihar, Andhra Pradesh, Telangana
Pulses	India is the **largest producer and consumer** of pulses. Leguminous crops (except arhar) **fix nitrogen** and restore soil fertility, so they are rotated with other crops	Madhya Pradesh, Rajasthan, Maharashtra, Uttar Pradesh, Karnataka

29.2 Non-food Crops

- **Sugarcane**: tropical and subtropical; 21°C to 27°C, 75 to 100 cm rain; India is 2nd after Brazil. Main source of sugar, gur, khandsari, molasses. Uttar Pradesh is the largest producer.
- **Oilseeds**: groundnut (kharif, about half of oilseeds), mustard (rabi), sesamum (kharif in north, rabi in south), castor seed, linseed, soyabean, sunflower.

YAAD RAKHO: QUICK FACTS

- **Sugarcane**: 21°C to 27°C and 75 to 100 cm of rain; India is the second largest producer after Brazil.
- **Tea** needs a warm, moist, frost-free climate and deep, fertile, well-drained soil rich in humus; major areas are Assam, the Darjeeling and Jalpaiguri hills, Tamil Nadu and Kerala.

- **Tea**: plantation crop; warm, moist, frost-free climate; deep fertile well-drained soil rich in humus; labour intensive. Assam, Darjeeling and Jalpaiguri (West Bengal), Tamil Nadu, Kerala.
- **Coffee**: **Arabica** variety brought from **Yemen**, first grown in the **Baba Budan Hills**; Nilgiri hills of Karnataka, Kerala and Tamil Nadu.

Fig. 29.1 *Plucking tea leaves in an Assam tea garden: tea needs a lot of skilled labour. (Wikimedia Commons, CC BY-SA 2.0)*

RUBBER

Equatorial crop, also grown in tropical areas: moist, humid climate, **over 200 cm** rain, above 25°C. Kerala, Tamil Nadu, Karnataka, Andaman and Nicobar Islands, Garo hills of Meghalaya.

COTTON

Grows on the **black soil** of the Deccan; high temperature, light rain or irrigation, **210 frost-free days**, bright sunshine; kharif crop, 6 to 8 months. Maharashtra, Gujarat, Madhya Pradesh, Karnataka, Telangana and more.

COTTON

JUTE: THE GOLDEN FIBRE

Well-drained fertile soils of **flood plains** renewed every year; high temperature. West Bengal, Bihar, Assam, Odisha, Meghalaya. Used for gunny bags, mats, ropes, carpets.

MEME SAMJHO
Astra meme, fact inside

JUTE VS NYLON

"Gunny bag bole: plastic aur nylon aa gaye... samay aa gaya hai aapse vida lene ka?"

Asli baat: Jute is **losing its market to synthetic fibres and packing materials, particularly nylon**, because jute is costlier. That is why the government now pushes jute packaging.

Crop	Largest producer (map)	Other major states
Sugarcane	Uttar Pradesh	Maharashtra, Karnataka, Tamil Nadu
Tea	Assam	West Bengal, Tamil Nadu, Kerala
Coffee	Karnataka	Kerala, Tamil Nadu
Rubber	Kerala	Tamil Nadu, Karnataka
Cotton	Gujarat	Maharashtra, Telangana, Madhya Pradesh
Jute	West Bengal	Bihar, Assam, Odisha

29.3 Technological and Institutional Reforms

- After Independence: **land reforms** (collectivisation, consolidation of holdings, cooperation, abolition of zamindari).
- 1960s and 1970s: **Green Revolution** (package technology) and **White Revolution** (Operation Flood); 1980s and 1990s: a comprehensive land development programme.
- Crop **insurance** against drought, flood, cyclone, fire and disease; **Grameen banks**, cooperative societies and banks for loans at lower interest.
- **Kisan Credit Card (KCC)**, **Personal Accident Insurance Scheme (PAIS)**; weather bulletins and farm programmes on radio and TV; **minimum support price** and procurement prices to check exploitation by middlemen.
- **Bhoodan-Gramdan**: Vinoba Bhave's padyatra led some zamindars to donate land to the landless (Bhoodan) and whole villages to be offered (Gramdan); it is called the **Blood-less Revolution**.

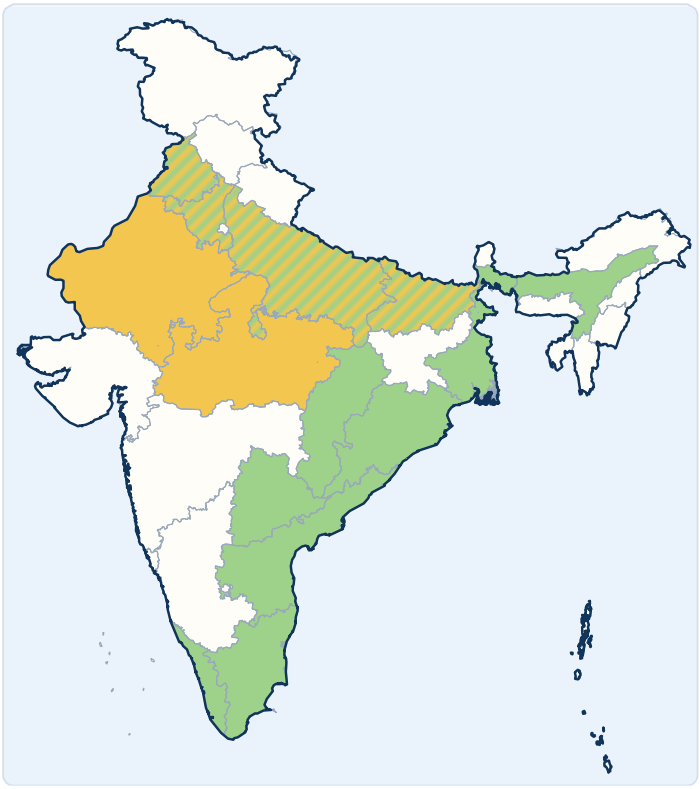

Fig. 29.2 *Major rice and wheat states.* Green *= rice,* gold *= wheat, striped = both.*

Fig. 29.3 *Largest producer state of each crop in the CBSE map list (star). Drawn by Astra.*

SHIVAM BHAIYA SAYS

Challenges wala answer aise likho: **small holdings**, **monsoon par dependence**, kam public investment in irrigation, power, roads; fertiliser subsidy ghatne se **cost badhi**. Har point ke saath ek solution bhi likho.

YAAD RAKHO: QUICK FACTS

- **Coffee**: the Arabica variety from Yemen was first grown on the **Baba Budan Hills**; Indian coffee is known for its good quality.
- **Rubber** needs rainfall above 200 cm and temperature above 25°C; grown in Kerala, Tamil Nadu, Karnataka, the Andaman and Nicobar Islands and the Garo hills of Meghalaya.

Day 29 Practice

15 board-pattern questions | solve first, then check

MCQ

1 **Identify the crop from the clues.**
(I) Its Arabica variety, first brought from Yemen, is grown in India.
(II) It was first cultivated on the Baba Budan Hills.
(III) Today it is grown in the Nilgiris in Karnataka, Kerala and Tamil Nadu. (1)

(a) Tea **(b)** Rice
(c) Coffee **(d)** Black pepper

2 **Which statement about pulses in India is NOT correct?** (1)

(a) Pulses are a major source of protein in a vegetarian diet.
(b) All pulses, including arhar, fix nitrogen and restore soil fertility.
(c) Tur, urad, moong, masur, peas and gram are major pulses.
(d) Pulses are grown in rotation with other crops.

3 **Which crop is known as the 'golden fibre'?** (1)

(a) Cotton **(b)** Hemp
(c) Jute **(d)** Natural silk

4 **Which millet grows well on red, black, sandy, loamy and shallow black soils and is very rich in iron, calcium and other micronutrients?** (1)

(a) Ragi **(b)** Bajra **(c)** Jowar **(d)** Maize

5 **Which one is the odd one out in the list of conditions needed for tea?** (1)

(a) Black soil
(b) Warm and moist frost-free climate
(c) Deep, fertile, well-drained soil rich in humus
(d) Frequent showers spread through the year

6 **Match the crops with their leading producing states and choose the correct option.**
(A) Cotton (B) Jute (C) Wheat (D) Bajra
(I) Uttar Pradesh (II) Maharashtra (III) Rajasthan (IV) West Bengal (1)

(a) (A)-(IV), (B)-(II), (C)-(III), (D)-(I)
(b) (A)-(II), (B)-(IV), (C)-(I), (D)-(III)
(c) (A)-(II), (B)-(III), (C)-(I), (D)-(IV)
(d) (A)-(I), (B)-(IV), (C)-(II), (D)-(III)

7 **Which of the following was an institutional reform given priority in India after Independence?** (1)

(a) Introduction of HYV seeds
(b) Abolition of zamindari
(c) Use of chemical fertilisers
(d) Weather bulletins on radio

8 **Which pair of conditions is correct for rubber?** (1)

(a) Rainfall above 200 cm, temperature above 25°C
(b) Rainfall 50-75 cm, cool growing season
(c) Rainfall 75-100 cm, temperature 21°C to 27°C
(d) Light rainfall, 210 frost-free days

ASSERTION-REASON

9 **Assertion (A):** The Bhoodan-Gramdan movement started by Vinoba Bhave is also called the 'Bloodless Revolution'.
Reason (R): Under it, land was donated to poor landless farmers voluntarily, without any violence. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** Tea cultivation is a labour-intensive industry.
Reason (R): Tea bushes need a warm, moist and frost-free climate all through the year. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read the source and answer the questions that follow. (4)

The Green Revolution, based on package technology, and the White Revolution (Operation Flood) were some of the strategies started to improve Indian agriculture. But this too led to development being concentrated in a few selected areas. So, in the 1980s and 1990s, a comprehensive land development programme was started, which included both institutional and technical reforms. Provision of crop insurance against drought, flood, cyclone, fire and disease, and setting up of Grameen banks, cooperative societies and banks for giving loans to farmers at lower rates of interest were some important steps in this direction.

(i) Name the two revolutions mentioned in the source that aimed to improve Indian agriculture. (1)

(ii) What was the drawback of these revolutions as per the source? (1)

(iii) Mention any two steps taken under the comprehensive land development programme. (2 marks) (2)

SHORT ANSWER

12 Describe the geographical conditions required for the growth of rice. Name two areas where it is grown. (3)

13 Describe any three technological and institutional reforms introduced by the Government of India in agriculture. (3)

14 Name any four oil-seeds grown in India. Why are oil-seeds important in our daily life? (3)

LONG ANSWER

15 Compare the geographical conditions required for the growth of cotton and jute. Name the main producing states of each. (5)

EXAM TIPS

- 5-mark answer: one-line introduction, then **4 to 5 points**, then a one-line conclusion. About 120 words.
- Assertion-Reason: judge A and R **separately first**, then ask: does R explain A?
- 'Which is NOT correct' questions: **circle the word NOT** before you read the options.

Day 29 Answers with explanation

1 **(c)** Coffee cultivation in India began on the Baba Budan Hills; the Arabica variety came from Yemen.

2 **(b)** Being leguminous, all pulses except arhar help restore soil fertility by fixing nitrogen from the air.

3 **(c)** Jute is called the golden fibre; it grows on fertile flood plains where soil is renewed every year.

4 **(a)** Ragi is a crop of dry regions, rich in iron, calcium and roughage; Karnataka is the leading producer.

5 **(a)** Tea needs deep fertile soil rich in humus and organic matter; black soil is associated with cotton.

6 **(b)** Cotton: Maharashtra (Deccan black soil); jute: West Bengal; wheat: Uttar Pradesh; bajra: Rajasthan.

7 **(b)** Collectivisation, consolidation of holdings, cooperation and abolition of zamindari were the institutional reforms; the others are technical inputs.

8 **(a)** Rubber is an equatorial crop needing moist humid climate with rainfall over 200 cm and temperature above 25°C.

9 **(a)** Landowners gave land (and some zamindars whole villages) to the landless peacefully, which is why it was called a bloodless revolution.

10 **(b)** Both are true. Tea needs abundant, cheap and skilled labour (for plucking leaves), but its climate needs do not explain why it is labour-intensive.

11 (i) The Green Revolution (package technology) and the White Revolution (Operation Flood). (ii) Development remained concentrated in a few selected areas, so the benefits did not reach all regions and all farmers. (iii) (1) Crop insurance against drought, flood, cyclone, fire and disease. (2) Grameen banks, cooperative societies and banks giving loans to farmers at lower rates of interest.

12 (1) Rice is a kharif crop that needs high temperature, above 25°C, and high humidity.
(2) It needs annual rainfall above 100 cm; in areas of less rainfall it grows with irrigation.
(3) It grows in the plains of north and north-east India, coastal areas and deltaic regions; canals and tubewells have made it possible in Punjab, Haryana, western UP and parts of Rajasthan.

13 (1) Special weather bulletins and agricultural programmes on radio and television to spread knowledge of new techniques.
(2) Crop insurance against drought, flood, cyclone, fire and disease.
(3) Grameen banks, cooperative societies and banks to give loans at low interest; also Kisan Credit Card (KCC) and Personal Accident Insurance Scheme (PAIS).
(4) Minimum support price and remunerative prices announced for important crops to check exploitation by middlemen.

14 **Oil-seeds:** groundnut, mustard, coconut, sesamum (til), soyabean, castor seeds, cotton seeds, linseed, sunflower (any four).
Importance: (1) Most are edible and used as cooking oil. (2) Some are raw material for soaps, cosmetics and ointments. (3) Oil cake left after extraction is used as cattle feed and manure.

15 **Cotton:** (1) grows well in drier parts of the black cotton soil of the Deccan plateau; (2) needs high temperature, light rainfall or irrigation; (3) needs 210 frost-free days and bright sunshine; (4) kharif crop taking 6 to 8 months to mature; (5) major states: Maharashtra, Gujarat, Madhya Pradesh, Karnataka, Andhra Pradesh, Telangana, Tamil Nadu, Punjab, Haryana and Uttar Pradesh.
Jute: (1) grows on well-drained fertile soils of flood plains where soils are renewed every year; (2) needs high temperature during growth; (3) known as the golden fibre, used for gunny bags, mats, ropes, yarn, carpets; (4) major states: West Bengal, Bihar, Assam, Odisha and Meghalaya.

Day 29 Extra Practice

17 more questions from this chapter | new, no repeats

MCQ

1 **Which are the two important wheat-growing zones of India?** (1)

(a) The Deccan plateau and the Konkan coast
(b) The north-eastern region and the eastern coastal plains
(c) The Ganga-Satluj plains and the black soil region of the Deccan
(d) None of the above

2 **How much annual rainfall does wheat need?** (1)

(a) About 200 cm **(b)** 50 to 75 cm
(c) Less than 20 cm **(d)** 200 to 300 cm

3 **In terms of area and production, which is the third most important food crop of India?** (1)

(a) Ragi **(b)** Wheat **(c)** Rice **(d)** Jowar

4 **Which set of conditions suits the growth of maize?** (1)

(a) Temperature of about 25°C with 200 cm of rainfall
(b) Temperature below 17°C and shallow black soil
(c) Temperature between 21°C and 27°C and old alluvial soil
(d) None of the above

5 **Which crop is used both as food and as fodder?** (1)

(a) Maize **(b)** Sugarcane
(c) Wheat **(d)** Rice

6 **Which crop is an important industrial raw material, used widely by the automobile tyre industry?** (1)

(a) Ragi **(b)** Rubber
(c) Pulses **(d)** None of these

7 **The rearing of silkworms to produce silk fibre is called:** (1)

(a) Pisciculture (b) Apiculture
(c) Sericulture (d) Aquaculture

8 As grouped in the NCERT chapter, which pair consists of important non-food crops of India? (1)
(a) Millets and pulses (b) Cotton and jute
(c) Tea and coffee (d) Rice and wheat

9 Complete the flow chart: Food crops → Cereals → rice, wheat and _____ → jowar, bajra, ragi (1)
(a) millets (b) maize (c) gram (d) pulses

ASSERTION-REASON

10 **Assertion (A):** Agriculture is the primary activity of India.
Reason (R): About two-thirds of India's population is engaged in agricultural activities. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

11 **Assertion (A):** The crops grown in different parts of India vary with differences in soil, climate and cultivation practices.
Reason (R): The availability of water also affects which crops are grown in an area. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

12 **Assertion (A):** Organic farming is much in vogue today.
Reason (R): In organic farming, crops are grown with high doses of insecticides to raise production. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

13 Name three states where three crops of paddy are grown in a year. What are these three crops called? (3)

14 What is horticulture? Describe India's position in horticulture, giving two examples of fruits and the areas known for them. (3)

15 Name four temperate fruits grown in India. Which states grow them the most? (3)

LONG ANSWER

16 Explain the importance of agriculture in the Indian economy. (5)

17 (a) What is India's position in the world in sugarcane production? State the geographical conditions needed to grow it. (b) Name the major sugarcane-producing states. (c) Name four products obtained from sugarcane. (5)

Day 29 Extra Practice: Answers

1 **(c)** NCERT names two important wheat-growing zones: the Ganga-Satluj plains in the north-west and the black soil region of the Deccan.
2 **(b)** Wheat needs 50 to 75 cm of annual rainfall, spread evenly over the growing season. It also needs a cool growing season and bright sunshine at ripening.
3 **(d)** Jowar comes after rice and wheat. It is a rain-fed crop grown mostly in moist areas, and Maharashtra is its largest producer.
4 **(c)** Maize is a kharif crop. It needs a temperature between 21°C and 27°C and grows well in old alluvial soil.
5 **(a)** NCERT describes maize as a crop used both as food and as fodder.
6 **(b)** Rubber is an important industrial raw material. A large share of it goes into making tyres and other automobile parts.

Day 29 Extra Practice: Answers continued

7 **(c)** Silk is obtained from the cocoons of silkworms fed on green mulberry leaves. Rearing silkworms for silk is called sericulture.
8 **(b)** NCERT treats rubber and fibre crops such as cotton and jute as non-food crops. Tea and coffee come under food crops other than grains.
9 **(a)** Jowar, bajra and ragi are the important millets grown in India, so the blank is millets.
10 **(a)** Agriculture is India's primary activity because about two-thirds of the people depend on it for their livelihood, so R explains A.
11 **(b)** A is a direct NCERT statement. R is also true, but it adds a separate factor rather than explaining A.
12 **(c)** Organic farming is popular because it uses no factory-made chemicals such as fertilisers and pesticides. So R is false.

Day 29 Extra Practice: Answers continued

13 1. Assam, West Bengal and Odisha grow three crops of paddy in a year. 2. The three crops are called Aus, Aman and Boro. 3. This is possible because these states have high temperature, high humidity, heavy rainfall and fertile alluvial soil.

14 1. Horticulture is the growing of fruits, vegetables and flowers. 2. India is a leading producer of fruits and vegetables. In 2018 it was second only to China. 3. India grows both tropical and temperate fruits. 4. Examples: the oranges of Nagpur and Cherrapunjee (Meghalaya), and the bananas of Kerala, Mizoram, Maharashtra and Tamil Nadu.

15 1. Apples, pears, apricots and walnuts are the main temperate fruits grown in India. 2. Jammu and Kashmir and Himachal Pradesh are the leading producers. 3. These fruits need the cool climate of hill slopes, which is why they are grown in these Himalayan areas.

16 1. Livelihood: about two-thirds of India's population depends on agriculture for work and income. 2. Food: it is a primary activity that produces most of the food and foodgrains we eat. 3. Raw materials: it supplies raw materials to agro-based industries, such as cotton to textile mills and sugarcane to sugar mills. 4. Exports: crops such as tea, coffee and spices are exported and earn foreign exchange. 5. Demand and trade: farm incomes create demand for industrial goods and services, and the movement of farm produce supports trade and transport.

17 (a) India is the second largest producer of sugarcane in the world, after Brazil. Sugarcane is a tropical as well as a subtropical crop. It grows well in a hot and humid climate with a temperature of 21°C to 27°C and an annual rainfall of 75 cm to 100 cm. Irrigation is needed in areas of low rainfall. It can grow on many kinds of soil, and it needs manual labour from sowing to harvesting. (b) The major producers are Uttar Pradesh, Maharashtra, Karnataka, Tamil Nadu, Andhra Pradesh, Telangana, Bihar, Punjab and Haryana. (c) Sugarcane is the main source of sugar, gur (jaggery), khandsari and molasses.

DAY 29 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 30, Revision 4 + case-based set

TONIGHT'S 2-MINUTE RECALL

Answer from memory, then check the notes

1. Climate needed for rice and for wheat.
2. Largest producer states: sugarcane, tea, coffee, rubber, cotton, jute.
3. Why are pulses grown in rotation with other crops?
4. Where was coffee first grown in India?
5. Name four institutional reforms for farmers.

My mistakes from today's practice:

DAY 30

REVISION DAY 4 | GEO CH4 + POL SCI CH3 + ECO CH3

Revision 4: Agriculture, Gender-Religion-Caste and Money

Recall sheets plus a case-based set, 25 questions in all

Aaj ka target

- ☐ Days 22, 23, 24, 25, 28, 29 ka revision
- ☐ 25 sawal, galti wale Mistake box mein
- ☐ 3 case-based sets: pehle passage, phir sawal
- ☐ 2 ghante, ek hi jagah baith ke

R1 Geography Ch4 Agriculture: recall sheet

TYPES OF FARMING AND SEASONS

- Primitive subsistence: slash and burn (jhumming in NE India), low output; intensive subsistence: high inputs on small land; commercial: HYV seeds, fertilisers, plantations (tea, coffee, rubber, sugarcane, banana)
- Rabi: sown Oct-Dec, harvested Apr-June (wheat, barley, peas, gram, mustard)
- Kharif: with the monsoon, harvested Sept-Oct (rice, maize, jowar, bajra, cotton, jute, groundnut)
- Zaid: short summer season (watermelon, muskmelon, cucumber, fodder)

MAJOR CROPS AND REFORMS

- Rice: kharif, above 25°C, 100 cm+ rain; wheat: rabi, cool growing season, 50-75 cm rain
- Millets: jowar, bajra, ragi; pulses: India largest producer
- Sugarcane (UP), tea (Assam), coffee (Karnataka), rubber (Kerala), cotton (black soil), jute (WB, "golden fibre")
- Reforms: land reforms, Green Revolution, White Revolution (Operation Flood), Kisan Credit Card, crop insurance, MSP

R2 Political Science Ch3 Gender, Religion and Caste: recall sheet

GENDER AND POLITICS

- Sexual division of labour: women do housework, men outside work
- Feminist movements demanded equal rights, voting rights, education, jobs
- Women in Lok Sabha still a small share (crossed 14% only in 2019); one-third seats reserved in panchayats and municipalities
- Women's Reservation Act 2023: one-third seats in Lok Sabha and state assemblies (to come into force after delimitation)

RELIGION, COMMUNALISM, CASTE

- Communalism: religion as the basis of the nation; forms: everyday beliefs, majoritarian dominance, political mobilisation, violence
- Secular state: no official religion, freedom to practise any religion, bans religious discrimination
- Caste: old hierarchy weakening with urbanisation, literacy, occupational mobility
- Caste in politics: candidates chosen by caste, voters mobilised; politics in caste: castes form coalitions, new identities (backward, forward)

R3 Economics Ch3 Money and Credit: recall sheet

MONEY AND BANKS

- Barter needs double coincidence of wants; money removes it (medium of exchange)
- Modern money: currency (RBI issues notes for the central government), deposits with banks (demand deposits, cheques)
- Banks keep about 15% of deposits as cash, lend the rest; interest on loans higher than on deposits

CREDIT

- Terms of credit: interest rate, collateral, documentation, mode of repayment
- Formal (banks, cooperatives, RBI supervises) vs informal (moneylenders, traders, relatives; high interest, debt trap)
- SHGs: 15-20 members (mostly women) pool savings; give small loans; help get bank loans without collateral; Grameen Bank of Bangladesh (Prof. Muhammad Yunus)

SHIVAM BHAIYA KA NOTE

Crop season ka formula: **Rabi = winter** (wheat), **Kharif = monsoon** (rice), **Zaid = summer** (tarbooz). Aur credit mein **4 terms**: interest, collateral, documents, repayment. Inme se koi na koi har saal aata hai!

REMEMBER: THE CROP MAP STATES

Rice: West Bengal, Punjab, UP. Wheat: Punjab, Haryana, UP, MP. Sugarcane: UP. Tea: Assam. Coffee: Karnataka. Rubber: Kerala. Cotton: Maharashtra, Gujarat. Jute: West Bengal.

Day 30 Practice

25 questions | solve first, then check

MCQ

1 A secular state is one that: (1)

(a) bans all religions
(b) has an official religion
(c) follows the religion of the majority
(d) gives no religion a special status

2 The double coincidence of wants is a problem of: (1)

(a) cheque payments (b) the barter system
(c) credit cards (d) modern banking

3 Slash and burn agriculture is known as jhumming in: (1)

(a) Kerala (b) Gujarat
(c) Punjab (d) North-eastern states

4 Watermelon, muskmelon and cucumber are grown in which season? (1)

(a) Monsoon only (b) Zaid
(c) Rabi (d) Kharif

5 Which of these is NOT an expression of communalism? (1)

(a) Voting for a party on its development record
(b) Religious prejudice in everyday beliefs
(c) Political mobilisation on religious lines
(d) Communal violence

6 Operation Flood is related to: (1)

(a) fish production (b) oilseeds
(c) food grains (d) milk production

7 Self Help Groups usually have how many members? (1)

(a) 5 to 8 (b) 100 or more
(c) 40 to 50 (d) 15 to 20

8 **Which state is the largest producer of coffee in India?** (1)
(a) Tamil Nadu (b) Assam
(c) Kerala (d) Karnataka

9 **Who issues currency notes in India on behalf of the central government?** (1)
(a) State Bank of India (b) Reserve Bank of India
(c) NABARD (d) Finance Ministry

10 **In which local bodies are at least one-third of seats reserved for women?** (1)
(a) High Courts
(b) Rajya Sabha
(c) Panchayats and municipalities
(d) Lok Sabha only

11 **Jute is known as the:** (1)
(a) blue revolution (b) golden fibre
(c) black gold (d) white gold

12 **Which of these is a rabi crop?** (1)
(a) Wheat (b) Jute (c) Rice (d) Cotton

CASE-BASED

13 **Read the source and answer the questions that follow.** (4)

Megha has taken a loan of Rs 5 lakh from the bank to purchase a house. The annual interest rate on the loan is 12 per cent and the loan is to be repaid in 10 years in monthly instalments. The bank retained the papers of the new house, which will be returned to Megha only when she repays the entire loan with interest.

(i) What is the collateral in Megha's loan? (1)
(ii) Name any two terms of credit in this case. (1)
(iii) Why do banks ask for collateral? (2)

14 **Read the source and answer the questions that follow.** (4)

Gender division is a form of hierarchical social division seen everywhere, but it is rarely recognised in the study of politics. It is not based on biology but on social expectations and stereotypes. Boys and girls are brought up to believe that the main responsibility of women is housework and bringing up children. In most families women do all the work inside the home, while men do outside work.

(i) What is meant by the sexual division of labour? (1)
(ii) Is gender division based on biology? (1)
(iii) Give two ways to increase women's political representation. (2)

15 **Read the source and answer the questions that follow.** (4)

Indian farmers grow a wide variety of crops. Rice is the staple crop of a majority of the people. Wheat is the second most important cereal crop and the main food crop in the north and north-western part of the country. India is the largest producer as well as the consumer of pulses in the world. Sugarcane is a tropical as well as a subtropical crop.

(i) Which is the main food crop of north and north-west India? (1)
(ii) Name one state that is the largest producer of sugarcane. (1)
(iii) Why are pulses important in Indian agriculture? Give two reasons. (2)

OPTIONS FOR EVERY ASSERTION-REASON QUESTION BELOW

(a) Both A and R are true, and R is the correct explanation of A. **(b)** Both A and R are true, but R is not the correct explanation of A. **(c)** A is true, but R is false. **(d)** A is false, but R is true.

ASSERTION-REASON

16 **Assertion (A):** Caste has completely disappeared from Indian society.
Reason (R): Urbanisation, literacy and occupational mobility have weakened the caste hierarchy. (1)

17 **Assertion (A):** Women's representation in the Lok Sabha has been low.
Reason (R): Political parties have not given many tickets to women candidates. (1)

18 **Assertion (A):** Commercial farming uses heavy doses of modern inputs.
Reason (R): The main aim of commercial farming is to produce crops for sale in the market. (1)

19 **Assertion (A):** Formal sector loans are better for poor households than informal loans.
Reason (R): Banks and cooperatives charge lower interest and are supervised by the RBI. (1)

20 **Assertion (A):** Rice is a kharif crop.
Reason (R): Rice needs high temperature and heavy rainfall. (1)

SHORT ANSWER

21 **Distinguish between primitive subsistence farming and commercial farming (three points).** (3)

22 **Describe any three institutional reforms introduced to improve Indian agriculture. (3)**

23 **Explain three ways in which caste influences politics. (3)**

24 **Why is cheap and affordable credit important for development? Give three points. (3)**

25 **How do Self Help Groups help the rural poor? Give three points. (3)**

Day 30 Answers with explanation

1 **(d)** India has no official religion and treats all religions equally.

2 **(b)** Both parties must want what the other has; money solves this.

3 **(d)** Jhumming is the local name in Assam, Meghalaya, Mizoram and Nagaland.

4 **(b)** Zaid is the short season between rabi and kharif.

5 **(a)** Voting on a development record is not communal.

6 **(d)** It is the White Revolution in dairying.

7 **(d)** A typical SHG has 15 to 20 members, mostly women.

8 **(d)** Karnataka grows most of India's coffee (Nilgiri hills region).

9 **(b)** The RBI issues currency notes for the central government.

10 **(c)** Since the 1992 amendment, one-third of local body seats go to women.

11 **(b)** Jute is called the golden fibre; West Bengal is the largest producer.

12 **(a)** Wheat is sown in winter and harvested in spring.

13 (i) The papers of the new house. (ii) Interest rate 12%, repayment in monthly instalments over 10 years (also collateral). (iii) Collateral is security: if the borrower fails to repay, the bank can sell it to recover the loan.

14 (i) A system where women do work inside the home and men outside. (ii) No, it is based on social expectations and stereotypes. (iii) Reservation of seats (one-third in local bodies; Women's Reservation Act 2023 for legislatures); more tickets to women by parties.

15 (i) Wheat. (ii) Uttar Pradesh. (iii) Main source of protein in a vegetarian diet; leguminous crops fix nitrogen and restore soil fertility; grown in rotation.

16 **(d)** A is false: caste still exists, though weakened; R is true.

17 **(a)** Few tickets mean few women MPs; R explains A.

18 **(a)** Higher output for the market needs HYV seeds, fertilisers and irrigation.

19 **(a)** Cheaper, regulated credit protects borrowers; R explains A.

20 **(a)** It grows with the monsoon; R explains A.

21 Primitive: small patches, simple tools, family labour, depends on monsoon, low output for self. Commercial: large areas, HYV seeds, fertilisers, irrigation, crops for sale.

22 Land reforms (collectivisation, consolidation, zamindari abolition); Green and White Revolutions; Kisan Credit Card, crop insurance, Grameen banks, MSP, weather bulletins.

23 Parties choose candidates by caste make-up; caste sentiments used to win votes; universal adult franchise made leaders mobilise castes; new caste coalitions form.

24 Helps farmers and small producers invest; raises output and incomes; avoids debt trap from high informal interest; more people can start businesses.

25 Pool savings and give small loans at reasonable interest; help members get bank loans without collateral; build self-reliance and a platform for social issues, especially for women.

EXAM ALERT: ASKED AGAIN AND AGAIN

Agriculture: rabi vs kharif with crops; conditions for rice and wheat; reforms after independence; commercial vs subsistence. **Gender, Religion, Caste:** forms of communalism; features of a secular state; caste in politics vs politics in caste; women's representation. **Money and Credit:** double coincidence of wants; terms of credit; formal vs informal sources; SHGs and the Grameen Bank.

EXTRA 5-MARKERS TO TRY THIS WEEK (OPTIONAL, NO ANSWER KEY)

1. Describe any five technological and institutional reforms in Indian agriculture.
2. "Communalism can take various forms in politics." Explain with examples.
3. Explain the constitutional provisions that make India a secular state.
4. Why should credit at reasonable rates be available for all? Give five reasons.
5. Compare the climatic conditions and major areas of rice and wheat cultivation.

MEME SAMJHO

Astra meme, fact inside

MONEY AND CREDIT, CH3

"Moneylender se 5% mahina pe loan? Self Help Group bana lo. Bachat bhi, sasta loan bhi."

Asli baat: An SHG has **15 to 20 members**, usually women, who save regularly and give small loans to members at reasonable interest. After a year or two the group can take a **bank loan** without collateral, so members escape high-interest informal credit.

DAY 30 COMPLETE? ☐ Recall from memory ☐ 25 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 31, Political Science: Political Parties I

DAY 31

POLITICAL SCIENCE | CHAPTER 4 | PART 1 OF 2

Why Parties? Functions and Party Systems

Political Parties

Aaj ka target (pages 135-137)

- ☐ Political Parties ka pehla part
- ☐ Party ke 3 components aur functions ki list
- ☐ 10 sawal, party systems wale clear
- ☐ 100 min, aaj halka din hai

4.1 What is a Political Party?

KEY TERM: POLITICAL PARTY

A **group of people who come together to contest elections and hold power** in the government. They agree on some policies and programmes for society with a view to promote the **collective good**. A party reflects fundamental political divisions in a society: it is a **part** of society and so involves **partisanship**.

A party has three components: the **leaders**, the **active members** and the **followers**.

4.2 7 Functions of Political Parties

- **Contest elections.** In most democracies candidates are put up by parties. In India top leaders choose candidates; in the USA members and supporters choose them.
- **Put forward policies and programmes** for voters to choose from; a party reduces a vast variety of opinions to a few basic positions.
- **Make laws.** Laws are debated and passed in the legislature; members follow the party leadership.
- **Form and run governments.** Parties recruit leaders, train them and make them ministers.
- **Play the opposition.** Parties that lose elections criticise the government for its failures and wrong policies, and mobilise opposition.
- **Shape public opinion.** They raise and highlight issues, and launch movements to resolve people's problems.
- **Give access to government machinery and welfare schemes.** For an ordinary citizen it is easier to approach a local party leader than a government officer.

SHIVAM BHAIYA SOCH RAHE HAIN

Functions yaad karne ki trick: **"Chunav, Policy, Kanoon, Sarkar, Virodh, Rai, Pahunch"**. Saat shabd, saat functions. 5-mark question mein koi bhi paanch, ek-ek line explanation ke saath.

4.3 Why Do We Need Parties?

Imagine a situation **without parties**: every candidate in the elections would be independent. No one could make promises about major policy changes, the government would be formed but its **utility would remain uncertain**, and elected representatives would be accountable only to their constituency, with **no one responsible for how the country is run**. Even in non-party local elections, informal groups soon form. The rise of political parties is directly linked to the emergence of **representative democracies**: large societies need a way to gather different views, present them to the government, and bring representatives together to form a responsible government.

4.4 How Many Parties? Three Party Systems

One-party Only one party is allowed to control and run the government, e.g. **China**. Voters have no meaningful choice, so it is **not a democratic option**.

MEME SAMJHO
Astra meme, fact inside

THE ONE-PARTY SYSTEM IN CHINA

"Election mein haar ka darr hi nahi... agar doosri party ko contest hi na karne do."

Asli baat: In **China only the Communist Party** is allowed to rule. This cannot be a good option for democracy, because a democracy must give at least **two parties a fair chance** to compete for power.

Two-party Power usually changes between two main parties; several others exist and contest, but only the two have a serious chance of winning a majority. Examples: **USA** and **UK**.

Multiparty Several parties compete for power, and more than two have a reasonable chance of coming to power on their own or in alliance with others, e.g. **India**.

When several parties in a multiparty system join hands to contest elections and win power, it is called an **alliance or front**; in 2004 India had three major alliances: the **National Democratic Alliance**, the **United Progressive Alliance** and the **Left Front**. A multiparty system often appears messy and can lead to political instability, but it allows a **variety of interests and opinions** to get political representation.

SHIVAM BHAIYA SAYS

Party system **koi country choose nahi karti**; ye wahan ke society ke nature, social and regional divisions, history aur election system se apne aap banta hai. India mein **social and geographical diversity** ki wajah se multiparty system hai.

REMEMBER IN ONE LINE

A party = leaders, active members, followers; 7 functions (contest elections, policies, laws, governments, opposition, public opinion, access to welfare); parties exist because representative democracy needs them; one-party (China) is undemocratic, two-party (USA, UK), multiparty (India) with alliances like NDA, UPA, Left Front.

Day 31 Practice
10 board-pattern questions | solve first, then check

MCQ

1 **Which statements about political parties are correct?**
(I) Parties are an essential condition of democracy.
(II) The rise of parties is linked with the rise of representative democracy.
(III) Only a two-party system is best for a healthy democracy. (1)

(a) Only (I) and (II) **(b)** Only (II) and (III)
(c) Only (I) and (III) **(d)** (I), (II) and (III)

2 **What is the main reason for the rise of many political parties at the same level in India?** (1)

(a) A federal political system
(b) Varied economic conditions
(c) Linguistic and regional diversity
(d) Low literacy and awareness

3 **The emergence of political parties is directly linked to the rise of:** (1)

(a) monitory democracies
(b) direct democracies
(c) constitutional democracies
(d) representative democracies

4 **Which country has a one-party system?** (1)

(a) India **(b)** USA **(c)** China **(d)** UK

5 **Which country has a two-party system?** (1)

(a) China **(b)** Russia **(c)** USA **(d)** India

6 **A society with many diverse social groups wants a political system that gives equality to all groups. Which feature should it adopt?** (1)

(a) Let different groups represent themselves by forming political parties
(b) Let groups take extreme positions for justice
(c) Make all groups merge into one
(d) Keep power with one group for stability

ASSERTION-REASON

7 **Assertion (A):** **A one-party system cannot be considered a good option for democracy.**
Reason (R): **In a democracy at least two parties must have a fair chance to compete for power.** (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

8 **Assertion (A):** A multiparty system often appears very messy.
Reason (R): It allows a variety of interests and opinions to enjoy political representation. (1)
(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

9 **Describe any three functions of political parties.** (3)

LONG ANSWER

10 **"Political parties are a necessary condition for a democracy." Analyse the statement with five arguments.** (5)

Day 31 Answers with explanation

1 **(a)** (I) and (II). No single party system is ideal for all countries.
2 **(c)** Linguistic and regional diversity.
3 **(d)** Representative democracies.
4 **(c)** China.
5 **(c)** USA.
6 **(a)** Parties let each group voice its interests.
7 **(a)** Without a fair chance for at least two parties there is no real choice; R explains A.
8 **(b)** Both true, but R is a merit of the system, not the reason it looks messy.
9 Any three: contest elections; put forward policies; make laws; form and run governments; play opposition; shape public opinion; give access to government schemes.
10 Without parties every candidate is independent and no one can promise policy change; government's utility uncertain; no one responsible for running the country; parties gather and present different views; they form responsible governments and an opposition; representative democracy cannot work without them.

FLASH REVISION: KEY TERMS

Partisanship: tendency to take a side, seeing issues only from one party's view

Alliance or front: parties joining hands to contest and form government

One-party system: only one party allowed, e.g. China

Two-party system: power alternates between two main parties, e.g. USA, UK

Multiparty system: more than two parties can win power, e.g. India

Opposition: parties that lose and criticise the government

WRITE IT RIGHT: "WHY DO WE NEED POLITICAL PARTIES?"

1. Start: parties are an essential condition of representative democracy.
2. Without parties every candidate is independent; nobody can promise major policy change.
3. No one would be responsible for how the country is run.
4. Parties gather many views, present them, and form a responsible government and an opposition.
5. Conclude: that is why parties exist in almost all countries.

TONIGHT'S 2-MINUTE RECALL

1. Party: people who come together to **contest elections and hold power**
2. Three components: **leaders, active members, followers**
3. India: **top leaders** choose candidates; USA: members and supporters
4. A party reduces many opinions to a **few basic positions**
5. Losing parties **play the opposition** and criticise the government
6. Easier for a citizen to reach a **local party leader** than an officer
7. Rise of parties is linked to **representative democracy**
8. Function trick: **Chunav, Policy, Kanoon, Sarkar, Virodh, Rai, Pahunch**

DAY 31 COMPLETE?

☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 32, Political Science: Political Parties II

DAY 32

POLITICAL SCIENCE | CHAPTER 4 | PART 2 OF 2

National and State Parties, Challenges and Reforms

Political Parties

Aaj ka target (pages 137-142)

- ☐ National aur state parties, challenges
- ☐ Recognition ke rules aur 4 challenges zubaani
- ☐ 15 sawal, reforms wale bhi
- ☐ 110 min, focus full

4.5 Recognised Parties

Every party in India has to **register with the Election Commission**. Parties that are bigger and well established get a **unique election symbol**, which only their official candidates can use. These are called **recognised political parties**.

STATE PARTY

Secures at least **6% of the total votes** in an election to the Legislative Assembly of a State and wins **at least two seats**. Also called regional parties, though many of them have national-level ambitions and a federal outlook.

NATIONAL PARTY

Secures at least **6% of the total votes** in Lok Sabha elections or Assembly elections in **four States**, and wins **at least four seats** in the Lok Sabha.

In 2023 there were **six recognised national parties**:

INC **Indian National Congress** (1885): one of the oldest parties of the world; ruled at the Centre till 1977 and then from 1980 to 1989; centrist party, supports secularism and welfare of weaker sections and minorities.

BJP **Bharatiya Janata Party** (1980): founded by reviving the Bharatiya Jana Sangh formed by Syama Prasad Mukherjee in 1951; cultural nationalism (Hindutva) is an important element of its conception of Indian nationhood.

BSP **Bahujan Samaj Party** (1984), led by Kanshi Ram: seeks to represent the bahujan samaj, which includes dalits, adivasis, OBCs and religious minorities; inspired by Sahu Maharaj, Phule, Periyar and Ambedkar.

CPI(M) **Communist Party of India (Marxist)** (1964): believes in Marxism-Leninism, supports socialism, secularism and democracy, opposes imperialism and communalism.

NPP **National People's Party** (2013): the first party from the North-East to get national party status.

AAP **Aam Aadmi Party** (2012).

EXAM ALERT!

Numbers ka khel: **State party = 6% votes + 2 seats** (assembly). **National party = 6% votes in Lok Sabha ya 4 states + 4 Lok Sabha seats**. Har saal MCQ mein ye criteria ghuma ke aate hain.

4.6 Four Challenges to Political Parties

1. **Lack of internal democracy**: power concentrates in one or few top leaders; no membership registers, no regular organisational meetings or internal elections. Members who disagree have no chance but to leave.
2. **Dynastic succession**: top positions are controlled by members of one family; people without adequate experience or popular support come to occupy positions of power.
3. **Growing role of money and muscle power**: parties nominate candidates who can raise lots of money; rich people and companies who give funds influence policies; parties sometimes support criminals who can win elections.
4. **Lack of meaningful choice**: ideological differences among parties have reduced in most parts of the world; leaders keep shifting from one party to another.

MEME SAMJHO

Astra meme, fact inside

AN MLA SWITCHES PARTY AFTER WINNING

"Kal tak is party ke ticket pe jeete, aaj doosri party ki sarkar mein mantri? Hain? Ye kaise ho gaya?"

Asli baat: This is **defection**. The **anti-defection law** (Constitution amended) says an MP or MLA who changes parties will **lose the seat** in the legislature.

4.7 How Can Parties Be Reformed?

STEPS ALREADY TAKEN

Anti-defection law: a legislator who changes parties loses the seat (but it has made dissent harder). **Supreme Court order:** every candidate files an **affidavit** giving details of property and criminal cases. **Election Commission order:** parties must hold **organisational elections** and file **income tax returns**.

SUGGESTIONS

A **law to regulate internal affairs** of parties (membership register, independent authority, internal elections); give a minimum number of tickets, about **one-third, to women**; **state funding of elections** (government gives parties money for election expenses).

Two other ways: **people can put pressure** on parties through petitions, publicity and agitations,

the media and pressure groups; and parties can improve if those who want reform **join political parties** themselves. Legal reforms must not go too far, or parties will find ways to get around them.

REMEMBER IN ONE LINE

Recognised parties get a unique symbol; state party: 6% votes + 2 assembly seats, national party: 6% votes in LS or 4 states + 4 LS seats; six national parties in 2023; challenges: internal democracy, dynasty, money and muscle, no meaningful choice; reforms: anti-defection law, affidavits, organisational elections and tax returns.

Day 32 Practice: Chapter Test

15 board-pattern questions | solve first, then check

MCQ

1 **Party ABC wins 6% of the votes in a state Legislative Assembly election and two seats. It will be recognised as a:** (1)

(a) National Party **(b)** State Party
(c) Ruling Party **(d)** Opposition Party

2 **Which party, formed in 2013, was the first from the North-East to become a national party?** (1)

(a) Nationalist Congress Party
(b) Aam Aadmi Party
(c) National People's Party
(d) Bharatiya Janata Party

3 **Which national party was formed in 1984 under the leadership of Kanshi Ram?** (1)

(a) Bahujan Samaj Party **(b)** CPI(M)
(c) Indian National Congress **(d)** Bharatiya Janata Party

4 **Which party believes in Marxism-Leninism and supports socialism, secularism and democracy?** (1)

(a) BJP **(b)** BSP **(c)** CPI(M) **(d)** INC

5 **The law that makes an MP or MLA lose the seat on changing party is the:** (1)

(a) Right to Information Act **(b)** Anti-defection law
(c) Representation Act **(d)** Affidavit rule

6 **Every candidate must file an affidavit giving details of property and criminal cases. This was ordered by the:** (1)

(a) Election Commission **(b)** Parliament
(c) Supreme Court **(d)** President

7 **Top positions in a party are controlled by members of one family. Which challenge is this?** (1)

(a) Lack of internal democracy
(b) Dynastic succession
(c) Money and muscle power
(d) Lack of meaningful choice

8 **Statement (I): The Election Commission made it necessary for parties to hold organisational elections.**
Statement (II): Parties must file their income tax returns. (1)

(a) Only (I) is correct **(b)** Only (II) is correct
(c) Both are correct **(d)** Both are incorrect

SHIVAM BHAIYA KA NOTE

Chapter 4 complete! Challenges ke 4 points ek line mein: **"Andar democracy nahi, parivaar ka raaj, paisa aur bahubal, choice khatam"**. Reforms ke 3 actual steps alag se yaad karo.

ASSERTION-REASON

9 **Assertion (A):** Most political parties do not practise open and transparent procedures for their functioning.
Reason (R): Power in a party is often concentrated in one or a few leaders at the top. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** The anti-defection law has made dissent within parties more difficult.
Reason (R): MPs and MLAs have to accept whatever the party leaders decide. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read and answer: *"Every party in the country has to register with the Election Commission. While the Commission treats all parties equally, it offers some special facilities to large and established parties. These parties are given a unique symbol."*
(i) What are such parties called? (1)
(ii) Who can use the unique symbol? (1)
(iii) State the condition for recognition as a national party. (2) (4)

SHORT ANSWER

12 Name any three national parties of India with one feature of each. (3)

13 What is meant by lack of internal democracy and dynastic succession in parties? (2)

14 Mention three efforts made in India to reform political parties. (3)

LONG ANSWER

15 Describe the four major challenges faced by political parties in India. (5)

Day 32 Answers with explanation

1 **(b)** State Party: 6% votes and 2 seats in a state assembly.
2 **(c)** National People's Party.
3 **(a)** Bahujan Samaj Party.
4 **(c)** CPI(M).
5 **(b)** The anti-defection law.
6 **(c)** The Supreme Court.
7 **(b)** Dynastic succession.
8 **(c)** Both are Election Commission orders.
9 **(a)** Concentration of power at the top is why procedures are not open; R explains A.
10 **(a)** Since leaving the party costs the seat, members must accept the leaders' decisions; R explains A.
11 (i) Recognised political parties. (ii) Only the official candidates of that party. (iii) At least 6% of total votes in Lok Sabha elections or in Assembly elections in four states, and at least four Lok Sabha seats.
12 Any three: INC (1885, centrist, secularism); BJP (1980, cultural nationalism); BSP (1984, bahujan samaj); CPI(M) (1964, Marxism-Leninism); NPP (2013, first from the North-East); AAP (2012).
13 Internal democracy: power with a few leaders, no membership registers, meetings or internal elections. Dynastic succession: top posts held by one family, so people without experience or support rise.
14 Anti-defection law; affidavits on property and criminal cases (Supreme Court); organisational elections and income tax returns (Election Commission).
15 Lack of internal democracy; dynastic succession; growing role of money and muscle power (rich donors, criminals as candidates); lack of meaningful choice (ideological differences reduced, leaders switch parties). Explain each.

FLASH REVISION: KEY TERMS

Recognised party: registered party with a unique symbol
Defection: changing party after election
Affidavit: signed statement on property and criminal cases
Dynastic succession: top posts within one family
State funding: government pays election expenses
Internal democracy: elections and open procedures inside a party

WRITE IT RIGHT: "CHALLENGES TO POLITICAL PARTIES"

1. Lack of internal democracy: power with a few leaders; no registers, meetings or internal elections.
2. Dynastic succession: top posts within one family; less experienced people rise.
3. Money and muscle power: rich donors influence policy; criminals given tickets.
4. Lack of meaningful choice: ideological differences shrinking; leaders switch parties.
5. Conclude with one reform for each: law on internal affairs, affidavits, state funding.

BOARD MEIN AISE LIKHO

Q. Distinguish between a national party and a state party. (3 marks)

1. **State party:** secures at least 6% of the votes in a State Legislative Assembly election and wins at least two seats.
2. **National party:** secures at least 6% of the votes in Lok Sabha elections or Assembly elections in four States, and wins at least four Lok Sabha seats.
3. **Examples:** in 2023 there were six national parties, e.g. INC, BJP, BSP, CPI(M), NPP and AAP; many state parties have national ambitions and a federal outlook.

Tip: criteria ke numbers (6%, 2 seats, 4 states, 4 seats) bilkul sahi likho.

TONIGHT'S 2-MINUTE RECALL

1. NPP: first **North-East** party with national status
2. Anti-defection law: a legislator who changes party **loses the seat**
3. INC ruled at the Centre till **1977** and from **1980 to 1989**
4. Election Commission: parties must hold **organisational elections**
5. Suggested reform: about **one-third tickets** to women
6. People can push reform through **petitions, publicity and agitations**

Day 32 Extra Practice

8 more questions from this chapter | new, no repeats

MCQ

1 According to NCERT, about how many political parties are registered with the Election Commission of India? (1)

(a) Fewer than 750 **(b)** Exactly 705
(c) Exactly 750 **(d)** More than 750

2 Which of the following best describes a 'partisan'? (1)

(a) The party that runs the government
(b) A group of people who come together to promote common beliefs
(c) A person who is strongly committed to a party
(d) The science of governance or the affairs of the state

3 What is meant by a 'ruling party'? (1)

(a) A party that sits in the opposition
(b) The political party that runs the government
(c) A party that has lost the election
(d) A party that is not registered with the Election Commission

4 Match the parties in List I with their alliance or status at the time of the 2004 Lok Sabha elections in List II. List I: 1. Indian National Congress 2. Bharatiya Janata Party 3. Communist Party of India (Marxist) 4. Telugu Desam Party. List II: A. National Democratic Alliance B. State party C. United Progressive Alliance D. Left Front (1)

(a) 1-C, 2-A, 3-B, 4-D **(b)** 1-C, 2-D, 3-A, 4-B
(c) 1-D, 2-C, 3-A, 4-B **(d)** 1-C, 2-A, 3-D, 4-B

5 In a democracy, how are political parties mainly held accountable to the public? (1)

(a) Through elections and the support of voters
(b) Through press conferences
(c) By encouraging partisanship
(d) Through social media campaigns

SHORT ANSWER

6 Explain what is meant by a political party. (3)

7 Name the three components of a political party and briefly describe each. (3)

8 Explain any three functions of opposition parties in a democracy. (3)

Day 32 Extra Practice: Answers

1 **(d)** NCERT states that more than 750 parties are registered with the Election Commission of India. Only a handful of them are serious contenders in elections.

2 **(c)** A partisan is a person who is strongly committed to a party, group or faction. Such a person tends to take one side and cannot take a balanced view on an issue.

3 **(b)** The ruling party is the party that forms and runs the government. Parties that lose the election play the role of the opposition.

4 **(d)** In 2004 the Congress led the UPA, the BJP led the NDA and the CPI(M) was part of the Left Front. The Telugu Desam Party is a state party.

5 **(a)** Parties must seek the support of voters in regular elections. A party that fails the people can be voted out, and this keeps parties accountable.

6 1. A political party is a group of people who come together to contest elections and hold power in the government. 2. Its members agree on some policies and programmes that they believe will promote the collective good of society. 3. A party tries to convince people that its policies are better than those of other parties. 4. It seeks to put these policies into action by winning popular support through elections, filling political offices and using political power.

Day 32 Extra Practice: Answers continued

7 1. Leaders: they are at the top of the party, contest elections and, if the party wins, become ministers who take major policy decisions. 2. Active members: they are the workers and activists spread across the country who carry out the party's work at the ground level. 3. Followers: they are ordinary citizens who believe in the party's policies and give it popular support at election time.

8 1. Opposition parties criticise the government for its failures and wrong policies. 2. They voice different views and raise people's problems inside and outside the legislature, for example by asking questions of the government. 3. They mobilise opposition and public opinion against government decisions, and this keeps the ruling party in check and accountable.

DAY 32 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 33, Economics: Globalisation

DAY 33

ECONOMICS | CHAPTER 4 | ONE-DAY CHAPTER + TEST

Globalisation, Its Drivers and India in the G20

Globalisation and the Indian Economy

Aaj ka target (pages 142-146)

- ☐ Globalisation ek din mein
- ☐ Liberalisation ka matlab apne words mein
- ☐ 15 sawal + test, G20 wala bhi
- ☐ 110 min, Eco ke chaaron chapter done

BOARD SCOPE 2026-27

For the board exam, CBSE lists only three parts of this chapter: **What is Globalisation**, **Factors that have Enabled Globalisation**, and **India and the G20**. The other sections are for the project. This Day covers exactly these three.

4.1 What is Globalisation?

- A **Multinational Corporation (MNC)** is a company that owns or controls production in **more than one nation**. MNCs set up factories and offices where they get cheap labour and other resources.
- In the last two to three decades, **foreign investment by MNCs** and **foreign trade** between countries have been rising fast. A large part of foreign trade is controlled by MNCs.
- Example: the **Ford Motors** plant in India makes cars for Indian markets, also exports cars to other developing countries and car components to its factories around the world.
- Result: **greater integration of production and markets** across countries.

KEY TERM: GLOBALISATION

Globalisation is the process of **rapid integration or interconnection between countries**. Countries get connected through the movement of **goods, services, investments, technology** and also **people** (in search of better income, jobs or education). MNCs play a major role in it.

SHIVAM BHAIYA SOCH RAHE HAIN

Globalisation ke **do engine**: **Technology** (containers, internet) aur **Liberalisation** (1991 ke baad barriers hate). 3 marker mein dono ke 2-2 points likho.

4.2 Factors that have Enabled Globalisation

Fig. 33.1 *A container ship at port. Containers are loaded intact onto ships, railways, planes and trucks.*

1. TECHNOLOGY

- **Transport:** faster delivery of goods over long distances at lower cost. **Containers** have led to a huge **reduction in port handling costs** and faster exports. Air transport costs have fallen too.
- **Information and communication technology:** telecommunication, computers and the **internet** let people get information instantly and talk across the world at negligible cost. A magazine for a London company can be designed and printed in Delhi, with text sent over the internet.

2. LIBERALISATION OF FOREIGN TRADE AND INVESTMENT POLICY

- A **tax on imports** is an example of a **trade barrier**: a restriction set up by the government to regulate foreign trade.
- After Independence, India put barriers on foreign trade and investment to **protect domestic producers** from foreign competition.
- **Starting around 1991**, the government decided Indian producers should **compete with producers around the globe**; competition would improve their performance and quality. Barriers were removed to a large extent.
- Removing barriers or restrictions set by the government is called **liberalisation**.

MEME SAMJHO
Astra meme, fact inside

INDIA, 1991

"Trade barriers ji, samay aa gaya hai aapse vida lene ka."

Asli baat: Around **1991** India removed barriers on foreign trade and investment to a large extent. This is **liberalisation**, a key factor that enabled globalisation.

MEME SAMJHO
Astra meme, fact inside

G20 NEW DELHI SUMMIT, 2023

"Presidency bhi apni, summit bhi Delhi mein, aur African Union bhi andar. Aaj to maza aa jayega!"

Asli baat: At the **New Delhi Summit (9 to 10 September 2023)**, under India's presidency, the **African Union** became a permanent member of the G20.

REMEMBER IN ONE LINE

Globalisation = rapid integration of countries through trade, investment, technology and people, led by **MNCs**; enabled by **technology** and **liberalisation** (1991); India's **G20 Presidency** 2022-23, theme **Vasudhaiva Kutumbakam**, African Union joined.

4.3 India and the G20

- The **G20 (Group of Twenty)** is a forum of **19 countries plus the European Union**; the **African Union** joined as a permanent member in 2023. It started in **1999** as a meeting of finance ministers; leaders' summits began in **2008**.
- Members together make up about **85% of world GDP**, about **75% of world trade** and about **two-thirds of the world's population**.
- India held the **G20 Presidency from 1 December 2022 to 30 November 2023**. Meetings were held in many cities across India.
- Theme: **"Vasudhaiva Kutumbakam: One Earth, One Family, One Future"**.
- The **New Delhi Summit (9 to 10 September 2023)** at Bharat Mandapam adopted the **New Delhi Leaders' Declaration** by consensus, and the **African Union** became a permanent member.

Fig. 33.2 *Bharat Mandapam, New Delhi, venue of the G20 Leaders' Summit, September 2023.*

INDIA'S PRIORITIES

- Green development and **LiFE** (Lifestyle for Environment)
- Inclusive and resilient growth; faster progress on the SDGs
- **Digital public infrastructure** and women-led development
- Reformed multilateral institutions

WHY IT MATTERS FOR INDIA

- A voice for the **Global South** and developing countries
- Showcased India's digital public infrastructure (like UPI) to the world
- Boost to trade, investment and tourism
- Stronger role in shaping global economic rules

Day 33 Practice
15 board-pattern questions | solve first, then check

MCQ (WHOLE CHAPTER TEST)

1 **Globalisation is best described as:** (1)

(a) the process of rapid integration or interconnection between countries
(b) the growth of trade within a single state
(c) government control over all imports
(d) the movement of people from villages to cities

2 **In 1991, the Indian government removed many barriers on foreign trade mainly because it felt that:** (1)

(a) foreign goods were of poor quality
(b) imports had to be stopped completely
(c) competition would improve the performance of Indian producers
(d) MNCs should leave India

3 **A tax on imported toys, so that Indian toy-makers can prosper, is an example of:** (1)

(a) liberalisation **(b)** a trade barrier
(c) globalisation **(d)** foreign investment

4 Removing barriers or restrictions set by the government on trade is called: (1)

(a) privatisation (b) nationalisation
(c) liberalisation (d) protection

5 Which factors have enabled globalisation? (I) Improvement in transport technology (II) Growth of information and communication technology (III) Liberalisation of foreign trade and investment policy (1)

(a) (I) only (b) (I) and (II) only
(c) (II) and (III) only (d) (I), (II) and (III)

6 The use of containers for transporting goods has led to: (1)

(a) higher port handling costs
(b) a huge reduction in port handling costs
(c) slower exports
(d) an end to air transport

7 A company that owns or controls production in more than one nation is called a: (1)

(a) cooperative (b) multinational corporation
(c) public sector unit (d) Self Help Group

8 Which of these is **not** a factor that enabled globalisation? (1)

(a) Containers for transport
(b) Internet and e-mail
(c) Rising trade barriers
(d) Liberalisation of investment policy

9 India held the G20 Presidency during: (1)

(a) 1 Dec 2021 to 30 Nov 2022 (b) 1 Dec 2022 to 30 Nov 2023
(c) 1 Jan 2023 to 31 Dec 2023 (d) 1 Dec 2023 to 30 Nov 2024

10 The theme of India's G20 Presidency, "Vasudhaiva Kutumbakam", means: (1)

(a) One Nation, One Market, One Tax
(b) One Earth, One Family, One Future
(c) Global Trade for All
(d) Make in India

11 Which organisation became a permanent member of the G20 at the New Delhi Summit in 2023? (1)

(a) ASEAN (b) SAARC
(c) The African Union (d) The European Union

ASSERTION-REASON

12 **Assertion (A):** Globalisation is the process of rapid integration within a country.
Reason (R): MNCs are playing a major role in the globalisation process. (1)

(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

ASSERTION-REASON

13 **Assertion (A):** Rapid improvement in technology has stimulated the globalisation process.
Reason (R): Containers and cheaper air transport have made faster delivery of goods across long distances possible at lower costs. (1)

(a) Both A and R are true, and R correctly explains A.
(b) Both A and R are true, but R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SHORT ANSWER

14 What is globalisation? Explain how technology has helped the process. (3)

LONG ANSWER

15 Explain the significance of India's G20 Presidency (2022-23) for India and the world. (5)

Day 33 Answers with explanation

1 (a) rapid integration or interconnection between countries.
2 (c) Competition would improve performance and quality of Indian producers.
3 (b) a trade barrier: a restriction set by the government.

4 (c) liberalisation.
5 (d) All three: technology (transport and ICT) and liberalisation.
6 (b) a huge reduction in port handling costs and faster exports.

7 (b) multinational corporation (MNC).
8 (c) Trade barriers restrict trade; removing them helped globalisation.
9 (b) 1 December 2022 to 30 November 2023.

10 (b) One Earth, One Family, One Future.
11 (c) The African Union.
12 (d) A is false: globalisation is integration between countries. R is true.

13 **(a)** Better transport made long-distance delivery faster and cheaper, which explains A.

14 Globalisation is the rapid integration or interconnection between countries through goods, services, investment, technology and people. **Technology:** containers cut port handling costs and sped up exports; air transport became cheaper; telecom, computers and the internet allow instant information and communication at negligible cost, so services can be produced anywhere.

15 Presidency from 1 Dec 2022 to 30 Nov 2023, theme **Vasudhaiva Kutumbakam: One Earth, One Family, One Future**; meetings across many Indian cities; New Delhi Summit (Sept 2023) adopted the Leaders' Declaration by consensus; **African Union** made a permanent member, giving voice to the Global South; priorities like green development and LiFE, inclusive growth, SDGs, digital public infrastructure and women-led development; boosted India's global image, trade, investment and tourism.

Day 33 Extra Practice

8 more questions from this chapter | new, no repeats

MCQ

1 **What is the main aim behind the investments made by MNCs?** (1)

(a) To work for the welfare of poor people
(b) To give financial support to the government of their home country
(c) To benefit the foreign countries where they invest
(d) To increase their assets and earn profits

2 **Before setting up production in a country, an MNC looks at certain factors. Which of these is NOT one of them?** (1)

(a) Favourable government policies
(b) Nearness to markets
(c) Presence of a large number of local competitors
(d) Availability of cheap skilled and unskilled labour

3 **Cargill Foods, a large American MNC, bought over an Indian company. Which company was it?** (1)

(a) Fun Foods Ltd.
(b) Parakh Foods
(c) Amul
(d) Agro Tech Foods Ltd.

4 **Which of the following is an important aspect of globalisation?** (1)

(a) Support to the domestic market
(b) Uniform culture
(c) Environmental support
(d) Access to new markets

ASSERTION-REASON

5 **Assertion (A): MNCs often choose countries like India and China as places for production.**
Reason (R): MNCs look for places around the world where production is cheap. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

6 **Read the source and answer the questions that follow.** (4)

The liberalisation of foreign trade and investment in India was supported by some very powerful international organisations. These organisations say that all barriers to foreign trade and investment are harmful, and that trade between countries should be 'free'. The World Trade Organisation (WTO) is one such organisation, and its aim is to liberalise international trade. It was started at the initiative of the developed countries. The WTO sets rules for international trade and sees that these rules are obeyed. About 160 countries are currently its members. The WTO is supposed to allow free trade for all. In practice, however, developed countries have unfairly kept their own trade barriers, while WTO rules have forced developing countries to remove theirs. The current debate on trade in agricultural products is one example.

(i) Name the organisation that stresses liberalisation of foreign trade and foreign investment. (1)
(ii) What is the main aim of the WTO? (1)
(iii) State any two shortcomings of the WTO. (2)

SHORT ANSWER

7 Explain the contribution of foreign investment to the process of globalisation. (3)

LONG ANSWER

8 How do Multinational Corporations (MNCs) interlink production across countries? Explain with examples. (5)

Day 33 Extra Practice: Answers

1 **(d)** MNCs invest money hoping that the assets they buy or set up will earn them profits.

2 **(c)** MNCs prefer places close to markets, with low-cost skilled and unskilled labour and helpful government policies. Many local rivals do not attract them.

3 **(b)** Cargill Foods bought Parakh Foods, a smaller Indian company. Buying local companies is one way MNCs quickly expand production.

4 **(d)** Globalisation links countries, so producers can sell in markets far beyond their own country.

5 **(a)** MNCs set up production where costs are low. Low-cost labour and other resources in India and China draw them there.

6 (i) The World Trade Organisation (WTO). (ii) To liberalise international trade by removing barriers, so that trade between countries is free. It also sets rules for trade and checks that they are obeyed. (iii) (1) Developed countries have unfairly kept their own trade barriers and continue to protect their producers. For example, US farmers get large subsidies and can sell farm products abroad at very low prices. (2) WTO rules have forced developing countries to remove their trade barriers, which hurts their producers.

Day 33 Extra Practice: Answers continued

7 (1) Investment made by MNCs in other countries is called foreign investment. Its aim is to expand production and earn profits. (2) MNCs bring money for setting up factories, buying machines and bringing in new technology. They also invest by buying local companies, for example Cargill Foods buying Parakh Foods. (3) They also partner with local firms for joint production. This links production in different countries and leads to greater integration of economies.

8 (1) MNCs set up factories and offices where they find nearness to markets, low-cost skilled and unskilled labour, and favourable government policies. (2) They spread production across countries. For example, a product may be designed in the USA, have its parts made in China and be assembled in Mexico or Eastern Europe, while customer care is handled from India. (3) They set up joint production with local companies and give them money and new technology. For example, Ford Motors set up a plant near Chennai together with Mahindra and Mahindra. (4) They buy up local companies to expand quickly. For example, Cargill Foods bought Parakh Foods. (5) Large MNCs place orders with small producers for goods such as garments, footwear and sports items, and then sell these under their own brand names.

Next: Day 34, Geography: Minerals and Energy I

DAY 34

GEOGRAPHY | CHAPTER 5 | PART 1 OF 2

Minerals: Where They Hide and Why They Matter

Minerals and Energy Resources

Aaj ka target (pages 146-150)

- ☐ Minerals: kahan milte hain, kyun zaroori
- ☐ Ferrous, non-ferrous, non-metallic: 2-2 naam
- ☐ 10 sawal, ores wale dhyaan se
- ☐ 100 min, map book saath rakho

34.1 What is a Mineral?

Geologists define a mineral as a **"homogenous, naturally occurring substance with a definable internal structure"**. Minerals are found in varied forms, from the hardest diamond to the softest talc. **Rocks** are combinations of homogenous substances called minerals. Their colour, hardness, crystal forms, lustre and density depend on the physical and chemical conditions under which they form.

34.2 Mode of Occurrence

Where	How they occur	Examples
Igneous and metamorphic rocks	In cracks, crevices, faults or joints: smaller ones are **veins**, larger ones are **lodes**	Tin, copper, zinc, lead

Sedimentary rocks	In **beds or layers**, formed by deposition and concentration	Coal, some iron ore; gypsum, potash salt, sodium salt (by evaporation in arid regions)
Decomposition of surface rocks	Soluble parts are removed, leaving a **residual mass** of weathered material	Bauxite
Alluvial deposits	In sands of valley floors and the base of hills: **placer deposits**; not corroded by water	Gold, silver, tin, platinum
Ocean waters and beds	Dissolved in sea water; ocean beds rich in **manganese nodules**	Common salt, magnesium, bromine

RAT-HOLE MINING

In **Jowai and Cherrapunjee** (Meghalaya), coal is mined by family members who dig long, narrow tunnels. Most minerals in India are owned by the government, but in the north-east they are owned by individuals or communities.

34.3 Ferrous Minerals: Iron Ore and Manganese

Ferrous minerals account for about **three-fourths** of the total value of metallic minerals produced in India. **Magnetite** is the finest iron ore (up to **70%** iron) with excellent magnetic qualities, valuable in the electrical industry. **Haematite** is the most important industrial iron ore by quantity, with **50 to 60%** iron.

Belt	Key mines and facts
Odisha-Jharkhand	High-grade haematite at **Badampahar** (Mayurbhanj and Kendujhar, Odisha); Gua and Noamundi (Singhbhum, Jharkhand)
Durg-Bastar-Chandrapur	**Bailadila** hills (Bastar, Chhattisgarh): very high grade haematite, the hills look like the **hump of an ox**; exported to Japan and South Korea via Visakhapatnam
Ballari-Chitradurga-Chikkamagaluru-Tumakuru	Karnataka: **Kudremukh** in the Western Ghats is a **100% export unit**; ore goes as **slurry through a pipeline** to a port near Mangaluru
Maharashtra-Goa	Goa and Ratnagiri: ore not of very high quality but efficiently mined; exported through **Marmagao** port

Fig. 34.1 *Iron ore mines in the CBSE map list. Drawn by Astra.*

Manganese is mainly used in making steel and ferro-manganese alloy: nearly **10 kg** of manganese is needed for **1 tonne of steel**. It is also used in bleaching powder, insecticides and paints.

Exam line: Kudremukh means "horse face" in Kannada; the peak resembles a horse's face. Its ore travels as slurry, not by truck.

34.4 Non-ferrous and Non-metallic Minerals

COPPER

Malleable, ductile and a good conductor: used in electrical cables, electronics and chemical industries. **Balaghat** mines (Madhya Pradesh), **Khetri** mines (Rajasthan), Singhbhum (Jharkhand).

COPPER

BAUXITE

Clay-like, from decomposition of rocks rich in aluminium silicates; ore of **aluminium**, which is light yet strong, conducts well and is malleable. Amarkantak plateau, Maikal hills, Bilaspur-Katni. **Odisha** is the largest producer (Panchpatmali, Koraput).

MICA

Made of plates or leaves; splits into thin sheets. Excellent **di-electric strength**, low power loss, insulating, resists high voltage: indispensable in electrical and electronics. **Koderma-Gaya-Hazaribagh** belt (Jharkhand), Ajmer, Nellore.

Limestone is found with rocks of calcium carbonates or calcium and magnesium carbonates, mostly in **sedimentary** rocks. It is the basic raw material of the **cement** industry and is essential for smelting iron ore in the blast furnace.

Hazards of mining: dust and noxious fumes cause **pulmonary diseases**; risk of roof collapse, inundation and fires; water sources get contaminated; waste and slurry degrade land and soil and pollute rivers.

CONSERVATION OF MINERALS

Minerals are **finite and non-renewable**; they take millions of years to form, while we use them up very fast. So: use them in a **planned and sustainable** way, develop **improved technologies** to use low-grade ores at low cost, **recycle metals** and use scrap metals and substitutes.

MEME SAMJHO

Astra meme, fact inside

ELECTRONICS INDUSTRY TO MICA

"High voltage jhel lo, current leak na ho, patli sheet ban jao... humare liye kaam karoge?"

Asli baat: Mica's **di-electric strength**, low power loss factor, insulating properties and resistance to high voltage make it **indispensable** in the electric and electronic industries.

SHIVAM BHAIYA SOCH RAHE HAIN

Iron ore belts ko **"OD-DBC-BCCT-MG"** ki tarah mat ratto. Map pe dekho: **East** (Odisha-Jharkhand), **Centre** (Durg-Bastar), **South-west** (Karnataka), **West coast** (Goa). Location se yaad rahega.

Day 34 Practice

10 board-pattern questions | solve first, then check

MCQ

1 **In igneous and metamorphic rocks, what are the larger occurrences of minerals in cracks, crevices, faults or joints called?** (1)

(a) Veins **(b)** Layers
(c) Chambers **(d)** Lodes

2 **Why is iron ore called the backbone of industrial development?** (1)

(a) It is a very valuable nuclear mineral.
(b) It is widely used to make steel for machinery, transport and construction.
(c) It is found in sedimentary rocks all over India.
(d) It is exported to meet domestic demand.

3 **Identify the mineral.**
(I) It is a clay-like substance from which alumina and then aluminium are obtained.
(II) Its deposits form by the decomposition of rocks rich in aluminium silicates.
(III) It is found in the Amarkantak plateau, Maikal hills and the Bilaspur-Katni plateau. (1)

(a) Mica **(b)** Magnetite
(c) Zinc ore **(d)** Bauxite

4 **Pick the odd one out.** (1)

(a) Peat, Lignite
(b) Hematite, Anthracite
(c) Bituminous, Peat
(d) Lignite, Anthracite, Bituminous

5 **Identify the type of mining.**
(I) It is done around Jowai and Cherrapunji in Meghalaya.
(II) Family members dig a long, narrow tunnel.
(III) The National Green Tribunal has declared it illegal. (1)

(a) Open-cast mining **(b)** Rat-hole mining
(c) Shaft mining **(d)** Strip mining

6 **About 10 kg of this mineral is needed to make one tonne of steel, and it is also used for bleaching powder, insecticides and paints. Which mineral is it?** (1)

(a) Copper **(b)** Mica
(c) Manganese **(d)** Limestone

ASSERTION-REASON

7 **Assertion (A):** The mineral content of an ore must be in sufficient concentration to make its extraction commercially viable.
Reason (R): The concentration of the mineral in the ore affects the cost of extraction. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

8 Read the source and answer the questions that follow. (4)

The total volume of workable mineral deposits is a very small fraction, about one per cent, of the earth's crust. We are rapidly using up mineral resources that took millions of years to form. The geological processes of mineral formation are so slow that the rate of replenishment is extremely small compared with the present rate of use. Mineral resources are therefore finite and non-renewable. Continued extraction of ores leads to rising costs, as minerals must be taken from greater depths, and their quality also falls.

(i) According to the source, what is one ill effect of continued extraction of ores? (1)

(a) Profits keep increasing.
(b) Minerals of lower quality are brought up.
(c) Continued extraction is always good.
(d) Better quality ores come up from depth.

(ii) What does the source say about the rate of replenishment of minerals? (1)

(a) It is equal to the rate of use.
(b) It is faster than the rate of use.
(c) It is much slower than the rate of use.
(d) It does not depend on use.

(iii) Which pair consists of finite resources? (1)

(a) Wind energy and sunlight
(b) Coal and petroleum
(c) Tidal energy and sunlight
(d) Wind energy and tidal energy

(iv) Resources that cannot be replenished are called: (1)

(a) Renewable resources
(b) Infinite resources
(c) Replenishable resources
(d) Non-renewable resources

SHORT ANSWER

9 Give evidence to show that mining is harmful to the health of miners and to the environment. (3)

LONG ANSWER

10 Suggest a five-point plan for the conservation of minerals. (5)

Day 34 Answers with explanation

1 **(d)** Smaller occurrences are veins; the larger ones are lodes.
2 **(b)** Iron ore is the basic mineral; steel made from it is used in almost every industry.
3 **(d)** Bauxite is a residual deposit and the ore of aluminium.
4 **(b)** Hematite is an iron ore; all the others are types of coal.
5 **(b)** Rat-hole mining in Meghalaya is dangerous and has been declared illegal by the NGT.
6 **(c)** Manganese is mainly used in steel and ferro-manganese alloy.
7 **(a)** Low concentration means more rock must be dug and processed for the same metal, raising costs; so R explains A.
8 (i) **(b)** Deeper ores cost more and are of lower quality. (ii) **(c)** Minerals take millions of years to form. (iii) **(b)** Coal and petroleum are fossil fuels and get exhausted. (iv) **(d)** Minerals are non-renewable.
9 (1) Dust and harmful fumes inhaled by miners make them prone to pulmonary (lung) diseases.
(2) Miners face the constant risk of mine roofs collapsing, flooding (inundation) and fires in coal mines.
(3) Water sources in the region get polluted, and dumping of waste and slurry degrades land, soil and nearby streams and rivers.
10 (1) Use minerals judiciously and avoid wastage, since they are finite and non-renewable.
(2) Recycle metals such as iron, copper and aluminium, and use scrap metals.
(3) Use substitutes for scarce minerals wherever possible.
(4) Use improved technologies so that low-grade ores can be used at low cost and extraction is more efficient.
(5) Reduce wastage during mining and processing, and restore mined land through afforestation and land reclamation.
(6) Make people, especially the new generation, aware of the need for conservation and sustainable use.

DAY 34 COMPLETE? ☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 35, Geography: Minerals and Energy II

TONIGHT'S 2-MINUTE RECALL Answer from memory, then check the notes

1. Define a mineral in one line.
2. Veins and lodes: in which rocks are they found?
3. Magnetite vs haematite: iron content of each.
4. Which mine sends ore as slurry through a pipeline?
5. Three uses of mica.

My mistakes from today's practice:

DAY 35

GEOGRAPHY | CHAPTER 5 | PART 2 OF 2 + TEST

Energy Resources

Minerals and Energy Resources

Aaj ka target (pages 150-156)

- ☐ Energy resources, chapter khatam
- ☐ Power plants aur mines map pe khud lagao
- ☐ 15 sawal + test, non-conventional pakka
- ☐ 2 ghante, phir Geo ChS done

Energy is needed for cooking, lighting, heating, vehicles and machinery in industries. **Conventional sources**: firewood, cattle dung cake, coal, petroleum, natural gas and electricity (hydel and thermal). **Non-conventional sources**: solar, wind, tidal, geothermal, biogas and atomic energy.

35.1 Coal

- The most abundantly available fossil fuel in India: a large part of our commercial energy. Types by compression and depth: **peat** (low carbon, high moisture, low heating capacity), **lignite** (low-grade brown coal; main reserves at **Neyveli**, Tamil Nadu; used for electricity), **bituminous** (most popular for commercial use; metallurgical coal for blast furnaces) and **anthracite** (highest quality hard coal).
- **Gondwana coal** (about 200 million years old): **Damodar valley** (Jharia, Raniganj, Bokaro); also Godavari, Mahanadi, Son and Wardha valleys.
- **Tertiary coal** (about 55 million years old): north-east (Meghalaya, Assam, Arunachal Pradesh, Nagaland).
- Coal is a **bulky** material that loses weight on use, so heavy industries and thermal plants are located on or near coalfields.

Fig. 35.1 *An open-pit coal mine at Jharia, Damodar valley, Jharkhand. (Wikimedia Commons, CC BY 2.0)*

35.2 Petroleum and Natural Gas

- Petroleum is the next major energy source after coal: fuel for heat and lighting, lubricants for machinery and raw material for many industries. **Refineries** act as a **"nodal industry"** for synthetic textile, fertiliser and chemical industries.
- Most petroleum occurs in **anticlines and fault traps** in rocks of the tertiary age; oil is held in porous rocks below a non-porous layer.
- About **63%** of India's petroleum came from **Mumbai High**, 18% from Gujarat and 16% from Assam (NCERT data). **Ankleshwar** is the most important field of Gujarat. **Assam** is the oldest oil-producing state: **Digboi, Naharkatia** and Moran-Hugrijan.
- **Natural gas** is a clean fuel, found with or without petroleum; used in power and fertiliser industries and as **CNG** in vehicles. Large reserves: **Krishna-Godavari basin**, Mumbai High, Gulf of Cambay, Andaman and Nicobar Islands.
- The **Hazira-Vijaipur-Jagdishpur (HVJ)** pipeline links Mumbai High and Bassien with fertiliser, power and industrial complexes in western and northern India.

Fig. 35.2 *Coal mines, oil fields and power plants in the CBSE map list. Drawn by Astra.*

Coal mine · Oil field · Thermal plant · Nuclear plant

Map item	Places
Coal mines	Raniganj (WB), Bokaro (Jharkhand), Talcher (Odisha), Neyveli (TN)
Oil fields	Digboi, Naharkatia (Assam); Mumbai High, Bassien (offshore, Maharashtra); Kalol, Ankaleshwar (Gujarat)
Thermal plants	Namrup (Assam), Singrauli (MP), Ramagundam (Telangana)
Nuclear plants	Narora (UP), Kakrapara (Gujarat), Tarapur (Maharashtra), Kalpakkam (TN)

35.3 Electricity

HYDRO ELECTRICITY

Generated by **fast flowing water**: a **renewable** source. Multi-purpose projects such as **Bhakra Nangal**, Damodar Valley Corporation and the Kopili Hydel Project produce it.

THERMAL ELECTRICITY

Generated by burning **coal, petroleum and natural gas**. Thermal plants use **non-renewable** fossil fuels. Over 300 thermal power plants run in India.

35.4 Non-conventional Sources

Source	Key facts for the exam
Nuclear (atomic)	Energy from altering the structure of atoms. **Uranium** and **thorium**: uranium in Jharkhand and the Aravalli ranges of Rajasthan; the **monazite sands of Kerala** are rich in thorium.
Solar	India is tropical with enormous potential. **Photovoltaic** technology turns sunlight into electricity. At Madhapur near Bhuj (Gujarat) solar energy is used to sterilise milk cans.
Wind	Largest wind farm cluster from **Nagarcoil to Madurai** (Tamil Nadu); also Andhra Pradesh, Karnataka, Gujarat, Kerala, Maharashtra, Lakshadweep. Nagarcoil and **Jaisalmer** use wind energy well.
Biogas	From shrubs, farm, animal and human waste. Higher thermal efficiency than kerosene, dung cake and charcoal. **Gobar gas plants** give energy and better manure.
Tidal	Floodgate dams across inlets. Ideal sites: **Gulf of Khambhat, Gulf of Kachchh** (Gujarat) and the Gangetic delta in the **Sundarbans** (West Bengal).
Geothermal	Heat from the earth's interior (hot springs). Experimental projects: **Parvati valley near Manikarn** (Himachal Pradesh) and **Puga valley** (Ladakh).

Fig. 35.3 *Wind turbines among farms in Tamil Nadu. (Wikimedia Commons, CC BY-SA 4.0)*

MEME SAMJHO

Astra meme, fact inside

CONSERVATION OF ENERGY

"Bijli ka bill bada aa hi nahi sakta... agar kamra chhodte hi switch off kar do."

Asli baat: Energy saved is energy produced. Use public transport, switch off electricity when not in use, use power-saving devices and non-conventional sources.

MAP ALERT!

Map mein **Digboi, Naharkatia, Namrup** teeno Assam mein bilkul paas-paas hain. Dot lagate waqt dhyan se: Digboi **sabse upar-right**. Aur Mumbai High **samudra mein** hai, zameen pe dot mat lagana!

YAAD RAKHO: QUICK FACTS

- **Lignite** is low-grade brown coal; Neyveli (Tamil Nadu) lignite is used for electricity. **Anthracite** is the highest quality hard coal.
- **Gondwana coal** (about 200 million years old) lies in the Damodar valley: Jharia, Raniganj, Bokaro. **Tertiary coal** (about 55 million years old) is in Meghalaya, Assam, Arunachal Pradesh and Nagaland.

Day 35 Practice

15 board-pattern questions | solve first, then check

MCQ

1 Uranium and thorium, used to generate nuclear power, are found in: (1)

(a) the Ganga basin
(b) the Aravalli ranges of Rajasthan
(c) the Gulf of Khambhat
(d) Manikaran in Himachal Pradesh

2 While studying India's oil fields, you read about one that lies offshore, in the sea away from the mainland. Which is it? (1)

(a) Digboi (b) Kalol
(c) Mumbai High (d) Ankleshwar

3 Which non-conventional source of energy is harnessed near Manikaran in Himachal Pradesh? (1)

(a) Wind energy (b) Hydel energy
(c) Solar energy (d) Geothermal energy

4 Most of India's Gondwana coal deposits are found in which valley? (1)

(a) Tapi valley (b) Damodar valley
(c) Krishna valley (d) Brahmaputra delta

5 Which type of coal, formed from decaying plants in swamps, has low carbon, high moisture content and low heating capacity? (1)

(a) Lignite (b) Bituminous
(c) Anthracite (d) Peat

6 Which place in Rajasthan is well known for the effective use of wind energy? (1)

(a) Udaipur (b) Jaipur
(c) Jaisalmer (d) Ajmer

7 Which regions offer ideal conditions for tidal energy in India?
(I) Gulf of Khambhat
(II) Gulf of Kuchchh
(III) Gangetic delta in the Sunderbans
(IV) Gulf of Mannar (1)

(a) (I) and (II) only (b) (III) and (IV) only
(c) (I), (II) and (III) (d) (I), (II), (III) and (IV)

8 Which two states hold most of India's petroleum deposits? (1)

(a) Gujarat and Goa (b) Assam and Gujarat
(c) Rajasthan and Kerala (d) Odisha and Punjab

EXAM TIPS

- Distinguish or compare questions: draw a quick **two-column table**; checkers tick it fast.
- Case-based questions: take the answer from the **passage first**, then add the NCERT term.
- **Underline keywords** like regur, jhumming, Agenda 21, hematite in your answer.

ASSERTION-REASON

9 **Assertion (A):** Biogas is the most efficient use of cattle dung.
Reason (R): Using dung in a biogas plant reduces the quality of manure. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** Oceanic tides cannot be used to generate electricity.
Reason (R): Tidal energy is used by building dams across inlets so that water flowing in and out through sluice gates turns turbines. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 **Read the source and answer the questions that follow.** (4)

Energy is a basic requirement for economic development. Every sector of the economy, agriculture, industry, transport, commercial and domestic, needs energy. Since Independence, development plans have needed more and more energy, so consumption of all forms of energy has been rising steadily. There is an urgent need for a sustainable path of energy development; promoting energy conservation and using more renewable energy are its twin planks. India is at present one of the least energy-efficient countries in the world. As concerned citizens we can help by using public transport instead of individual vehicles, switching off electricity when not in use and using power-saving devices. After all, energy saved is energy produced.

(i) Why is energy called a basic requirement for economic development? (1)

(ii) Is it correct to say that India is one of the least energy-efficient countries? Give a reason. (1)

(iii) State the twin planks of sustainable energy and give one way a citizen can save energy. (2 marks) (2)

SHORT ANSWER

12 **Distinguish between commercial and non-commercial sources of energy.** (3)

13 **'Natural gas is an important source of energy.' Support the statement.** (3)

14 **What are the sources of biogas? State the benefits of gobar gas plants in rural areas.** (3)

LONG ANSWER

15 **'There is a pressing need to use renewable energy resources in India.' Justify the statement.** (5)

EXAM TIPS

- Never leave a question blank: CBSE has **no negative marking**.
- Time plan: about **1 minute per MCQ**, 5 to 6 minutes for a 3-marker, 8 to 10 minutes for a 5-marker.
- After solving, mark every wrong answer in your **Mistake Book** with the correct fact.

Day 35 Answers with explanation

1 **(b)** Uranium and thorium occur in Jharkhand and the Aravalli ranges of Rajasthan.
2 **(c)** Mumbai High is offshore; Digboi is in Assam and Kalol and Ankleshwar are in Gujarat.
3 **(d)** Geothermal projects are in the Parvati valley near Manikaran and in the Puga valley, Ladakh.
4 **(b)** Gondwana coal, about 200 million years old, is mainly in the Damodar valley (Jharia, Raniganj, Bokaro); Godavari, Mahanadi, Son and Wardha valleys also have it.
5 **(d)** Peat has low carbon and high moisture. Lignite is low-grade brown coal; anthracite is the highest quality hard coal.
6 **(c)** Jaisalmer in Rajasthan has a large wind power cluster; Nagarcoil in Tamil Nadu is another.
7 **(c)** Gulf of Khambhat, Gulf of Kuchchh (Gujarat) and the Sunderbans (West Bengal) have the large tidal range needed.
8 **(b)** Petroleum occurs in sedimentary rocks of Gujarat on the west and Assam on the east.
9 **(c)** A is true, but R is false: gobar gas plants give energy and also improve the quality of manure (twin benefits).
10 **(d)** A is false, R is true. Water trapped at high tide and let out at low tide runs a turbine that generates electricity.
11 (i) Every sector of the economy, agriculture, industry, transport, commercial and domestic, needs energy inputs, and development plans need more energy to keep running. (ii) Yes. The source says India is presently one of the least energy-efficient countries, so a cautious and judicious use of energy is needed. (iii) Twin planks: promoting energy conservation and increased use of renewable energy. A citizen can use public transport, switch off appliances when not in use, or use power-saving devices.

12 (1) **Commercial** sources such as coal, petroleum, natural gas and electricity are bought and sold; **non-commercial** sources such as firewood, cattle dung cake and agricultural waste are mostly collected freely.
(2) Commercial energy is used mainly by industry, transport and commerce; non-commercial energy is used mainly for domestic needs in villages.
(3) Use of commercial energy is an indicator of economic development; heavy dependence on non-commercial energy shows low living standards.

13 (1) It is an important clean energy source and gives low carbon dioxide emissions, so it is called the fuel for the present century.
(2) It is used as an industrial raw material in the petrochemical industry and for making fertilisers.
(3) It can be transported easily through pipelines such as the Hazira-Vijaipur-Jagdishpur pipeline, and it is used as CNG in vehicles and to generate power.

14 **Sources:** shrubs, farm waste, animal and human waste.
Benefits: (1) Decomposition of organic matter gives a gas with higher thermal efficiency than kerosene, dung cake and charcoal. (2) Gobar gas plants give twin benefits to farmers: energy and better quality manure. (3) They save firewood and dung cake from being burnt, reducing loss of trees and manure.

15 (1) India has become increasingly dependent on fossil fuels like coal, oil and gas, which are non-renewable and will run out.
(2) Rising prices of oil and gas and possible shortages threaten the security of future energy supply, which can hurt the growth of the national economy.
(3) Burning fossil fuels causes serious environmental problems such as air pollution.
(4) Renewable sources like solar, wind, tidal, biomass and energy from waste are abundant, clean and replenishable.
(5) India has good potential: plenty of sunlight (Madhapur solar plant near Bhuj), wind (Nagarcoil to Madurai, Jaisalmer), tides (Gulf of Khambhat, Kuchchh) and geothermal sites (Manikaran, Puga valley).

Day 35 Extra Practice

20 more questions from this chapter | new, no repeats

MCQ

1 Koderma in Jharkhand is the leading producer of which mineral? (1)
(a) Mica **(b)** Iron ore
(c) Copper **(d)** Bauxite

2 Which one of these is a ferrous mineral? (1)
(a) Bauxite **(b)** Coal
(c) Manganese **(d)** Copper

3 Which of the following is a non-metallic mineral? (1)
(a) Platinum **(b)** Mica
(c) Gold **(d)** Silver

4 Which pair gives the names of copper mines in India? (1)
(a) Balaghat and Khetri **(b)** Tarapur and Kakrapara
(c) Jharia and Raniganj **(d)** Ratnagiri and Bailadila

5 Which state was the largest producer of bauxite in India in 2016-17? (1)
(a) Goa **(b)** Bihar **(c)** Sikkim **(d)** Odisha

6 Limestone is the basic raw material of which industry? (1)
(a) Sugar industry **(b)** Textile industry
(c) Cement industry **(d)** Paper industry

7 Why is mica widely used in the electric and electronic industries? (1)
(a) It is a good conductor of electricity.
(b) It insulates well and resists high voltage.
(c) It is highly malleable.
(d) It is sonorous.

8 Which of these minerals is formed by evaporation, especially in arid regions? (1)
(a) Sodium salt **(b)** Gypsum
(c) Potash salt **(d)** All of the above

9 Which of these are obtained largely from ocean waters? (I) Common salt (II) Bauxite (III) Magnesium (IV) Bromine (1)
(a) Only (IV) **(b)** Only (II)
(c) (I) and (II) **(d)** (I), (III) and (IV)

10 Which of these groups are non-ferrous minerals? (I) Copper and bauxite (II) Lead, zinc and gold (III) Manganese and iron (IV) Nickel and cobalt (1)
(a) (III) and (IV) **(b)** Only (I)
(c) (I) and (II) **(d)** Only (II)

11 Identify the mineral from these clues: (I) It is made up of a series of plates or leaves. (II) It splits easily into thin sheets. (III) It can be clear, black, green, red, yellow or brown. (1)
(a) Copper **(b)** Mica
(c) Tin **(d)** Manganese

12 **Which pair is correctly matched?** (1)

(a) Non-metallic minerals: Limestone
(b) Energy minerals: Cobalt
(c) Ferrous minerals: Natural gas
(d) Non-ferrous minerals: Nickel

ASSERTION-REASON

13 **Assertion (A):** Minerals are an indispensable part of our lives.
Reason (R): Almost everything we use in daily life, from a pin to a building or a ship, is made from minerals. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

14 **Assertion (A):** Thermal power stations are located on or near coalfields.
Reason (R): Coal is a bulky material that loses weight on use, as it is reduced to ash. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

15 **Read the source and answer the questions that follow.** (4)

India is a tropical country with great possibilities for tapping solar energy. Photovoltaic technology converts sunlight directly into electricity, and it is fast becoming popular in rural and remote areas. Some big solar power plants are being set up in different parts of the country. These will reduce the dependence of rural households on firewood and dung cakes, which will help conserve the environment and leave more manure for farming. India also has great potential for wind power. The largest wind farm cluster stretches from Nagarcoil to Madurai in Tamil Nadu. Andhra Pradesh, Karnataka, Gujarat, Kerala, Maharashtra and Lakshadweep also have important wind farms. Nagarcoil and Jaisalmer are well known for making effective use of wind energy.

(i) What is photovoltaic technology? (1)
(ii) Where is the largest wind farm cluster of India located? (1)
(iii) State two benefits of using solar energy in rural and remote areas. (2)

SHORT ANSWER

16 **Distinguish between ferrous and non-ferrous minerals, giving examples of each.** (3)

17 **Distinguish between metallic and non-metallic minerals, with examples.** (3)

18 **Electricity is generated mainly in two ways. Name them and state how they differ.** (3)

19 **Explain how petroleum is useful both as an energy resource and as an industrial raw material.** (3)

LONG ANSWER

20 **Energy sources can be grouped as conventional and non-conventional. Distinguish between the two with examples.** (5)

Day 35 Extra Practice: Answers

1 **(a)** The Koderma-Gaya-Hazaribagh belt of Jharkhand is India's leading mica-producing area.
2 **(c)** Ferrous minerals include iron ore, manganese, nickel and cobalt. Copper and bauxite are non-ferrous, and coal is an energy mineral.
3 **(b)** Mica is a non-metallic mineral. Gold, silver and platinum are precious metals.
4 **(a)** Balaghat (Madhya Pradesh) and Khetri (Rajasthan) are copper mines. Jharia and Raniganj are coalfields, and Tarapur and Kakrapara are nuclear power plants.
5 **(d)** Odisha led bauxite production. Its Panchpatmali deposits in Koraput district are the most important in the state.
6 **(c)** Limestone is the basic raw material for cement. It is also needed for smelting iron ore in blast furnaces.

Day 35 Extra Practice: Answers continued

7 **(b)** Mica has excellent dielectric strength, low power loss, good insulating properties and resistance to high voltage.
8 **(d)** Gypsum, potash salt and sodium salt all form through evaporation, mostly in arid regions.
9 **(d)** Common salt, magnesium and bromine come largely from ocean waters. Bauxite forms on land through the decomposition of rocks.
10 **(c)** Copper, bauxite, lead, zinc and gold are non-ferrous. Manganese, iron, nickel and cobalt are ferrous.
11 **(b)** Mica is made of plates or leaves that split easily into thin sheets, and it occurs in many colours.

12 **(a)** Limestone is a non-metallic mineral. Cobalt and nickel are ferrous, and natural gas is an energy mineral.

Day 35 Extra Practice: Answers continued

13 **(a)** Minerals are used to make tools, buildings, vehicles and machines, and are even present in our food. This is why they are indispensable.

14 **(a)** Coal is bulky and much of it turns to ash. Setting up plants near coalfields saves the cost of transporting it.

15 (i) It is a technology that converts sunlight directly into electricity using solar cells. (ii) In Tamil Nadu, in the stretch from Nagarcoil to Madurai. (iii) (1) It reduces the dependence of households on firewood and dung cakes, which helps conserve forests and the environment. (2) Dung is saved for use as manure, so farms get more manure.

16 (1) Ferrous minerals contain iron or are used with it, for example iron ore, manganese, nickel and cobalt. Non-ferrous minerals do not contain iron, for example copper, bauxite, lead, zinc and gold. (2) Ferrous minerals make up about three-fourths of the value of metallic mineral production, while India's reserves and output of non-ferrous minerals are not very satisfactory. (3) Ferrous minerals are the base of metallurgical industries and are also exported. Non-ferrous minerals support metallurgical, engineering and electrical industries.

17 (1) Metallic minerals contain metal and are found mostly in igneous and metamorphic rocks. Non-metallic minerals do not contain metal and are found mostly in sedimentary rocks. (2) Metallic minerals include ferrous minerals (iron ore, manganese), non-ferrous minerals (copper, bauxite) and precious metals (gold, silver). Non-metallic minerals include mica, salt, potash, limestone and granite. (3) Metals are generally hard and can be melted to make new products. Non-metallic minerals such as limestone serve as raw material for industries like cement.

18 (1) Hydroelectricity is produced by fast-flowing water that drives turbines. Thermal electricity is produced by burning coal, petroleum or natural gas to drive turbines. (2) Hydroelectricity uses a renewable resource. Thermal power uses non-renewable fossil fuels. (3) Hydroelectricity causes little air pollution, while thermal plants pollute the air. Examples are Bhakra Nangal and Damodar Valley (hydel), and NTPC plants such as Ramagundam (thermal).

Day 35 Extra Practice: Answers continued

19 (1) After coal, petroleum is the next major energy source in India. It provides fuel for heat and lighting and for running vehicles. (2) It supplies lubricants for machinery. (3) It provides raw material for many industries. Refineries act as a nodal industry for synthetic textiles, fertilisers and numerous chemical industries.

20 (1) Conventional sources such as firewood, cattle dung cake, coal, petroleum and natural gas have been used for ages. Non-conventional sources such as solar, wind, tidal, geothermal energy and biogas depend on relatively new technology. (2) Most conventional sources, except hydel power, are exhaustible. Non-conventional sources are renewable and inexhaustible. (3) Conventional sources cause pollution, while non-conventional sources are largely pollution-free and eco-friendly. (4) Conventional sources are limited and costly. Non-conventional sources are abundant and cheaper to run. (5) Because of their limited stock, we cannot depend on conventional sources for the future. Non-conventional sources are dependable and are called the energy of the future.

DAY 35 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 36, Revision 5: Hist, Geo, Pol Sci

DAY 36

REVISION DAY 5 | HISTORY CH5 + GEO CH5 + POL SCI CH4

Revision 5: Print Culture, Minerals and Energy, Political Parties

Recall sheets and a 24-question mixed set

Aaj ka target

- ☐ Days 26, 27, 31, 32, 34, 35: Print, Minerals, Parties
- ☐ Recall sheet pehle, book baad mein
- ☐ 24 mixed sawal, ek baithak
- ☐ 2 ghante, phir apne aap ko shabashi

R1 History Ch5 Print Culture: recall sheet

868	Diamond Sutra, oldest Japanese printed book
1430s	Gutenberg develops the printing press
1517	Luther's 95 Theses
1558	Index of Prohibited Books
1780	Hicky's Bengal Gazette
1821	Sambad Kaumudi (Rammohun Roy)
1871	Gulamgiri (Phule)
1878	Vernacular Press Act

PRINT IN EUROPE

- Gutenberg, Strasbourg: olive press as model, first book the Bible (180 copies)
- Printing press made books cheaper; reading public grew
- Luther: "Printing is the ultimate gift of God"
- Church feared heresy: Menocchio, Index of 1558

PRINT IN INDIA

- Portuguese missionaries in Goa, mid-16th century
- Debates on sati, idolatry; Rammohun Roy, Deoband fatwas
- Women writers: Rashsundari Debi (Amar Jiban), Tarabai Shinde, Pandita Ramabai
- Censorship: Vernacular Press Act 1878; Tilak deported 1908

R2 Geography Ch5 Minerals and Energy: recall sheet

MINERALS

- Occur in veins and lodes, beds and layers, placer deposits, ocean waters
- Ferrous: iron ore (haematite, magnetite), manganese
- Non-ferrous: copper (Balaghat, Khetri), bauxite (Amarkantak, Koraput)
- Mica: Koderma-Gaya-Hazaribagh; Rat-hole mining in Meghalaya

ENERGY

- Conventional: coal (Gondwana, Damodar valley), petroleum (Mumbai High), natural gas, electricity
- Coal grades: peat, lignite (Neyveli), bituminous, anthracite (highest)
- Non-conventional: nuclear, solar, wind, biogas, tidal, geothermal
- Conservation: public transport, switch off, power-saving devices

R3 Political Science Ch4 Political Parties: recall sheet

BASICS

- Party = group seeking power by contesting elections
- Three parts: leaders, active members, followers
- Functions: contest elections, policies, make laws, form government, opposition, shape opinion, welfare access
- One-party (China), two-party (USA, UK), multi-party (India)

CHALLENGES AND REFORMS

- Lack of internal democracy
- Dynastic succession
- Money and muscle power
- No meaningful choice
- Reforms: anti-defection law, affidavits of assets and criminal cases, organisational elections and tax returns to EC

SHIVAM BHAIYA SAYS

Aaj teen alag chapter hain, isliye **mix mat karo**: pehle History ki dates, phir Geo ke mineral-place pairs (Balaghat copper, Koderma mica, Neyveli lignite), phir Parties ke 4 challenges. Har card padhke 1 minute aankh band karke bolo. Jo nahi aaya, wahi aaj ka homework.

Day 36 Practice

24 questions | solve first, then check

MCQ

1 Which country has a one-party system? (1)

(a) USA (b) UK (c) India (d) China

2 The book Istri Dharam Vichar mainly taught: (1)

(a) the rules of the vernacular press
(b) the link between caste and class
(c) the life of widows in Bengal
(d) how to be an ideal wife and homemaker

3 Why did many people fear the spread of printed books? (1)

(a) Books cost too much
(b) Uncontrolled print could spread rebellious and irreligious ideas
(c) Books could not be read by men
(d) Printing used up paper

4 The highest quality hard coal is: (1)

(a) anthracite (b) lignite
(c) bituminous (d) peat

5 Who started the Bengali weekly Sambad Kaumudi in 1821? (1)

(a) Tarabai Shinde (b) Rashsundari Debi
(c) Ram Chaddha (d) Raja Rammohun Roy

6 **Which is a recent reform to curb defection? (1)**
(a) RTI Act (b) Vernacular Press Act
(c) Anti-defection law (d) Panchayati Raj

7 **Mumbai High is famous for: (1)**
(a) iron ore (b) mica
(c) petroleum (d) copper

8 **The economic viability of a mineral reserve depends on: (1)**
(a) only government permission
(b) concentration in the ore, ease of extraction and nearness to market
(c) only the ease of extraction
(d) only nearness to market

9 **Which law of 1878 allowed the British to censor Indian-language newspapers? (1)**
(a) Rowlatt Act (b) Ilbert Bill
(c) Vernacular Press Act (d) Charter Act

10 **Recognition of a party as a national or state party is given by the: (1)**
(a) Election Commission (b) Parliament
(c) President (d) Supreme Court

11 **A party that wins 6% of votes in Lok Sabha or Assembly elections in four states and 4 Lok Sabha seats is a: (1)**
(a) national party (b) regional front
(c) state party (d) pressure group

12 **Kitagawa Utamaro is remembered as a: (1)**
(a) German printer
(b) Chinese painter of landscapes
(c) Japanese artist of ukiyo prints
(d) Bengali novelist

13 **A geologist mainly studies: (1)**
(a) ocean currents
(b) formation, age and composition of minerals
(c) air pressure
(d) farm output

14 **Neyveli in Tamil Nadu is known for: (1)**
(a) mica (b) anthracite
(c) bauxite (d) lignite

CASE-BASED

15 **Read the source and answer the questions that follow. (4)**

Rat-hole mining: in the north-east, minerals are owned by individuals and communities. In Jowai and Cherrapunjee in Meghalaya, coal is mined by family members digging long narrow tunnels.

(i) Name this kind of mining. (1)
(ii) Who owns the minerals in the north-east? (1)
(iii) Give two dangers of such mining. (2)

OPTIONS FOR EVERY ASSERTION-REASON QUESTION BELOW

(a) Both A and R are true, and R is the correct explanation of A. **(b)** Both A and R are true, but R is not the correct explanation of A. **(c)** A is true, but R is false. **(d)** A is false, but R is true.

ASSERTION-REASON

16 **Assertion (A):** Tidal energy is generated in the Gulf of Kuchchh.
Reason (R): The Gulf of Kuchchh has ideal conditions for using tidal energy. (1)

17 **Assertion (A):** India exports a large amount of ferrous minerals.
Reason (R): Ferrous minerals are about three-fourths of the value of metallic mineral production. (1)

18 **Assertion (A):** Martin Luther welcomed printing as a gift of God.
Reason (R): Print helped spread his 95 Theses and new ideas quickly. (1)

19 **Assertion (A):** Political parties are a necessary condition for democracy.
Reason (R): Without parties, every candidate would be independent and no one could make promises about major policy. (1)

20 **Assertion (A):** Dynastic succession is a challenge for parties.
Reason (R): Most parties hold open and regular organisational elections. (1)

SHORT ANSWER

21 **How did print help the spread of new ideas during the French Revolution? Give three points. (3)**

22 **Why should we conserve mineral resources? Give three reasons. (3)**

23 **Explain any three functions of political parties. (3)**

24 **Describe any five suggestions to reform political parties. (5)**

Day 36 Answers with explanation

1 **(d)** Only the Communist Party is allowed to rule in China.

2 **(d)** Ram Chaddha's book gave women instructions on ideal conduct.

3 **(b)** Religious and political authorities feared heresy and dissent.

4 **(a)** Anthracite has the highest carbon content.

5 **(d)** Rammohun Roy used it to argue for social reform, including against sati.

6 **(c)** A legislator who changes party loses the seat.

7 **(c)** About 63% of India's petroleum came from Mumbai High (NCERT).

8 **(b)** All three together decide whether mining pays.

9 **(c)** Modelled on the Irish Press Laws, it gave wide powers to seize presses.

10 **(a)** The Election Commission recognises parties using vote and seat criteria.

11 **(a)** These are the Election Commission's criteria for a national party.

12 **(c)** Born in Edo in 1753, he made ukiyo (pictures of the floating world) prints.

13 **(b)** Geologists study minerals and rocks.

14 **(d)** Neyveli has India's major lignite reserves, used for power.

15 (i) Rat-hole mining. (ii) Individuals and communities. (iii) Unsafe tunnels can collapse; poor ventilation and health risks for miners; damage to land and water.

16 **(a)** Both true; R explains A.

17 **(a)** Both true; the big output leaves a surplus after home use.

18 **(a)** Both true; R explains A.

19 **(a)** Both true; R explains A.

20 **(c)** A is true; R is false: many parties do not hold open elections.

21 Popularised Enlightenment thinkers (Voltaire, Rousseau); created a culture of debate and dialogue; mocked the royalty and questioned its morality.

22 Minerals are finite and non-renewable; they take millions of years to form; our rate of use is far faster than replenishment; mining causes pollution.

23 Contest elections; put forward policies and programmes; make laws; form and run governments; play opposition; shape public opinion; give people access to government welfare.

24 Law to regulate internal affairs; reserve one-third tickets for women; state funding of elections; affidavits on assets and criminal cases (done); pressure by people, media and movements.

DAY 36 COMPLETE? ☐ Recall from memory ☐ 24 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 37, Political Science: Outcomes of Democracy

DAY 37

POLITICAL SCIENCE | CHAPTER 5 | FULL CHAPTER IN ONE DAY

Outcomes of Democracy

Democratic Politics II, Chapter 5

Aaj ka target (pages 159-163)

- ☐ Outcomes of Democracy poora ek din mein
- ☐ Accountable government ke points apne words mein
- ☐ 15 sawal, dignity wale bhi
- ☐ 110 min, Pol Sci syllabus done

5.1 How Do We Assess Democracy?

Fig. 37.1 *Sansad Bhavan, New Delhi, home of the Parliament of India for over 90 years. (Photo: Wikimedia Commons, public domain)*

- Democracy is better because it promotes **equality among citizens**, enhances the **dignity of the individual**, improves the **quality of decision-making**, provides a method to **resolve conflicts**, and allows room to **correct mistakes**.
- Do not expect democracy to solve every problem: it only creates **conditions** for achieving goals. Democracies differ a lot in their social, economic and cultural achievements.

5.2 Accountable, Responsive and Legitimate Government

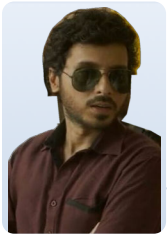

- **Accountable:** citizens have the right and the means to examine the process of decision-making. This is called **transparency**. Democratic decisions follow norms and procedures, so they may take more time, but they are more **acceptable to the people and more effective**.
- **Regular, free and fair elections**, open public debate on major policies and legislation, and citizens' **right to information** about the government and its functioning.
- **Responsive** to the needs and expectations of people: democracies often frustrate people here and do not always attend to them, but they do better than dictatorships.
- **Legitimate:** a democratic government is **people's own government**. It may be slow, less efficient, not always responsive or clean, but there is overwhelming support for democracy all over the world.

5.3 Economic Growth and Development

If we consider all democracies and all dictatorships for the fifty years between 1950 and 2000, **dictatorships have a slightly higher rate of economic growth**. But economic development depends on several factors: the country's population size, global situation, cooperation from other countries, economic priorities. The difference in growth rates is **negligible**, and democracy has many other positive outcomes, so it should be preferred.

MEME SAMJHO

Astra meme, fact inside

A GOVERNMENT ELECTED BY THE PEOPLE

"Na talwar se, na takhtapalat se... vote se aaye hain. Legitimacy ka jalwa hai hamara!"

Asli baat: Democracy's ability to generate its own support is itself an outcome. A democratic government is **legitimate** because it is chosen by the people through free and fair elections.

5.4 Inequality and Poverty

Democracies are based on **political equality**: every citizen has an equal say in electing representatives. But **economic inequalities** have grown: a small number of ultra-rich enjoy a highly disproportionate share of wealth and incomes, while those at the bottom have very little to depend on. In actual life, democracies do not appear to be very successful in reducing economic inequalities. In **Bangladesh**, more than half the population lives in poverty.

SHIVAM BHAIYA SOCH RAHE HAIN

Democracy ka "report card" ek line mein: **political equality mein A+**, economic growth mein dictatorship se thoda peeche, economic inequality kam karne mein abhi kaafi kaam baaki. Isliye answer mein dono side likho, balance dikhta hai.

5.5 Social Diversity, Dignity and Freedom

- **Accommodation of social diversity:** democracies develop a procedure to conduct competition and handle social differences peacefully; non-democratic regimes often turn a blind eye or suppress internal social differences. Two conditions: **majority must work with the minority**, and rule by majority must not become **rule by a majority community** in terms of religion, race or language.
- **Dignity of women:** long struggles have created some sensitivity that respect and equal treatment of women are necessary ingredients of a democratic society. Once the principle is recognised, it becomes easier for women to **wage a struggle** against what is now legally and morally unacceptable.
- **Caste:** democracy in India has strengthened the claims of the **disadvantaged and discriminated castes** for equal status and opportunity. Caste-based inequalities and atrocities still occur, but they lack moral and legal foundations.
- **Expectations:** as people get some benefits, they ask for more and complain about democracy. That complaint itself is a **testimony to democracy's success**: people have moved from being subjects to being **citizens**.

EXAM ALERT!

Educart ka pakka trap: "Democracy economic inequality khatam kar deti hai" ya "Dictatorship se conflicts hamesha ke liye solve hote hain" wale options **hamesha galat**. Democracy ka sabse strong point: **dignity and freedom of the individual**.

REMEMBER IN ONE LINE

Democracy is accountable, responsive and legitimate (transparency, elections, right to information); dictatorships grew slightly faster from 1950 to 2000 but the gap is negligible; democracy gives political equality but has not reduced economic inequality; it accommodates diversity and enhances the dignity of women and disadvantaged castes.

Day 37 Practice: Chapter Test

15 board-pattern questions | solve first, then check

MCQ

1 **Choose the correct statement.** (1)

(a) Decisions of non-democratic governments are more acceptable to the people
(b) A dictatorship can fully and permanently resolve conflicts among groups
(c) Democracies differ a lot from each other in social, economic and cultural achievements
(d) Monarchies are democratic governments

2 **Which feature of democracy is most clearly shown when every citizen has an equal vote?** (1)

(a) Economic equality **(b)** Political equality
(c) Social diversity **(d)** Transparency

3 **The right of citizens to examine the process of decision-making is called:** (1)

(a) Legitimacy **(b)** Responsiveness
(c) Transparency **(d)** Accountability of judges

4 **Democracy is best because it:** (1)

(a) enhances the dignity of individuals
(b) promotes private ownership only
(c) always gives faster growth
(d) increases individualism

5 **In which country does more than half the population live in poverty, as per the chapter?** (1)

(a) India **(b)** Bangladesh
(c) Pakistan **(d)** Nepal

6 **Match democracy's features: (A) accountable, (B) responsive, (C) legitimate, (D) ensures. Which pairing is correct?**
(i) to the needs and expectations of citizens (ii) people's own government (iii) to its citizens (iv) political equality (1)

(a) (A)-(iii), (B)-(i), (C)-(ii), (D)-(iv)
(b) (A)-(i), (B)-(iii), (C)-(iv), (D)-(ii)
(c) (A)-(ii), (B)-(iv), (C)-(i), (D)-(iii)
(d) (A)-(iv), (B)-(ii), (C)-(iii), (D)-(i)

7 **Between 1950 and 2000, which had a slightly higher rate of economic growth?** (1)

(a) Democracies **(b)** Dictatorships
(c) Both were exactly equal **(d)** Monarchies only

8 **Which countries do not have a democratic government?** (1)

(a) India **(b)** Nepal
(c) China **(d)** Sri Lanka

ASSERTION-REASON

9 **Assertion (A):** Democracies are based on political equality.
Reason (R): All individuals have an equal say in electing representatives. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

10 **Assertion (A):** Democratically elected governments do not appear as keen to address poverty as expected.
Reason (R): They believe that if the poor remain poor, they will vote for them more. (1)

(a) Both A and R are true; R explains A.
(b) Both are true; R does not explain A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

11 Read and answer: *"Once the principle of equality is recognised, it becomes easier for women to wage a struggle against what is now unacceptable legally and morally. The same is true of caste inequalities. Democracy in India has strengthened the claims of the disadvantaged castes for equal status."*
(i) Which outcome of democracy is highlighted? (1)
(ii) Why do caste atrocities today lack legal foundations? (1)
(iii) How does democracy accommodate social diversity? Give two conditions. (2) (4)

SHORT ANSWER

12 "Democracy is a better form of government than dictatorship." Give three reasons. (3)

13 How is a democratic government accountable to citizens? (2)

14 "The complaints about democracy are a testimony to its success." Explain. (3)

LONG ANSWER

15 **Evaluate the outcomes of democracy in terms of economic growth and reduction of inequality and poverty.** (5)

Day 37 Answers with explanation

1 **(c)** Democracies differ a lot from each other; the other options are false.

2 **(b)** Political equality: one person, one vote.

3 **(c)** Transparency.

4 **(a)** It enhances the dignity of individuals.

5 **(b)** Bangladesh.

6 **(a)** Accountable to citizens; responsive to their needs; legitimate as people's own government; ensures political equality.

7 **(b)** Dictatorships, but the difference is negligible.

8 **(c)** China.

9 **(a)** An equal vote for everyone is what political equality means; R explains A.

10 **(c)** A is true, as the chapter observes. R is false: it is not a valid reason, and no such claim is made in the chapter.

11 (i) Dignity and freedom of citizens. (ii) Because democracy recognises equality, so discrimination is illegal and morally unacceptable. (iii) Majority works with the minority; majority rule does not become rule by a majority community of religion, race or language.

12 Promotes equality; enhances dignity; better decisions; resolves conflicts; room to correct mistakes; legitimate government (any three).

13 Citizens can examine decision-making (transparency), vote in regular free and fair elections, and use the right to information; open debate on policies.

14 As people get benefits they expect more and complain. This shows they are aware and critical, have moved from subjects to citizens, and believe they can hold rulers to account.

15 Growth: dictatorships slightly higher 1950 to 2000, but growth depends on many factors and the gap is negligible. Inequality: political equality exists, but economic inequality has grown; ultra-rich hold a large share; poor have little; e.g. Bangladesh. Democracy still preferred for its other outcomes.

FLASH REVISION: KEY TERMS

Transparency: right of citizens to examine decision-making

Accountable: answerable to citizens

Legitimate: people's own government

Political equality: equal vote for every citizen

Economic inequality: gap between ultra-rich and poor

Dignity: respect and equal treatment of every person

WRITE IT RIGHT: "DEMOCRACY IS BETTER THAN DICTATORSHIP"

1. Equality among citizens and dignity of the individual.
2. Better quality of decisions through discussion; more acceptable decisions.
3. A method to resolve conflicts peacefully.
4. Room to correct mistakes through elections and debate.
5. Legitimacy: people's own government. Conclude: the growth gap with dictatorships is negligible.

SHIVAM BHAIYA KA NOTE

Political Science complete! Paanchon chapters ho gaye. Aaj raat har chapter ka ek "Remember in one line" box zor se padho, aur Day 46 ke revision ke liye apni Mistake Book tayyar rakho.

TONIGHT'S 2-MINUTE RECALL

1. Democratic decisions take **more time** but are more acceptable and effective
2. Democracy only **creates conditions** for achieving goals
3. 1950 to 2000: dictatorships grew **slightly faster**; the gap is negligible
4. Political equality yes; **economic inequality** has grown
5. Bangladesh: **more than half** the people live in poverty
6. Majority rule must not become rule by a **majority community**
7. Complaints about democracy are a **testimony to its success**
8. People move from being **subjects to citizens**

Day 37 Extra Practice

1 more questions from this chapter | new, no repeats

SHORT ANSWER

1 "Democracy is seen to be good in principle, but is felt to be not so good in practice." Justify this statement. (3)

Day 37 Extra Practice: Answers

1 Model answer: (1) In principle, democracy gives a written constitution, regular elections, political parties and rights for citizens, so people widely support it. (2) In practice, democracies differ a lot in their social, economic and cultural achievements. Many still face poverty, inequality, discrimination and slow decision-making. (3) Whenever these expectations are not met, people blame the idea of democracy itself. (4) But democracy is only a form of government. It can create conditions for achieving goals, and citizens must use those conditions to achieve them.

DAY 37 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 38, Geography: Manufacturing Industries I

DAY 38

GEOGRAPHY | CHAPTER 6 | PART 1 OF 2

Manufacturing: Importance and Agro-based Industries

Manufacturing Industries

Aaj ka target (pages 163-166)

- ☐ *Manufacturing shuru: textile, jute, sugar*
- ☐ *Industry kahan lagti hai, uske factors yaad*
- ☐ *10 sawal, agro-based wale pakke*
- ☐ *100 min, dhyaan se*

Production of goods in large quantities after processing raw materials into **more valuable products** is called **manufacturing**. Paper from wood, sugar from sugarcane, iron and steel from iron ore, aluminium from bauxite: all are manufacturing. People in the **secondary sector** work here.

38.1 Why Manufacturing Matters

IMPORTANCE

Helps **modernise agriculture**; reduces heavy dependence on agriculture by giving jobs in secondary and tertiary sectors; helps remove **unemployment and poverty**; exports expand trade and bring **foreign exchange**; turns raw materials into finished goods of **higher value**.

AGRICULTURE AND INDUSTRY GO HAND IN HAND

Agro-industries raise farm productivity, and industries depend on agriculture for raw materials. In turn, industries sell farmers irrigation pumps, fertilisers, insecticides, pesticides, PVC pipes, machines and tools.

CONTRIBUTION TO THE NATIONAL ECONOMY

The share of manufacturing in GDP has stagnated at about **17%** over the decades (out of about 27% for industry, which includes 10% for mining, quarrying, electricity and gas). The government set up the **National Manufacturing Competitiveness Council (NMCC)** to improve it.

38.2 Classification of Industries

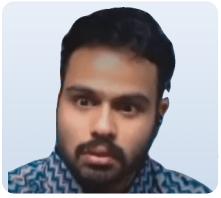

Basis	Types with examples
Source of raw material	**Agro-based**: cotton, woollen, jute, silk textile, rubber, sugar, tea, coffee, edible oil. **Mineral-based**: iron and steel, cement, aluminium, machine tools, petrochemicals

Main role	**Basic or key** industries supply raw materials to others (iron and steel, copper smelting, aluminium smelting). **Consumer** industries make goods for direct use (sugar, toothpaste, paper, sewing machines, fans)
Ownership	**Public sector**: BHEL, SAIL. **Private**: TISCO, Bajaj Auto, Dabur. **Joint**: Oil India Ltd. (OIL). **Cooperative**: sugar in Maharashtra, coir in Kerala
Bulk and weight	**Heavy**: iron and steel. **Light**: electrical goods. Also small-scale vs large-scale by capital investment

INDUSTRIAL LOCATION

Industries locate where they can keep costs low: availability of **raw material, labour, capital, power and market**. Many industries cluster near an urban centre to use its services (banking, insurance, transport, labour, consultants): these are **agglomeration economies**.

MEME SAMJHO Astra meme, fact inside

EARLY COTTON MILLS

"Saari cotton mills Maharashtra aur Gujarat mein hi? Hain? Ye kaise ho gaya?"

Asli baat: Early mills clustered in the cotton-growing belt for **raw cotton, market, transport with port facilities, labour and a moist climate**.

38.3 Agro-based Industries

- **Textile** is the only industry in India that is **self-reliant and complete in the value chain**: from raw material to the highest value-added products.
- **Cotton textiles**: the first successful mill came up in **Mumbai in 1854**. Spinning is concentrated in Maharashtra, Gujarat and Tamil Nadu; **weaving is highly decentralised** (handloom, powerloom, mills). India spins world-class yarn, but weaving supplies lower-quality fabric that cannot use all the yarn.
- **Khadi** gives large-scale employment to weavers at home as a cottage industry.

Fig. 38.1 *Raw jute inside a mill in Kolkata. (Wikimedia Commons, CC BY 4.0)*

JUTE TEXTILES

India is the **largest producer** of raw jute and jute goods and second largest exporter after Bangladesh. First mill near Kolkata at **Rishra (1855)**. Mills lie along the **Hugli**: close to jute areas, cheap water transport, rail and road links, plenty of water, cheap labour from nearby states, and Kolkata's banking, insurance and port. National Jute Policy 2005 aims to raise productivity and quality.

SUGAR

India is the **second largest** producer of sugar and first in gur and khandsari. Cane is bulky and loses sucrose in haulage, so mills are near farms. Mills are shifting to the **south and west** (Maharashtra): cane has more sucrose, cooler climate gives a longer crushing season, cooperatives work better. Challenges: seasonal work, old methods, transport delays, using bagasse well.

SHIVAM BHAIYA SAYS

Jute industry ke **Hugli belt** wale 5 factors ek baar likh ke dekho. Ye **3-mark sure-shot** hai. Aur yaad rakho: Partition ke baad mills India mein rahin, par **three-fourth jute area** Bangladesh chala gaya.

Day 38 Practice

10 board-pattern questions | solve first, then check

MCQ

1. **Which of the following describes a basic or key industry?** (1)

(a) An industry that makes goods for direct use by consumers
(b) An industry that supplies its products as raw material to make other goods
(c) An industry defined by its maximum investment
(d) An industry that uses light raw materials to make light goods

2 **Pooja, a social worker, sees new industries being set up in a tribal and backward area of eastern India. What is the main aim of setting up industries in such areas?** (1)
(a) Developing new cities
(b) Eradicating unemployment and poverty
(c) Bringing down regional disparities
(d) Quality production

3 **Fill in the blank about India's jute industry: India is the _____ of raw jute and jute goods, and the second largest exporter after Bangladesh.** (1)
(a) second largest consumer
(b) largest producer
(c) largest importer
(d) smallest producer

4 **The Karnataka Milk Federation (KMF) collects milk from its farmer-members, processes it and sells it as 'Nandini'. On the basis of ownership, KMF is a:** (1)
(a) Public sector industry
(b) Joint sector industry
(c) Private sector industry
(d) Cooperative sector industry

5 **Which one of these is a private sector industry?** (1)
(a) BHEL
(b) SAIL
(c) TISCO
(d) Oil India Ltd.

6 **In which city was the first successful cotton textile mill set up in 1854?** (1)
(a) Kolkata
(b) Mumbai
(c) Delhi
(d) Bengaluru

EXAM TIPS

- Read every option before choosing: two options are often almost right, only one is **fully right**.
- For 'give reasons' questions, start each point with **because** or **due to**; it keeps the answer on target.
- Write state names with places: 'Bailadila, **Chhattisgarh**' scores better than 'Bailadila' alone.
- If two options look correct, pick the one that matches the **NCERT wording** most closely.
- Keep answers in **points**, not long paragraphs; each point on a new line.

ASSERTION-REASON

7 **Assertion (A): Industrialisation and urbanisation go hand in hand.**
Reason (R): Cities provide markets and services such as banking, insurance, transport, labour, consultants and financial advice to industry. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

8 **Read the source and answer the questions that follow.** (4)

Once an industrial activity starts, urbanisation follows. Sometimes industries are located in or near cities, so industrialisation and urbanisation go together. Cities provide markets and services like banking, insurance, transport, labour, consultants and financial advice to industry. Many industries tend to come together to use the advantages offered by urban centres, called agglomeration economies. Gradually a large industrial agglomeration takes place. Industrial location is complex: it depends on raw material, labour, capital, power and market, and an industry is usually set up where these are available at low cost.

(i) Which word from the source means 'a cluster or collection of things'? (1)
(a) Urbanisation
(b) Economies
(c) Industrialisation
(d) Agglomeration

(ii) Why do many industries come together in urban centres? (1)

(iii) Name any two factors that decide the location of an industry. (2 marks) (2)

SHORT ANSWER

9 **Why is the economic strength of a country measured by the development of manufacturing industries?** (3)

LONG ANSWER

10 **'The textile industry occupies a unique position in the Indian economy.' Justify the statement.** (5)

Day 38 Answers with explanation

1 **(b)** Basic industries like iron and steel supply their products to other industries.

2 **(c)** Industries in tribal and backward areas aim at reducing regional disparities, though they also create jobs.

3 **(b)** India is the largest producer of raw jute and jute goods and second largest exporter after Bangladesh.

4 **(d)** It is owned and run by the producers (dairy farmers) themselves, like sugar mills in Maharashtra.

5 **(c)** TISCO is privately owned; BHEL and SAIL are public sector; Oil India Ltd. is joint sector.

6 **(b)** The first successful textile mill was established in Mumbai in 1854.

7 **(a)** Urbanisation follows industry, and cities offer markets and services, so industries come up in or near cities; R explains A.

Day 38 Answers continued

8 (i) **(d)** A cluster of industries is an industrial agglomeration. (ii) To use the advantages (agglomeration economies) offered by cities: markets, banking, insurance, transport, labour, consultants and financial advice. (iii) Any two: availability of raw material, labour, capital, power, market; the least-cost location is preferred.

9 (1) Manufacturing helps modernise agriculture (supplying pumps, fertilisers, machines) and reduces heavy dependence on farm income by giving jobs in secondary and tertiary sectors.
(2) Industrial development helps remove unemployment and poverty, and industries in tribal and backward areas reduce regional disparities.
(3) Export of manufactured goods expands trade and earns foreign exchange.
(4) Countries that turn raw materials into a wide variety of higher-value finished goods are prosperous.

10 (1) It contributes significantly to industrial production and foreign exchange earnings and gives a large share of employment, second only to agriculture.
(2) It is the only industry in the country that is self-reliant and complete in the value chain, from raw material to the highest value-added products.
(3) It supports agriculture: cotton growers, and the industry also supports weavers and many related trades.
(4) Handspun khadi gives large-scale employment to weavers in their homes as a cottage industry.
(5) India exports yarn and cotton goods to many countries; it has a large share of the world trade in cotton yarn.
Note: spinning is centralised in Maharashtra, Gujarat and Tamil Nadu, while weaving is decentralised.

DAY 38 COMPLETE? ☐ Notes read ☐ 10 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 39, Geography: Manufacturing Industries II

TONIGHT'S 2-MINUTE RECALL — Answer from memory, then check the notes

1. Four reasons manufacturing is important.
2. Classify industries on the basis of ownership, with examples.
3. Why did early cotton mills grow in Maharashtra and Gujarat?
4. Five factors behind the jute mills on the Hugli.
5. Why are sugar mills shifting to the south and west?

My mistakes from today's practice:

DAY 39

GEOGRAPHY | CHAPTER 6 | PART 2 OF 2 + TEST

Mineral-based Industries and Pollution

Manufacturing Industries

Aaj ka target (pages 166-174)

- ☐ Steel, IT aur pollution, chapter khatam
- ☐ Industrial centres map pe khud mark karo
- ☐ IS sawal + test
- ☐ 2 ghante, Geography khatam

39.1 Iron and Steel: the Basic Industry

- A **basic** industry (all other industries depend on it for machinery) and a **heavy** industry (raw materials and products are heavy and bulky).
- Iron ore, coking coal and limestone are needed in the ratio of about **4 : 2 : 1**, plus some manganese.
- The **Chota Nagpur plateau** has the maximum concentration: low-cost iron ore, high-grade raw materials close by, cheap labour and a vast home market.
- India is a leading producer of crude steel and the **largest producer of sponge iron**, but per capita steel consumption is low.

- **Problems**: high cost and limited availability of coking coal, lower labour productivity, irregular energy supply, poor infrastructure. Liberalisation and FDI have given a boost.

Fig. 39.1 *The steel plant at Jamshedpur, Jharkhand. (Wikimedia Commons, CC BY 4.0)*

ALUMINIUM SMELTING

Second most important metallurgical industry. Aluminium is light, corrosion-resistant, a good heat conductor, malleable and strong in alloys: used in aircraft, utensils, wires. Raw material: **bauxite**. Key needs: **regular electricity** and raw material at minimum cost. Plants: Odisha, West Bengal, Kerala, Uttar Pradesh, Chhattisgarh, Maharashtra, Tamil Nadu.

CHEMICAL

Inorganic: sulphuric acid (fertilisers, synthetic fibres, plastics, paints, dyes), nitric acid, soda ash, caustic soda: widely spread. **Organic**: petrochemicals for synthetic fibres, rubber, plastics, dyes, drugs: near oil refineries. The chemical industry is its **own largest consumer**.

FERTILISER

Nitrogenous (mainly **urea**), phosphatic, ammonium phosphate (DAP) and complex fertilisers. India has **no reserves of commercially usable potash**, so all potash is imported. Gujarat, Tamil Nadu, Uttar Pradesh, Punjab and Kerala make half the fertiliser.

YAAD RAKHO: QUICK FACTS

- Iron and steel is a **basic industry**: all other heavy, medium and light industries depend on it for machinery.
- Most iron and steel plants are in the **Chhotanagpur plateau** region, which has low-cost iron ore, high-grade raw materials, cheap labour and a large market.
- **Aluminium smelting** is the second most important metallurgical industry; it needs bauxite and regular, cheap power.

CEMENT

Needs bulky raw materials: **limestone, silica and gypsum**, plus coal, power and rail. Gujarat plants can reach markets in the **Gulf countries**. First plant: **Chennai, 1904**. Decontrol of price and distribution in **1989** helped it grow.

AUTOMOBILE

After liberalisation, new models and FDI arrived. Centres: around Delhi, Gurugram, Mumbai, Pune, Chennai, Kolkata, Lucknow, Indore, Hyderabad, Jamshedpur, Bengaluru.

IT AND ELECTRONICS

From transistor sets to TVs, phones, radars and computers. **Bengaluru** is the **electronic capital** of India. A big source of jobs and of foreign exchange through business process outsourcing (BPO).

Fig. 39.2 *Cotton textile centres (blue dot) and iron and steel plants (brown square).*

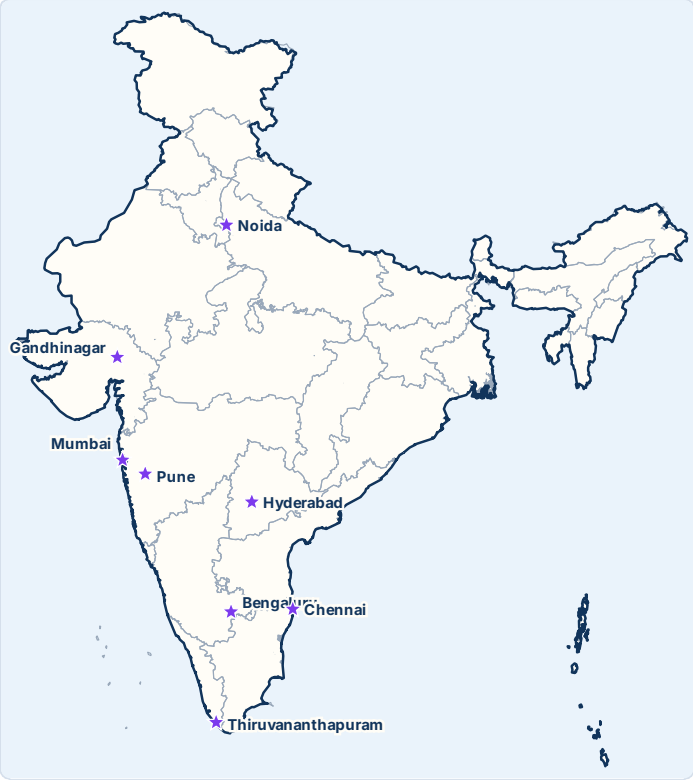

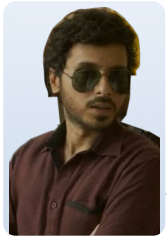

Fig. 39.3 *Software technology parks (purple star). Both drawn by Astra.*

39.2 Industrial Pollution

Type	Main sources and effects
Air	Sulphur dioxide, carbon monoxide, smoke from chemical and paper factories, brick kilns, refineries, smelting plants, burning fossil fuels; toxic gas leaks can be very hazardous
Water	Organic and inorganic effluents from paper, pulp, chemical, textile and dyeing industries, refineries, tanneries, electroplating: dyes, detergents, acids, salts, heavy metals like **lead and mercury**
Thermal	**Hot water** from factories and thermal plants drained into rivers and ponds before cooling; nuclear wastes can cause cancers and birth defects
Land	Dumping of glass, harmful chemicals, industrial effluents, packaging and garbage makes soil useless; rain carries pollutants to groundwater
Noise	Irritation, hearing impairment, higher heart rate and blood pressure; from machinery, generators, saws, pneumatic and electric drills

MEME SAMJHO Astra meme, fact inside

NTPC AND THE ENVIRONMENT

"Ash ka poora use, green belts, electrostatic precipitators, ecological monitoring... Jalwa hai hamara!"

Asli baat: NTPC has **ISO 14001** certification for its Environment Management System. It maximises **ash utilisation**, grows **green belts**, manages ash ponds and recycles ash water, and monitors ecology online.

CONTROLLING ENVIRONMENTAL DEGRADATION

Water: reuse and recycle water in successive stages; harvest rainwater; treat effluents before release: **primary** (mechanical: screening, grinding, flocculation, sedimentation), **secondary** (biological) and **tertiary** (biological, chemical and physical: recycling waste water); regulate overdrawing of groundwater. **Air**: fit smoke stacks with **electrostatic precipitators**, fabric filters, scrubbers and inertial separators; use oil or gas instead of coal. **Noise**: silencers, redesigned machinery, noise-absorbing material, earplugs.

SHIVAM BHAIYA KA NOTE
Geography ke saare 6 chapters complete! Day 40 pe Map Marathon hai. Aaj raat sirf **industries wala map** 2 baar khali map pe practice karo: textile, steel, software parks.

Day 39 Practice

15 board-pattern questions | solve first, then check

MCQ

1 Rahul wants a material for his factory that is light, durable and versatile enough to replace steel, copper, zinc and lead in many uses. Which should he choose? (1)

(a) Iron ore (b) Bronze
(c) Pyrite (d) Aluminium

2 Namit's elder sister works in the IT industry in the city called the electronic capital of India. Which city is it? (1)

(a) Noida (b) Bengaluru
(c) Hyderabad (d) Delhi

EXAM TIPS

- Use terms the checker looks for: **sustainable development**, **conservation**, **judicious use**.

3 Wastes from nuclear power plants and nuclear weapon facilities can cause: (1)

(a) viral diseases
(b) hair fall and bacterial infections
(c) cancers, birth defects and miscarriages
(d) problems of weight and height

4 Which of the following is a product of the organic chemicals industry? (1)

(a) Nitric acid (b) Cement
(c) Synthetic rubber (d) Metals

5 Identify the type of pollution.
(I) It is caused by organic and inorganic industrial wastes and effluents discharged into rivers.
(II) Main culprits are paper, pulp, chemical, textile and dyeing units, refineries and tanneries.
(III) Fly ash, phospho-gypsum and iron and steel slags are major solid wastes linked to it. (1)

(a) Air pollution (b) Thermal pollution
(c) Noise pollution (d) Water pollution

6 Identify the type of pollution.
(I) It causes irritation and anger.
(II) It can lead to hearing loss, higher heart rate and blood pressure.
(III) Sources include construction work, factory machinery, generators, saws and pneumatic and electric drills. (1)

(a) Noise pollution (b) Soil pollution
(c) Air pollution (d) Water pollution

7 Which of these is NOT a raw material for the iron and steel industry?
(I) Iron ore (II) Gypsum (III) Limestone (IV) Manganese (1)

(a) Only (III) (b) Only (I), (III) and (IV)
(c) Only (II) (d) Only (I), (II) and (III)

8 Arrange the steps of steel making in the correct order.
(I) Raw materials are transported to the plant.
(II) Molten material is poured into moulds.
(III) Rolling, pressing, casting and forging are done.
(IV) Iron ore is melted in the blast furnace and limestone is added. (1)

(a) (IV), (I), (II), (III) (b) (I), (IV), (II), (III)
(c) (I), (II), (IV), (III) (d) (III), (I), (II), (IV)

ASSERTION-REASON

9 **Assertion (A):** Some cement plants have been located in Gujarat.
Reason (R): Gujarat has suitable access to the market in the Gulf countries. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

EXAM TIPS

- Attempt the questions you know **first**, then come back to the hard ones.
- Leave 10 minutes at the end to **revise** answers and check the map question.

CASE-BASED

10 **Read the source and answer the questions that follow.** (4)

The electronics industry covers a wide range of products, from transistor sets to televisions, telephones, cellular telecom, telephone exchanges, radars, computers and many other items needed by the telecommunication industry. Bengaluru has emerged as the electronic capital of India. Other important centres for electronic goods are Mumbai, Delhi, Hyderabad, Pune, Chennai, Kolkata, Lucknow and Coimbatore. A major impact of this industry has been on employment generation, and the continuing growth in hardware and software is the key to the success of the IT industry in India.

(i) Which city is called the electronic capital of India? (1)

(a) Noida **(b)** Mumbai
(c) Bengaluru **(d)** Pune

(ii) How does the electronics industry help communication? (1)

(iii) How is the growth of the IT industry beneficial for India? Give two points. (2 marks) (2)

SHORT ANSWER

11 **How can industrial pollution of fresh water be reduced? Suggest three ways.** (3)

12 **What are Software Technology Parks? Give their importance.** (3)

13 **Write a short note on the fertiliser industry in India.** (3)

LONG ANSWER

14 **Explain any five reasons for the concentration of iron and steel industries in and around the Chhotanagpur plateau region.** (5)

15 **'The challenge of sustainable development requires control of environmental degradation by industries.' Support the statement with the example of NTPC.** (5)

Day 39 Answers with explanation

1 **(d)** Aluminium is light, corrosion-resistant, a good conductor and malleable, and becomes strong when mixed with other metals.

2 **(b)** Bengaluru has emerged as the electronic capital of India.

3 **(c)** Radioactive wastes from nuclear plants cause cancers, birth defects and miscarriages.

4 **(c)** Organic chemicals include petrochemicals used for synthetic fibres, synthetic rubber, plastics, dyes and drugs; nitric acid is inorganic.

5 **(d)** Industrial effluents and solid wastes dumped into rivers cause water pollution.

6 **(a)** Unwanted loud sound from machines causes noise pollution.

7 **(c)** Iron ore, coking coal, limestone and manganese are used for steel; gypsum is used in cement.

8 **(b)** Raw materials reach the plant, ore is smelted with limestone, molten metal is cast in moulds and then shaped by rolling, pressing and forging.

Day 39 Answers continued

9 **(a)** NCERT explains that cement plants in Gujarat are located there because of easy access to Gulf markets (cement also needs limestone, coal and power nearby).

10 (i) **(c)** Bengaluru is the electronic capital of India. (ii) It makes the products the telecom industry needs: telephones, cellular telecom, telephone exchanges, radars and computers. (iii) (1) It has created a large number of jobs. (2) It earns foreign exchange through software exports, and growth in hardware and software has boosted the services sector.

11 (1) Minimise the use of water by reusing and recycling it in two or more successive stages. (2) Harvest rainwater to meet water needs. (3) Treat hot water and effluents before releasing them into rivers and ponds: primary (mechanical: screening, grinding, flocculation, sedimentation), secondary (biological) and tertiary (biological, chemical and physical) treatment. (4) Regulate overdrawing of groundwater by industries.

12 Software Technology Parks provide single-window service and high-speed data communication facilities to software experts.
(1) They are located at Bengaluru, Noida, Mumbai, Chennai, Hyderabad and Pune, among others.
(2) They have helped generate employment on a large scale in the IT sector.
(3) Software exports from them earn valuable foreign exchange, and growth in hardware and software is the key to the IT industry's success.

13 (1) It produces nitrogenous fertilisers (mainly urea), phosphatic fertilisers, ammonium phosphate (DAP) and complex fertilisers with nitrogen (N), phosphate (P) and potash (K).
(2) Potash is entirely imported, as India has no reserves of commercially usable potash.
(3) There are 10 public sector undertakings and one in the cooperative sector at Hazira in Gujarat under the Fertiliser Corporation of India.
(4) After the Green Revolution the industry spread to other parts; Gujarat, Tamil Nadu, Uttar Pradesh, Punjab and Kerala produce about half the fertiliser.

14 (1) Low cost of iron ore, as the iron ore mines are close by.
(2) High-grade raw materials such as coking coal, limestone and manganese are available in proximity.
(3) Cheap labour is available in large numbers from the region and nearby states.
(4) Good rail and road links help bring in raw materials and send heavy finished goods to markets; Kolkata port is near for exports.
(5) Vast growth potential in the home market, plus power from thermal and hydel sources (e.g. the Damodar Valley) and water from rivers.

15 **Need:** industries add to economic growth but also cause air, water, land, thermal and noise pollution, so they must grow in a sustainable way: eco-friendly products, safe disposal of waste, new technology and the reduce-reuse-recycle approach.
NTPC's steps (a public sector power company):
(1) Optimum use of equipment by adopting the latest techniques and upgrading existing equipment.
(2) Minimising waste generation by maximising ash utilisation.
(3) Providing green belts and afforestation to nurture ecological balance.
(4) Reducing pollution through ash pond management, ash water recycling and liquid waste management.
(5) Ecological monitoring, reviews and online database management for all its power stations.

Day 39 Extra Practice

21 more questions from this chapter | new, no repeats

MCQ

1 **In the industry-market linkage, raw materials and the factors of production are carried to a unit where they are turned into products, which are then sent to the market. What is this unit called?** (1)

(a) Market **(b)** Service sector
(c) Factories **(d)** Agriculture

2 **On the basis of the source of its raw material, the cotton textile industry is classed as a:** (1)

(a) Key industry **(b)** Agro-based industry
(c) Forest-based industry **(d)** None of these

3 **Industries that use minerals as their raw material are known as:** (1)

(a) Forest-based industries **(b)** Mineral-based industries
(c) Agro-based industries **(d)** Basic industries

4 **Which statement about the spinning sector of India is NOT correct?** (1)

(a) Most of the yarn produced in India is used by our local weavers.
(b) India has world-class production in spinning.
(c) Spinning mills are mostly located in Maharashtra, Gujarat and Tamil Nadu.
(d) Our spinning mills are capable of using all the fibres we produce.

5 **Which country is a major buyer of the yarn exported by India?** (1)

(a) Bhutan **(b)** Indonesia
(c) Spain **(d)** Japan

6 **Which pair of states is best known for the cotton textile industry?** (1)

(a) Assam and West Bengal
(b) Kerala and Tamil Nadu
(c) Maharashtra and Gujarat
(d) Jammu and Kashmir and Punjab

7 Most of the jute mills of India stand along the banks of the: (1)

(a) Son river (b) Hugli river
(c) Yamuna river (d) Alaknanda river

8 Which of these factors explain the location of jute mills in the Hugli basin? I. Nearness to the jute-producing areas II. Cheap water transport III. A good network of railways, roadways and waterways IV. Special government provisions to promote jute only in the Hugli basin V. Plenty of water for processing raw jute (1)

(a) Only IV (b) I, II, III and IV
(c) I, II and III (d) I, II, III and V

9 India's first cement plant was set up in 1904 at: (1)

(a) Chennai (b) Nagpur
(c) Jamshedpur (d) Hyderabad

10 Limestone is an important raw material for which industry? (1)

(a) Jute (b) Sugar
(c) Cement (d) Aluminium

11 Which two factors matter most when choosing a site for an aluminium smelting plant? (1)

(a) Transport network and water supply
(b) Cheap and regular supply of electricity and an assured source of raw material at low cost
(c) Market and labour
(d) None of these

12 Complete the chain of aluminium processing: 4 to 6 tonnes of bauxite gives 2 tonnes of alumina, which gives _____. (1)

(a) 2 tonnes of aluminium (b) 1 tonne of aluminium
(c) 1 tonne of bauxite (d) 2 tonnes of bauxite

13 Which industry is described as its own largest consumer? (1)

(a) Chemical industry (b) Fertiliser industry
(c) Automobile industry (d) Iron and steel industry

14 In which industry are about 30 per cent of the people employed women? (1)

(a) Iron and steel industry
(b) Fertiliser industry
(c) Chemical industry
(d) Information technology and electronics industry

ASSERTION-REASON

15 **Assertion (A):** Agro-based industries have given a major boost to agriculture in India.
Reason (R): Manufacturing industries have helped farmers raise their production and have made production processes more efficient. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

CASE-BASED

16 Read the source and answer the questions that follow. (4)

The chemical industry in India is growing fast and diversifying. It has both large and small manufacturing units. Rapid growth has been recorded in both the inorganic and the organic sectors. Inorganic chemicals include sulphuric acid (used to make fertilisers, synthetic fibres, plastics, adhesives, paints and dyestuffs), nitric acid, alkalies, soda ash (used to make glass, soaps, detergents and paper) and caustic soda. These industries are widely spread over the country.

(i) Describe the present state of the chemical industry in India. (1)
(ii) Name any two inorganic chemicals produced in India and state one use of soda ash. (1)
(iii) How does the chemical industry contribute to India's economy? Give two points. (2)

17 Read the source and answer the questions that follow. (4)

Automobiles provide vehicles for the quick transport of goods, services and passengers. Trucks, buses, cars, motorcycles, scooters, three-wheelers and multi-utility vehicles are made at many centres in India. After liberalisation, the arrival of new and contemporary models raised the demand for vehicles, and the industry grew in a healthy way, including passenger cars and two- and three-wheelers. The industry is located around Delhi, Gurugram, Mumbai, Pune, Chennai, Kolkata, Lucknow, Indore, Hyderabad, Jamshedpur and Bengaluru.

(i) Name any four centres of the automobile industry in India. (1)
(ii) Why is the automobile industry important for the country? (1)
(iii) What led to the rapid growth of the automobile industry, and how? (2)

SHORT ANSWER

18 **Classify industries on the basis of the source of their raw material. How do these types differ from each other? (3)**

19 **Suggest any three measures to control air pollution caused by industries. (3)**

LONG ANSWER

20 **"Agriculture and industry are not separate from each other; they move hand in hand." Give arguments to support this statement. (5)**

21 **"Industries have changed a great deal because of advances in technology and shifts in what consumers want." Justify the statement with examples. (5)**

Day 39 Extra Practice: Answers

1 **(c)** Factories (industries) process inputs into finished products. This is the secondary activity that links raw materials with the market.

2 **(b)** Cotton textile mills use raw cotton, a farm product, so the industry is agro-based.

3 **(b)** Industries such as iron and steel, cement and petrochemicals use minerals as raw material, so they are mineral-based.

4 **(a)** Our weaving sector supplies low-quality fabric and cannot use much of the high-quality yarn produced in the country. A large part of the yarn is exported.

5 **(d)** NCERT notes that India exports yarn to Japan.

6 **(c)** The early cotton mills grew in the cotton-growing belt of Maharashtra and Gujarat. This belt offered raw cotton, markets, transport, ports, labour and a moist climate.

Day 39 Extra Practice: Answers continued

7 **(b)** Most jute mills lie in a narrow belt along the Hugli river in West Bengal.

8 **(d)** NCERT lists nearness to jute areas, cheap water transport, a good transport network and abundant water. It mentions no special government provision for the Hugli basin.

9 **(a)** The first cement plant in India was set up in Chennai in 1904.

10 **(c)** Cement needs bulky and heavy raw materials such as limestone, silica and gypsum.

11 **(b)** Aluminium smelting uses a great deal of power and bulky bauxite. Cheap electricity and a sure supply of raw material are therefore the prime factors.

12 **(b)** About 4 to 6 tonnes of bauxite yield 2 tonnes of alumina, which in turn yield 1 tonne of aluminium.

Day 39 Extra Practice: Answers continued

13 **(a)** Basic chemicals are processed into other chemicals used in industry, agriculture or for consumers, so the chemical industry is its own largest consumer.

14 **(d)** NCERT notes that about 30 per cent of the people working in the IT and electronics sector are women.

15 **(a)** Industries supply farmers with pumps, fertilisers, pipes and machines. These inputs raise productivity and make farming efficient, which is how agro-industries boost agriculture.

16 (i) It is growing fast and diversifying. It has both large and small units, with rapid growth in the inorganic and organic sectors. (ii) Any two of sulphuric acid, nitric acid, alkalies, soda ash and caustic soda. Soda ash is used to make glass, soaps, detergents and paper. (iii) It contributes about 3 per cent of GDP and is the third largest in Asia. It supplies raw materials to fertilisers, textiles, paper, plastics and many other industries, and it is also its own largest consumer.

17 (i) Any four of Delhi, Gurugram, Mumbai, Pune, Chennai, Kolkata, Lucknow, Indore, Hyderabad, Jamshedpur and Bengaluru. (ii) It provides vehicles for the quick movement of goods, services and passengers, which supports trade and other industries. (iii) Liberalisation led to the growth. New and contemporary models came into the market and raised the demand for vehicles. This led to healthy growth in passenger cars and two- and three-wheelers.

18 1. There are two types: agro-based and mineral-based industries. 2. Agro-based industries use farm products as raw material, for example cotton, jute, silk and woollen textiles, sugar, tea, coffee and edible oil. 3. Mineral-based industries use minerals as raw material, for example iron and steel, cement, aluminium, machine tools and petrochemicals.

Day 39 Extra Practice: Answers continued

19 1. Fit smoke stacks with electrostatic precipitators, fabric filters, scrubbers and inertial separators to cut particulate matter. 2. Use oil or gas instead of coal in factories to reduce smoke. 3. Follow pollution norms and fit equipment to control harmful gas emissions.

20 1. Agro-industries have boosted agriculture by raising its productivity. 2. Many industries, such as cotton textiles, sugar and jute, depend on agriculture for raw materials. 3. Industries supply farmers with irrigation pumps, fertilisers, insecticides, PVC pipes, machines and tools. 4. Manufacturing has helped farmers raise production and made farming processes efficient. 5. Transport developed by industry helps farmers get inputs and sell their produce.

21 1. After liberalisation, new and modern vehicle models raised consumer demand and led to fast growth of the automobile industry. 2. The electronics industry has moved from transistor sets to televisions, mobile phones, telephone exchanges, radars and computers. 3. Growth in hardware and software has made the IT industry a big employer and foreign exchange earner through BPO services. 4. Software technology parks give experts high-speed data communication facilities. 5. Industries now adopt cleaner technology and better waste management to meet the demand for sustainable development.

DAY 39 COMPLETE? ☐ Notes read ☐ 15 questions solved ☐ Answers checked ☐ Mistakes noted

Next: Day 40, Map marathon

DAY 40

MAPS | HISTORY + GEOGRAPHY | 3 ROUNDS

Map Marathon: Every Map Item, One Day

All map items in the 2026-27 CBSE list

Aaj ka target (pages 174-179)

- ☐ Map Marathon: saare map items
- ☐ Round 1 identify, Round 2 locate, Round 3 recheck
- ☐ 30 map sawal, pencil se
- ☐ 2 ghante, rubber paas rakhna

The board paper has a **map question** on outline maps of India: places from History Chapter 2 and items from Geography. Marks are almost free if you know **where** each item is. Today you see every item once on answer maps, then test yourself in three rounds.

- **Round 1 (30 min):** identify the 15 numbered places on the practice map.
- **Round 2 (40 min):** locate and label 15 items on the two blank maps.
- **Round 3 (20 min, after a break):** redo both rounds from memory, then check with the answer maps. Mark every miss in your Mistake Book.

MAP WRITING RULES

Use a **sharp pencil** for the dot or symbol, then write the **name neatly next to it** with a pen. Use the symbol the question asks for. Never write across a state boundary. Practise on printed outline maps of India (they cost a few rupees at any stationery shop).

MEME SAMJHO

Astra meme, fact inside

MAP DAY

"30 map items, 3 rounds, aur sab yaad... aaj to maza aa jayega!"

Asli baat: In the board paper, map work is direct marks: the item is given, you only have to locate or identify it. One day of focused practice covers the whole list.

40.1 The Complete CBSE Map List

HISTORY CH2: NATIONALISM IN INDIA

- INC sessions: Calcutta (Sep 1920), Nagpur (Dec 1920), Madras (1927)
- Champaran (Bihar): indigo planters
- Kheda (Gujarat): peasant satyagraha
- Ahmedabad (Gujarat): cotton mill workers satyagraha
- Amritsar (Punjab): Jallianwala Bagh
- Dandi (Gujarat): Civil Disobedience

GEOGRAPHY CH1: RESOURCES AND DEVELOPMENT

- Major soil types (identification only)

GEOGRAPHY CH3: WATER RESOURCES

- Dams: Salal, Bhakra Nangal, Tehri, Rana Pratap Sagar, Sardar Sarovar, Hirakud, Nagarjuna Sagar, Tungabhadra

GEOGRAPHY CH4: AGRICULTURE

- Major areas of rice and wheat (identification)
- Largest/major producer states of sugarcane, tea, coffee, rubber, cotton and jute (identification)

GEOGRAPHY CH5: MINERALS AND ENERGY RESOURCES

- Iron ore mines: Mayurbhanj, Durg, Bailadila, Bellary, Kudremukh
- Coal mines: Raniganj, Bokaro, Talcher, Neyveli
- Oil fields: Digboi, Naharkatia, Mumbai High, Bassien, Kalol, Ankaleshwar
- Thermal: Namrup, Singrauli, Ramagundam
- Nuclear: Narora, Kakrapara, Tarapur, Kalpakkam

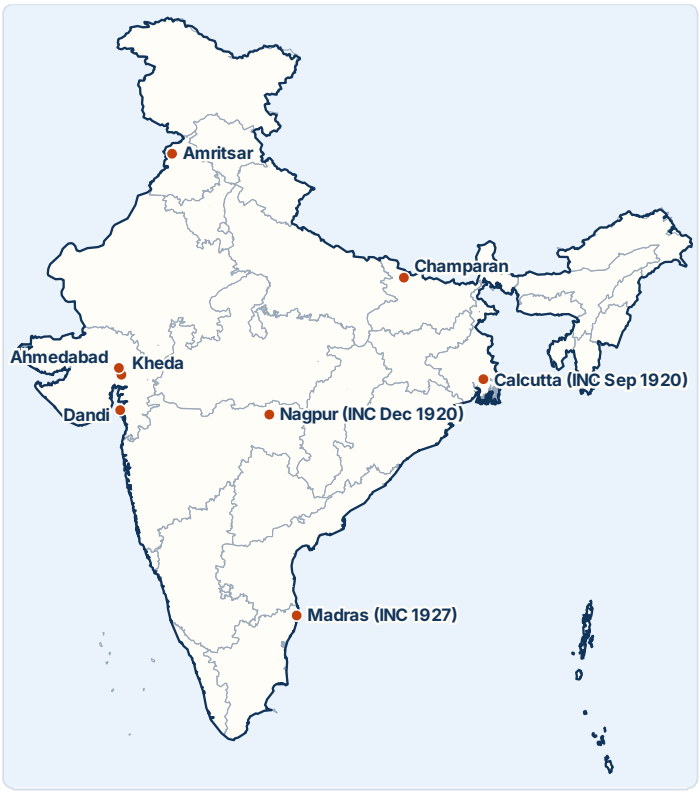

GEOGRAPHY CH6: MANUFACTURING INDUSTRIES

- Cotton textile: Mumbai, Indore, Surat, Kanpur, Coimbatore
- Iron and steel: Durgapur, Bokaro, Jamshedpur, Bhilai, Vijayanagar, Salem
- Software technology parks: Noida, Gandhinagar, Mumbai, Pune, Hyderabad, Bengaluru, Chennai, Thiruvananthapuram

GEOGRAPHY CH7: LIFELINES OF NATIONAL ECONOMY (POINTING ONLY)

- Major ports: Kandla, Mumbai, Marmagao, New Mangalore, Kochi, Tuticorin, Chennai, Visakhapatnam, Paradip, Haldia
- International airports: Amritsar, Delhi, Mumbai, Chennai, Kolkata, Hyderabad

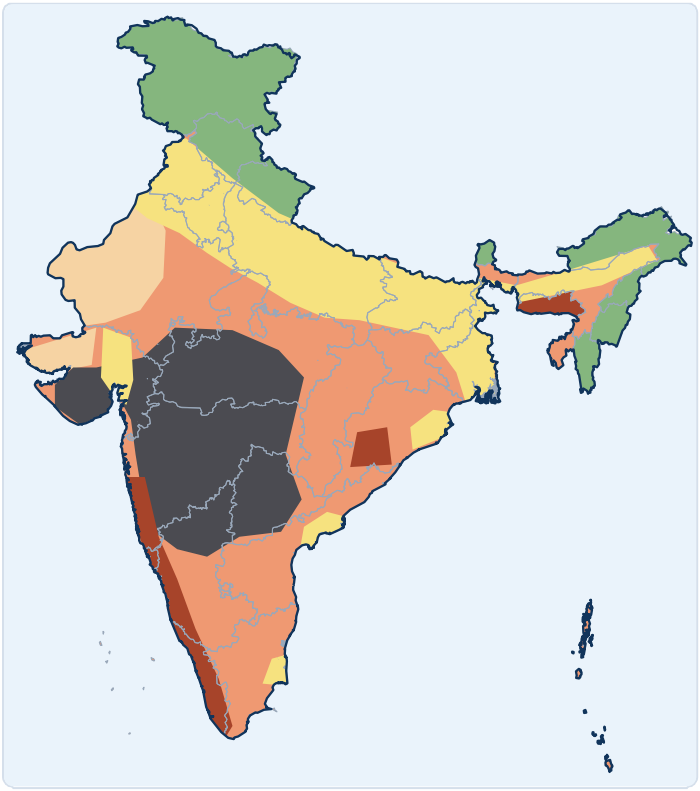

40.2 Answer Maps: Learn These First

Map A *History Ch2: INC sessions and places of the national movement.*

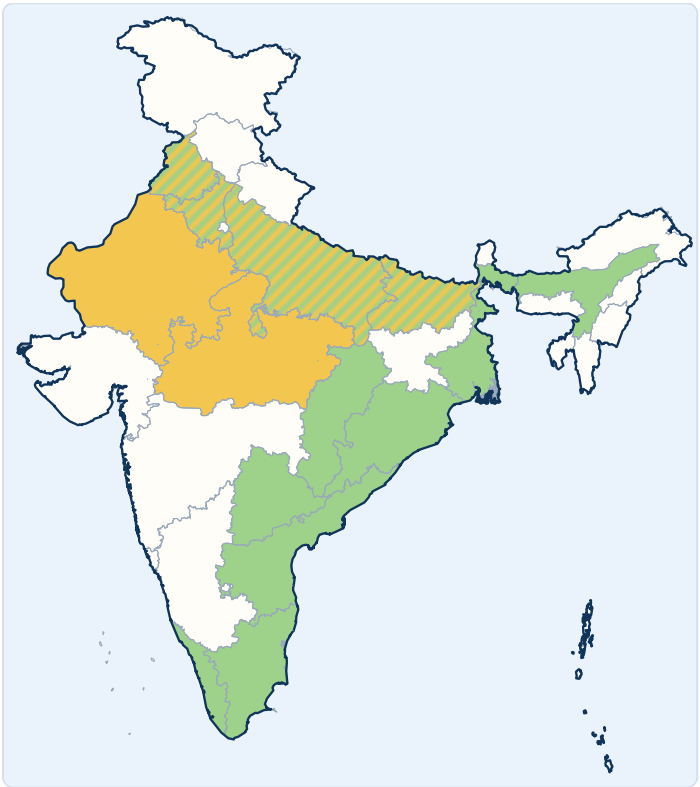

Map B *Geography Ch3: the 8 dams (triangles).*

Map C *Geography Ch1: major soil types (identification).*

Alluvial | Black (regur) | Red and yellow | Laterite | Arid | Forest and mountain

Map D *Geography Ch4: rice (green), wheat (gold), both (striped).*

Map E *Largest producer states: sugarcane, tea, coffee, rubber, cotton, jute.*

Map F *Geography Ch5: iron ore mines.*

MAP MARKING TIPS

- Use a **sharp pencil**: mark a small dot or symbol exactly at the place and write the name neatly beside it, not over it.

Map G *Coal mines (square), oil fields (blue dot), thermal (triangle), nuclear (star).*

Map H *Geography Ch6: cotton textile (blue dot), iron and steel (square).*

Map I *Software technology parks.*

Map J *Major ports (blue dot) and international airports (A). Mumbai and Chennai have both a port and an airport.*

MAP MARKING TIPS

- **Identify** questions: the place is already marked (A, B); just write its correct name on the line given.
- **Locate and label** questions: mark the place with a dot or symbol and write its name next to it.

SHIVAM BHAIYA SAYS

Map yaad karne ka tareeka: **coast ke saath** chalo. West coast pe Kandla, Mumbai, Marmagao, New Mangalore, Kochi; neeche Tuticorin; phir east coast pe Chennai, Visakhapatnam, Paradip, Haldia. Ek kahani ki tarah ghoomo, ratna nahi padega.

Day 40 Practice

30 map items | 3 rounds | answers on the answer maps

Round 1 *Identify the 15 numbered places. Write the name against each number in the table.*

No.	Your answer
1	
2	
3	
4	
5	
6	
7	
8	
9	
10	
11	
12	
13	
14	
15	

MAP MARKING TIPS

- Fix the **state first**, then the position inside the state (north, south, coast, border).
- Dams sit on rivers: learn the **river course** and the dam position follows.
- Coastal places (ports, Tarapur, Kalpakkam, Thiruvananthapuram) must touch the **coastline**.

Round 2, Map 1 *Locate and label the 8 items listed below.*

1. Rana Pratap Sagar dam
2. Tungabhadra dam
3. Narora nuclear plant
4. Singrauli thermal plant
5. Talcher coal mine
6. Mayurbhanj iron ore mine
7. Kalol oil field
8. Bokaro iron and steel plant

Round 2, Map 2 *Locate and label the 7 items listed below.*

9. Kanpur cotton textile centre
10. Vijayanagar iron and steel plant
11. Gandhinagar software technology park
12. Madras (INC session 1927)
13. Nagpur (INC session Dec 1920)
14. Kheda (peasant satyagraha)
15. Amritsar (Jallianwala Bagh)

Day 40 Answers

1. Salal dam
2. Tehri dam
3. Sardar Sarovar dam
4. Nagarjuna Sagar dam
5. Digboi oil field
6. Mumbai High oil field
7. Tarapur nuclear plant
8. Kalpakkam nuclear plant
9. Bailadila iron ore mine
10. Kudremukh iron ore mine
11. Raniganj coal mine
12. Bhilai iron and steel plant
13. Coimbatore cotton textile centre
14. Champaran (indigo satyagraha)
15. Dandi (Salt March)

R2 Check Round 2 against Maps A, B, F, G, H and I above. Every item is drawn there at its correct place.

DAY 40 COMPLETE? ☐ Answer maps learnt
☐ Round 1 done ☐ Round 2 done
☐ Round 3 recheck
Next: Day 41, Buffer day

DAY 41

Revision | Buffer day

Clear the Backlog, Fix Weak Tests

Catch up on missed Days and redo every test below 70%

Aaj ka target

- [ ] Jo Days chhoot gaye, aaj pehle unhe pura karo
- [ ] 70% se kam wale test dobara do
- [ ] 20 sawal, har subject se 5
- [ ] 2 ghante, ek-ek kaam karke

How to Use Today

STEP 1: LIST THE BACKLOG

- Open the roadmap and circle every Day without a tick.
- Note them in order: learn days first, then revision days.
- If nothing is pending, give the full time to weak tests.

STEP 2: CLEAR IT SMARTLY

- Do not re-read full notes: read the recall cards and Exam Alerts.
- Solve that Day's practice and check answers honestly.
- Max 30 min per pending Day; tick it the moment it is done.

STEP 3: TODAY'S TIME PLAN

- 60 min: pending Days.
- 40 min: redo tests below 70%.
- 20 min: the 20 mixed questions on this Day.

THE 70% RULE

A chapter test is below 70% if you scored less than **7 out of 10** or **11 out of 15**. Redo only the questions you got wrong, then read the answer box for them and write the correct point in your Mistake Book.

Redo Tracker: All 19 Chapters

Subject	Chapter	Day	Score	< 70%	Redo score
History	Ch1 Nationalism in Europe	3	___ / ___	☐	___ / ___
History	Ch2 Nationalism in India	6	___ / ___	☐	___ / ___
History	Ch3 Making of a Global World	19	___ / ___	☐	___ / ___
History	Ch5 Print Culture	30	___ / ___	☐	___ / ___

SHIVAM BHAIYA KA NOTE

Backlog dekh ke ghabrana nahi. Ek ek Day uthao, khatam karo, tick lagao. Jo test 70% se kam aaya, sirf galat wale questions dobara karo: score khud upar jayega.

Today's Practice: 20 Mixed Questions

5 per subject | 1 mark MCQ and A-R, 3-mark short answers | 25 min

MULTIPLE CHOICE QUESTIONS

1 Which soil forms when heavy rain and high temperature cause intense leaching? (1)

(a) Alluvial soil (b) Arid soil
(c) Black soil (d) Laterite soil

2 For producers, one clear effect of globalisation is: (1)

(a) less choice for consumers
(b) greater competition from local and foreign firms
(c) fewer foreign brands in the market
(d) an end to trade between countries

3 Mahatma Gandhi called off the Non-Cooperation Movement in February 1922 after: (1)

(a) the arrival of the Simon Commission
(b) the Jallianwala Bagh massacre
(c) the violent clash at Chauri Chaura
(d) the Dandi March

4 The World Bank compares countries mainly by their: (1)

(a) average income per person (b) life expectancy
(c) total national income (d) literacy rate

5 On hill slopes, ploughing along the lines of equal height to slow running water is called: (1)

(a) shelter belts (b) contour ploughing
(c) gully farming (d) strip cropping

6 A programme where village communities and the forest department jointly restore degraded forests is: (1)

(a) Project Tiger (b) Chipko Movement
(c) Joint Forest Management (d) Beej Bachao Andolan

7 The city where Dutch and French speakers have equal representation in Belgium's local government is: (1)

(a) Antwerp (b) Colombo
(c) Liege (d) Brussels

8 Five family members work on a small farm where three are enough. This is: (1)

(a) open unemployment (b) educated unemployment
(c) seasonal unemployment (d) disguised unemployment

9 India has many parties and governments are often formed by alliances. This is a: (1)

(a) no-party system (b) two-party system
(c) one-party system (d) multi-party system

10 The fabled "city of gold" that Europeans hunted for in South America was called: (1)

(a) Lisbon (b) El Dorado
(c) Cathay (d) Potosi

11 The Diamond Sutra, printed in AD 868, is important because it: (1)

(a) was banned by the Ming rulers
(b) was the first newspaper of Asia
(c) was printed on Gutenberg's press
(d) is the oldest Japanese book that survives

12 Which group of powers together defeated Napoleon in 1815? (1)

(a) Britain, Russia, Netherlands and Germany
(b) Britain, Luxembourg, Germany and Italy
(c) France, Russia, Prussia and Austria
(d) Britain, Russia, Prussia and Austria

13 Which step is the clearest example of majoritarianism in Sri Lanka? (1)

(a) A coalition of all parties at the centre
(b) A community government elected by each language group
(c) The 1956 Act making Sinhala the only official language
(d) Equal ministers for Dutch and French speakers

14 The Hirakud Dam is built on the river: (1)

(a) Narmada (b) Krishna
(c) Mahanadi (d) Sutlej

15 Who supervises the functioning of formal sources of loans in India? (1)

(a) World Bank (b) Reserve Bank of India
(c) SEBI (d) State Bank of India

16 **India, where power is shared between a strong Union and the States, is a:** (1)
(a) unitary state
(b) military alliance
(c) coming together federation
(d) holding together federation

ASSERTION-REASON

17 **Assertion (A):** Rice is grown in Punjab and Haryana with the help of irrigation.
Reason (R): Rice needs annual rainfall above 100 cm, which these states do not get. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

18 **Assertion (A):** Demand deposits are treated as money in the modern economy.
Reason (R): They can be withdrawn on demand and cheques against them can settle payments. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

SHORT ANSWER QUESTIONS

19 **"Democracy produces an accountable, responsive and legitimate government." Explain.** (3)

20 **Why did Indians oppose the Rowlatt Act of 1919?** (3)

Day 41 Answers

1 (d) Laterite soil. Humus is low; it suits tea, coffee and cashew with manure.

2 (b) greater competition from local and foreign firms. Competition pushes quality up and prices down.

3 (c) the violent clash at Chauri Chaura. He felt satyagrahis needed more training before mass struggle.

4 (a) average income per person. Average (per capita) income = total income divided by total population.

5 (b) contour ploughing. It breaks the flow of water down the slope.

6 (c) Joint Forest Management. It began in Odisha in 1988.

7 (d) Brussels. Brussels has a separate government with equal representation.

8 (d) disguised unemployment. Taking two away would not reduce output.

9 (d) multi-party system. Example: NDA and UPA alliances.

10 (b) El Dorado. The legend drove many Spanish expeditions.

11 (d) is the oldest Japanese book that survives. It has text and woodcut illustrations.

12 (d) Britain, Russia, Prussia and Austria. These four met at Vienna under Metternich.

13 (c) The 1956 Act making Sinhala the only official language. It ignored the Tamil-speaking people.

14 (c) Mahanadi. It is in Odisha.

15 (b) Reserve Bank of India. RBI checks that banks keep cash reserves and lend to small borrowers too.

16 (d) holding together federation. A big country divides power between the centre and states.

17 (a) Both A and R true, R explains A. Low rainfall is made up by canals and tube wells.

18 (a) Both A and R true, R explains A. So they share the essential features of money.

19 (1) Accountable: people elect and can remove leaders; decisions follow procedure. (2) Responsive: it attends to people's needs and opinions. (3) Legitimate: it is the people's own government, so it is accepted even when slow. Transparency (right to know how decisions are made) supports all three.

20 (1) It let the government detain political prisoners without trial for two years. (2) It gave huge powers to repress political activity. (3) It was rushed through despite the united opposition of Indian members of the Imperial Legislative Council.

DAY 41 COMPLETE? ☐ Backlog cleared ☐ Weak tests redone ☐ 20 questions checked
Next: Day 42, Syllabus complete

DAY 42

Revision | Syllabus complete

All 19 Chapters at One Glance

One recall card per chapter, then a 30-question mixed test

Aaj ka target
☐ Syllabus khatam! 19 recall cards ek nazar mein
☐ Jo card kamzor lage use Weak mark karo

☐ 30 sawal ka mixed test
☐ 2 ghante, aaj ka din bada hai

Recall Cards: H = History, G = Geography, P = Pol Sci, E = Economics

H1 NATIONALISM IN EUROPE

- 1789 French Revolution: **la patrie**, **le citoyen**, tricolour flag.
- **Civil Code 1804**: equality before law, right to property; but no political freedom.
- **Vienna 1815** (Metternich): conservative regimes restored.
- **Mazzini**: Young Italy, Young Europe. 1848 Frankfurt Parliament failed.
- Germany 1871 (Bismarck, Versailles); Italy 1861 (Victor Emmanuel II).

H2 NATIONALISM IN INDIA

- **Rowlatt Act 1919**, Jallianwala Bagh 13 April 1919.
- **Non-Cooperation + Khilafat** 1920; withdrawn after Chauri Chaura, Feb 1922.
- Simon Commission 1928; **Purna Swaraj** at Lahore, Dec 1929.
- **Dandi March** 12 March 1930 starts Civil Disobedience.

H3 PRE-MODERN WORLD

- **Silk routes** linked China with Asia, Europe and North Africa.
- Goods, ideas and faiths travelled: Buddhism, Christianity, Islam.
- Foods from the Americas: potato, maize, tomato, chillies.
- Spanish conquest of America; **smallpox** killed native people.

H5 PRINT CULTURE

- Woodblock printing in **China**; **Diamond Sutra** (Japan, AD 868).
- **Gutenberg** press 1430s; Bible printed first.
- Luther's 95 Theses (1517) spread by print: Reformation.
- Portuguese missionaries bring press to Goa, mid-16th century.

G1 RESOURCES AND DEVELOPMENT

- Resources: biotic/abiotic, renewable/non-renewable.
- **Rio Summit 1992**, Agenda 21 for sustainable development.
- **Alluvial** most widespread; **black** soil holds moisture, cotton.
- **Laterite**: leaching in heavy rain; tea, coffee, cashew.

G2 FOREST AND WILDLIFE

- **Reserved** forests are more than half of forest land.
- Protected and unclassed forests are the other two types.
- Wildlife Protection Act 1972; **Project Tiger** 1973.
- Chipko, Beej Bachao Andolan, **JFM** (Odisha 1988).

G3 WATER RESOURCES

- Scarcity: over-use, growing population, pollution.
- Dams called "temples of modern India" by Nehru.
- **Narmada Bachao Andolan** against Sardar Sarovar.
- Rainwater harvesting: guls/kuls, rooftop tankas in Rajasthan.

G4 AGRICULTURE

- Primitive subsistence (slash and burn), intensive, commercial.
- **Rabi**: sown in winter (wheat, gram); **kharif**: with monsoon (rice).
- **Zaid**: short summer season (watermelon, cucumber).
- Rice: above 25°C, above 100 cm rain. Wheat: 50-75 cm.

G5 MINERALS AND ENERGY

- Minerals occur in veins, lodes, beds and layers.
- Ferrous (iron, manganese), non-ferrous (copper, bauxite).
- **Rat-hole mining** in Meghalaya.
- Conventional: coal, petroleum, gas. **Mumbai High** oil.

G6 MANUFACTURING INDUSTRIES

- Manufacturing = secondary sector; backbone of growth.
- Agro-based: cotton, jute, sugar. Mineral-based: iron and steel.
- Iron and steel is a **basic industry**.
- Pollution: air, water, thermal, noise.

P1 POWER-SHARING

- **Belgium**: Dutch 59%, French 40%, German 1%.

P1 POWER-SHARING

- Accommodation: equal ministers, community government.
- **Sri Lanka**: 1956 Act, Sinhala only: majoritarianism.
- Prudential + moral reasons for sharing power.
- Forms: horizontal, vertical, social groups, parties.

P2 FEDERALISM

- Two or more levels of government.
- **Coming together** (USA) vs **holding together** (India).
- Union, State, Concurrent Lists; residuary with Union.
- 22 scheduled languages; no national language.

P3 GENDER, RELIGION, CASTE

- Sexual division of labour; feminist movements.
- One-third seats in local bodies reserved for women.
- **Communalism**: religion as basis of the nation.
- India is **secular**: no official religion.

P4 POLITICAL PARTIES

- Party: group that contests elections to hold power.
- One-party, two-party, **multi-party** (India).
- National parties vs state parties (recognised by EC).
- Challenges: internal democracy, dynasty, money and muscle.

P5 OUTCOMES OF DEMOCRACY

- Accountable, responsive, legitimate government.
- Growth: dictatorships slightly ahead, democracy still preferred.
- Inequality and poverty still persist.
- Accommodates social diversity.

E1 DEVELOPMENT

- Different people have different goals.
- **Per capita income** = total income / population.
- HDI (UNDP): income, education, health.
- IMR, literacy rate, net attendance ratio.

E2 SECTORS OF THE ECONOMY

- Primary, secondary, tertiary sectors.
- **GDP**: value of final goods and services in a year.
- Disguised unemployment in agriculture.
- **MGNREGA 2005**: 100 days of work.

E3 MONEY AND CREDIT

- Barter needs double coincidence of wants.
- Modern money: currency + demand deposits.
- **RBI** issues currency, supervises banks.
- Terms of credit: interest, collateral, documents, repayment.

E4 GLOBALISATION (BOARD PART)

- Integration of countries through trade, investment, people.
- **MNCs** spread production across countries.
- Enablers: technology and liberalisation.
- India held the **G20** presidency, Delhi summit 2023.
- African Union joined G20 as permanent member.

SHIVAM BHAIYA KA NOTE

Syllabus khatam! Ek card padho, aankh band karke uske points bolo, phir tick lagao. Jo card yaad nahi aaya, use mark karo aur is hafte us chapter ka Day dobara kholo.

Today's Practice: 30 Mixed Questions

All subjects | MCQ, Assertion-Reason, 2-3 mark answers | 40 min

MULTIPLE CHOICE QUESTIONS

1. **Which is a rabi crop?** (1)
   (a) Wheat **(b)** Rice **(c)** Cotton **(d)** Jute

2. **Which subject is in the Concurrent List?** (1)
   (a) Defence **(b)** Banking
   (c) Education **(d)** Police

3. **A state that has no official religion and treats all faiths equally is called:** (1)
   (a) federal **(b)** theocratic
   (c) secular **(d)** communal

4. **Which crop came to Europe and Asia from the Americas after Columbus?** (1)
   (a) Potato **(b)** Barley **(c)** Rice **(d)** Wheat

5. **Which soil is also called regur and is ideal for cotton?** (1)

(a) Alluvial soil (b) Black soil
(c) Red soil (d) Laterite soil

6 **Rooftop rainwater harvesting tanks called "tankas" are found in:** (1)
(a) Kerala (b) Rajasthan
(c) Punjab (d) Assam

7 **The resolution for Purna Swaraj was passed at which session?** (1)
(a) Madras, 1927 (b) Nagpur, December 1920
(c) Lahore, December 1929 (d) Calcutta, September 1920

8 **The Chipko Movement is linked with:** (1)
(a) saving seeds in Tehri
(b) building dams in Gujarat
(c) saving trees in the Himalayas
(d) rooftop water harvesting

9 **Rat-hole mining is practised in:** (1)
(a) Meghalaya (b) Jharkhand
(c) Gujarat (d) Odisha

10 **Which of these was NOT a feature of the Napoleonic Code of 1804?** (1)
(a) Equality before the law
(b) Universal adult suffrage
(c) End of privileges based on birth
(d) Right to property

11 **Who led the peasants of Awadh against talukdars and landlords?** (1)
(a) Motilal Nehru (b) Alluri Sitarama Raju
(c) Mohammad Ali Jinnah (d) Baba Ramchandra

12 **Which is a formal source of credit?** (1)
(a) Cooperative society (b) Trader
(c) Landlord (d) Moneylender

13 **Which law stops elected members from changing parties after election?** (1)
(a) Vernacular Press Act (b) Right to Information Act
(c) Rowlatt Act (d) Anti-defection law

14 **Who wrote "Amar Jiban", the first full autobiography in Bengali?** (1)
(a) Rashsundari Debi (b) Pandita Ramabai
(c) Tarabai Shinde (d) Kailashbashini Debi

15 **Which sector produces the largest share of India's GDP today?** (1)
(a) Organised sector (b) Tertiary sector
(c) Secondary sector (d) Primary sector

16 **The Treaty of Vienna (1815) aimed mainly to:** (1)
(a) unite all German states
(b) undo most changes made during the Napoleonic wars
(c) give voting rights to all men
(d) free the Balkan states

17 **In Belgium, the "community government" is elected by:** (1)
(a) the Brussels city council
(b) people of one language community only
(c) all citizens of Belgium
(d) the central government

18 **Iron and steel is called a basic industry because:** (1)
(a) it employs only women
(b) other industries depend on it for their machinery
(c) it needs no raw material
(d) it uses only agricultural raw material

19 **A country with high average income but poor public facilities is weak on:** (1)
(a) industrial output (b) total income
(c) human development (d) foreign trade

ASSERTION-REASON

20 **Assertion (A):** Black soil is ideal for growing cotton.
Reason (R): Black soil is made of lava rocks and holds moisture for a long time. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

21 **Assertion (A):** Napoleon's rule was welcomed at first but later opposed in conquered areas.
Reason (R): Increased taxes, censorship and forced conscription into French armies outweighed the benefits. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

22 **Assertion (A):** In Sri Lanka, power was shared equally between Sinhalas and Tamils.
Reason (R): The 1956 Act made Sinhala the only official language. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

23 **Assertion (A):** Moneylenders charge higher interest than banks.
Reason (R): Informal lenders are not supervised by the RBI. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

24 **Assertion (A):** The Simon Commission was greeted with the slogan "Go back Simon".
Reason (R): The Commission did not have a single Indian member. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

SHORT ANSWER QUESTIONS

25 Distinguish between coming together and holding together federations. (3)

26 Explain any three terms of credit. (3)

27 State any two reasons why the Non-Cooperation Movement slowed down in the cities. (2)

28 How did print help spread the ideas of the Reformation? Give two points. (2)

29 Why is sustainability important for development? Give an example. (2)

30 Distinguish between reserved and protected forests. (2)

Day 42 Answers

1 **(a)** Wheat. Rabi crops are sown in winter and harvested in summer.

2 **(c)** Education. Both Union and States can make laws on it.

3 **(c)** secular. The Constitution of India makes India secular.

4 **(a)** Potato. Potato, maize, tomato and chillies came from America.

5 **(b)** Black soil. It holds moisture well.

6 **(b)** Rajasthan. They store rain for drinking in the dry season.

7 **(c)** Lahore, December 1929.

8 **(c)** saving trees in the Himalayas.

9 **(a)** Meghalaya. Families dig long narrow tunnels for coal.

10 **(b)** Universal adult suffrage.

11 **(d)** Baba Ramchandra.

12 **(a)** Cooperative society.

13 **(d)** Anti-defection law. A member who changes party loses the seat.

14 **(a)** Rashsundari Debi. It was published in 1876.

15 **(b)** Tertiary sector.

16 **(b)** undo most changes made during the Napoleonic wars.

17 **(b)** people of one language community only.

18 **(b)** other industries depend on it for their machinery.

19 **(c)** human development. HDI looks at health and education too.

20 **(a)** Both true, R explains A. Moisture retention suits cotton.

21 **(a)** Both true, R explains A. The hardships made people turn against him.

22 **(d)** A false, R true. Sri Lanka followed majoritarianism, so A is false.

23 **(a)** Both true, R explains A. No one checks how they lend.

24 **(a)** Both true, R explains A. It was set up in 1928 to review the constitution.

25 Coming together: independent states join to form a bigger unit, keep their identity, and units are equally powerful (USA, Switzerland, Australia). Holding together: a large country divides power between centre and states; the centre is stronger (India, Spain, Belgium).

26 (1) Interest rate: the extra amount paid with the loan. (2) Collateral: an asset (land, gold, house) the borrower pledges as a guarantee. (3) Documentation and mode of repayment: papers needed and how the loan is paid back.

27 (1) Khadi cloth was costlier than mill cloth, so poor people could not afford it. (2) Indian institutions were not ready to replace British schools, colleges and courts, so students and lawyers went back.

28 (1) Luther's 95 Theses were printed and read widely, leading to a split in the Church. (2) Cheap printed tracts reached common people, so new ideas spread fast across Europe.

29 Development should meet present needs without harming future generations. Example: overuse of groundwater lowers the water table, so future farmers may have no water.

30 Reserved forests (more than half of forest land) are the most valuable for conservation of forest and wildlife. Protected forests (about one-third) are protected from further depletion.

QUICK RECALL: 16 ONE-LINERS (COVER THE RIGHT SIDE AND ANSWER)

First to print with woodblocks: China

Allegory of France: Marianne

Allegory of Germany: Germania

Khilafat leaders: Muhammad Ali and Shaukat Ali

Gandhi's first satyagraha in India: Champaran, 1917

Most widespread soil of India: Alluvial soil

Project Tiger launched: 1973

Bhakra Nangal dam river: Sutlej

Oldest oil field of India: Digboi (Assam)

Electronic capital of India: Bengaluru

Belgium's German speakers: About 1%

Residuary subjects go to: Union Government

Party recognition is given by: Election Commission

HDI is published by: UNDP

Who issues currency notes in India: RBI (on behalf of the government)

G20 New Delhi summit: September 2023

BOARD SCOPE ALERT: DO NOT WASTE TIME HERE

- **History Ch3**: only "The Pre-modern World" comes in the board paper; the rest is for the project.
- **History Ch4** (Age of Industrialisation): periodic tests only, not in the board paper.
- **Geography Ch7** (Lifelines) and **Economics Ch5** (Consumer Rights): project work only.
- **Economics Ch4**: board part is What is globalisation, the enabling factors and India and the G20.
- Paper: 80 marks, 20 per subject; maps carry 5 marks (History 2 + Geography 3).

WEAK-CARD TRACKER: TICK ONE BOX PER CHAPTER TONIGHT

Chapter	Strong	Shaky	Weak

DAY 42 COMPLETE? ☐ 19 cards recalled ☐ 30 questions checked ☐ Weak cards marked

Next: Day 43, History round 2

DAY 43

History | Revision round 2

All Board History in One Sitting

Ch1 Europe, Ch2 India, Ch3 Pre-modern World, Ch5 Print Culture

Aaj ka target

- ☐ Board History ek baithak mein: 4 chapters
- ☐ 30 key dates bina dekhe likho
- ☐ 30 sawal, phir answers milao
- ☐ 2 ghante, timeline zor se bolo

Key Dates Timeline

EUROPE (CH1)

1789	French Revolution: idea of la patrie and le citoyen
1804	Napoleonic Civil Code

1815	Napoleon defeated; Treaty of Vienna (Metternich)
1821	Greek War of Independence begins
1830	July Revolution in France; Belgium breaks away
1832	Treaty of Constantinople: Greece independent
1834	Zollverein (customs union) under Prussia
1848	Revolutions of liberals; Frankfurt Parliament
1861	Victor Emmanuel II king of united Italy
1871	German Empire proclaimed at Versailles
1914	First World War begins (Balkan tensions)

INDIA (CH2)

1915	Gandhiji returns from South Africa (Jan)
1917	Champaran (Bihar) and Kheda (Gujarat) satyagrahas
1918	Ahmedabad cotton mill workers satyagraha
1919	Rowlatt Act; Jallianwala Bagh, 13 April
1920	Calcutta session (Sep), Nagpur session (Dec): Non-Cooperation
1922	Chauri Chaura; movement withdrawn (Feb)
1927	Madras session of the Congress
1928	Simon Commission arrives
1929	Lahore session: Purna Swaraj (Dec)
1930	Dandi March, 12 March: Civil Disobedience
1932	Poona Pact (Sep)

PRINT AND THE WORLD (CH3, CH5)

AD 594	Books printed in China by woodblock
AD 868	Diamond Sutra printed in Japan
1295	Marco Polo brings woodblock knowledge to Italy
1430s	Gutenberg's printing press
1517	Luther's Ninety-five Theses
1780	Hickey's Bengal Gazette
1821	Sambad Kaumudi by Rammohun Roy
1878	Vernacular Press Act

PRE-MODERN WORLD IN 4 LINES

- Silk routes: silk and pottery from China, gold and silver from Europe; Buddhism, Christianity and Islam travelled too.
- Food: noodles from China; potato, maize, tomato, chillies from America after Columbus.
- Irish potato famine (1845-49): about 1 million died when the crop failed.
- Conquest: Spanish guns and germs (smallpox) won America; silver from Peru and Mexico enriched Europe.

KEY TERMS

Nation-state: state whose citizens share a common identity and history

Liberalism: freedom of the individual and equality before law

Conservatism: stress on tradition and established institutions

Plebiscite: direct vote of all people of a region on a proposal

Allegory: an abstract idea shown through a person or thing

Zollverein: Prussian-led customs union of German states, 1834

Satyagraha: struggle through truth and non-violence

Begar: labour that villagers had to give without pay

KEY TERMS (CONTD.)

Picket: protest by blocking the entrance of a shop or office

Boycott: refusal to buy, use or deal with something

Silk routes: old trade routes linking China with the West

El Dorado: fabled city of gold in South America

Calligraphy: the art of beautiful, stylised writing

Vellum: parchment made from animal skin

Reformation: 16th-century movement to reform the Catholic Church

Inquisition: Catholic court that punished heretics

PEOPLE TO REMEMBER

Metternich: Austrian chancellor, host of Vienna 1815

Mazzini: Young Italy (Marseilles), Young Europe (Berne)

Cavour: chief minister of Sardinia-Piedmont

Garibaldi: led the Red Shirts into South Italy, 1860

Bismarck: Prussian chief minister, made Germany

Frederic Sorrieu: painted "Democratic and Social Republics" 1848

Alluri Sitarama Raju: led guerrilla struggle in Gudem Hills

B.R. Ambedkar: Depressed Classes Association, 1930

Abanindranath Tagore: painted Bharat Mata

Gutenberg: first known printing press, Bible

Martin Luther: 95 Theses, 1517

Rammohun Roy: Sambad Kaumudi, 1821

Today's Practice: 30 History Questions

Ch1, Ch2, Ch3 (pre-modern), Ch5 | MCQ, A-R, 2-3 mark answers | 40 min

MULTIPLE CHOICE QUESTIONS

1 The Frankfurt Parliament of 1848 met in: (1)

(a) the Hall of Mirrors (b) the Church of St Paul
(c) the Reichstag (d) the Palace of Vienna

2 Who said "Printing is the ultimate and greatest gift of God"? (1)

(a) Mercier (b) Martin Luther
(c) Erasmus (d) Gutenberg

3 Europeans in the 16th century conquered America mainly because: (1)

(a) germs like smallpox killed huge numbers of natives
(b) the natives invited them
(c) America had no resources
(d) natives had stronger armies

4 Which one was NOT carried from the Americas to the rest of the world? (1)

(a) Potato (b) Noodles
(c) Chillies (d) Maize

5 Who called Mazzini "the most dangerous enemy of our social order"? (1)

(a) Metternich (b) Bismarck
(c) Cavour (d) Napoleon

6 Who turned folk dances like the polonaise and mazurka into nationalist symbols in Poland? (1)

(a) Johann Herder (b) Eugene Delacroix
(c) Karol Kurpinski (d) Lord Byron

7 Who printed the first known Bible on a press? (1)

(a) Johannes Gutenberg (b) Martin Luther
(c) William Caxton (d) Marco Polo

8 Which group was hesitant to join the Civil Disobedience Movement because of its link with untouchability? (1)

(a) Many Dalit leaders (b) Rich peasants
(c) Indian merchants (d) Women of the cities

9 Who wrote "Gulamgiri" about the injustices of caste? (1)

(a) E.V. Ramaswamy Naicker (b) Rammohun Roy
(c) B.R. Ambedkar (d) Jyotiba Phule

10 Which paper was edited by Bal Gangadhar Tilak? (1)

(a) Shamsul Akhbar (b) Bengal Gazette
(c) Kesari (d) Sambad Kaumudi

11 The first clear expression of nationalism came with which event? (1)

(a) The Treaty of Vienna, 1815
(b) The unification of Italy
(c) The French Revolution of 1789
(d) The Greek War of Independence

12 The Swaraj Party was formed by: (1)

(a) Ambedkar and Jinnah
(b) Gandhiji and Nehru
(c) Tilak and Gokhale
(d) C.R. Das and Motilal Nehru

13 The Simon Commission was set up in response to the demand for: (1)

(a) release of political prisoners
(b) abolition of salt tax
(c) constitutional reform in India
(d) separate electorates for Muslims

14 Which group was "Khilafat" mainly concerned with? (1)

(a) Tribal forest rights
(b) The power of the Ottoman Caliph
(c) Indigo planters in Bihar
(d) Mill workers in Ahmedabad

15 Germania wears a crown of oak leaves, which stands for: (1)

(a) readiness to fight (b) liberation
(c) heroism (d) peace

16 Which Italian state was ruled by an Italian princely house before unification? (1)

(a) Sardinia-Piedmont
(b) Venetia
(c) Kingdom of the Two Sicilies
(d) Lombardy

ASSERTION-REASON

17 **Assertion (A):** Industrialists like Purshottamdas Thakurdas supported the Civil Disobedience Movement.
Reason (R): They wanted protection against imports of foreign goods. (1)

(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

18 **Assertion (A):** Gandhiji chose salt as the symbol of protest in 1930.
Reason (R): Salt was used by the rich and poor alike, and the tax on it was oppressive. (1)

(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

19 **Assertion (A):** Print helped spread Martin Luther's ideas.
Reason (R): His 95 Theses were printed and widely read. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

20 **Assertion (A):** The silk routes carried only goods between Asia and Europe.
Reason (R): Buddhism spread from India along the silk routes. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

21 **Assertion (A):** The Frankfurt Parliament of 1848 failed to unite Germany.
Reason (R): King Friedrich Wilhelm IV of Prussia rejected the crown it offered and the aristocracy and military opposed it. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

22 **Assertion (A):** The Vernacular Press Act of 1878 gave freedom to Indian newspapers.
Reason (R): It gave the government power to censor reports in the vernacular press. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

23 **Assertion (A):** Mazzini's Young Italy aimed at a unitary Italian republic.
Reason (R): Mazzini believed nations were the natural units of mankind. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

SHORT ANSWER QUESTIONS

24 Why did some people fear the effect of easily available printed books? Give two points. (2)

25 Why did Gandhiji start the Non-Cooperation Movement? Give two reasons. (2)

26 How did Napoleon's administrative measures make life easier for ordinary people? Give three points. (3)

27 How did print help women in 19th-century India? Give two points. (2)

28 What was the effect of the spread of smallpox in America in the 16th century? (2)

29 What was the Poona Pact of 1932? (2)

30 Describe the role of Otto von Bismarck in the unification of Germany. (3)

Day 43 Answers

1 (b) the Church of St Paul.
2 (b) Martin Luther.
3 (a) germs like smallpox killed huge numbers of natives.
4 (b) Noodles.
5 (a) Metternich.
6 (c) Karol Kurpinski.
7 (a) Johannes Gutenberg.
8 (a) Many Dalit leaders.
9 (d) Jyotiba Phule.
10 (c) Kesari.
11 (c) The French Revolution of 1789.
12 (d) C.R. Das and Motilal Nehru.
13 (c) constitutional reform in India.
14 (b) The power of the Ottoman Caliph.
15 (c) heroism.
16 (a) Sardinia-Piedmont.
17 (a) Both true, R explains A.
18 (a) Both true, R explains A.
19 (a) Both true, R explains A.
20 (d) A false, R true.
21 (a) Both true, R explains A.
22 (d) A false, R true.
23 (a) Both true, R explains A.
24 (1) Religious authorities and monarchs feared that rebellious and irreligious ideas would spread unchecked. (2) Writers feared that wrong ideas would spread and the authority of valuable literature would be destroyed.

25 (1) To protest against the Rowlatt Act and the Jallianwala Bagh massacre. (2) To support the Khilafat issue and win swaraj, since British rule survived only through Indian cooperation.

26 (1) Civil Code 1804: equality before law and right to property. (2) Feudal dues and serfdom abolished; guild restrictions removed. (3) Better transport and communication; uniform laws, weights, measures and currency helped trade.

27 (1) Women began reading and writing; journals were written by women, for women. (2) Writers like Rashsundari Debi and Tarabai Shinde wrote about women's lives, and some like Kailashbashini Debi wrote about their experiences.

28 It killed and wiped out whole native communities who had no immunity, making the Spanish conquest easy, often even before any fighting began.

29 An agreement between Gandhiji and Dr B.R. Ambedkar: the Depressed Classes (later Scheduled Castes) got reserved seats in provincial and central councils, but they were to be voted in by the general electorate.

30 (1) As chief minister of Prussia he led the movement with the Prussian army and bureaucracy. (2) Three wars over seven years, with Austria, Denmark and France, ended in Prussian victory. (3) In January 1871 the Prussian king William I was proclaimed German Emperor at Versailles.

DAY 43 COMPLETE?

- [ ] Timeline written from memory

- [ ] Mistakes noted

Next: Day 44, Geography round 2

DAY 44

Geography | Revision round 2

All 6 Geography Chapters + Maps

Soils, crops, resources, industries and every map item from memory

Aaj ka target

- [ ] Geography ke 6 chapters + maps
- [ ] 30 sawal, galat wale lal pen se
- [ ] 12 map groups memory se
- [ ] 2 ghante, atlas band rakhna

Soils at a Glance (Ch1)

Soil	Where	Remember
Alluvial	Northern plains, river deltas, coast	Most widespread; very fertile; khadar new, bangar old
Black (regur)	Deccan trap: Maharashtra, Gujarat, MP	Holds moisture; cracks when dry; cotton
Red and yellow	Eastern and southern Deccan, Odisha, Chhattisgarh	Red from iron; yellow when hydrated
Laterite	Kerala, Karnataka, TN hills, Odisha	Heavy rain leaching; tea, coffee, cashew
Arid	Rajasthan	Sandy, saline; kankar layer below
Forest	Hills and mountains	Loamy in valleys, coarse on slopes

Crops: Season and Conditions (Ch4)

Crop	Season	Conditions and leading areas
Rice	Kharif	Above 25°C, above 100 cm rain; WB, UP, Punjab
Wheat	Rabi	50-75 cm rain; Punjab, Haryana, UP, MP
Maize	Kharif (rabi in Bihar)	21-27°C, old alluvial soil
Millets	Kharif	Jowar, bajra, ragi; dry areas
Sugarcane	Long duration	21-27°C, 75-100 cm; UP largest

Crop	Season	Conditions and leading areas
Tea	Plantation	Well-drained soil, frost-free; Assam
Coffee	Plantation	Arabica; Karnataka (Nilgiris)
Cotton	Kharif	Black soil, 210 frost-free days
Jute	Kharif	Golden fibre; West Bengal

SEASONS IN ONE LINE

Rabi: sown Oct-Dec, cut Apr-Jun (wheat, barley, gram, mustard). **Kharif**: sown with monsoon, cut Sep-Oct (rice, maize, jowar, bajra, cotton, jute). **Zaid**: between the two (watermelon, muskmelon, cucumber, fodder).

FORESTS AND WILDLIFE

- Reserved (over half), protected (about one-third), unclassed.
- Wildlife Protection Act 1972; Project Tiger 1973.

FORESTS AND WILDLIFE

- Chipko, Beej Bachao Andolan, JFM (Odisha 1988).
- Bishnois of Rajasthan protect blackbuck and trees.

WATER RESOURCES

- Scarcity from over-use, population, pollution.
- Multipurpose projects: irrigation, power, flood control.
- Opposition: Narmada Bachao Andolan, displacement.
- Harvesting: guls/kuls, tankas, rooftop in Shillong, bamboo drip.

MINERALS AND ENERGY

- Ores in veins/lodes (igneous), beds (sedimentary).
- Magnetite best iron ore; hematite most used.
- Bauxite gives aluminium; mica in electrical industry.
- Non-conventional: solar, wind, tidal, geothermal, biogas.

MANUFACTURING

- Agro-based: cotton, jute, sugar; mineral-based: steel.
- Iron and steel is a basic industry.
- Chotanagpur plateau has most steel plants.
- Pollution: air, water, thermal, noise; treat effluents.

Maps from Memory: Every Board Map Item

TAKE A BLANK OUTLINE MAP OF INDIA. MARK EACH GROUP FROM MEMORY, THEN CHECK WITH THE STATE COLUMN. TICK ROUND 1 TODAY, ROUND 2 BEFORE MOCK 2.

Group	Items (state)	R1	R2
Dams (8)	Salal (J&K), Bhakra Nangal (HP-Punjab), Tehri (Uttarakhand), Rana Pratap Sagar (Rajasthan), Sardar Sarovar (Gujarat), Hirakud (Odisha), Nagarjuna Sagar (Telangana-AP), Tungabhadra (Karnataka)	☐	☐
Soils	Identify: alluvial, black, red and yellow, laterite, arid, forest soils	☐	☐
Rice and wheat	Rice: West Bengal, UP, Punjab, coastal and delta areas. Wheat: Punjab, Haryana, UP, MP, Rajasthan	☐	☐
Largest producers	Sugarcane: UP; Tea: Assam; Coffee: Karnataka; Rubber: Kerala; Cotton: Gujarat, Maharashtra; Jute: West Bengal	☐	☐
Iron ore mines	Mayurbhanj (Odisha), Durg (Chhattisgarh), Bailadila (Chhattisgarh), Bellary (Karnataka), Kudremukh (Karnataka)	☐	☐
Coal mines	Raniganj (WB), Bokaro (Jharkhand), Talcher (Odisha), Neyveli (TN, lignite)	☐	☐

Group	Items (state)	R1	R2
Oil fields	Digboi, Naharkatia (Assam); Mumbai High, Bassien (offshore Maharashtra); Kalol, Ankaleshwar (Gujarat)	☐	☐
Thermal power	Namrup (Assam), Singrauli (Madhya Pradesh), Ramagundam (Telangana)	☐	☐
Nuclear power	Narora (UP), Kakrapara (Gujarat), Tarapur (Maharashtra), Kalpakkam (TN)	☐	☐
Cotton textiles	Mumbai, Indore, Surat, Kanpur, Coimbatore	☐	☐
Iron and steel	Durgapur (WB), Bokaro, Jamshedpur (Jharkhand), Bhilai (Chhattisgarh), Vijayanagar (Karnataka), Salem (TN)	☐	☐
Software parks	Noida, Gandhinagar, Mumbai, Pune, Hyderabad, Bengaluru, Chennai, Thiruvananthapuram	☐	☐

MAP EXAM ALERT

Mark with a dot and write the name neatly next to it. In the board paper, Geography maps carry 3 marks and History maps 2 marks. Soils, rice/wheat areas and crop states are asked as **identify**; dams, mines, plants and industries as **locate and label**.

Today's Practice: 30 Geography Questions

All 6 chapters | MCQ, A-R, 2-3 mark answers | 40 min

MULTIPLE CHOICE QUESTIONS

1 Which crop needs 210 frost-free days and black soil? (1)
(a) Cotton (b) Jute (c) Rice (d) Tea

2 Which is the largest producer of tea in India? (1)
(a) Karnataka (b) Assam
(c) Kerala (d) Punjab

3 Tidal energy in India can be produced in the: (1)
(a) Bay of Bengal near Kolkata
(b) Andaman Sea
(c) Gulf of Khambhat
(d) Gulf of Mannar

4 Resources owned by the whole nation, like minerals and water, are called: (1)
(a) Community resources (b) International resources
(c) Individual resources (d) National resources

5 Slash and burn farming is called "jhumming" in: (1)
(a) Kerala (b) Rajasthan
(c) North-eastern states (d) Punjab

6 Which dam is built on the Sutlej? (1)
(a) Hirakud (b) Bhakra Nangal
(c) Nagarjuna Sagar (d) Tehri

7 "Guls" or "kuls" are diversion channels found in: (1)
(a) Kerala (b) Meghalaya
(c) Western Himalayas (d) Rajasthan

8 Most iron and steel plants are on the Chotanagpur plateau because: (1)
(a) raw materials are found close by
(b) the sea is near
(c) the soil is fertile
(d) the climate is cool

9 Where is Neyveli, known for lignite coal? (1)
(a) Odisha (b) West Bengal
(c) Jharkhand (d) Tamil Nadu

10 Bauxite is the ore of: (1)
(a) copper (b) aluminium
(c) manganese (d) iron

11 The Beej Bachao Andolan is linked with: (1)
(a) Tehri (b) Chambal (c) Sariska (d) Odisha

12 Which is a zaid crop? (1)
(a) Mustard (b) Watermelon
(c) Rice (d) Wheat

13 Deep channels cut by running water that make land unfit for farming are called: (1)
(a) sheet wash (b) shelter belts
(c) terraces (d) gullies (badlands)

14 Which animal is protected under Project Tiger? (1)
(a) One-horned rhino (b) Asiatic lion
(c) Kashmir stag (d) Tiger

15 The best quality iron ore with up to 70% iron is: (1)
(a) hematite (b) magnetite
(c) siderite (d) limonite

16 Agenda 21 was signed at the: (1)
(a) Rio de Janeiro Earth Summit, 1992
(b) Paris Summit, 2015
(c) Kyoto meeting, 1997
(d) Stockholm Conference, 1972

17 The first successful cotton mill in India was set up in: (1)
(a) Kolkata (1855) (b) Mumbai (1854)
(c) Kanpur (1869) (d) Ahmedabad (1861)

18 Which forest category is the most valuable for conservation? (1)
(a) Community forests (b) Protected forests
(c) Reserved forests (d) Unclassed forests

19 The Bhoodan-Gramdan movement was started by: (1)
(a) Vinoba Bhave (b) Sunderlal Bahuguna
(c) Jawaharlal Nehru (d) M.S. Swaminathan

20 India's "golden fibre" is: (1)
(a) rubber (b) silk (c) cotton (d) jute

21 In which state is overgrazing a main cause of land degradation? (1)
(a) Rajasthan (b) Assam
(c) Kerala (d) Jharkhand

22 Which city is called the electronic capital of India? (1)
(a) Noida (b) Bengaluru
(c) Hyderabad (d) Pune

23 Who called dams the "temples of modern India"? (1)

(a) Vinoba Bhave (b) Mahatma Gandhi
(c) Medha Patkar (d) Jawaharlal Nehru

ASSERTION-REASON

24 **Assertion (A):** Laterite soil is suitable for tea and coffee.
Reason (R): Laterite soil is rich in humus and needs no manure. (1)

(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

25 **Assertion (A):** Thermal pollution happens when hot water from plants is drained into rivers.
Reason (R): Hot water harms aquatic life. (1)

(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

26 **Assertion (A):** Rainwater harvesting is common in Rajasthan.
Reason (R): Rajasthan gets low rainfall and water is scarce. (1)

(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

SHORT ANSWER QUESTIONS

27 Give two reasons why multipurpose projects are opposed. (2)

28 Why is it necessary to conserve mineral resources? Give three reasons. (3)

29 Distinguish between rabi and kharif crops. (2)

30 Explain any three measures to conserve soil. (3)

Day 44 Answers

1 **(a)** Cotton. Maharashtra and Gujarat grow it.

2 **(b)** Assam. Tea is a plantation crop.

3 **(c)** Gulf of Khambhat. Also the Gulf of Kachchh.

4 **(d)** National resources.

5 **(c)** North-eastern states. A primitive subsistence method.

6 **(b)** Bhakra Nangal. It is on the Himachal-Punjab side.

7 **(c)** Western Himalayas. They carry water for farming.

8 **(a)** raw materials are found close by.

9 **(d)** Tamil Nadu. Lignite is low-grade brown coal.

10 **(b)** aluminium. Aluminium is light and strong.

11 **(a)** Tehri. It showed farming without chemicals is possible.

12 **(b)** Watermelon. Grown in the short summer season.

13 **(d)** gullies (badlands). The Chambal basin has such ravines.

14 **(d)** Tiger. Launched in 1973.

15 **(b)** magnetite. It has excellent magnetic qualities.

16 **(a)** Rio de Janeiro Earth Summit, 1992.

17 **(b)** Mumbai (1854). Near the cotton belt and a port.

18 **(c)** Reserved forests. More than half of India's forest land.

19 **(a)** Vinoba Bhave. Land was given to the landless.

20 **(d)** jute. West Bengal leads in jute.

21 **(a)** Rajasthan. Also Gujarat, MP and Maharashtra.

22 **(b)** Bengaluru. A big IT hub.

23 **(d)** Jawaharlal Nehru. Dams were seen as a sign of progress.

24 **(c)** A true, R false. It is poor in humus; with manure it suits tea and coffee.

25 **(b)** Both true, R does not explain A. Both are true, but R tells the effect, not the reason.

26 **(a)** Both true, R explains A. Tankas store rain for drinking.

27 (1) Large-scale displacement of local people without proper rehabilitation. (2) Damage to ecology: loss of forests, sedimentation of reservoirs, and floods when dams release water.

28 (1) Minerals are finite and non-renewable. (2) They take millions of years to form, much slower than we use them. (3) Continued mining raises cost as ores get deeper and poorer. So recycle metals, use substitutes and plan use.

29 Rabi: sown in winter (October-December), harvested in summer (April-June): wheat, gram, mustard. Kharif: sown with the monsoon, harvested in September-October: rice, maize, cotton, jute.

30 (1) Contour ploughing along hill contours. (2) Terrace farming on slopes and strip cropping with grass strips. (3) Shelter belts of trees to check wind erosion in dry areas.

DAY 44 COMPLETE? ☐ Maps Round 1 done
☐ 30 questions checked
☐ Weak map items noted
Next: Day 45, MOCK TEST 1

DAY 45

MOCK TEST 1 OF 3

Full Board Paper: Mock Test 1

One sitting, 3 hours, exactly like the board exam. Check only after the bell.

Aaj ka target
- ☐ Mock Test 1: board jaisa paper, 38 sawal, 80 marks
- ☐ Answer key bell bajne ke baad hi kholna
- ☐ 3 ghante ek baithak, book aur phone door
- ☐ Marks Self-check strip mein likho

MOCK TEST 1

Time: 3 hours | Max. marks: 80

1. This paper has 38 questions in four sections: A History, B Geography, C Political Science, D Economics. All questions are compulsory.
2. Each section carries 20 marks. MCQs and Assertion-Reason questions carry 1 mark each.
3. Very short answer (2 marks): about 40 words. Short answer (3 marks): about 60 words. Long answer (5 marks): about 120 words.
4. Case-based questions carry 4 marks, with sub-parts of 1 or 2 marks.
5. Q9 (History, 2 marks) and Q19 (Geography, 3 marks) are map questions. Attach the outline map of India inside your answer book.
6. There is no overall choice. Internal choice (OR) is given in every 5-mark question; attempt only one of the two.

A History

Q1 to Q9 | 20 marks

1 After Napoleon was defeated in 1815, which kind of government did most European states set up to keep order and crush revolutionary ideas? (1)

(a) Liberal **(b)** Federal
(c) Conservative **(d)** Feudal

2 Fill in the missing session: **Calcutta** 1920 | **Madras** 1927 | _____ 1929 (the session that demanded Purna Swaraj). (1)

(a) Bombay **(b)** Nagpur **(c)** Pune **(d)** Lahore

3 A reformer prints thousands of pamphlets questioning old religious practices and they spread among common people. Why would the religious authority see this as a threat? (1)

(a) Print made religious books costlier.
(b) Print let dissenting ideas spread quickly to many readers.
(c) Only the Church controlled all printing presses.
(d) Common people were banned from reading.

4 **Assertion (A):** After Poland was occupied by Russia, the Russian language was forced on its people.
Reason (R): The use of Polish came to be seen as a symbol of the struggle against Russian dominance. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

5 Give two examples to show that food travelled across long distances in the pre-modern world. (2)

6 Mahatma Gandhi and Dr B.R. Ambedkar signed an agreement in September 1932 after a long disagreement over separate electorates. Name the agreement and state its main features. (3)

7 Describe the process of the unification of Italy. (5)

OR

Analyse the process by which Germany was unified. (5)

8 Read the source and answer the questions that follow. (4)

Gandhiji felt the movement was turning violent in many places and that satyagrahis needed proper training, so he withdrew it in February 1922. C.R. Das and Motilal Nehru formed the Swaraj Party to contest elections to the provincial councils set up under the Government of India Act of 1919 and oppose British policies from inside. Younger leaders such as Jawaharlal Nehru and Subhas Chandra Bose pressed for mass agitation and full independence. Two factors shaped Indian politics in the late 1920s: the worldwide economic depression, with farm prices falling from 1926 and collapsing after 1930, and the Simon Commission.

(i) Which movement is referred to in the source, and why was it withdrawn? (1)
(ii) Why did C.R. Das and Motilal Nehru want to return to council politics? (1)
(iii) Explain the two factors that shaped Indian politics in the late 1920s. (2)

9 **On the outline map of India, locate and label the following with suitable symbols:**
(a) The place where the Indian National Congress session was held in September 1920.
(b) The place where Mahatma Gandhi broke the salt law in 1930. (2)

B Geography

Q10 to Q19 | 20 marks

10 **A farmer sows crops twice in a year on the same field, besides his net sown area. Which term describes the total area cropped in that year?** (1)

(a) Net sown area **(b)** Gross cropped area
(c) Current fallow **(d)** Culturable waste land

11 **Which of the following best reflects the aim of Agenda 21 signed at Rio de Janeiro in 1992?** (1)

(a) Faster industrial growth without environmental rules
(b) Local participation in resource conservation and sustainable development
(c) Each country ignoring global agreements
(d) Using resources without thinking of the future

12 **Ravi, studying India's environmental laws, finds a law implemented in 1972 to conserve the country's wildlife. Which law is it?** (1)

(a) Environment Protection Act
(b) Indian Wildlife (Protection) Act
(c) Forest Conservation Act
(d) Biological Diversity Act

13 **Assertion (A):** The availability of water resources varies over space and time.
Reason (R): Availability of water resources helps in storing water. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

14 **A farmer grows rice in the kharif season and wheat in the rabi season on the same field. This mainly shows:** (1)

(a) Shifting cultivation
(b) Plantation agriculture
(c) Multiple cropping following the seasons
(d) Subsistence farming without irrigation

15 **Miners inhale dust and harmful fumes and face roof collapse, flooding and fires in coal mines. What does this show about mining?** (1)

(a) It lowers soil fertility only.
(b) It causes health hazards and safety risks to miners.
(c) It raises land productivity.
(d) It only pollutes nearby rivers.

16 **Regions with alluvial soil are densely populated and intensively cultivated. Give two reasons.** (2)

17 **"There are many ways to solve the problem of land degradation." Explain any five measures with examples.** (5)

OR

"Multipurpose river projects have faced resistance in recent years." Explain any five reasons for this resistance. (5)

18 **Read the source and answer the questions that follow.** (4)

In India much of the forest and wildlife is owned or managed by the government through the Forest Department. More than half of the total forest land has been declared reserved forest; these are regarded as the most valuable for conservation. Almost one-third of the forest area is protected forest, which is protected from any further depletion. All other forests and wastelands belonging to the government and private individuals and communities are unclassed forests.

(i) What is the main feature of a protected forest? (1)
(ii) Why are reserved forests regarded as the most valuable for conservation? (1)
(iii) How does classifying forests help preserve their biodiversity? (2)

19 On the outline map of India, locate and label any three of the following:
(a) Salal Dam (b) Bailadila iron ore mine (c) Bhilai iron and steel plant (d) Kakrapara nuclear power plant (3)

C Political Science

Q20 to Q28 | 20 marks

20 According to the idea of power sharing, what is the long-term result of imposing the will of the majority community on others? (1)

(a) Quick economic growth
(b) It undermines national unity and causes political instability
(c) Permanent strength for the majority
(d) No need for consensus in politics

21 Arrange the institutions in **increasing** order of the area they cover:
(I) Panchayat Samiti (II) State Government (III) Gram Panchayat (IV) Zila Parishad (1)

(a) (III), (I), (IV), (II) **(b)** (I), (III), (II), (IV)
(c) (III), (IV), (I), (II) **(d)** (IV), (I), (III), (II)

22 **Assertion (A):** Elections in India are all about caste and nothing else.
Reason (R): Every candidate and party needs to win the confidence of more than one caste and community to win elections. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

23 Which authority recognises political parties and decides whether a party is a national or a state party? (1)

(a) President of India **(b)** Election Commission
(c) Speaker of Lok Sabha **(d)** Supreme Court

24 What does the system of checks and balances ensure in horizontal power sharing? (2)

25 A web search for "teacher" shows mostly women, while a search for "pilot" shows mostly men. What does this show about the sexual division of labour? Explain with an example. (2)

26 How did the Sri Lankan Tamils express their discontent against the majoritarian measures taken after 1956? (3)

27 "Power sharing is important in countries with diverse communities." Support the statement with examples from Belgium. (5)

OR

"Democracies do not appear to be very successful in reducing economic inequalities." Justify the statement. (5)

28 Read the source and answer the questions that follow. (4)

Nannu, a daily wage earner in East Delhi, lost his ration card and applied for a duplicate in January 2004. For three months he went to the local Food and Civil Supplies office again and again, but officials would not do his work or even tell him the status. He then filed an application under the Right to Information Act, asking for the daily progress on his application, the names of the officials responsible and the action to be taken against them. Within a week an inspector visited him to say the card was ready. When he went to collect it, the officer offered him tea and requested him to withdraw his RTI application.

(i) What does Nannu's example show about the right he used? (1)
(ii) What impact did his RTI application have on the officials? (2)
(iii) Which outcome of democracy does this passage show? (1)

D Economics

Q29 to Q38 | 20 marks

29 Children in which state have attained the highest school attendance, as per the NCERT comparison of Haryana, Kerala and Bihar? (1)

(a) Haryana
(b) Bihar
(c) Kerala
(d) Haryana and Kerala equally

30 Which statement correctly describes sustainable development? (1)

(a) Using natural resources without thinking of future generations
(b) Meeting present needs while keeping in mind the needs of future generations
(c) Meeting future needs even if present needs go unmet
(d) Using resources only for the present

31 **Assertion (A):** Underemployment is also called disguised unemployment.
Reason (R): Each person is doing some work, but no one is fully employed according to their potential. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

32 Rahul has cotton and needs wheat; Anush has wheat and needs cotton. Which removes the need for this kind of exact match of wants? (1)

(a) Exchanging one commodity for another
(b) Credit on commodity
(c) Loan on commodity
(d) Using money as a medium of exchange

33 Consider the statements about Self Help Groups:
(I) SHGs help borrowers overcome the problem of lack of collateral.
(II) Members get timely loans for many purposes at a high rate of interest. (1)

(a) Only (I) is correct. **(b)** Only (II) is correct.
(c) Both are correct. **(d)** Both are incorrect.

34 Which of these is an example of globalisation? (1)

(a) A government portal advertising goods of local vendors
(b) A furniture store of a foreign company in Bengaluru selling goods made in China
(c) A local Sunday market selling village vegetables
(d) A handicraft fair of local artisans

35 Suggest any three ways to improve public facilities in India. (3)

36 "Workers are exploited in the unorganised sector." Give three reasons to support the statement. (3)

37 "Modern currency has no use of its own." Do you agree? Why is it accepted as a medium of exchange? (3)

38 "Technology has stimulated the process of globalisation." Explain with five points. (5)

OR

Why is the tertiary sector becoming more and more important in India? Give five reasons. (5)

Self-check score

History	Geography	Pol. Science	Economics	Total
__/20	__/20	__/20	__/20	__/80

Mock Test 1: answer key and marking points

1-34 **Objective answers:** **1** (c) **2** (d) **3** (b) **4** (b) **10** (b) **11** (b) **12** (b) **13** (c) **14** (c) **15** (b) **20** (b) **21** (a) **22** (d) **23** (b) **29** (c) **30** (b) **31** (a) **32** (d) **33** (a) **34** (b)

5
- Noodles travelled west from China and became spaghetti in Italy.
- Potatoes, soya, groundnuts, maize, tomatoes and chillies came to Europe and Asia from America after its discovery.
- (Any two, 1 mark each)

6
- Poona Pact, September 1932.
- Depressed Classes (Dalits) got reserved seats in provincial and central legislative councils.
- They were to be voted in by the general electorate, not by separate electorates.

7
- Before 1848: Italy divided into seven states; only Sardinia-Piedmont had an Italian princely house.
- Mazzini formed Young Italy for a unitary republic; revolts of 1831 and 1848 failed.
- Victor Emmanuel II of Sardinia-Piedmont and his chief minister Cavour sought unity through war and diplomacy.
- Through an alliance with France, Sardinia-Piedmont defeated Austria in 1859.
- Garibaldi and his Red Shirts (1860) took South Italy and the Kingdom of the Two Sicilies; in 1861 Victor Emmanuel II was proclaimed king of united Italy.

OR
- Liberal initiative of the middle classes (Frankfurt Parliament 1848) was crushed by monarchy, military and Junkers.
- Prussia took the lead; chief minister Otto von Bismarck was the architect, helped by the Prussian army and bureaucracy.
- Three wars in seven years with Austria, Denmark and France ended in Prussian victory.
- January 1871: Prussian king William I proclaimed German Emperor at Versailles.
- New state stressed modernising currency, banking, legal and judicial systems; Prussian measures became a model.

8 • (i) Non-Cooperation Movement; Gandhiji withdrew it in February 1922 as it was turning violent (Chauri Chaura) and satyagrahis needed training.
• (ii) They wanted to oppose British policies from inside the councils and argue for reform.
• (iii) The worldwide economic depression: agricultural prices fell from 1926 and collapsed after 1930, causing turmoil in the countryside; the Simon Commission (1928), which had no Indian member, was opposed everywhere.

9 (a) Calcutta (b) Dandi (Gujarat), correctly located and labelled.

16 • Alluvial soil is very fertile and rich in potash, phosphoric acid and lime, ideal for sugarcane, paddy, wheat and pulses.
• It is found in level plains with easy irrigation, so farming is intensive and supports many people.

17 • Afforestation and proper management of grazing.
• Planting shelter belts of plants and stabilising sand dunes by growing thorny bushes in arid areas.
• Control on overgrazing; contour ploughing, terrace farming and strip cropping on slopes.
• Proper management of waste lands; control of mining activities.
• Proper discharge and disposal of industrial effluents and waste after treatment.
OR • Displacement of local communities and loss of livelihood (Narmada Bachao Andolan, Tehri).
• Regulating rivers affects natural flow, poor sediment flow and excessive sedimentation at reservoir bottoms.
• Fragmentation of rivers harms aquatic life and their migration.
• Flood plains get submerged; induced earthquakes, water-borne diseases and pollution from excessive water use.
• Benefits go mostly to landowners and large farmers; inter-state water disputes (e.g. Krishna-Godavari).

18 • (i) Protected forests are protected from any further depletion.
• (ii) They are the largest category, conserved strictly for forest and wildlife.
• (iii) Each category gets a set level of protection, so habitats are not destroyed; reserved and protected forests keep plants and animals safe from clearing and hunting.

19 Salal: Jammu and Kashmir (on the Chenab); Bailadila: Chhattisgarh (Dantewada); Bhilai: Chhattisgarh; Kakrapara: Gujarat (near Surat). Any three, 1 mark each.

24 • Organs of government (legislature, executive, judiciary) are placed at the same level.
• Each organ checks the others, so none can have unlimited power; it keeps a balance of power.

25 • The results reflect the belief that some jobs are for women (teaching, caring) and others for men.
• This sexual division of labour is social, not biological: women can be pilots and men can be teachers.

26 • They launched political organisations and struggles for recognition of Tamil as an official language, regional autonomy and equal opportunity in education and jobs.
• Their demands were repeatedly denied.
• By the 1980s Tamil organisations demanded an independent Tamil Eelam in the north and east; this led to a civil war.

27 • Belgium has 59% Dutch speakers (Flemish), 40% French and 1% German; Brussels had a French majority.
• Equal number of Dutch and French ministers in the central government.
• Many powers given to state governments, which are not subordinate to the Centre.
• Brussels has a separate government with equal representation of both communities.
• A community government elected by each language group handles cultural, educational and language issues. Result: unity kept and civil war avoided.
OR • A small number of ultra-rich enjoy a highly disproportionate share of wealth and income.
• The share of the poorest in total income has been declining.
• The poor find it hard to meet basic needs of food, clothing, housing, education and health.
• The poor are a large part of voters, yet parties do not address their problems properly.
• In Bangladesh over half the people live in poverty; so democracy has not reduced economic inequality much.

28 • (i) The Right to Information Act empowers citizens and makes officials answerable.
• (ii) The officials became active, did the work within a week and tried to please him so that he would withdraw the application.
• (iii) Democracy produces an accountable and responsive government.

35 • Open more government schools and health centres, with teachers and doctors present.
• Strengthen the Public Distribution System with fair price shops.
• Provide clean drinking water, sanitation and electricity in rural areas. (Any three)

36 • Jobs are low-paid and often not regular; no overtime, paid leave or holidays.
• No job security: workers can be asked to leave any time.
• No provident fund, medical benefits or safe working conditions; rules are rarely followed.

37 • Yes: paper notes and coins have no use of their own.
• They are accepted because they are authorised by the government; the RBI issues notes on behalf of the central government.
• Rupee is legal tender: no one in India can legally refuse it in settling transactions.

38 • Rapid improvement in technology is a major factor that enabled globalisation.
• Transport technology: containers and faster, cheaper transport moved goods over long distances at lower cost.
• Information and communication technology: telecom, computers and the internet link the world instantly.
• Satellites, mobile phones, fax and e-mail make communication from remote areas easy.
• Services like designing, data entry, call centres and accounts can be done in one country for buyers in another.
OR • Basic services like hospitals, schools, post, police, banks and transport are needed by all.
• Development of agriculture and industry creates demand for transport, trade and storage.
• Higher incomes create demand for eating out, tourism, shopping, private schools and hospitals.
• New services based on information and communication technology have grown fast.
• It is the largest producing sector in GDP, though not the largest employer.

AFTER THE BELL: READ YOUR SCORE HONESTLY

70 and above: board-ready; keep the rhythm. **55 to 69:** good base; the lost marks are mostly in 3 and 5 markers, so practise writing points. **Below 55:** no panic; redo the chapters where you lost the most marks before Mock Test 2 on Day 49. Write every wrong answer in your Mistake Book today, with the correct point next to it.

DAY 45 COMPLETE?

- [ ] Wrote the full paper in 3 hours
- [ ] Checked with the key
- [ ] Every lost mark noted in the Mistake Book

Next: Day 46, Political Science round 2

DAY 46

Political Science | Revision round 2

All 5 Political Science Chapters

Comparisons, lists and key terms that boards love to ask

Aaj ka target

- [ ] Pol Sci ke 5 chapters ek round mein
- [ ] 16 key terms ka matlab ek-ek line
- [ ] 30 sawal, comparisons pe dhyaan
- [ ] 2 ghante, table wale points pakke

Ch1 Power-sharing: Belgium vs Sri Lanka

Point	Belgium	Sri Lanka
Population	Dutch 59%, French 40%, German 1%	Sinhala 74%, Tamil 18%
Capital issue	Brussels: French majority, Dutch minority	Tamils: Sri Lankan and Indian Tamils
Path chosen	Accommodation: power shared	Majoritarianism: power with majority

Point	Belgium	Sri Lanka
Key steps	Equal ministers; community government; state powers	1956 Sinhala-only Act; preference in jobs; Buddhism protected
Result	Unity, EU headquarters in Brussels	Distrust, civil war

Ch2 Federalism

	Coming together	Holding together
How formed	Independent states pool sovereignty	Large country divides power
Power of units	Units are equally powerful, strong	Centre stronger; units may be unequal
Examples	USA, Switzerland, Australia	India, Spain, Belgium

List	Subjects
Union List	Defence, foreign affairs, banking, currency, communications
State List	Police, trade, commerce, agriculture, irrigation
Concurrent List	Education, forest, trade unions, marriage, adoption, succession
Residuary	Subjects not in any list, e.g. computer software: Union

DECENTRALISATION IN 3 LINES

Rural: **gram panchayat** (sarpanch) under the gram sabha, **panchayat samiti** (block), **zilla parishad** (district, chairperson). Urban: municipality (chairperson), municipal corporation (mayor). 1992 amendment: regular elections, reservations (one-third for women), State Election Commission.

SHIVAM BHAIYA KA NOTE

Pol Sci mein tables hi hero hain. Belgium vs Sri Lanka, coming vs holding together, teen lists: ye teeno khud bana ke dekho bina dekhe. 3-mark answer mein comparison table banao, examiner khush!

Ch3 and Ch4: Society and Parties

System	Meaning	Example
One-party	Only one party allowed to rule	China
Two-party	Power usually alternates between two main parties	USA, UK
Multi-party	Several parties; often coalitions or alliances	India

GENDER, RELIGION, CASTE: MUST-KNOW

- Sexual division of labour; women in public life still low.
- Communalism uses religion to divide; India is secular.
- Caste in politics; politics in caste (new caste groupings).
- Caste alone does not decide elections.

PARTIES: FUNCTIONS AND CHALLENGES

- Contest elections, put forward policies, make laws.
- Form and run governments; act as opposition.
- Challenges: no internal democracy, dynasty, money and muscle, no real choice.
- Reforms: anti-defection law, affidavits, EC orders on internal elections.

CH5 OUTCOMES OF DEMOCRACY

- Accountable, responsive, legitimate government.
- Growth: small gap with dictatorships.
- Inequality and poverty still persist.
- Dignity of women and dalits; accommodates diversity.

KEY TERMS

Power-sharing: dividing power among organs, levels and groups

Majoritarianism: majority community rules as it wishes

Civil war: violent conflict between groups within a country

Federalism: power divided between a central authority and units

Decentralisation: power taken from centre and state to local government

Gram Sabha: all voters of a village; reviews the panchayat

Feminist: person who believes in equal rights for women and men

Patriarchy: system that values men more and gives them power

KEY TERMS (CONTD.)

Communalism: politics that makes religion the basis of the nation

Secular state: state with no official religion

Caste hierarchy: ladder-like order of caste groups

Political party: group that contests elections to hold power

Alliance or front: parties joining hands to contest and form government

Defection: changing party after being elected

Affidavit: signed document stating facts under oath

Transparency: right of citizens to examine how decisions are made

EXAM ALERT: POL SCI TRAPS

- Do not write "India is a coming together federation": it is **holding together**.
- Prudential reason = careful calculation of benefits; moral reason = spirit of democracy.
- Gram sabha (all voters) is different from gram panchayat (elected body).
- Communalism is not just religion in politics; it is making religion the basis of the nation and one religion superior.
- A national party needs votes in 4 states AND 4 Lok Sabha seats.

Today's Practice: 30 Political Science Questions

All 5 chapters | MCQ, A-R, 2-3 mark answers | 40 min

MULTIPLE CHOICE QUESTIONS

1 Which country has an official religion? (1)
(a) USA (b) Sri Lanka (Buddhism)
(c) India (d) Belgium

2 Which is a challenge to political parties? (1)
(a) Dynastic succession (b) Forming governments
(c) Making policies (d) Contesting elections

3 Which country has a two-party system? (1)
(a) China (b) India
(c) USA (d) Bangladesh

4 What percentage of Belgium's people speak Dutch? (1)
(a) 59% (b) 1% (c) 40% (d) 80%

5 The head of a zilla parishad is the: (1)
(a) chairperson (b) sarpanch
(c) mayor (d) collector

6 How many languages are in the Eighth Schedule of the Constitution? (1)
(a) 14 (b) 28 (c) 22 (d) 18

7 Sri Lankan Tamils make up about what share of the population? (1)
(a) 5% (b) 74% (c) 13% (d) 40%

8 The idea that men and women are equal and should have equal rights is held by: (1)
(a) feminists (b) communalists
(c) conservatives (d) casteists

9 Over half of the population lives in poverty in which democracy, as NCERT notes? (1)
(a) Bangladesh (b) Sri Lanka
(c) Switzerland (d) Belgium

10 Power shared among legislature, executive and judiciary is called: (1)
(a) community government (b) vertical distribution
(c) horizontal distribution (d) coalition

11 "Power-sharing reduces conflict between social groups." This is a: (1)
(a) moral reason (b) prudential reason
(c) legal reason (d) historical reason

12 A government formed by two or more parties together is a: (1)
(a) community government (b) federal government
(c) coalition government (d) unitary government

13 Democracy is better than other forms because it: (1)
(a) removes all poverty
(b) always gives the fastest growth
(c) avoids all conflict
(d) is legitimate, accountable and responsive

14 Which is NOT a feature of federalism? (1)
(a) The centre can change state powers at will
(b) Two or more levels of government
(c) Courts settle disputes
(d) Sources of revenue are specified

15 Which is NOT a form of communal politics? (1)
(a) Communal violence and riots
(b) Political mobilisation on religious lines
(c) Religious prejudice and stereotypes
(d) Celebrating festivals of all faiths together

16 The 1992 amendment made it compulsory to reserve for women at least: (1)
(a) all panchayat chairperson posts
(b) one-fourth of state assembly seats
(c) half of Lok Sabha seats
(d) one-third of seats in local bodies

17 Caste in politics means: (1)
(a) abolition of caste by law
(b) reservation in private jobs
(c) parties choosing candidates from the dominant caste of an area
(d) caste ending due to urbanisation

18 In a unitary system: (1)
(a) there is one level of government, or units are under the centre
(b) power is equally shared
(c) units have their own constitution
(d) states can override the centre

19 Candidates must file an affidavit giving details of their: (1)
(a) caste and religion
(b) school marks
(c) party membership fees
(d) property and criminal cases

20 A recognised national party must, among other conditions, secure at least: (1)
(a) one-third of Rajya Sabha seats
(b) 6% of votes in Lok Sabha or assembly elections in four states
(c) 50 Lok Sabha seats
(d) 10% of votes in one state

ASSERTION-REASON

21 **Assertion (A):** Women's representation in Indian legislatures has been low.
Reason (R): Women face the burden of the sexual division of labour and patriarchy. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

22 **Assertion (A):** India is a holding together federation.
Reason (R): In India, the Union has more powers than the States. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

23 **Assertion (A):** Political parties are necessary in a democracy.
Reason (R): Without parties, every candidate would be independent and no one could promise major policy changes. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

24 **Assertion (A):** Dictatorships always have higher growth than democracies.
Reason (R): Democracy aims at reducing economic inequality. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

25 **Assertion (A):** Belgium amended its Constitution four times between 1970 and 1993.
Reason (R): Its leaders wanted to accommodate both linguistic communities. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

SHORT ANSWER QUESTIONS

26 State any three steps taken in 1992 to make local government powerful. (3)

27 Name any two reforms suggested to strengthen political parties. (2)

28 Explain three forms of power-sharing in modern democracies. (3)

29 "Democracy accommodates social diversity." Explain with two points. (2)

30 What is the difference between a secular state and a theocratic state? (2)

Day 46 Answers

1 **(b)** Sri Lanka (Buddhism). India has no official religion.
2 **(a)** Dynastic succession. Top posts stay with one family.
3 **(c)** USA. Power alternates between two main parties.
4 **(a)** 59%. They live mostly in the Flemish region.
5 **(a)** chairperson. Most members are elected.
6 **(c)** 22. Hindi is the mother tongue of about 40% of Indians.

7 **(c)** 13%. With Indian Tamils, Tamils total about 18%.

8 **(a)** feminists. Feminist movements demanded equal rights.

9 **(a)** Bangladesh. Democracy has not removed poverty there.

10 **(c)** horizontal distribution.

11 **(b)** prudential reason.

12 **(c)** coalition government. Common when no party wins a majority.

13 **(d)** is legitimate, accountable and responsive.

14 **(a)** The centre can change state powers at will.

15 **(d)** Celebrating festivals of all faiths together.

16 **(d)** one-third of seats in local bodies.

17 **(c)** parties choosing candidates from the dominant caste of an area.

18 **(a)** there is one level of government, or units are under the centre.

19 **(d)** property and criminal cases.

20 **(b)** 6% of votes in Lok Sabha or assembly elections in four states.

21 **(a)** Both true, R explains A. Social barriers keep their share low.

22 **(a)** Both true, R explains A. A large country divided power, keeping the centre strong.

23 **(a)** Both true, R explains A. Parties make representative government possible.

24 **(d)** A false, R true. The growth difference is small and not always true, so A is false.

25 **(a)** Both true, R explains A. The changes created the Belgian model of power-sharing.

26 (1) Regular elections to local bodies made compulsory. (2) Seats reserved for SCs, STs, OBCs and at least one-third for women. (3) State Election Commission set up; states must share some powers and revenue with local bodies.

27 (1) A law to regulate internal affairs: membership register, internal elections, own constitution. (2) Reserve a minimum share of tickets (about one-third) for women; state funding of elections.

28 (1) Horizontal: among legislature, executive and judiciary. (2) Vertical: among central, state and local governments. (3) Among social groups (community government, reservations) and among parties, pressure groups and movements.

29 (1) It does not let the majority rule over minorities; majority keeps changing with issues. (2) Belgium shows that negotiation and power-sharing keep different groups together peacefully.

30 A secular state has no official religion and treats all religions equally (India). A theocratic or religious state gives official status to one religion (Sri Lanka gives Buddhism a special place; Pakistan, Islam).

QUICK RECALL: 12 ONE-LINERS (COVER THE RIGHT SIDE)

Belgium's capital with equal representation: Brussels

Sinhala-only Act: 1956

Belgian constitution amended: 4 times, 1970-1993

Example of coming together federation: USA

Subjects not in any list go to: Union Government

Local bodies amendment: 1992

Seats for women in local bodies: at least one-third

State with official religion (Buddhism): Sri Lanka

Founder of BSP: Kanshi Ram

One-party system example: China

Who recognises political parties: Election Commission

Law against changing party after election: Anti-defection law

TONIGHT'S 2-MINUTE RECALL

1. **Power-sharing:** Belgium shared power (equal ministers, regional, Brussels and community governments) and stayed united; Sri Lanka chose majoritarianism (1956 Sinhala-only Act) and faced civil war; power sharing is prudent (less conflict) and moral (spirit of democracy); 4 forms: organs, levels, social groups, parties and pressure groups.
2. **Federalism:** Federalism = power divided between a centre and units, each independent in its own field; USA, Switzerland, Australia came together; India, Spain, Belgium hold together; India has Union, State and Concurrent lists, residuary powers with the Union; key changes need Parliament (2/3) plus half the states.
3. **Religion and Caste:** Communalism = religion as the basis of political community, shown as beliefs, majoritarian dominance, mobilisation and violence; India is secular (no official religion, freedom of religion, no discrimination, state can intervene); caste hierarchy weakened by urbanisation and education but not gone; caste shapes politics and politics reshapes caste.
4.

TONIGHT'S 2-MINUTE RECALL

Political Parties: A party = leaders, active members, followers; 7 functions (contest elections, policies, laws, governments, opposition, public opinion, access to welfare); parties exist because representative democracy needs them; one-party (China) is undemocratic, two-party (USA, UK), multiparty (India) with alliances like NDA, UPA, Left Front.

BOARD MEIN AISE LIKHO

Q. Why did Belgium succeed in keeping its country together while Sri Lanka slipped into civil war? (3 marks)

1. **Belgium shared power:** equal Dutch and French ministers at the centre, powers to the state governments, an equal-representation government for Brussels and community governments.
2. **Sri Lanka chose majoritarianism:** the 1956 Act made Sinhala the only official language, Sinhalas got preference in jobs and universities, and the state protected Buddhism.
3. **Result:** Belgium avoided civic strife, while Sri Lankan Tamils felt alienated, demanded Tamil Eelam, and a civil war followed that ended only in 2009.

Tip: pehle dono countries ka step likho, phir result. Contrast hi marks dilata hai.

DAY 46 COMPLETE? ☐ Tables revised ☐ 30 questions checked ☐ Key terms written

Next: Day 47, Economics round 2

DAY 47

Economics | Revision round 2

All 4 Economics Chapters

Formulas, comparisons and key terms; Ch4 only the board part

Aaj ka target

- ☐ Economics ke 4 chapters (Ch4 board wala hissa)
- ☐ 6 measures/formulas zubaani, jaise per capita
- ☐ 30 sawal
- ☐ 2 ghante, calculator ki zaroorat nahi

Ch1 Development: Measures and Formulas

Measure	How it is worked out
Average (per capita) income	Total income of the country / Total population
Infant Mortality Rate (IMR)	Children dying before age 1 per 1000 live births
Literacy rate	Literate population aged 7+ as % of that age group
Net Attendance Ratio	Children aged 14-15 attending school as % of all children of that age
Body Mass Index (BMI)	Weight in kg / (height in m)^2; below 18.5 = undernourished
GDP	Value of all final goods and services produced in a year within the country

WORKED EXAMPLE

Country X: 4 people earn 8,000, 12,000, 10,000 and 10,000 rupees a month. Total = 40,000. **Average income = 40,000 / 4 = 10,000 rupees.** Country Y: incomes 1,000, 1,000, 1,000 and 37,000: average is also 10,000, but one person has almost everything. So average income hides **distribution**.

Ch2 Sectors of the Indian Economy

Basis	Organised	Unorganised
Rules	Registered; follows laws	Small, scattered units; rules often not followed
Job security	Regular jobs, security	Low pay, no security
Benefits	Paid leave, PF, medical, fixed hours	No paid leave or PF; long hours

THREE SECTORS IN INDIA

- Primary: still the largest employer of workers.
- Tertiary: largest share of GDP since 2013-14.
- Disguised unemployment is common in agriculture.
- MGNREGA 2005: 100 days of work; else allowance.

Ch3 Money and Credit

Source	Features
Formal (banks, cooperatives)	Supervised by RBI; lower interest; need collateral and documents
Informal (moneylenders, traders, relatives)	No supervision; higher interest; can trap borrowers in debt

MONEY IN ONE LOOK

- Barter fails without double coincidence of wants.
- Modern money: currency and demand deposits.
- RBI issues notes and supervises banks.
- Terms of credit: interest, collateral, documents, repayment.

SHIVAM BHAIYA KA NOTE

Economics mein formula + example = full marks. Average income ka sawal aaye to pehle total nikalo, phir log se divide karo. Aur yaad rakho: average sab kuch nahi batata, distribution bhi dekho!

Ch4 Globalisation (board part only)

WHAT IS GLOBALISATION

- Rapid integration of countries.
- Through trade, investment (MNCs), technology and movement of people.
- More choice for consumers; more competition for producers.

WHAT ENABLED IT

- Technology: transport, containers, telecom, internet.
- Liberalisation: removing trade and investment barriers (India, 1991).
- India and the G20: presidency 2023, New Delhi summit; African Union joined.

KEY TERMS

Development: progress in income and in other goals like health, education, freedom

HDI: UNDP index: income, education, health

Sustainability: meeting today's needs without harming future generations

Primary sector: uses natural resources directly: farming, fishing, mining

Secondary sector: manufacturing: turns natural products into other forms

Tertiary sector: services that support the other two: transport, banking

Disguised unemployment: more people working than needed; output does not fall if some leave

MGNREGA 2005: right to 100 days of paid work a year in rural areas

KEY TERMS (CONTD.)

Double coincidence of wants: both parties want what the other has: needed in barter

Demand deposits: bank deposits withdrawable on demand; cheques work as money

Collateral: asset pledged by a borrower as a guarantee

Debt trap: a loan that leaves the borrower worse off

SHG: 15-20 members, mostly women, pool savings and lend

Globalisation: rapid integration of countries through trade, investment, technology, people

MNC: company that owns or controls production in more than one nation

Liberalisation: removing barriers set by the government on trade and investment

EXAM ALERT: ECONOMICS TRAPS

- Per capita income is the **average** income, not the total income of a country.
- Disguised unemployment: people are working, but not productively; it is not "no work".
- Organised vs unorganised is about **rules and job security**; public vs private is about **ownership**.
- Demand deposits are money; a cheque is only an order to the bank to pay.

Today's Practice: 30 Economics Questions

All 4 chapters | MCQ, A-R, 2-3 mark answers | 40 min

MULTIPLE CHOICE QUESTIONS

1 **Which is NOT a term of credit? (1)**

(a) Mode of repayment (b) Interest rate
(c) Number of family members (d) Collateral

2 **A basket weaver belongs to which sector? (1)**

(a) Primary (b) Secondary
(c) Quaternary (d) Tertiary

3 **Which body became a permanent member of the G20 at the New Delhi summit in 2023? (1)**

(a) European Union (b) African Union
(c) ASEAN (d) SAARC

4 **Which body publishes the Human Development Report? (1)**

(a) World Bank (b) UNDP
(c) WTO (d) IMF

5 **Which is NOT counted in the Human Development Index? (1)**

(a) Education levels (b) Size of the army
(c) Per capita income (d) Life expectancy

6 **The Grameen Bank of Bangladesh was started by: (1)**

(a) Raghuram Rajan (b) Muhammad Yunus
(c) Amartya Sen (d) Manmohan Singh

7 **Five people work on a farm where two are enough. The extra three are: (1)**

(a) educated unemployed (b) fully employed
(c) disguised unemployed (d) seasonally employed

8 **Overuse of which resource in states like Punjab threatens sustainability? (1)**

(a) Forests in Kerala (b) Wind energy
(c) Solar energy (d) Groundwater

9 **Who issues currency notes on behalf of the Government of India? (1)**

(a) NABARD (b) Reserve Bank of India
(c) State Bank of India (d) Ministry of Finance

10 **Removing barriers set by the government on trade is called: (1)**

(a) liberalisation (b) privatisation
(c) protectionism (d) nationalisation

11 **Which sector became the largest producing sector in India by 2013-14? (1)**

(a) Tertiary (b) Organised
(c) Primary (d) Secondary

12 **Which is an example of the public sector? (1)**

(a) Reliance Industries
(b) Indian Railways
(c) A private hospital
(d) Tata Iron and Steel Company

13 **Which factor has most helped globalisation? (1)**

(a) Rapid improvement in technology
(b) Closing of ports
(c) Fewer means of transport
(d) Higher import taxes

14 **Workers in the unorganised sector usually: (1)**

(a) work fixed hours with overtime pay
(b) have no job security or paid leave
(c) get provident fund and medical benefits
(d) are protected by all labour laws

15 **Country A has 5 citizens with monthly incomes of 9500, 10500, 9800, 10000 and 10200 rupees. Its average income is: (1)**

(a) 9,500 rupees (b) 50,000 rupees
(c) 10,000 rupees (d) 10,500 rupees

16 **A barter system needs: (1)**

(a) a bank account
(b) double coincidence of wants
(c) a credit card
(d) collateral

17 **Self Help Groups usually have: (1)**

(a) 15-20 members, mostly women
(b) 100-200 members
(c) 2-3 members
(d) only bank officers

18 **The aim of MGNREGA 2005 is to provide: (1)**

(a) pensions to retired workers
(b) free education up to class 12
(c) loans to small farmers
(d) 100 days of guaranteed work a year to rural households

19 **A landless rural labourer would most likely want: (1)**

(a) an end to all dams
(b) more factories in cities only
(c) high prices for crops
(d) more days of work and better wages

20 **A bank uses what share of deposits to give loans? (1)**

(a) A major portion (it keeps about 15% as cash)
(b) All 100%
(c) Only 15%
(d) None of it

21 **An MNC is a company that:** (1)
(a) is owned only by a government
(b) works only in its home town
(c) sells only online
(d) owns or controls production in more than one country

22 **Kerala has a low infant mortality rate mainly because of:** (1)
(a) cold climate
(b) the highest per capita income
(c) more factories
(d) adequate basic health and education facilities

ASSERTION-REASON

23 **Assertion (A):** The tertiary sector has grown in importance in India.
Reason (R): Basic services, growth of trade, transport and IT need service workers. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

24 **Assertion (A):** Average income is a useful but limited measure of development.
Reason (R): It hides how income is distributed among people. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

25 **Assertion (A):** Globalisation has benefited all workers equally.
Reason (R): Technology has made it easy to link production across countries. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

26 **Assertion (A):** Cheap credit from formal sources is important for development.
Reason (R): High interest from informal lenders can push borrowers into a debt trap. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

SHORT ANSWER QUESTIONS

27 **Distinguish between the public and private sectors.** (3)

28 **How has information technology helped globalisation? Give three points.** (3)

29 **Why do different people have different developmental goals? Give two examples.** (2)

30 **Why are banks unwilling to lend to small farmers? Give two reasons.** (2)

Day 47 Answers

1 **(c)** Number of family members.
2 **(b)** Secondary. The product is made from natural material.
3 **(b)** African Union. India held the G20 presidency in 2023.
4 **(b)** UNDP. It compares countries on HDI.
5 **(b)** Size of the army. HDI uses income, education and health.
6 **(b)** Muhammad Yunus. He won the Nobel Peace Prize in 2006.
7 **(c)** disguised unemployed. Their removal would not cut output.
8 **(d)** Groundwater. Water is being used faster than it is recharged.
9 **(b)** Reserve Bank of India. No other person can issue currency.
10 **(a)** liberalisation.
11 **(a)** Tertiary. Services grew fastest.
12 **(b)** Indian Railways. The government owns most of its assets.
13 **(a)** Rapid improvement in technology.
14 **(b)** have no job security or paid leave.
15 **(c)** 10,000 rupees. Total 50,000 / 5 = 10,000.
16 **(b)** double coincidence of wants.
17 **(a)** 15-20 members, mostly women.
18 **(d)** 100 days of guaranteed work a year to rural households.
19 **(d)** more days of work and better wages.
20 **(a)** A major portion (it keeps about 15% as cash).
21 **(d)** owns or controls production in more than one country.
22 **(d)** adequate basic health and education facilities.
23 **(a)** Both true, R explains A. Rising incomes also raise demand for services.
24 **(a)** Both true, R explains A. Two countries with the same average can have very different equality.
25 **(d)** A false, R true. Gains are uneven, so A is false; R is true.

26 **(a)** Both true, R explains A. So formal credit should reach the poor too.

27 Public: government owns most assets and provides services (Railways, post); aim is public welfare, not just profit. Private: owned by individuals or companies (Tata Steel, Reliance); aim is to earn profit.

28 (1) Telecom (phones, fax, satellites) lets people contact each other instantly across the world. (2) The internet lets firms share information and send work like designing or data entry anywhere. (3) Services such as call centres can be run from far-off countries at low cost.

29 People's life situations differ, so their aspirations differ. A landless labourer wants more work and better wages; a rich farmer wants higher crop prices; a girl from a rich family wants the same freedom as her brother.

30 (1) Small farmers often lack collateral like land titles. (2) They lack the documents banks need and their incomes are uncertain, so banks see the loans as risky.

QUICK RECALL: 12 ONE-LINERS (COVER THE RIGHT SIDE)

Average income formula: Total income / total population

IMR is counted per: 1000 live births

HDI published by: UNDP

Largest employer sector: Primary

Largest share of GDP: Tertiary

MGNREGA year: 2005

Who issues currency: RBI

Cash banks keep: about 15% of deposits

SHG size: 15-20 members

Grameen Bank founder: Muhammad Yunus

India's new economic policy (liberalisation): 1991

G20 summit in New Delhi: September 2023

3-MARK ANSWER FORMULA

For 3-mark Economics answers, write one definition line + two points + one example (Kerala for public facilities, MGNREGA for employment, SHG for rural credit). Numbers like 15%, 100 days and 1991 earn easy marks when used correctly.

TRY IT: 3 QUICK SUMS (ANSWERS BELOW)

1. Five families earn 20,000, 30,000, 40,000, 50,000 and 60,000 rupees a month. Average income? **2.** A state's total income is 12,000 crore rupees and its population is 4 crore. Per capita income? **3.** Of 1000 babies born in a year, 12 die before age one. IMR?

Answers: 1. 2,00,000 / 5 = 40,000 rupees. 2. 12,000 crore / 4 crore = 3,000 rupees. 3. IMR = 12.

TONIGHT'S 2-MINUTE RECALL

1. **Development:** Different people, different (even conflicting) goals; **per capita income** compares countries (World Bank) but hides inequality; Kerala beats Haryana on IMR and literacy because of **public facilities**; **HDI** (UNDP) = income + health + education; development must be **sustainable**.
2. **Sectors (I):** Primary uses nature, secondary manufactures, tertiary serves; **GDP counts only final goods** made in a year; tertiary is now the **largest producing** sector, but primary is still the **largest employer**, full of **disguised unemployment**.
3. **Sectors (II): Organised** = registered, regular job, benefits; **unorganised** = scattered, no security, needs protection; **public** = government owns, welfare motive; **private** = individuals own, profit motive.
4. **Money:** Barter needs a **double coincidence of wants**; money is a **medium of exchange**; RBI issues notes for the central government; **demand deposits** and cheques work like money; banks keep about **5%** as cash and lend the rest.
5. **Credit:** Credit can help (Salim) or trap (Swapna); **terms of credit** = interest, collateral, documents, repayment; **formal** (banks, cooperatives, RBI-supervised) vs **informal** (moneylenders, no supervision); **SHGs** give the poor credit without collateral.
6. **Globalisation: Globalisation** = rapid integration of countries through trade, investment, technology and people, led by **MNCs**; enabled by **technology** and **liberalisation** (1991); India's **G20 Presidency** 2022-23, theme **Vasudhaiva Kutumbakam**, African Union joined.

DAY 47 COMPLETE? ☐ Formulas written ☐ 30 questions checked ☐ Key terms recited

Next: Day 48, Mistake Book day

DAY 48

Revision | Mistake Book day

Fix Every Error from Mock 1

Find the mistake, name its type, write the fix, then test the confusing points

Aaj ka target

- [ ] Mock 1 ki sheet saamne rakho
- [ ] Har galti Mistake Book mein: kya likha, kya sahi
- [ ] 25 confusing sawal, dhyaan se
- [ ] 2 ghante, sabse kaam ka din

How to Use the Mistake Book

STEP 1: COLLECT

- Open your checked Mock 1.
- List every wrong, half-right or skipped question.
- Note marks lost against each.

STEP 2: DIAGNOSE

- Name the type: mix-up, fact gap, map, incomplete, time.
- Write the correct point in one line.
- Find it in that chapter's Day page.

STEP 3: FIX

- Write one action per mistake.
- Re-solve the question tomorrow without help.
- Read your Mistake Book before Mock 2 (Day 49).

My Mistake Book (example rows filled)

Q no.	Topic	What I wrote	Correct point	Mistake type	Fix (what I will do)
Sec A Q3	Mazzini vs Garibaldi	Garibaldi formed Young Italy	Mazzini formed Young Italy (Marseilles)	Mix-up	Make a 2-column table of Italian leaders
Sec B Q19	Map: Tehri dam	Marked in Himachal	Tehri is in Uttarakhand (Bhagirathi)	Map	Mark all 8 dams daily for 3 days
Sec C Q27	Federalism, 5 marks	Wrote 3 points, no intro	Intro line + 5 points + conclusion	Incomplete	Count points before moving on
Sec D Q35	Formal vs informal credit	Wrote only definitions	Compare on interest, collateral, supervision	No comparison	Use a 3-row table for "distinguish"

5 Most Common SST Answer-Writing Mistakes

Mistake	How to fix it
1. Not reading the command word	"Explain" needs reasons; "distinguish" needs a comparison; "examine" needs both sides. Underline the command word before you write.
2. Too few points for the marks	Rule: 1 point per mark. A 3-marker needs 3 clear points; a 5-marker needs 5 plus an intro line.
3. Long stories, no keywords	Examiners look for NCERT keywords: majoritarianism, disguised unemployment, collateral, la patrie. Use them early.

Mistake	How to fix it
4. Weak map work	Dot plus neat label, spelled right. Do not shade a state when a city or dam is asked.
5. Leaving questions or running out of time	Follow the time plan: 1-markers fast, then 3s and 5s. Never leave a question blank: write at least the key point.

Today's Practice: 25 Most-Confused Points

All subjects | MCQ, A-R, short answers | 30 min

MULTIPLE CHOICE QUESTIONS

1 **India, Spain and Belgium are examples of:** (1)

(a) one-party states
(b) coming together federations
(c) unitary states
(d) holding together federations

2 **Which agreement was signed between Gandhiji and Dr B.R. Ambedkar?** (1)

(a) Delhi Pact, 1920 (b) Lucknow Pact, 1916
(c) Poona Pact, 1932 (d) Gandhi-Irwin Pact, 1931

3 **Salal dam is on which river?** (1)

(a) Sutlej (b) Chenab
(c) Narmada (d) Bhagirathi

4 **The gram sabha is:** (1)

(a) all voters of a village
(b) the block-level body
(c) the district-level body
(d) the elected village council

5 **Organised and unorganised sectors are classified on the basis of:** (1)

(a) size of the GDP (b) ownership of assets
(c) nature of activity (d) conditions of employment

6 **The allegory of France was named:** (1)

(a) Britannia (b) Marianne
(c) Liberty (d) Germania

7 **Per capita income means:** (1)

(a) income of government employees
(b) total income divided by total population
(c) total income of a country
(d) income of the richest person

8 **Who formed the secret society "Young Italy"?** (1)

(a) Giuseppe Garibaldi (b) Victor Emmanuel II
(c) Count Cavour (d) Giuseppe Mazzini

9 **Which soil is formed by leaching under heavy rain, and which one by lava?** (1)

(a) Laterite by leaching; black by lava
(b) Alluvial by leaching; red by lava
(c) Red by leaching; arid by lava
(d) Black by leaching; laterite by lava

10 **Who printed the first newspaper in India, the Bengal Gazette?** (1)

(a) Lord Lytton (b) James Augustus Hickey
(c) Rammohun Roy (d) Gutenberg

11 **Kakrapara nuclear plant is in:** (1)

(a) Uttar Pradesh (b) Maharashtra
(c) Gujarat (d) Tamil Nadu

12 **Which statement about a secular state is correct?** (1)

(a) It gives special status to Buddhism
(b) It follows the majority religion
(c) It bans all religions
(d) It has no official religion

13 **Which crop pair is rabi?** (1)

(a) Watermelon and cucumber (b) Cotton and maize
(c) Rice and jute (d) Wheat and mustard

14 **Which steel plant is in Chhattisgarh?** (1)

(a) Bokaro (b) Durgapur
(c) Vijayanagar (d) Bhilai

15 **Which forests are "protected from further depletion" and form about one-third of forest area?** (1)

(a) Unclassed forests (b) Sacred groves
(c) Protected forests (d) Reserved forests

16 **Gandhiji's satyagraha for peasants who could not pay revenue due to crop failure was at:** (1)

(a) Champaran (b) Kheda
(c) Dandi (d) Ahmedabad

17 **A state party becomes a national party when it gets 6% votes in 4 states and wins at least:** (1)

(a) 40 Lok Sabha seats (b) 4 Lok Sabha seats
(c) 14 Lok Sabha seats (d) 1 Lok Sabha seat

18 **A cheque is:** (1)

(a) a type of loan
(b) a form of currency issued by RBI
(c) a paper instructing the bank to pay from an account
(d) a collateral

19 **Which came from China, not from the Americas?** (1)

(a) Noodles (b) Potato
(c) Chillies (d) Tomato

ASSERTION-REASON

20 **Assertion (A): Black soil needs heavy irrigation in dry months.**
Reason (R): Black soil cannot hold moisture. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

21 **Assertion (A): Disguised unemployment means people have no work at all.**
Reason (R): It is common in agriculture where more people work than needed. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

22 **Assertion (A): In a coming together federation, units have equal power.**
Reason (R): Independent states pool sovereignty and keep their identity. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

23 **Assertion (A): Mazzini and Garibaldi both worked for a united Italy.**
Reason (R): Garibaldi was a member of Young Italy and led the Red Shirts. (1)
(a) Both A and R true; R explains A
(b) Both true; R does not explain A
(c) A is true, R is false
(d) A is false, R is true

SHORT ANSWER QUESTIONS

24 **Distinguish between the Champaran and Kheda satyagrahas.** (2)

25 **Distinguish between formal and informal sources of credit.** (3)

Day 48 Answers

1 **(d)** holding together federations.
2 **(c)** Poona Pact, 1932.
3 **(b)** Chenab.
4 **(a)** all voters of a village.
5 **(d)** conditions of employment.
6 **(b)** Marianne. Germania stood for Germany.
7 **(b)** total income divided by total population.
8 **(d)** Giuseppe Mazzini.
9 **(a)** Laterite by leaching; black by lava. Do not mix the two.
10 **(b)** James Augustus Hickey. It came out in 1780.
11 **(c)** Gujarat. Kalpakkam is in Tamil Nadu; Tarapur in Maharashtra.
12 **(d)** It has no official religion.
13 **(d)** Wheat and mustard.
14 **(d)** Bhilai. Bokaro is in Jharkhand; Durgapur in West Bengal.
15 **(c)** Protected forests. Reserved forests are over half.
16 **(b)** Kheda. Champaran was against indigo planters.
17 **(b)** 4 Lok Sabha seats. Both conditions must be met.
18 **(c)** a paper instructing the bank to pay from an account.
19 **(a)** Noodles. Spaghetti may have come from Chinese noodles.
20 **(c)** A true, R false. It holds moisture well, so R is false.
21 **(d)** A false, R true. People are working, but some are not needed, so A is false.
22 **(a)** Both true, R explains A. They join on equal terms.
23 **(b)** Both true, R does not explain A. Both statements are true, but R does not explain why both worked for unity.
24 Champaran (Bihar, 1917): for peasants against the oppressive indigo plantation system. Kheda (Gujarat, 1917): for peasants who could not pay revenue because of crop failure and a plague epidemic.
25 (1) Formal (banks, cooperatives) are supervised by the RBI; informal (moneylenders, traders) are not. (2) Formal loans have lower interest; informal have high interest. (3) Formal need collateral and documents; informal lenders may use unfair means to get money back.

CONFUSING PAIRS: THE ONE-LINE DIFFERENCE

Mazzini / Garibaldi: Young Italy founder / Red Shirts leader

Cavour / Bismarck: Sardinia-Piedmont minister / Prussian chief minister

Champaran / Kheda: indigo planters (Bihar) / revenue relief (Gujarat)

Calcutta / Nagpur 1920: Non-Cooperation passed (Sep) / adopted (Dec)

Gutenberg / Luther: printing press / 95 Theses

Laterite / Black soil: leaching in heavy rain / from lava, holds water

Reserved / Protected forest: over half, most valuable / about one-third

Tehri / Salal dam: Bhagirathi, Uttarakhand / Chenab, J&K

Kalpakkam / Kakrapara: Tamil Nadu / Gujarat

Bhilai / Bokaro: Chhattisgarh / Jharkhand

Gram sabha / Gram panchayat: all village voters / elected council

Organised / Public sector: based on job conditions / based on ownership

SHIVAM BHAIYA KA NOTE

Galti karna problem nahi hai, wahi galti dobara karna problem hai. Har galti ko ek line ka fix do, aur Mock 2 se pehle ek baar ye page zaroor padhna.

BEFORE MOCK 2: TICK ALL FIVE

- [ ] Every Mock 1 mistake has a one-line fix written
- [ ] Formal vs informal credit and organised vs unorganised tables written from memory
- [ ] Belgium vs Sri Lanka and coming vs holding together tables redrawn
- [ ] Mistake Book read once, the night before Mock 2
- [ ] All 8 dams and 5 iron ore mines marked once more
- [ ] History dates 1815, 1848, 1871, 1919, 1920, 1930, 1932 said aloud
- [ ] Three 5-mark answers rewritten with intro, 5 points and a conclusion

BOARD MEIN AISE LIKHO

Q. How has the caste hierarchy weakened in modern India? (3 marks)

1. **Reformers:** Jotiba Phule, Gandhiji, B.R. Ambedkar and Periyar Ramaswami Naicker worked for a society free of caste inequality.
2. **Social change:** urbanisation, growth of literacy and education, occupational mobility and the weakening of landlords in villages broke down the old hierarchy.
3. **Constitution:** it prohibits caste-based discrimination. Yet caste has not disappeared: most people still marry within their caste.

Tip: last point mein "caste has not disappeared" zaroor likho, balance dikhta hai.

BOARD MEIN AISE LIKHO

Q. Distinguish between a national party and a state party. (3 marks)

1. **State party:** secures at least 6% of the votes in a State Legislative Assembly election and wins at least two seats.
2. **National party:** secures at least 6% of the votes in Lok Sabha elections or Assembly elections in four States, and wins at least four Lok Sabha seats.
3. **Examples:** in 2023 there were six national parties, e.g. INC, BJP, BSP, CPI(M), NPP and AAP; many state parties have national ambitions and a federal outlook.

Tip: criteria ke numbers (6%, 2 seats, 4 states, 4 seats) bilkul sahi likho.

DAY 48 COMPLETE?

- [ ] Mistake Book filled
- [ ] 25 questions checked
- [ ] Fixes written

Next: Day 49, MOCK TEST 2

DAY 49

MOCK TEST 2 OF 3

Full Board Paper: Mock Test 2

One sitting, 3 hours, exactly like the board exam. Check only after the bell.

Aaj ka target

- [ ] Mock Test 2: 38 sawal, 80 marks, CBSE jaisa
- [ ] Phone aur book doosre kamre mein
- [ ] 180 min, timer laga ke, bina ruke
- [ ] Check sirf baad mein, score likh ke rakho

MOCK TEST 2

Time: 3 hours | Max. marks: 80

1. Same pattern as Mock Test 1: 38 compulsory questions in four sections of 20 marks; OR choice in every 5-mark question; Q9 and Q19 on the outline map of India.

A History

Q1 to Q9 | 20 marks

1 How did the Grimm Brothers help preserve German culture? (1)

(a) They made Germans adopt classical European literature.
(b) They collected folk tales from villages and worked on the German language.
(c) They promoted court culture and elite customs.
(d) They replaced regional traditions with one foreign-influenced culture.

2 Arrange in chronological order:
(I) Satyagraha at Kheda (II) Hartal against the Rowlatt Act (III) Gandhiji returns to India (IV) Congress adopts Non-Cooperation (1)

(a) (III), (I), (II), (IV) **(b)** (IV), (I), (III), (II)
(c) (I), (III), (II), (IV) **(d)** (III), (II), (I), (IV)

3 Match the columns:
(A) China (B) Japan (C) Buddhist missionaries (D) Marco Polo
(I) Diamond Sutra, the oldest Japanese book (II) Textbooks for the civil service examination (III) Brought woodblock knowledge to Italy (IV) Brought hand-printing to Japan (1)

(a) A-II, B-I, C-IV, D-III **(b)** A-I, B-II, C-III, D-IV
(c) A-II, B-IV, C-I, D-III **(d)** A-III, B-I, C-IV, D-II

4 **Assertion (A):** The rise of periodicals and newspapers strengthened public opinion in the nineteenth century.
Reason (R): They regularly carried news, debates and views on social and political issues to a wide readership. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

5 "Most conservative regimes set up in 1815 imposed censorship laws." Why did they do so? Give two reasons. (2)

6 Explain any three developments that shaped the early spread of print culture in India. (3)

7 Explain the role of different social groups in the Civil Disobedience Movement. (5)

OR

Explain any five effects of the Non-Cooperation Movement on the economic front. (5)

8 Read the source and answer the questions that follow. (4)

Through the seventeenth and eighteenth centuries literacy rates rose in most of Europe. Churches of different denominations set up schools in villages, carrying literacy to peasants and artisans. By the end of the eighteenth century, literacy in some parts of Europe was as high as 60 to 80 per cent. A virtual reading mania followed: people wanted books and printers produced them in ever larger numbers. Pedlars roamed villages selling almanacs, ballads and folktales. In England, penny chapbooks were carried by petty pedlars called chapmen and sold for a penny, so that even the poor could buy them.

(i) Give two reasons why literacy rates increased in Europe. (2)
(ii) How did the spread of literacy affect the production of books? (1)
(iii) What were chapbooks? (1)

9 On the outline map of India, locate and label the following with suitable symbols:
(a) The place where the Indian National Congress session was held in December 1920.
(b) The place associated with the movement of indigo planters in 1917. (2)

B Geography

Q10 to Q19 | 20 marks

10 Which statements about conservation of resources are true?
(I) It reduces environmental damage. (II) Unplanned use can deplete resources. (III) It keeps resources available for future generations. (IV) It slows economic development. (1)

(a) (I) and (II) only **(b)** (I), (II) and (III)
(c) (II) and (IV) **(d)** (I), (III) and (IV)

11 The first resolution for Joint Forest Management was passed in 1988 by which state? (1)

(a) Odisha **(b)** Rajasthan
(c) Madhya Pradesh **(d)** Uttarakhand

12 Which is the most valid reason for protests against big dams in recent years? (1)

(a) Dams cause tsunamis.
(b) Dams often failed to control floods and even triggered floods, besides displacing people.
(c) Dams stop all rainfall in the area.
(d) Dams make river water salty.

13 **Consider the statements about the sugar industry:**
(I) About 60 per cent of sugar mills are in Uttar Pradesh and Bihar. (II) Its raw material, sugarcane, is bulky. (1)
(a) Only (I) is correct. (b) Only (II) is correct.
(c) Both are incorrect. (d) Both are correct.

14 **Assertion (A): Per capita consumption of electricity is taken as an index of development.**
Reason (R): Electricity does not have wide application in industries today. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

15 **The Bhoodan-Gramdan movement for voluntary gift of land was started by:** (1)
(a) Mahatma Gandhi (b) Jawaharlal Nehru
(c) Vinoba Bhave (d) Sunderlal Bahuguna

16 **How does the distribution of uranium and thorium in India support nuclear power generation?** (2)

17 **"The agriculture sector in India faced a setback even though the GDP growth rate went up." Explain any five reasons.** (5)

OR

How have local communities helped in conserving forests and wildlife in India? Explain with five examples. (5)

18 **Read the source and answer the questions that follow.** (4)

The major iron ore belts of India: the Odisha-Jharkhand belt, where high grade haematite is found in Badampahar mines (Mayurbhanj and Kendujhar); the Durg-Bastar-Chandrapur belt in Chhattisgarh and Maharashtra, where the Bailadila hills have 14 deposits of super high grade haematite with the best physical properties for steel making, and the ore is exported to Japan and South Korea via Visakhapatnam port; the Ballari-Chitradurga-Chikkamagaluru-Tumakuru belt in Karnataka, where the Kudremukh mines are among the largest in the world and the ore is sent as slurry through a pipeline to a port near Mangaluru.

(i) Name the iron ore belt to which Badampahar mines belong. (1)
(ii) Does India only import iron ore? Justify from the source. (1)
(iii) How is iron ore from Kudremukh transported, and why is Bailadila ore valued? (2)

19 **On the outline map of India, locate and label any three of the following:**
(a) Hirakud Dam (b) Neyveli coal mine (c) Tarapur nuclear power plant (d) Noida software technology park (3)

C Political Science

Q20 to Q28 | 20 marks

20 **Tamils in Sri Lanka demanded "Eelam". What did it mean?** (1)
(a) A tax on Sinhalas
(b) A separate Tamil state in the north and east of Sri Lanka
(c) Voting rights for Tamils
(d) The name of the Sri Lankan capital

21 **Two people of different faiths wish to marry under a special law. Marriage is in which list of the Constitution?** (1)
(a) Union List (b) State List
(c) Concurrent List (d) Residuary subjects

22 **A country is known for a high share of women in parliament and has had women as Prime Minister and President several times. Which country fits best?** (1)
(a) India (b) Bangladesh
(c) France (d) Finland

23 **Assertion (A): A challenge for political parties is that they often do not offer a meaningful choice to voters.**
Reason (R): Politicians are the same everywhere. (1)
(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

24 **The Centre and a state pass different laws on a subject in the Concurrent List. Whose law will prevail and why?** (2)

25 **Distinguish between a pressure group and a political party. (Two points)** (2)

26 **Describe any three changes brought in by the Constitutional amendment of 1992 towards decentralisation.** (3)

27 Describe any five ways in which communalism can take forms in politics. (5)

OR

"Democracy accommodates social diversity and promotes the dignity of citizens." Explain with five points. (5)

28 Read the source and answer the questions that follow. (4)

After a bitter civil war, the leaders of Lebanon agreed on rules of power sharing: the President must be a Maronite Catholic Christian, the Prime Minister a Sunni Muslim, the Deputy Prime Minister an Orthodox Christian and the Speaker a Shi'a Muslim. The Christians agreed not to seek French protection and the Muslims agreed not to seek unification with Syria. Khalil of Beirut, whose father was an Orthodox Christian and mother a Sunni Muslim, has political ambition but cannot rise to a top post because he follows neither religion.

(i) Why is Lebanon not a "normal" democracy according to the source? (2)
(ii) Name this kind of power-sharing arrangement. (1)
(iii) Which religious communities share power in Lebanon? (1)

D Economics

Q29 to Q38 | 20 marks

29 Which statements correctly describe investment?
(I) Money spent on social ceremonies. (II) Spending on land, buildings or machinery. (III) Buying household goods for daily use. (IV) Spending made in the hope of future returns. (1)

(a) (I) and (III) **(b)** (II) and (IV)
(c) (I), (II) and (III) **(d)** All four

30 Which pair is correctly matched? (1)

(a) Production of sugarcane: Secondary sector
(b) Sugar mill making sugar: Primary sector
(c) Transport of sugar to markets: Tertiary sector
(d) Retail sale of sugar: Secondary sector

31 Per capita income is calculated as: (1)

(a) Total income / total population
(b) Total population / total income
(c) Total income x total population
(d) Total savings / total population

32 Which statement about trade barriers is correct? (1)

(a) Government can use trade barriers to raise or lower foreign trade and decide what goods come in.
(b) India removed all trade barriers right after independence.
(c) Trade barriers halt all imports and exports.
(d) Only foreign firms gain when barriers are removed.

33 The Human Development Index of the UNDP compares countries on: (1)

(a) Income only
(b) Health, education and income
(c) Military power and income
(d) Population and area

34 **Assertion (A):** Banks have to submit information to the RBI on how much they lend, to whom and at what rate of interest.
Reason (R): This is done to make sure the rich get enough loans. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

35 Sunil works in a factory with fixed hours and paid leave; Raman works in a small unregistered workshop. Give three differences between the sectors they work in. (3)

36 Dhananjay is a government employee; Arun is from a poor rural household. Both need a loan. Who is more likely to get a bank loan and why? (3)

37 How is information technology connected with globalisation? Explain with three points. (3)

38 "Different people have different notions of development." Explain with examples, and show how a goal of one person can conflict with another's. (5)

OR

Describe the positive and negative role of credit in economic development with examples. (5)

Self-check score

History	Geography	Pol. Science	Economics	Total
__/20	__/20	__/20	__/20	__/80

Mock Test 2: answer key and marking points

1-34 **Objective answers:** **1** (b) **2** (a) **3** (a) **4** (a) **10** (b) **11** (a) **12** (b) **13** (d) **14** (c) **15** (c) **20** (b) **21** (c) **22** (d) **23** (c) **29** (b) **30** (c) **31** (a) **32** (a) **33** (b) **34** (c)

5
- They feared the liberal and nationalist ideas spread by the French Revolution and wanted to stop criticism of autocratic rule.
- Censorship controlled what was said in newspapers, books, plays and songs, so ideas of liberty and freedom could not spread.

6
- The printing press first came to Goa with Portuguese missionaries in the mid-sixteenth century; Konkani and Kanara books were printed by 1674.
- Catholic priests printed the first Tamil book in 1579 at Cochin and the first Malayalam book in 1713.
- James Augustus Hickey began the Bengal Gazette in 1780; Gangadhar Bhattacharya, close to Rammohun Roy, brought out the first Indian newspaper, also called the Bengal Gazette.

7
- Rich peasants (Patidars of Gujarat, Jats of UP) joined against high revenue as trade depression hit them.
- Poor peasants wanted unpaid rent remitted; many joined radical movements led by socialists and communists.
- Business classes (Purshottamdas Thakurdas, G.D. Birla) supported it against colonial controls; formed FICCI (1927).
- Industrial workers (Nagpur) joined selectively: boycotted foreign goods and struck work, but the Congress kept them at a distance.
- Women joined in large numbers: protest marches, salt making, picketing liquor and foreign cloth shops.

OR
- Foreign goods were boycotted, liquor shops picketed and foreign cloth burnt in bonfires.
- Import of foreign cloth halved between 1921 and 1922 (value fell from 102 crore to 57 crore).
- Merchants and traders refused to trade in foreign goods or finance foreign trade.
- Production of Indian textile mills and handlooms went up.
- People discarded imported clothes and wore Indian cloth (khadi).

8
- (i) Churches of different denominations set up schools in villages; literacy reached peasants and artisans.
- (ii) A reading mania began: printers produced books in ever larger numbers for new readers.
- (iii) Small cheap books sold for a penny by pedlars called chapmen in England, so even the poor could buy them.

9 (a) Nagpur (Maharashtra) (b) Champaran (Bihar), correctly located and labelled.

16
- Uranium is found in Jharkhand and the Aravalli ranges of Rajasthan; thorium in the monazite sands of Kerala.
- These deposits fuel nuclear plants such as Tarapur, Kalpakkam, Narora and Kakrapara, so India can produce nuclear power from its own minerals.

17
- Low yield and dependence on monsoon; most farms rain-fed.
- Small and fragmented land holdings.
- Reduction in public investment in irrigation, power, rural roads and research.
- Subsidies on fertilisers decreased, raising the cost of production.
- Reduction in import duties on farm products and global competition hurt farmers; many left farming.

OR
- Chipko Movement in the Himalayas resisted deforestation.
- Bishnois of Rajasthan protect blackbuck, chinkara, nilgai and peacocks.
- Villagers of Alwar (Rajasthan) declared 1,200 hectares of forest as the Bhairodev Dakav Sonchuri.
- Beej Bachao Andolan (Tehri) and Navdanya promote diversified crops without chemicals.
- Joint Forest Management (Odisha, 1988) involves local people in managing degraded forests; sacred groves protect nature.

18
- (i) The Odisha-Jharkhand belt.
- (ii) No: India exports high grade ore from Bailadila to Japan and South Korea through Visakhapatnam port.
- (iii) Kudremukh ore goes as slurry through a pipeline to a port near Mangaluru; Bailadila ore is super high grade haematite with the best physical properties for steel making.

19 Hirakud: Odisha (on the Mahanadi); Neyveli: Tamil Nadu; Tarapur: Maharashtra; Noida: Uttar Pradesh. Any three, 1 mark each.

24
- The law made by the Union (Centre) will prevail.
- In case of a conflict on a Concurrent List subject, the Constitution gives priority to the Union law.

25
- A pressure group tries to influence government policies; a party aims to win elections and form the government.
- Pressure groups do not contest elections or take direct political power; parties do.

26 • Regular elections to local government bodies became constitutionally mandatory.
• Seats reserved for SCs, STs and OBCs; at least one-third of all positions reserved for women.
• A State Election Commission in each state conducts local body elections; state governments share some powers and revenue with local bodies.

27 • Religion is expressed in politics in exclusive, partisan terms; one community is seen as superior.
• Communal prejudices, stereotypes and belief in superiority of one religion in everyday thinking.
• Political mobilisation on religious lines, using sacred symbols, religious leaders and emotional appeal.
• Attempts to form majority dominance or a separate political unit for minorities.
• The ugliest form is communal violence, riots and massacre (for example during Partition).
OR • Democracies handle social differences and conflicts better through negotiation.
• Belgium accommodated linguistic differences successfully.
• Democracy follows majority rule but works with minorities; majority is not permanent.
• Dignity of women: democracy recognised equal rights and legal protections; women's movements gained strength.
• Caste: legal and moral force strengthens the claims of disadvantaged castes for equal status.

28 • (i) Top posts are fixed for particular religious communities; a citizen like Khalil cannot get a top post on merit or by choice.
• (ii) Community-based (group) power sharing / accommodation of communities.
• (iii) Christians (Maronite Catholics, Orthodox) and Muslims (Sunni, Shi'a).

35 • Organised sector: registered with the government, follows its rules; unorganised: small, scattered, largely outside government control.
• Organised: regular jobs with fixed working hours, paid leave and overtime; unorganised: low pay, no paid leave.
• Organised: job security, provident fund and medical benefits; unorganised: no security, can be asked to leave any time.

36 • Dhananjay is more likely to get a bank loan.
• He has a regular salary and can offer collateral and proper documents; banks see him as able to repay.
• A poor rural borrower lacks collateral and documents, so often depends on informal lenders at high interest.

37 • IT and telecom (internet, mobile phones, satellites) connect the world instantly.
• Information can be accessed and services such as designing, accounts and call centres can be delivered from one country to another.
• Faster communication helps MNCs coordinate production across countries, which speeds globalisation.

38 • People have different notions of development because life situations differ.
• A landless rural labourer wants more days of work and better wages; a rich farmer wants higher prices for crops.
• An urban girl may want freedom and equal opportunity like her brother.
• Conflicting goals: industrialists want more dams for electricity; people displaced by the dam want their land.
• So development for one may be destruction for another; goals include income plus equality, freedom, security and respect.
OR • Credit helps people meet working capital needs of production and complete production on time.
• It helps increase earnings, as in the case of the shoe maker Salim who repaid and made profit.
• Credit helps farmers buy seeds, fertilisers and pesticides.
• But if crops fail, credit can push people into a debt trap (Swapna's case: she sold land to repay).
• So cheap and affordable credit (formal sector) is crucial for development; high-cost informal credit is harmful.

MOCK 1 VS MOCK 2: TRACK YOUR RISE

Write both scores side by side: **Mock 1 ____ / 80 Mock 2 ____ / 80**. If a section fell, revise its chapter cards from Days 43 to 47 tonight. If map marks were lost, redo the Day 40 map practice tomorrow. Before Mock 3 (Day 53), time yourself: Section A in 40 minutes, B in 40, C in 40, D in 40, and 20 minutes to revise.

DAY 49 COMPLETE?

- [ ] **Wrote the full paper in 3 hours**
- [ ] **Checked with the key**
- [ ] **Every lost mark noted in the Mistake Book**

Next: Day 50, A-R and case-based practice

DAY 50

REVISION | ALL 4 SUBJECTS

Assertion-Reason and Case-Based Practice

24 A-R items + 4 case sets = 40 questions

Aaj ka target

- [ ] 40 sawal: A-R aur case-based, chaaron subject
- [ ] 32/40 = pass, kam aaye to dobara
- [ ] Galat wale Mistake Book mein
- [ ] 120 min, A-R mein statements dhyaan se

A-R AND CASE-BASED QUESTIONS TEST ONE SKILL: CAREFUL READING. 1 MINUTE PER A-R ITEM, 8 MINUTES PER CASE SET.

HOW TO CRACK ASSERTION-REASON IN 3 STEPS

Step 1: Read A alone. True or false?

Step 2: Read R alone. True or false?

Step 3: If both are true, join them with **"because"**: "A *because* R". If it makes sense, choose (a); if R is true but explains something else, choose (b).

Shortcut: A false means the answer can only be (d). R false with A true means (c). Never pick (a) or (b) unless both are true.

(a) Both A and R true; R explains A.
(b) Both true; R does not explain A.
(c) A true, R false.
(d) A false, R true.

SHIVAM BHAIYA SAYS

A-R mein sabse common galti: dono statements sahi dekh ke turant **(a)** laga dena. Ruko, aur **"A kyunki R"** bol ke dekho. Agar sentence ajeeb lage, to answer **(b)** hai.

Part A: History A-R

1. **A:** The conservative regimes set up in Europe in 1815 did not put up with criticism or dissent.
   R: These regimes were autocratic in nature. (1)

2. **A:** The Non-Cooperation Movement was adopted at the Madras session of the Congress in 1919.
   R: Gandhiji called off the movement after the violence at Chauri Chaura. (1)

3. **A:** For the first time, the Poona Pact made the depressed classes a strong political force.
   R: Under the Poona Pact, Gandhiji and Ambedkar agreed on separate electorates for the depressed classes. (1)

4. **A:** The pre-modern world shrank greatly in the sixteenth century.
   R: Transport between countries was discovered for the first time in that century. (1)

5. **A:** No two copies of the Bible printed by Gutenberg looked exactly alike.
   R: In every copy, artists designed, painted and illuminated the borders by hand. (1)

6. **A:** The printing press created a new reading public.
   R: Printing made books costlier than manuscripts. (1)

Part B: Geography A-R

7. **A:** Alluvial soil is ideal for growing paddy, wheat, cereals and pulses.
   R: Alluvial soil is best known for its capacity to hold moisture. (1)

8. **A:** The number of blackbucks in India has been rising in recent times.
   R: Blackbucks are hunted and poached in the wild. (1)

9. **A:** Johads and khadins are modern methods of water harvesting.
   R: Johads and khadins are found in western India, especially Rajasthan. (1)

10. **A:** Tea cultivation is a labour-intensive industry.
    R: Tea bushes need a warm, moist, frost-free climate all through the year. (1)

11. **A:** Ocean tides cannot be used to generate electricity.
    R: Tidal energy can turn turbines that produce electricity. (1)

12. **A:** Burning fossil fuels in factories that ignore pollution norms causes air pollution.
    R: Factories have no responsibility to prevent air pollution. (1)

Part C: Political Science A-R

13. **A:** Sri Lanka suffered a civil war.
    R: An Act passed in 1956 set out to establish Sinhala dominance over the government. (1)

14. **A:** In Belgium, the community government has powers over cultural, educational and language issues.
    R: In Belgium, state governments are subordinate to the Central Government. (1)

15 **A:** The literacy rate of women in India is still lower than that of men.
R: Indian society is still largely patriarchal. (1)

16 **A:** Any country can choose its party system.
R: A party system evolves over a long time. (1)

17 **A:** Democracy is slow but widely accepted.
R: Democracy is the rule of a minority. (1)

18 **A:** Democracies leave room to correct mistakes.
R: Democratic governments are elected. (1)

Part D: Economics A-R

19 **A:** Development means thinking about the ways in which we can work towards holistic goals.
R: Holistic growth means only economic growth. (1)

20 **A:** Most families in India have members working in the unorganised sector.
R: The organised sector offers fewer job opportunities. (1)

21 **A:** Not every good or service produced needs to be counted to know total production.
R: The value of final goods already includes the value of intermediate goods. (1)

22 **A:** Self-Help Groups help to promote economic democracy.
R: SHGs spread economic power and opportunities more fairly. (1)

23 **A:** The rupee is accepted as a medium of exchange in India.
R: The World Bank legalises the use of the rupee in India. (1)

24 **A:** More and more goods, services, investment and technology move between countries.
R: People move from one country to another for better jobs, income or education. (1)

Case-Based Sets

4 sets, 4 marks each, 8 minutes per set

25 **Case 1 (History):** Read the source and answer. (4)

The Columbian Exchange was the movement of crops, diseases, ideas and people between the Old World and the New World after Columbus reached the Americas in 1492. The Old World (Europe, and in fact the whole Eastern Hemisphere) gained new supplies of metals and new staple crops such as potatoes, sweet potatoes, maize and cassava. Crops like sugar and coffee spread widely because the soils of the New World suited them. Native Americans, however, suffered heavy losses. Growing profitable crops in the Americas, along with the deaths of native people from disease, created a huge demand for labour.

(i) How did Native Americans suffer because of the Columbian Exchange? (1)
(ii) Name any two staple crops that the Old World received from the Americas. (1)
(iii) In which direction did the centre of world trade shift after this exchange? (1)
(iv) How was the demand for labour on American plantations met? (1)

26 **Case 2 (Geography):** Read the source and answer. (4)

In plantation farming, one crop is grown over a large area. A plantation is a meeting point of agriculture and industry: it covers large tracts of land, uses a lot of capital and migrant labour, and its whole produce goes as raw material to industries. Tea, coffee, rubber, sugarcane and banana are important plantation crops in India; tea grows in Assam and North Bengal and coffee in Karnataka. Because the produce is meant for the market, a good network of transport and communication linking plantations, processing units and markets is essential.

(i) Plantation farming is a form of: (a) intensive subsistence farming (b) slash and burn farming (c) commercial farming (d) primitive farming
(ii) Which of these is NOT a plantation crop? (a) Banana (b) Coffee (c) Sugarcane (d) Silk
(iii) Which statement best shows that a plantation links agriculture and industry? (a) It covers large tracts of land (b) Its whole produce is used as raw material by industries (c) It needs migrant labour (d) It grows a single crop
(iv) The largest producer of coffee in India is: (a) Kerala (b) Goa (c) Karnataka (d) Maharashtra

27 **Case 3 (Political Science):** Read the source and answer. (4)

Compare the political map of India in 1947 with today's and the changes are striking. In 1947 the boundaries of several old States were redrawn so that people who spoke the same language lived in the same State. Some States were created not on the basis of language but to recognise differences of culture, ethnicity or geography. When the demand for linguistic States was first raised, some national leaders feared it would break up the country, and the Central Government resisted for some time. Experience has shown that linguistic States have actually made the country more united and administration easier.

(i) Which of these States was created to recognise ethnic and cultural differences rather than language? (a) Kerala (b) Bihar (c) Rajasthan (d) Nagaland
(ii) According to the source, old State boundaries were first redrawn in: (a) 1950 (b) 1947 (c) 1967 (d) 1953
(iii) Which feature of Indian democracy does the creation of linguistic States show? (1)
(iv) What has been the actual result of forming linguistic States? (1)

28 Case 4 (Economics): Read the source and answer. (4)

Kanta works in an office from 9.30 a.m. to 5.30 p.m. She gets her salary at the end of every month, along with provident fund as per government rules and medical and other allowances. Sunday is a paid holiday. When she joined, she was given an appointment letter stating all terms of work. Her neighbour Kamal is a daily-wage worker at a grocery shop. He works from 7.30 a.m. to 8 p.m., gets no allowances, and is not paid for days he does not work. He has no leave or paid holidays.

(i) Identify the sector in which Kanta works. (1)
(ii) Why is Kamal's job called insecure? (1)
(iii) Why does Kanta get more facilities than Kamal? (1)
(iv) Name one benefit Kanta gets that Kamal does not. (1)

Day 50 Answers

1 **(a)** Autocratic regimes used censorship to crush dissent, so R explains A.
2 **(d)** It was adopted at the Nagpur session, December 1920. R is true (February 1922).
3 **(c)** The Pact (1932) gave reserved seats within a common electorate, not separate electorates.
4 **(c)** Trade links (silk routes) existed long before; the world shrank because Europeans found sea routes and reached the Americas.
5 **(a)** The hand-painted borders made each copy unique, so R explains A.
6 **(c)** Print reduced the cost of books, which is why more people could read.
7 **(c)** Black soil is famous for holding moisture. Alluvial soil is fertile.
8 **(d)** Blackbuck numbers have fallen; hunting and poaching are real threats.
9 **(d)** They are traditional methods; R is true.
10 **(b)** Both true, but labour intensity comes from plucking leaves by hand, not from the climate.
11 **(d)** Tidal power is a non-conventional source (e.g. Gulf of Khambhat, Gulf of Kachchh).
12 **(c)** Industries must follow pollution norms and reduce emissions.
13 **(a)** The 1956 Act (Sinhala as the only official language) and other majoritarian steps alienated Tamils and led to civil war.
14 **(c)** In Belgium, state governments are not subordinate to the Centre.
15 **(a)** Patriarchy gives girls fewer chances to study, which explains the gap.
16 **(d)** A party system cannot be chosen; it grows out of a society's nature, divisions and history.
17 **(c)** Democracy is rule by the majority (through elected representatives) with respect for minorities.
18 **(b)** Both true, but mistakes get corrected because of public debate and accountability, not just because of elections.
19 **(c)** Development includes income and also security, equality, freedom and respect.
20 **(a)** Jobs in the organised sector have grown slowly, so most workers end up in the unorganised sector.
21 **(a)** Counting intermediate goods again would be double counting.
22 **(a)** SHGs give poor women credit and a voice, so R explains A.
23 **(c)** The rupee is authorised by the Government of India; the RBI issues notes.
24 **(b)** Both true, but migration does not explain the flow of goods and capital.
25 (i) They had no immunity to European germs like smallpox, so whole communities died. (ii) Any two: potatoes, maize, sweet potatoes, cassava. (iii) Away from Asia, towards Europe (as the Americas grew in importance). (iv) By capturing and bringing slaves from Africa.

26 (i) **(c)** commercial farming. (ii) **(d)** Silk: it comes from rearing silkworms (sericulture), not from a crop. (iii) **(b)** its produce is raw material for industries. (iv) **(c)** Karnataka.

27 (i) **(d)** Nagaland (like Uttarakhand and Jharkhand). (ii) **(b)** 1947. (iii) Respect for diversity: people's demands are accommodated, a key feature of federal democracy. (iv) The country became more united and administration became easier.

28 (i) Organised sector. (ii) He is paid only for days he works; he has no leave, no allowances and no job security. (iii) The organised sector is registered with the government and must follow its rules and laws (provident fund, paid leave, fixed hours). (iv) Any one: provident fund, paid holiday, medical allowance, appointment letter.

History A-R	Geography A-R	Pol Sci A-R	Economics A-R	Case sets
__/6	__/6	__/6	__/6	__/16

⚠ 5 A-R TRAPS EXAMINERS LOVE

1. Wrong place or year: Non-Cooperation adopted at "Madras 1919" (it was Nagpur, Dec 1920). One wrong detail makes the whole statement false.

2. Swapped soil: moisture-holding is black soil, not alluvial.

3. Absolute words: "only", "always", "no responsibility" usually signal a false statement.

4. True but unrelated R: migration does not explain trade flows, so (b), not (a).

5. Old vs new: johads, khadins and kuls are traditional, never "modern".

DAY 50 COMPLETE?

- ☐ 24 A-R done
- ☐ 4 case sets done
- ☐ Score written
- ☐ Wrong ones in Mistake Book

Next: Day 51, Long answers

DAY 51

REVISION | HISTORY + POLITICAL SCIENCE

Long Answers: 5 Timed Answers

Write like the board exam: 12 minutes each

Aaj ka target

- ☐ 5 long answers: History + Pol Sci
- ☐ 60 min likhna + 30 min checking
- ☐ Har answer 12 min, lagbhag 120 words
- ☐ Neeche ke points se khud marks do

HOW A 5-MARK ANSWER IS BUILT (ABOUT 120 WORDS, 12 MINUTES)

1. Intro line (1 line): answer the question directly, using its own key words.

2. Five points: one fact per point, numbered, each 1 or 2 lines. Start each with a bold key term (Dandi March, horizontal sharing, contour ploughing).

3. Example or date: at least two points carry a name, date or place. Examiners tick facts, not long sentences.

4. Conclusion (1 line): sum up the effect or importance.

5. Time: 2 min planning (jot 5 key words in the margin), 9 min writing, 1 min checking.

0:00 to 0:12	Q1 History, Treaty of Vienna
0:12 to 0:24	Q2 History, social groups in Civil Disobedience
0:24 to 0:36	Q3 History, Print Revolution
0:36 to 0:48	Q4 Pol Sci, forms of power sharing
0:48 to 1:00	Q5 Pol Sci, challenges to political parties
1:00 to 1:30	Check each answer against the marking points; give 1 mark per point you actually wrote

Today's Practice

5 long answers, 5 marks each, write in your notebook

1. **"The Treaty of Vienna (1815) showed the spirit of conservatism." Support this statement with the main provisions of the treaty.** *[History Ch1]* (5)

   OR

   The Congress of Vienna met in 1815 to undo the changes of the Napoleonic wars. Describe its main decisions.

2. **Explain how different social groups took part in the Civil Disobedience Movement, and what each group wanted from it.** *[History Ch2]* (5)

3. **"The print revolution of the sixteenth century changed people's lives in Europe." Support the statement with five suitable arguments.** *[History Ch5]* (5)

4 "Modern democracies share power in different ways." Justify the statement by describing the forms of power sharing, with examples. *[Pol Sci Ch1]* (5)

5 Political parties must overcome some challenges to remain effective instruments of democracy. Explain any four such challenges and suggest one reform. *[Pol Sci Ch4]* (5)

OR

"Dynastic succession is a major challenge for political parties in India." Analyse this along with other challenges parties face.

SHIVAM BHAIYA SOCH RAHE HAIN

Long answer mein **kahani mat likho**. Pehli line mein seedha jawab, phir 1 se 5 tak numbered points, har point mein ek naam, saal ya jagah. Checker ke paas 20 second hote hain, use points dikhne chahiye, paragraph nahi.

Day 51 Model Answers (marking points)

1 **Intro:** In 1815 Britain, Russia, Prussia and Austria met at Vienna, hosted by Metternich, to undo Napoleon's changes.
(1) The Bourbon dynasty was restored in France. (2) France lost the territories annexed under Napoleon. (3) A ring of states was set up on France's borders: the Kingdom of the Netherlands (with Belgium) in the north, and Genoa added to Piedmont in the south. (4) Prussia got new territory on its western frontier; Austria got control of northern Italy. (5) The German Confederation of 39 states was left untouched; Russia got part of Poland and Prussia part of Saxony.
Conclusion: The aim was to restore monarchies and the old order, so the treaty stood for conservatism.

2 **Intro:** Many social groups joined the movement (1930 onward), each with its own idea of swaraj.
(1) **Rich peasants** (Patidars of Gujarat, Jats of UP) were hit by falling prices and high revenue; they wanted revenue reduced. (2) **Poor peasants** wanted unpaid rent remitted; Congress gave them little support (fear of upsetting landlords). (3) **Business classes** (Purshottamdas Thakurdas, G. D. Birla; FICCI 1927) wanted protection against foreign goods and a rupee-sterling ratio that discouraged imports. (4) **Industrial workers** (Nagpur) joined selectively, boycotting foreign goods and fighting low wages. (5) **Women** joined protest marches, made salt and picketed liquor and foreign cloth shops, mostly from high-caste and rich peasant homes.
Conclusion: Participation was wide, but each group's hopes were different.

3 **Intro:** Print brought a new reading culture and new ideas.
(1) Books became cheaper and more numerous, so a **new reading public** emerged. (2) Ballads and folk tales were printed with pictures and read aloud, so even people who could not read joined in. (3) **Public debate** grew: ideas could be argued over, published and spread widely. (4) Religious debates spread: Martin Luther's Ninety-five Theses (1517) led to the Protestant Reformation. (5) Not everyone welcomed print; the Church feared heretical ideas and set up the **Index of Prohibited Books** (from 1558).
Conclusion: Print changed how people read, thought and questioned authority.

4 **Intro:** Power is shared among organs, levels, social groups and parties.
(1) **Horizontal sharing** among legislature, executive and judiciary; each checks the others (checks and balances). (2) **Vertical sharing** among levels: Union, State and local governments (federal division). (3) **Among social groups:** community government in Belgium; reserved constituencies in India. (4) **Among parties, pressure groups and movements:** competition between parties, coalition governments, and groups that influence decisions. (5) Each form prevents concentration of power and keeps the system stable.
Conclusion: Power sharing is the spirit of democracy.

5 **Intro:** Parties face four main challenges. (1) **Lack of internal democracy:** power sits with one or a few top leaders; no regular membership records or organisational elections. (2) **Dynastic succession:** top posts go to family members, unfair to ordinary workers. (3) **Money and muscle power:** rich people and criminals get tickets to win elections. (4) **No meaningful choice:** differences in ideology between parties have shrunk. (5) **Reform:** the anti-defection law, compulsory affidavits on property and criminal cases, and the Election Commission's rule on organisational elections and income tax returns. **Conclusion:** Reforms and public pressure can make parties stronger.

WEAK ANSWER VS STRONG ANSWER (SAME QUESTION, Q4)

Weak (2/5): "Power sharing is good. In a democracy power is shared in many ways between many people so that there is no fight and everyone is happy."

Strong (5/5): "Power is shared in four forms. (1) Horizontal: legislature, executive, judiciary. (2) Vertical: Union, State, local. (3) Social groups: Belgium's community government. (4) Parties and pressure groups: coalitions. Hence power is not concentrated."

Why: the strong one names 4 forms + 1 example in fewer words. Key terms earn marks.

8 MORE FAVOURITE 5-MARKERS FOR YOUR NEXT FREE HOUR

H1: How Romanticism built national feeling; why the Balkans became the "powder keg" of Europe.

H2: Why Gandhiji launched a satyagraha against the Rowlatt Act; how a sense of collective belonging developed (Bharat Mata, folklore, flag, history).

H5: How print helped new readers: children, women and workers in 19th-century Europe.

P1/P2: Elements of the Belgian model; five advantages of decentralisation after 1992.

P5: "Democracy produces an accountable, responsive and legitimate government." Justify.

KEYWORD BANK: WORDS THAT EARN MARKS IN HISTORY + POL SCI ANSWERS

Conservatism: preserve monarchy, Church, old order (Vienna 1815)

Liberalism: liber = free; equality before law, constitution

Satyagraha: power of truth, non-violent mass action

Swaraj: self-rule; each group read it differently

Index of Prohibited Books: Church list of banned books, from 1558

Vernacular Press Act: 1878, censorship of Indian-language papers

Majoritarianism: majority rules as it wishes (Sri Lanka 1956)

Checks and balances: organs of government limit each other

Coalition government: two or more parties share power

Anti-defection law: stops elected members switching parties

Q1	Q2	Q3	Q4	Q5	Total
__/5	__/5	__/5	__/5	__/5	__/25

DAY 51 COMPLETE? ☐ 5 answers written ☐ Timed ☐ Self-marked ☐ Weak points noted

Next: Day 52, Geo + Eco long answers

DAY 52

REVISION | GEOGRAPHY + ECONOMICS

Long Answers + One Full Map Round

5 timed answers, then all 63 geography map items

Aaj ka target

- ☐ 5 long answers (5-5 marks) + poora map round
- ☐ 63 map items, target 55 sahi
- ☐ 60 + 40 + 20 min ka plan
- ☐ Galat map items ek baar aur mark karo

SAME STRUCTURE AS YESTERDAY

Intro line, 5 numbered points with a bold key term each, one example (a place, a state, a number), one-line conclusion. About 120 words, 12 minutes. In Geography answers, a **named place** in a point is worth more than a general sentence.

Part A: Long Answers

5 questions, 5 marks each, 12 minutes each

1. Soil erosion is a serious problem in many parts of India. Analyse five measures that can be taken to control it. *[Geo Ch1]* (5)

2. Explain why there is a pressing need to use non-conventional (renewable) sources of energy in India. Give examples. *[Geo Ch5]* (5)

   OR

   "Energy saved is energy produced." Explain, with five ways of conserving energy.

3. Explain five factors responsible for the concentration of iron and steel plants in and around the Chhota Nagpur plateau. *[Geo Ch6]* (5)

4. "Some activities are the primary responsibility of the government." Explain this statement with suitable examples. *[Eco Ch2]* (5)

5. "Credit can sometimes push a borrower into a situation from which recovery is very painful." Support the statement with examples, and say how this risk can be reduced. *[Eco Ch3]* (5)

MAP ALERT!

Board paper mein **Q19 = 3 marks** Geography map. Bina dekhe 63 mein se kam se kam 55 sahi hone chahiye. Dot lagao, naam likho, **spelling bhi check** karo (Bailadila, Kakrapara, Naharkatia).

Part B: Map Round

On an outline map of India, mark all 63 items. 40 minutes, no book.

DAMS (CH3)

- **1.** Salal, **2.** Bhakra Nangal, **3.** Tehri, **4.** Rana Pratap Sagar, **5.** Sardar Sarovar, **6.** Hirakud, **7.** Nagarjuna Sagar, **8.** Tungabhadra

SOILS (CH1, IDENTIFY)

- **9.** Alluvial, **10.** Black, **11.** Red and yellow, **12.** Laterite, **13.** Arid, **14.** Forest

CROPS (CH4, IDENTIFY)

- **15.** Rice, **16.** Wheat, **17.** Sugarcane, **18.** Tea, **19.** Coffee, **20.** Rubber, **21.** Cotton, **22.** Jute

IRON ORE MINES (CH5)

- **23.** Mayurbhanj, **24.** Durg, **25.** Bailadila, **26.** Bellary, **27.** Kudremukh

COAL MINES (CH5)

- **28.** Raniganj, **29.** Bokaro, **30.** Talcher, **31.** Neyveli

OIL FIELDS (CH5)

- **32.** Digboi, **33.** Naharkatia, **34.** Mumbai High, **35.** Bassien, **36.** Kalol, **37.** Ankaleshwar

THERMAL POWER (CH5)

- **38.** Namrup, **39.** Singrauli, **40.** Ramagundam

NUCLEAR POWER (CH5)

- **41.** Narora, **42.** Kakrapara, **43.** Tarapur, **44.** Kalpakkam

COTTON TEXTILE (CH6)

- **45.** Mumbai, **46.** Indore, **47.** Surat, **48.** Kanpur, **49.** Coimbatore

IRON AND STEEL PLANTS (CH6)

- **50.** Durgapur, **51.** Bokaro, **52.** Jamshedpur, **53.** Bhilai, **54.** Vijayanagar, **55.** Salem

SOFTWARE TECHNOLOGY PARKS (CH6)

- **56.** Noida, **57.** Gandhinagar, **58.** Mumbai, **59.** Pune, **60.** Hyderabad, **61.** Bengaluru, **62.** Chennai, **63.** Thiruvananthapuram

MAP MARKING RULES

Use a sharp pencil. Mark a dot or symbol (dams: a short bar on the river; mines: a small triangle; power plants: a small square; cities: a dot) and write the name neatly next to it. For soils and crops, shade or write the name inside the region. Do not colour the whole map.

Day 52 Answers, Part A (marking points)

1 **Intro:** Soil erosion can be checked by changing how land is farmed and protected.
(1) **Contour ploughing** along contour lines slows water flowing down slopes. (2) **Terrace farming** (step cultivation) on hill slopes, as in the Western and Central Himalayas. (3) **Strip cropping:** strips of grass between crops break the force of wind. (4) **Shelter belts:** rows of trees planted in western India (Rajasthan) stabilised sand dunes. (5) **Plugging gullies** and checking overgrazing, plus planting trees (afforestation).
Conclusion: Conserving soil protects farm output for the future.

2 **Intro:** India needs non-conventional energy because conventional sources are limited and polluting.
(1) Fossil fuels (coal, oil, gas) are **exhaustible** and will run out. (2) India **imports** much of its oil; rising prices strain the economy. (3) Burning coal and oil causes **pollution** and climate change. (4) India has plenty of **sunshine, wind, tides, biomass**: solar (Madhapur near Bhuj), wind (Nagarcoil, Jaisalmer), geothermal (Parvati valley, Puga valley), tidal (Gulf of Khambhat). (5) They are **renewable** and suit rural areas (biogas, gobar gas plants).
Conclusion: Renewables give clean, lasting energy security.

3 **Intro:** The Chhota Nagpur plateau has the largest concentration of iron and steel plants.
(1) **Low cost of iron ore** found nearby. (2) **High-grade raw materials** close by: coal, limestone, dolomite, manganese. (3) **Cheap labour** available in large numbers. (4) **Vast market potential** in the home region. (5) **Good transport** (railways) and water and power for the plants.
Example: Jamshedpur, Bokaro, Durgapur, Burnpur. **Conclusion:** Nearness to raw materials keeps costs low.

4 **Intro:** Some activities need heavy spending or serve everyone, so the government must do them.
(1) **Infrastructure:** roads, bridges, railways, harbours, power and dams need huge money that private firms cannot raise. (2) Some services must be supplied at **low cost**: electricity, water. (3) **Food security:** buying grain at a fair price from farmers and selling it cheaply through ration shops. (4) **Health and education** for all: government schools and hospitals. (5) Running **sick industries** to protect workers' jobs, and caring for the poor.
Conclusion: The public sector exists for welfare, not just profit.

5 **Intro:** Credit helps only when the borrower can repay; otherwise it becomes a debt trap.
(1) A small farmer like **Swapna** borrows to grow groundnut; the crop fails due to pests. (2) She cannot repay, so the loan plus interest grows larger. (3) She must **sell part of her land** to repay the moneylender. (4) This is a **debt trap**: credit made her worse off than before. (5) **Remedy:** cheap formal credit from banks and cooperatives, and Self-Help Groups that lend without collateral at fair rates.
Conclusion: In risky situations, credit can do more harm than good.

MOCK TEST 3 OF 3

Full Board Paper: Mock Test 3

One sitting, 3 hours, exactly like the board exam. Check only after the bell.

Aaj ka target

- [ ] Mock Test 3: aakhri full paper, 80 marks
- [ ] 3 ghante, bilkul board exam ki tarah
- [ ] No book, no phone, no break
- [ ] Key bell ke baad, galtiyan Mistake Book mein

MOCK TEST 3

Time: 3 hours | Max. marks: 80

1. Same pattern as Mock Test 1: 38 compulsory questions in four sections of 20 marks; OR choice in every 5-mark question; Q9 and Q19 on the outline map of India.

A History

Q1 to Q9 | 20 marks

1 Which statements about the Civil Code of 1804 (Napoleonic Code) are true?
(I) It secured the right to property. (II) It established equality before the law. (III) It did away with privileges based on birth. (IV) It gave women equal rights with men. (1)

(a) (I) and (II) only **(b)** (II) and (III) only
(c) (I), (II) and (III) only **(d)** (I), (II), (III) and (IV)

2 The Rowlatt Act of 1919 was opposed because it: (1)

(a) raised the tax on salt
(b) allowed detention of political prisoners without trial for two years
(c) banned the Congress party
(d) forced Indians to grow indigo

3 As a diplomat you study a country that, from the fifteenth century, restricted overseas contacts and retreated into isolation. Which country is it? (1)

(a) India **(b)** England **(c)** America **(d)** China

4 "The printing press is the most powerful engine of progress, and public opinion is the force that will sweep despotism away." Who said this? (1)

(a) Martin Luther **(b)** Louise-Sebastien Mercier
(c) Erasmus **(d)** Menocchio

5 State any two effects of the Jallianwala Bagh massacre on the national movement. (2)

6 A leader played a key role in bringing the Italian states together through diplomacy and alliances with other European powers. Identify him and explain three of his actions. (3)

7 "The Vernacular Press Act of 1878 reflected the fear of the British government towards Indian public opinion." Justify the statement. (5)

OR

"Print culture created the conditions within which the French Revolution occurred." Explain with five arguments. (5)

8 Read the source and answer the questions that follow. (4)

> *In the economic sphere, liberalism stood for the freedom of markets and the abolition of state-imposed restrictions on the movement of goods and capital. A merchant travelling from Hamburg to Nuremberg had to pass through 11 customs barriers and pay a duty of about 5 per cent at each. Each region had its own weights and measures: an elle of cloth was 54.7 cm in Frankfurt, 55.1 cm in Mainz and 65.6 cm in Nuremberg.*

(i) What did liberalism stand for in the economic sphere? (1)
(ii) What was the elle? (1)
(iii) Why was trade slow and costly in the German states, and how did the Zollverein of 1834 help? (2)

9 On the outline map of India, locate and label the following with suitable symbols:
(a) The place where peasants organised a satyagraha in 1917-18 against revenue collection after crop failure.
(b) The place where the Jallianwala Bagh incident took place. (2)

B Geography

Q10 to Q19 | 20 marks

10 Land use pattern differs across regions of India mainly because of: (1)

(a) Relief and rainfall only
(b) Soil and minerals only
(c) Physical factors along with human factors
(d) Colonial history alone

11 Arrange in chronological order:
(I) Conservationists demanded a national wildlife protection programme. (II) Butterflies, moths, beetles and one dragonfly were added to the protected list. (III) Plants were added, starting with six species. (IV) The Indian Wildlife (Protection) Act was implemented. (1)

(a) (I), (IV), (II), (III) (b) (IV), (I), (II), (III)
(c) (I), (II), (IV), (III) (d) (IV), (II), (III), (I)

12 Hirakud Dam is built on which river? (1)

(a) Krishna (b) Mahanadi
(c) Sutlej (d) Narmada

13 **Assertion (A):** Stagnation in agriculture will not lead to a decline in other spheres of the economy.
Reason (R): All three sectors of the economy depend on each other. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

14 The iron ore of Kudremukh is carried to a port near Mangaluru: (1)

(a) by railway wagons
(b) as slurry through a pipeline
(c) by trucks on highways
(d) by river barges

15 Which statements about NTPC are correct?
(I) It is a major power-producing corporation. (II) It causes most of India's air pollution. (III) It uses ecological monitoring and online database management at its power stations. (IV) It has a power station at Ramagundam. (1)

(a) (I), (III) and (IV) (b) (I) and (II)
(c) (II) and (IV) (d) (I), (II), (III) and (IV)

16 Why are many industries located in or near cities? Give two reasons. (2)

17 "Industries are located on the basis of several factors that ensure efficiency and profit." Explain any five factors. (5)

OR

"Conservation of minerals is necessary for future generations and sustained development." Explain why, and suggest ways to conserve them. (5)

18 Read the source and answer the questions that follow. (4)

Climate-smart agriculture (CSA) is an approach that guides actions to transform farming systems towards green and climate-resilient practices. It supports internationally agreed goals such as the Sustainable Development Goals and the Paris Agreement on climate change, and the FAO strategic framework built on four betters: better production, better nutrition, a better environment and a better life for all.

(i) An expert suggests growing and eating more millets in India. Justify this view. (1)
(ii) Why does India need climate-smart agriculture? (1)
(iii) Suggest two ways in which India can shift towards climate-smart agriculture. (2)

19 On the outline map of India, locate and label any three of the following:
(a) Sardar Sarovar Dam (b) Digboi oil field (c) Pune software technology park (d) Kalpakkam nuclear power plant (3)

C Political Science

Q20 to Q28 | 20 marks

20 **Assertion (A):** Social conflict often leads to violence and political instability.
Reason (R): It creates disharmony among social groups and damages the unity of the nation. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

21 Why can caste alone not decide elections in India?
(I) No party wins the votes of all voters of one caste. (II) Parties ignore caste altogether. (III) No constituency has a clear majority of one single caste. (1)

(a) (I) only (b) (II) only
(c) (I) and (III) only (d) (I), (II) and (III)

22 Arrange these parties by year of formation, earliest first: (I) BSP (II) BJP (III) INC (IV) CPI(M) (1)

(a) (III), (IV), (II), (I) (b) (III), (II), (IV), (I)
(c) (IV), (III), (I), (II) (d) (III), (IV), (I), (II)

23 Country A now has a popular head of state, welcomes people of all religions and has allowed women to vote. What change has it gone through? (1)

(a) Monarchy to autocracy
(b) Autocracy to bureaucracy
(c) Non-democratic to democratic government
(d) Democracy to military rule

24 Give two reasons to show that India is a federal country. (2)

25 Suggest any two ways to promote communal harmony in India. (2)

26 How do state or regional parties strengthen federalism and democracy in India? Explain three points. (3)

27 Explain how the Constitution of India divides legislative powers between the Union and the States, with examples. (5)

OR

How does democracy promote the dignity and freedom of citizens? Explain with five points. (5)

28 Read the source and answer the questions that follow. (4)

> *Political parties are the most visible face of democracy, so people tend to blame them for whatever is wrong with its working. All over the world people express strong dissatisfaction with the failure of parties to perform their functions well. Popular criticism has focused on four problem areas: lack of internal democracy, dynastic succession, the growing role of money and muscle power, and the lack of a meaningful choice for voters.*

(i) Name one challenge related to the internal working of parties. (1)
(ii) A party head will hand over his post to no one except his son. Which challenge is this? (1)
(iii) Suggest two ways to curb the use of money and muscle power in politics. (2)

D Economics

Q29 to Q38 | 20 marks

29 Kerala has a lower infant mortality rate than many states mainly because: (1)

(a) it has a higher per capita income
(b) it has adequate basic health and educational facilities
(c) it has more industries
(d) it has a hilly terrain

30 Ronit works in a hotel with fixed working hours, paid leave and a provident fund. He works in the: (1)

(a) Unorganised sector **(b)** Organised sector
(c) Primary sector **(d)** Informal sector

31 Who issues currency notes in India on behalf of the central government? (1)

(a) State Bank of India **(b)** Finance Ministry
(c) Reserve Bank of India **(d)** NABARD

32 **Assertion (A):** Barriers were removed so that the Indian economy could be westernised.
Reason (R): Removing barriers or restrictions set by the government is known as liberalisation. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

33 India held the G20 presidency in 2023. What was the theme of its presidency? (1)

(a) Sabka Saath Sabka Vikas
(b) One Earth, One Family, One Future
(c) Make in India, Make for the World
(d) Digital India for All

34 Banks in India keep only a small share of their deposits as cash. About how much is it? (1)

(a) 5 per cent **(b)** 15 per cent
(c) 50 per cent **(d)** 75 per cent

35 "Sustainability is important for development." Support the statement with three points. (3)

36 "Several services that the private sector cannot provide are provided by the public sector." Justify with three examples. (3)

37 Explain the main terms of credit with an example. (3)

38 Highlight the ways in which the government can create more employment in rural and urban areas. Mention the role of MGNREGA. (5)

OR

What is globalisation? Explain the factors that have enabled globalisation. (5)

Self-check score

History	Geography	Pol. Science	Economics	Total
__/20	__/20	__/20	__/20	__/80

Mock Test 3: answer key and marking points

1-34 **Objective answers:** **1** (c) **2** (b) **3** (d) **4** (b) **10** (c) **11** (a) **12** (b) **13** (d) **14** (b) **15** (a) **20** (a) **21** (c) **22** (a) **23** (c) **29** (b) **30** (b) **31** (c) **32** (d) **33** (b) **34** (b)

5 • It caused widespread anger: crowds took to the streets, strikes, clashes with police and attacks on government buildings in north Indian towns.
• The government responded with brutal repression; Gandhiji called off the Rowlatt Satyagraha and felt the need for a broader movement (Non-Cooperation). (Any two)

6 • Count Camillo de Cavour, chief minister of Sardinia-Piedmont.
• He led the movement to unify Italy through diplomacy, not revolution or democracy.
• He engineered a tactful alliance with France, which helped Sardinia-Piedmont defeat Austria in 1859.
• He supported regular troops and the volunteers led by Garibaldi; in 1861 Victor Emmanuel II became king of united Italy.

7 • After 1857, the British changed their attitude to freedom of the press; enraged Englishmen demanded a clampdown on the native press.
• Vernacular newspapers became assertively nationalist and criticised colonial misrule.
• The Act (1878), modelled on the Irish Press Laws, gave the government extensive rights to censor reports and editorials in the vernacular press.
• The government kept regular track of vernacular papers; if a report was "seditious", the paper was warned and its press could be seized and machinery confiscated.
• Despite this, nationalist papers grew; when Punjab revolutionaries were deported in 1907, Tilak wrote about them in Kesari and was imprisoned, causing protests.
OR • Print popularised the ideas of Enlightenment thinkers like Voltaire and Rousseau.
• Their writings criticised tradition, superstition and despotism and argued for rule by reason.
• Print created a new culture of dialogue and debate; old values were questioned.
• By the 1780s there was a flood of literature mocking royalty, especially the king and queen, and their morality.
• Print helped spread ideas, though it did not directly shape minds; people read selectively, but it created conditions for revolution.

8 • (i) Freedom of markets and abolition of state-imposed restrictions on the movement of goods and capital.
• (ii) A measure of cloth whose length differed from region to region.
• (iii) Many customs barriers, duties at each and different weights and measures made trade slow and costly; the Zollverein (1834, led by Prussia) abolished tariff barriers and reduced the currencies from over thirty to two.

9 (a) Kheda (Gujarat) (b) Amritsar (Punjab), correctly located and labelled.

16 • Cities provide markets, banking, insurance, transport, labour, consultants and financial advice.
• Agglomeration economies: industries benefit from the many services and other industries already present there.

17 • Availability and cost of raw material.
• Labour supply and capital.
• Power supply and availability of water.
• Market for the finished goods.
• Government policies, transport and banking facilities; industries try to keep costs low by locating where these factors meet.
OR • Minerals are finite and non-renewable; their formation takes millions of years.
• Rate of replenishment is far slower than the present rate of use.
• Continued extraction raises costs as deeper mines and poorer ores remain.
• Ways: use minerals in a planned and sustainable manner; improved technologies to use low grade ores at low cost.
• Recycling of metals, use of scrap metals and other substitutes.

18 • (i) Millets need little water and grow on poor soils, so they suit a changing climate and are nutritious.
• (ii) To raise production and nutrition while coping with climate change and protecting the environment.
• (iii) Water-saving irrigation such as drip irrigation; crop diversification, organic manure and climate-resilient seeds (any two).

19 Sardar Sarovar: Gujarat (on the Narmada); Digboi: Assam; Pune: Maharashtra; Kalpakkam: Tamil Nadu. Any three, 1 mark each.

24 • Power is divided between the Union and the State governments (three lists), with local government as a third tier.
• The Constitution is supreme; changes to basic structure need consent of both levels, and courts settle disputes. (Any two)

25 • Religion should be kept a personal matter; the state must treat all religions equally (secularism).
• Spreading awareness and education against communal prejudice; strict action against communal violence. (Any two)

26 • Regional parties got a chance to be in power at the state level and in coalition governments at the Centre.
• This made the Centre respect the autonomy of states and strengthened federalism.
• They give voice to regional interests and diversity, making democracy more broad-based.

27 • The Constitution has a three-fold distribution of legislative powers.
• Union List: subjects of national importance like defence, foreign affairs, banking and currency; only the Union makes laws.
• State List: subjects of state and local importance like police, trade, commerce, agriculture and irrigation; states make laws.
• Concurrent List: common interest subjects like education, forest, trade unions, marriage, adoption; both can make laws, and Union law prevails in a conflict.
• Residuary subjects (like computer software) not in any list go to the Union government.
OR • Democracy is based on respect and dignity of every individual.
• It recognises equal rights of women; laws against discrimination and dowry, and their struggles are legally supported.
• It strengthens the claims of disadvantaged and discriminated castes for equal status and opportunity.
• Citizens can express views freely and choose their rulers.
• Democracy transforms people from subjects into citizens and keeps examining its own working.

28 • (i) Lack of internal democracy: power concentrated in one or a few top leaders.
• (ii) Dynastic succession.
• (iii) Candidates must file affidavits giving details of property and criminal cases; state funding of elections; parties must hold organisational elections (any two).

35 • Resources like groundwater and fossil fuels are limited; overuse will leave nothing for future generations.
• Development must be sustained: the present generation should use resources without harming the future.
• Environmental damage (pollution, degradation) is not limited to a country; it affects everyone.

36 • Building roads, bridges, railways, harbours and generating electricity need huge spending, so the government provides them.
• The government supplies electricity and water at low cost to small industries and the poor.
• It runs schools, hospitals, the PDS and supports farmers by buying food grains at a fair price.

37 • Rate of interest charged on the loan.
• Collateral: an asset the borrower owns (land, building, gold) used as a guarantee.
• Documentation and mode of repayment; e.g. a house loan: bank takes the house papers as collateral and fixes monthly instalments.

38 • Identify, promote and locate industries and services in semi-rural areas with more people employed.
• Invest in irrigation, dams and rural roads, cold storage and transport for farmers.
• Provide cheap credit to farmers and small units; promote tourism, regional crafts and IT.
• MGNREGA 2005: right to work for 100 days a year in 625 districts; if no work is given, unemployment allowance is paid.
• Work under MGNREGA (water, land, soil) raises farm output; one-third of jobs are for women.
OR • Globalisation: rapid integration or interconnection between countries through trade, investment and movement of people, ideas and technology.
• Technology in transport: containers and faster, cheaper movement of goods.
• Information and communication technology: telecom, computers and the internet connect the world.
• Liberalisation of foreign trade and investment policy: removing barriers set by the government (India, 1991).
• These let MNCs spread production and markets across countries, integrating them.

THREE MOCKS DONE: YOUR BOARD STRATEGY

Compare all three scores: **M1 ____ M2 ____ M3 ____** (out of 80). Your weakest section now gets one extra hour each day of the Last 7 Days. Keep the timing you practised: about 40 minutes per section and the last 20 minutes to read through and complete the maps.

DAY 53 COMPLETE?

- ☐ **Wrote the full paper in 3 hours**
- ☐ **Checked with the key**
- ☐ **Every lost mark noted in the Mistake Book**

Next: Day 54, Last 7 Days begins (History)

DAY 54

LAST 7 DAYS | HISTORY

History in One Sitting

Timelines, people, key terms, maps + Quick 15

Aaj ka target

- [ ] History ek baithak mein: 4 chapters recap
- [ ] Timeline aur dates ek baar zor se bolo
- [ ] Quick 15, target 15/15
- [ ] 90 min, bas

Ch1 Nationalism in Europe: dates

1707	Act of Union: England and Scotland form United Kingdom (1801: Ireland joins)
1789	French Revolution: sovereignty to the people; **la patrie**, **le citoyen**, tricolour
1804	Napoleonic Civil Code: equality before law, right to property
1815	Napoleon defeated; Congress of Vienna (Metternich) restores conservative order
1821	Greek war of independence begins (Byron supports)
1830	July revolution in France; Belgium breaks from the Netherlands
1832	Treaty of Constantinople: Greece independent
1834	Zollverein customs union led by Prussia
1848	Revolutions of liberals; Frankfurt Parliament (St Paul's Church, 18 May)
1859-70	Unification of Italy (Cavour, Garibaldi); 1861 Victor Emmanuel II king
1871	German Empire proclaimed at Versailles; Kaiser William I; Bismarck
1871-1914	Balkans become the "powder keg" of Europe

Ch2 Nationalism in India: dates

1915	Gandhiji returns from South Africa
1917	Champaran (indigo), Kheda (peasants); 1918 Ahmedabad (mill workers)
1919	Rowlatt Act; 13 April Jallianwala Bagh, Amritsar
Sep 1920	Calcutta session: Non-Cooperation approved
Dec 1920	Nagpur session: Non-Cooperation adopted
Feb 1922	Chauri Chaura; movement withdrawn
1927	Madras session of the Congress
1928	Simon Commission arrives: "Go back, Simon"
Dec 1929	Lahore session: Purna Swaraj (Nehru); 26 Jan 1930 Independence Day
Mar-Apr 1930	Dandi March (Sabarmati to Dandi, 6 April salt law broken)
Mar 1931	Gandhi-Irwin Pact; Dec 1931 Second Round Table Conference
Sep 1932	Poona Pact: reserved seats for depressed classes

Ch3 Pre-modern World + Ch5 Print Culture: dates

Pre-modern	Silk routes link China, India, West Asia, Europe; Buddhism, Christianity, Islam spread along them
1492	Columbus reaches the Americas; Columbian Exchange of crops, germs, people
Mid-1500s	Spanish and Portuguese conquest; smallpox kills native people
AD 594	China: books printed by rubbing paper on inked woodblocks
768-770	Hand-printing reaches Japan; AD 868 Diamond Sutra
1448	Gutenberg perfects his printing press; first book printed is the Bible
1517	Martin Luther's Ninety-five Theses: Protestant Reformation
1558	Roman Church begins Index of Prohibited Books
1780	James Augustus Hickey starts the Bengal Gazette
1821-22	Sambad Kaumudi (Rammohun Roy); Persian papers Jam-i-Jahan Nama
1878	Vernacular Press Act
1871 / 1938	Phule's Gulamgiri on caste; Kashibaba (Kanpur mill worker) writes Chhote Aur Bade Ka Sawal

EUROPE

- **Mazzini:** Young Italy, Young Europe; Metternich called him the most dangerous enemy of social order
- **Cavour:** chief minister of Sardinia-Piedmont, diplomacy and French alliance
- **Garibaldi:** Red Shirts, South Italy and Two Sicilies (1860)
- **Bismarck:** Prussian chief minister, three wars in seven years

EUROPE

INDIA

- **Gandhiji:** satyagraha; Champaran, Kheda, Ahmedabad; Non-Cooperation; Dandi
- **Ambedkar:** Depressed Classes Association 1930; Poona Pact
- **Alluri Sitaram Raju:** Gudem hills rebellion, Andhra
- **Abanindranath Tagore:** painted Bharat Mata

KEY TERMS IN ONE LINE EACH

Nation-state: citizens share a common identity and history

Absolutist: unrestricted monarchical rule

Utopian: an ideal society unlikely to exist

Plebiscite: direct vote of all people on a proposal

Suffrage: the right to vote

Conservatism: stress on tradition and established institutions

Ethnic: shared racial, tribal or cultural origin

Allegory: an abstract idea shown through a person or thing

Satyagraha: non-violent resistance based on truth

Begar: forced labour without pay

Picket: blocking a shop entrance as protest

Boycott: refusal to deal with people or goods

Calligraphy: art of beautiful, stylised writing

Vellum: parchment made from animal skin

Protestant Reformation: 16th-century movement to reform the Catholic Church

Ulama: scholars of Islamic learning

HISTORY MAP ITEMS (Q9, 2 MARKS)

Calcutta: INC session, September 1920

Nagpur: INC session, December 1920

Madras: INC session, 1927

Champaran (Bihar): indigo planters

Kheda (Gujarat): peasant satyagraha

Ahmedabad (Gujarat): cotton mill workers

Amritsar (Punjab): Jallianwala Bagh

Dandi (Gujarat): Civil Disobedience, salt law

SHIVAM BHAIYA KA NOTE

Aaj sirf **dates aur names**. Har timeline ko ek baar padho, phir book band karke 1789 se 1932 tak **zubani bolo**. Jo date atke, uspe tick lagao aur kal subah phir dekho.

Quick 15

1 mark each, 12 minutes, answer in one line

1. What did the French revolutionaries use instead of royal standards to symbolise the nation? *[H1]*
2. The term *la patrie* referred to what? *[H1]*
3. Which language did Galicia's aristocracy use? *[H1]*
4. Identify the Austrian Chancellor who hosted the 1815 Congress of Vienna. *[H1]*
5. Who argued that the real German culture lived among ordinary people, *das Volk*? *[H1]*
6. Which state led the political unification of Italy? *[H1]*
7. Name the allegorical figure of the German nation. *[H1]*
8. Which Congress session accepted Non-Cooperation in December 1920? *[H2]*
9. At what event did Gandhiji call off Non-Cooperation? *[H2]*
10. Which group organised the Indian Industrial and Commercial Congress? *[H2]*
11. Name the 1932 pact between Gandhiji and Ambedkar over representation. *[H2]*
12. What two goods moved toward Asia along the Silk Routes from Europe? *[H3]*
13. Which New World crop from the Columbian Exchange changed the diet of Europe? *[H3]*
14. Who published the reformist newspaper *Sambad Kaumudi*? *[H5]*
15. What 1878 law gave the colonial state power over Indian-language newspapers? *[H5]*

Day 54 Answers

1. The tricolour flag.

2 The fatherland.
3 Polish.
4 Duke Metternich.
5 Johann Gottfried Herder.
6 Sardinia-Piedmont.

7 Germania.
8 Nagpur.
9 The violence at Chauri Chaura (1922).
10 Indian industrialists and business groups.
11 Poona Pact.
12 Gold and silver.

13 Potato (also maize, sweet potato, cassava).
14 Raja Rammohun Roy.
15 Vernacular Press Act.

HOW HISTORY COMES IN THE BOARD PAPER (SECTION A, 20 MARKS)

Q1 to Q4 (1 each): MCQs, often picture-based (Germania, Sorrieu, Bharat Mata) or A-R.

Q5 (2) and Q6 (3): short answers: Napoleonic Code, Rowlatt satyagraha, Silk Routes, print and women.

Q7 (5, with OR): Vienna 1815, social groups in Civil Disobedience, print revolution.

Q8 (4): source-based case from any chapter.

Q9 (2): two map items from the list above.

Tip: Ch1 and Ch2 together carry the most marks, revise them first.

DAY 54 COMPLETE?

- ☐ Recap read twice
- ☐ 15 questions done
- ☐ Score __/15
- ☐ Weak topics marked

Next: Day 55, Geography

DAY 55

LAST 7 DAYS | GEOGRAPHY

Geography and All Maps, One Last Time

6 chapter cards, 63 map items, Quick 15

Aaj ka target

- ☐ Geography + saare maps, aakhri baar
- ☐ 63 + 8 map items memory se
- ☐ Quick 15 sawal, maps ke baad
- ☐ 90 min, pencil ready

CH1 RESOURCES

- Resources: biotic/abiotic, renewable/non-renewable, individual to international
- Rio Earth Summit 1992: Agenda 21
- Land use: net sown area about 54% (varies by state)
- Soils: alluvial, black, red-yellow, laterite, arid, forest
- Erosion control: contour ploughing, terracing, strip cropping, shelter belts

CH2 FORESTS AND WILDLIFE

- Reserved forests: more than half of forest land, most protected
- Protected forests: about one-third; unclassed: rest
- Wildlife Protection Act 1972; Project Tiger 1973
- Community action: Chipko, Bishnois, sacred groves, JFM (Odisha 1988)

CH3 WATER

- Scarcity: overuse, pollution, unequal access, growing population
- Multipurpose projects: Nehru's "temples of modern India"
- Problems: displacement, sediment, floods, Narmada Bachao Andolan
- Rainwater harvesting: guls/kuls, tankas, khadins, johads, bamboo drip (Meghalaya)

CH4 AGRICULTURE

- Primitive subsistence (slash and burn), intensive subsistence, commercial
- Seasons: rabi (winter), kharif (monsoon), zaid (summer gap)
- Rice: kharif, 25 degree C, over 100 cm rain; wheat: rabi, 50-75 cm
- Bhoodan-Gramdan (Vinoba Bhave); MSP, KCC, crop insurance

CH4 AGRICULTURE

CH5 MINERALS AND ENERGY

- Ferrous (iron, manganese), non-ferrous (copper, bauxite), non-metallic (mica, limestone)
- Coal: Gondwana (Damodar) and tertiary (North-East)
- Conventional: coal, oil, gas, thermal, hydel; nuclear
- Non-conventional: solar, wind, tidal, geothermal, biogas

CH6 MANUFACTURING

- Location factors: raw material, labour, power, capital, market
- Agro-based: cotton, jute, sugar; mineral-based: iron and steel, aluminium
- Chhota Nagpur: largest iron and steel concentration
- Pollution: air, water, thermal, noise; control by treatment, rainwater, ESP filters

SHIVAM BHAIYA SOCH RAHE HAIN

Map yaad karne ka trick: **state wise** socho. Gujarat = Sardar Sarovar, Kalol, Ankaleshwar, Kakrapara, Surat, Gandhinagar. Ek state, chhe answer!

SPELLINGS THAT LOSE MARKS ON THE MAP QUESTION

Bailadila (not Bailadilla)
Kakrapara (not Kakrapar)
Naharkatia (not Nahar Katiya)
Ramagundam (not Ramagundum)
Thiruvananthapuram (write in full)
Mayurbhanj (not Mayurbhanja)
Rana Pratap Sagar (on the Chambal)

Every map item with its place (63 Geography + 8 History)

DAMS (CH3)

- **Salal:** Jammu and Kashmir (Chenab)
- **Bhakra Nangal:** Himachal Pradesh-Punjab (Satluj)
- **Tehri:** Uttarakhand (Bhagirathi)
- **Rana Pratap Sagar:** Rajasthan (Chambal)
- **Sardar Sarovar:** Gujarat (Narmada)
- **Hirakud:** Odisha (Mahanadi)
- **Nagarjuna Sagar:** Telangana-Andhra Pradesh (Krishna)
- **Tungabhadra:** Karnataka (Tungabhadra)

SOILS (CH1, IDENTIFY)

- **Alluvial:** Northern plains, river deltas of east coast
- **Black:** Deccan lava plateau: Maharashtra, Gujarat, MP, Chhattisgarh
- **Red and yellow:** Eastern and southern Deccan: Odisha, Chhattisgarh
- **Laterite:** Karnataka, Kerala, Tamil Nadu, hills of Odisha, Assam
- **Arid:** Western Rajasthan
- **Forest:** Hilly and mountain areas

CROPS (CH4, IDENTIFY)

- **Rice:** West Bengal, UP, Punjab, coastal and delta areas
- **Wheat:** Punjab, Haryana, UP, MP, Rajasthan
- **Sugarcane:** Uttar Pradesh (largest)
- **Tea:** Assam (largest); WB hills, TN, Kerala
- **Coffee:** Karnataka (largest)
- **Rubber:** Kerala (largest)
- **Cotton:** Gujarat, Maharashtra (Deccan black soil)
- **Jute:** West Bengal (largest)

IRON ORE MINES (CH5)

- **Mayurbhanj:** Odisha
- **Durg:** Chhattisgarh
- **Bailadila:** Chhattisgarh
- **Bellary:** Karnataka
- **Kudremukh:** Karnataka

COAL MINES (CH5)

- **Raniganj:** West Bengal
- **Bokaro:** Jharkhand
- **Talcher:** Odisha
- **Neyveli:** Tamil Nadu (lignite)

OIL FIELDS (CH5)

- **Digboi:** Assam
- **Naharkatia:** Assam
- **Mumbai High:** Offshore, Maharashtra
- **Bassien:** Offshore, Maharashtra
- **Kalol:** Gujarat
- **Ankaleshwar:** Gujarat

THERMAL POWER (CH5)

- **Namrup:** Assam
- **Singrauli:** Madhya Pradesh
- **Ramagundam:** Telangana

THERMAL POWER (CH5)

NUCLEAR POWER (CH5)

- **Narora:** Uttar Pradesh
- **Kakrapara:** Gujarat
- **Tarapur:** Maharashtra
- **Kalpakkam:** Tamil Nadu

HOW GEOGRAPHY COMES IN THE BOARD PAPER (SECTION B, 20 MARKS)

Q10 to Q15 (1 each): MCQs: soil types, dams and rivers, crops and seasons, minerals.

Q16 (2): short answer, e.g. rainwater harvesting, a farming type.

Q17 (5, with OR): soil erosion, multipurpose projects, iron and steel location, energy.

Q18 (4): case on agriculture, water or industry.

Q19 (3): three map items from the list on the next page.

COTTON TEXTILE (CH6)

- **Mumbai:** Maharashtra
- **Indore:** Madhya Pradesh
- **Surat:** Gujarat
- **Kanpur:** Uttar Pradesh
- **Coimbatore:** Tamil Nadu

IRON AND STEEL PLANTS (CH6)

- **Durgapur:** West Bengal
- **Bokaro:** Jharkhand
- **Jamshedpur:** Jharkhand
- **Bhilai:** Chhattisgarh
- **Vijayanagar:** Karnataka
- **Salem:** Tamil Nadu

SOFTWARE TECHNOLOGY PARKS (CH6)

- **Noida:** Uttar Pradesh
- **Gandhinagar:** Gujarat
- **Mumbai:** Maharashtra
- **Pune:** Maharashtra
- **Hyderabad:** Telangana
- **Bengaluru:** Karnataka
- **Chennai:** Tamil Nadu
- **Thiruvananthapuram:** Kerala

HISTORY ITEMS (CH2)

- **Calcutta:** INC Sep 1920
- **Nagpur:** INC Dec 1920
- **Madras:** INC 1927
- **Champaran:** Bihar
- **Kheda, Ahmedabad, Dandi:** Gujarat
- **Amritsar:** Punjab, Jallianwala Bagh

Quick 15

1 mark each, 12 minutes, answer in one line

1. Which soil stays moist and suits cotton cultivation? *[G1]*
2. Which plateau has rich reserves of minerals and fossil fuels? *[G1]*
3. Name one crop suited to laterite soil when manured and irrigated. *[G1]*
4. Which category of forests has the highest degree of legal protection? *[G2]*
5. What does Joint Forest Management bring local communities into? *[G2]*
6. Which dam lies across the Mahanadi River? *[G3]*
7. Where is rooftop rainwater harvesting no longer common after canal water arrived? *[G3]*
8. Name the fibre crop called “golden fibre”. *[G4]*
9. Which State produces the most coffee in India? *[G4]*
10. Name a rabi pulse grown in winter. *[G4]*
11. Which valley has important Gondwana coal deposits? *[G5]*
12. Bauxite is the ore of which metal? *[G5]*
13. Name the technology that uses cattle dung to make fuel and manure. *[G5]*
14. Which mineral is not a raw material for making iron and steel: limestone, iron ore, gypsum or coal? *[G6]*
15. Name the city called India's “electronic capital”. *[G6]*

Day 55 Answers

1. Black (regur) soil.

2 Chhota Nagpur plateau.
3 Tea or coffee.
4 Reserved forests.
5 Forest protection and restoration.
6 Hirakud.
7 Western Rajasthan.
8 Jute.

9 Karnataka.
10 Gram.
11 Damodar Valley.
12 Aluminium.
13 Biogas.
14 Gypsum.
15 Bengaluru.

MAP SELF-TEST: WRITE THE STATE FOR EACH, THEN CHECK ON THE PREVIOUS PAGES

DAY 56

LAST 7 DAYS | POLITICAL SCIENCE

Political Science in One Sitting

5 chapter cards, comparisons, key terms + Quick 15

Aaj ka target

- ☐ *Pol Sci ke 5 chapters ka recap*
- ☐ *12 key terms bina dekhe likho*
- ☐ *Quick 15 sawal, comparisons pe nazar*
- ☐ *90 min, phir thoda aaram*

CH1 POWER-SHARING

- Belgium: Dutch 59%, French 40%, German 1%; Brussels 80% French
- Belgian model: equal ministers, state govts not subordinate, community govt, Brussels separate govt
- Sri Lanka: Sinhala 74%, Tamils 18%; 1956 Act Sinhala only official language
- Reasons: prudential (less conflict) and moral (spirit of democracy)

CH2 FEDERALISM

- Two or more levels; constitution fixes powers; courts settle disputes
- Coming together (USA, Switzerland) vs holding together (India, Spain, Belgium)
- Union, State, Concurrent lists; residuary with Union
- 1992 amendment: local bodies, elections, one-third seats for women, SEC

CH3 GENDER, RELIGION, CASTE

- Sexual division of labour; feminist movements
- Women in Lok Sabha still a small share; one-third seats in local bodies
- Communalism: religion as basis of nation; secular state (no official religion)
- Caste: vote banks, but no caste is a majority in any constituency

CH4 POLITICAL PARTIES

- Functions: contest elections, policies, make laws, form govt, opposition, shape opinion
- One-party, two-party, multiparty systems
- Recognition by Election Commission: national and state parties

CH4 POLITICAL PARTIES

- Challenges: internal democracy, dynasty, money and muscle, no real choice

CH5 OUTCOMES OF DEMOCRACY

- Accountable, responsive, legitimate government
- Right to information: citizens can examine decisions
- Economic growth: no guarantee; inequality persists
- Dignity and freedom of citizens, especially women and dalits

COMPARE IN ONE LINE

- **Horizontal vs vertical:** organs vs levels
- **Coming together vs holding together:** equal states vs stronger Centre
- **National vs state party:** 6% votes in 4 states + 4 LS seats vs 6% votes + 2 seats in a state assembly
- **Secular vs communal:** state neutral vs religion-based politics

KEY TERMS FOR ONE-MARK ANSWERS

Majoritarianism: majority rules as it wishes, ignoring minorities

Civil war: violent conflict between groups inside a country

Prudential: based on careful calculation of gains and losses

Jurisdiction: area over which someone has legal authority

Decentralisation: power taken from Centre and State to local government

Gram Sabha: all voters of a village; elects and checks the panchayat

Patriarchy: system that values men more and gives them power

Feminist: one who believes in equal rights for women and men

Secular state: no official religion; equal freedom to all faiths

Partisan: strongly committed to one party, not fair-minded

Defection: changing party after being elected

Affidavit: signed statement of facts made on oath

HOW POLITICAL SCIENCE COMES IN THE BOARD PAPER (SECTION C, 20 MARKS)

Q20 to Q23 (1 each): MCQ or A-R: Belgium, federation types, party systems.

Q24, Q25 (2 each): e.g. two features of federalism, two reasons for power sharing.

Q26 (3): e.g. caste in politics, decentralisation.

Q27 (5, with OR): forms of power sharing, challenges to parties, outcomes of democracy.

Q28 (4): case on Belgium/Sri Lanka, federalism or gender.

SHIVAM BHAIYA SAYS

Pol Sci mein **examples** hi marks hain. Belgium, Sri Lanka, 1992 amendment, Election Commission ki shartein: har answer mein kam se kam ek example daalo.

Quick 15

1 mark each, 12 minutes, answer in one line

1. What is the principal aim of Belgium's power-sharing system? *[P1]*
2. What is it called when the majority community rules as it wishes, ignoring minorities? *[P1]*
3. Which European city hosts the headquarters of the European Union? *[P1]*
4. Who elects Belgium's community government? *[P1]*
5. How is a federation formed when states join to share power voluntarily? *[P2]*
6. Name the body in a village comprising all adult voters. *[P2]*
7. What does India's linguistic reorganisation illustrate? *[P2]*
8. Which group has one-third of seats reserved in local government bodies? *[P3]*
9. What is a division of labour based on stereotypes of men's and women's roles? *[P3]*
10. What term means using religion as the main basis of political identity? *[P3]*
11. Which party system lets only the ruling party contest elections (as in China)? *[P4]*
12. What challenge arises when top party posts pass to relatives of leaders? *[P4]*

13 **Name one document a candidate must file before an election.** *[P4]*

14 **Which outcome lets citizens examine how decisions were taken?** *[P5]*

15 **Why are complaints against government not necessarily a failure of democracy?** *[P5]*

Day 56 Answers

1 Accommodate the country's linguistic diversity.
2 Majoritarianism.
3 Brussels.
4 People belonging to the relevant language community.
5 A coming-together federation.
6 Gram Sabha.
7 Respect for diversity strengthens federalism.
8 Women (at least one-third).
9 Sexual division of labour.
10 Communalism.
11 One-party system.
12 Dynastic succession.
13 Affidavit stating property and criminal cases.
14 An accountable government.
15 They show people know their rights and expect accountability.

READY ANSWER FRAMES: THE POINTS EXAMINERS LOOK FOR

Why power sharing is desirable (3): reduces conflict between groups; ensures political stability; spirit of democracy, people affected have a say.

1992 amendment, local government (5): regular elections compulsory; seats reserved for SC, ST, OBC; one-third seats for women; State Election Commission; State must share powers and revenue.

Key features of federalism (3): two or more levels; each level's powers fixed by the constitution; courts interpret and settle disputes; both levels have own revenue.

Functions of political parties (5): contest elections; put forward policies; make laws; form and run government; play opposition; shape public opinion; give access to welfare schemes.

Caste in politics (3): parties choose candidates by caste make-up; appeal to caste sentiment; new consciousness among neglected castes; but no caste is a majority anywhere.

Democracy and dignity (3): women's equality recognised in law; dalits and backward castes claim equal status; people can demand rights.

BELGIUM VS SRI LANKA IN ONE TABLE

Point	Belgium	Sri Lanka
Groups	Dutch, French, German speakers	Sinhala majority, Tamil minority
Approach	Accommodation (power sharing)	Majoritarianism
Key step	Constitution amended four times (1970-1993)	1956 Act: Sinhala only official language
Result	Unity kept; EU headquarters in Brussels	Distrust, Tamil parties and civil war

DAY 56 COMPLETE?

☐ Recap read twice
☐ 15 questions done ☐ Score __/15
☐ Weak topics marked

Next: Day 57, Economics

DAY 57

LAST 7 DAYS | ECONOMICS

Economics in One Sitting

4 chapter cards, formulas, key terms + Quick 15

Aaj ka target

☐ Economics ke 4 chapters ka recap
☐ 6 formulas ek kaagaz pe likh ke dekho
☐ Quick 15, formulas wale pehle
☐ 90 min, aaj halka rakho

CH1 DEVELOPMENT

- Different people, different goals; income plus security, respect, freedom
- World Bank uses per capita income to classify countries

CH1 DEVELOPMENT

- HDI (UNDP): per capita income, health (life expectancy), education
- Kerala: low IMR, high literacy due to health and education services; PDS
- Sustainability: groundwater overuse, crude oil limits

CH2 SECTORS

- Primary (natural), secondary (manufacturing), tertiary (services)
- GDP counts only final goods and services
- Tertiary now largest in GDP; primary still largest employer
- Underemployment = disguised unemployment; MGNREGA 2005: 100 days work
- Organised vs unorganised; public vs private sector

CH3 MONEY AND CREDIT

- Barter needs double coincidence of wants; money is medium of exchange
- RBI issues notes on behalf of the government; supervises banks
- Terms of credit: interest, collateral, documents, mode of repayment
- Formal (banks, cooperatives) vs informal (moneylenders, traders)
- SHGs: 15-20 members, savings, loans without collateral

CH4 GLOBALISATION (BOARD PART)

- Globalisation: rapid integration of countries via trade, investment, technology
- Enabling factors: transport and IT technology; liberalisation of trade and investment
- India 1991: removed many trade barriers
- G20: forum of major economies; India's presidency 2023, New Delhi summit
- African Union made permanent G20 member in 2023

FORMULAS AND RATIOS TO REMEMBER

Per capita income = total income of country / total population

Infant mortality rate = children dying before age 1, per 1,000 live births

Literacy rate = literate people aged 7 and above, as % of that age group

Net attendance ratio = children aged 14-15 in school, as % of all children of that age

GDP = value of all final goods and services produced in a year within the country

Average hides inequality: always compare distribution too

KEY TERMS FOR ONE-MARK ANSWERS

Double coincidence of wants: both parties want what the other offers

Collateral: asset a borrower pledges as loan security

Demand deposit: bank deposit withdrawable on demand

Credit: agreement where lender supplies money now for later repayment

Intermediate goods: goods used up in making final goods

Disguised unemployment: more people working than needed

Organised sector: registered, follows rules, regular jobs

Public sector: government owns most assets

Liberalisation: removing government barriers on trade

MNC: company that owns or controls production in more than one country

HOW ECONOMICS COMES IN THE BOARD PAPER (SECTION D, 20 MARKS)

Q29 to Q34 (1 each): MCQs: sectors, GDP, RBI, collateral, globalisation, G20.

Q35 to Q37 (3 each): e.g. formal vs informal credit, organised vs unorganised, limits of average income.

Q38 (5, with OR): government's role in economy, credit and debt trap, SHGs, development goals.

SHIVAM BHAIYA KA NOTE

Economics mein **numbers wala sawaal** (per capita income, average) aaye to formula pehle likho, phir calculation. Step dikhoge to galti par bhi marks milenge.

Quick 15

1 mark each, 12 minutes, answer in one line

1. What is used to compare the average income of two countries? *[E1]*
2. Which health indicator uses height and weight to assess nutrition? *[E1]*

3. **Name the UN agency that publishes the Human Development Report.** *[E1]*

4. **Why can average income hide serious inequality?** *[E1]*

5. **Which sector produces natural goods such as crops and minerals?** *[E2]*

6. **What is the value of all final goods and services produced in a country in a year?** *[E2]*

7. **What is it called when extra workers can leave a farm without reducing output?** *[E2]*

8. **Which sector gives workers benefits such as paid leave and provident fund?** *[E2]*

9. **Who issues currency notes in India?** *[E3]*

10. **What type of bank balance is withdrawable at any time?** *[E3]*

11. **What is an asset pledged as security for a loan called?** *[E3]*

12. **Name a group that pools savings and gives small loans without collateral.** *[E3]*

13. **Name two factors that have enabled globalisation.** *[E4]*

14. **Which body was admitted as a permanent G20 member in 2023?** *[E4]*

15. **What is meant by globalisation?** *[E4]*

Day 57 Answers

1. Per capita income = total income divided by population.
2. Body Mass Index (BMI).
3. UNDP.
4. A few high incomes raise the mean even if most people are poor.
5. Primary sector.
6. Gross Domestic Product (GDP).
7. Disguised unemployment.
8. Organised sector.
9. Reserve Bank of India (RBI).
10. Demand deposit.
11. Collateral.
12. Self-Help Group (SHG).
13. Better transport and communication technology; trade liberalisation.
14. African Union.
15. Rapid integration and interconnection of countries through trade, investment and technology.

READY ANSWER FRAMES: THE POINTS EXAMINERS LOOK FOR

Why per capita income is not enough (3): it is an average and hides inequality; ignores health, education, freedom; says nothing about how income is spent on public services.

Formal vs informal credit (3): formal is supervised by RBI, lower interest, needs collateral and papers; informal has no supervision, high interest, can lead to debt trap; poor depend more on informal.

How to protect unorganised workers (3): minimum wages and fixed hours by law; cheap loans and support for small units; health, safety and social security schemes.

Role of SHGs (3): savings habit; loans without collateral at fair interest; women become self-reliant and gain a voice; group takes repayment responsibility.

Factors enabling globalisation (3): fast transport (containers); IT and telecom (internet, mobile); liberalisation of trade and investment policies.

NUMBERS WORTH ONE MARK EACH

100 days: work guaranteed per year under MGNREGA 2005

15 to 20: members in a typical SHG

1,000: live births, the base for infant mortality rate

7 years and above: age group for literacy rate

1991: India removes many barriers on trade and investment

2023: India's G20 presidency summit in New Delhi; African Union joins as permanent member

DAY 57 COMPLETE?

- [ ] Recap read twice
- [ ] 15 questions done
- [ ] Score __/15
- [ ] Weak topics marked

Next: Day 58, Mistake Book + Exam Alerts

DAY 58

LAST 7 DAYS | MISTAKE BOOK

Mistake Book + Every Exam Alert

20 traps to tick off, then 20 quick questions

Aaj ka target

- [ ] Mistake Book ki har laal entry dobara
- [ ] 20 quick sawal
- [ ] 20 Exam Alerts ek-ek karke tick karo
- [ ] 90 min, galtiyon ko alvida

HOW TO USE TODAY

Step 1 (30 min): open your Mistake Book from Days 48 and 50. Redo every wrong question without looking at the answer.

Step 2 (20 min): read the 20 Exam Alerts below. Tick one only if you are sure you would not make that mistake in the exam.

Step 3 (25 min): Quick 20, then check. Every wrong answer goes into the Mistake Book with the correct line.

Step 4 (15 min): read the Mistake Book once more, slowly. That is your revision for tomorrow morning too.

EXAM ALERTS: HISTORY

- [ ] The first liberal-nationalist upheaval of July 1830 was in **France** (not Germany).
- [ ] Non-Cooperation was adopted at **Nagpur, Dec 1920**; approved earlier at Calcutta, Sep 1920.
- [ ] Poona Pact (1932) = **reserved seats** in a common electorate, not separate electorates.
- [ ] Ch3: only **The Pre-modern World** is for the board; Ch4 Industrialisation is not.
- [ ] Gutenberg's first printed book was the **Bible**; Diamond Sutra (868) is the oldest Japanese printed book.

EXAM ALERTS: GEOGRAPHY

- [ ] **Black** soil holds moisture; **alluvial** soil is the most fertile and widespread.
- [ ] Johads, khadins, kuls, tankas are **traditional** water harvesting, not modern.
- [ ] Largest producers: coffee **Karnataka**, rubber **Kerala**, jute **West Bengal**, sugarcane **UP**.
- [ ] Bauxite gives **aluminium**; mica is used in electrical and electronic industry.
- [ ] Rabi = sown in winter (wheat, gram); kharif = with monsoon (rice); zaid = short summer season.

EXAM ALERTS: POLITICAL SCIENCE

- [ ] In Belgium, state governments are **not subordinate** to the Central Government.
- [ ] India is a **holding together** federation; USA and Switzerland are coming together.
- [ ] A party system **evolves**; no country can simply choose it.
- [ ] One-third of seats in local bodies are reserved for **women** (1992 amendment).
- [ ] Democracy is rule of the **majority** with respect for minority rights, not rule of the majority community.

EXAM ALERTS: ECONOMICS

- [ ] **RBI** issues currency notes on behalf of the Government; the World Bank has no role.
- [ ] GDP counts **final** goods only; counting intermediate goods is double counting.
- [ ] Tertiary sector is largest in **GDP**, but primary is still the largest **employer**.
- [ ] Per capita income is an **average**; it hides inequality.
- [ ] Consumer Rights (Eco Ch5) is project work only; it is **not** in the board paper.

EXAM ALERT!

Board exam mein marks **galti se katte hain, kam padhai se nahi**. Aaj in 20 traps ko pakka karo, kal paper mein yahi chhote marks bachayenge.

Quick 20

5 per subject, 1 mark each, 15 minutes

1. A cartoon shows Napoleon as a postman. What do the letters falling from his bag stand for? *[H1]*
2. Who led the peasant movement in Awadh against talukdars and landlords? *[H2]*
3. During which movement did women first join protests in large numbers? *[H2]*
4. Who perfected the power-driven cylindrical press in New York by the mid-19th century? *[H5]*

5. Which artist produced popular images of gods and mythological scenes for mass circulation? *[H5]*

6. What is land full of deep gullies and ravines, unfit for farming, called? *[G1]*

7. What was the main aim of the 1992 Earth Summit at Rio de Janeiro? *[G1]*

8. Which national park is famous for the one-horned rhinoceros? *[G2]*

9. Name two uses of the water of the Bhakra Nangal project. *[G3]*

10. Which Indian industry is self-reliant and complete in the value chain? *[G6]*

11. What type of federation is Belgium? *[P2]*

12. Name any two States created on the basis of culture, ethnicity or geography. *[P2]*

13. Which principle forced leaders to mobilise all groups to win votes? *[P3]*

14. Name a country with a two-party system. *[P4]*

15. Why does India have a multiparty system? *[P4]*

16. Name a resource that is renewable yet getting overused in many States. *[E1]*

17. A flower cultivator works in which sector? *[E2]*

18. Interest rate, collateral, documents and mode of repayment together are called? *[E3]*

19. The rupee is widely accepted in India because it is authorised by whom? *[E3]*

20. Which international forum did India preside over in 2023? *[E4]*

Day 58 Answers

1. Territories he lost.
2. Baba Ramchandra.
3. Civil Disobedience Movement.
4. Richard M. Hoe.
5. Raja Ravi Varma.
6. Badland (e.g. Chambal ravines).
7. Environmental protection along with socio-economic development.
8. Kaziranga (Assam).
9. Hydel power and irrigation.
10. Textile industry.
11. A holding-together federation.
12. Any two: Nagaland, Uttarakhand, Jharkhand.
13. Universal adult franchise.
14. USA (or UK).
15. Its social and geographical diversity.
16. Groundwater.
17. Primary sector.
18. Terms of credit.
19. The Government of India.
20. The G20.

MISTAKE BOOK PAGE: COPY THIS FORMAT INTO YOUR NOTEBOOK

Day / Q	What I wrote	Correct point	Why I slipped
Day 50, Q2	(a)	(d): it was Nagpur, Dec 1920	Did not check A alone
Day 55, Q1	Alluvial	Black soil holds moisture	Mixed up two soils

DAY 58 COMPLETE? ☐ Mistake Book redone
☐ 20 alerts ticked ☐ Quick 20 done
☐ Score __/20
Next: Day 59, Half mock

DAY 59

LAST 7 DAYS: HALF MOCK

Half Mock: Objectives, Cases and Maps

Ninety calm minutes on the questions that are pure scoring: no long writing today.

Aaj ka target

- ☐ Half mock: 24 sawal, 33 marks
- ☐ Objectives, cases aur maps: pure scoring
- ☐ 90 min pe pen down, bilkul
- ☐ Long answers aaj nahi, tension free

HALF MOCK

Time: 90 minutes | Max. marks: 33

1. Q1 to Q20: MCQ and Assertion-Reason, 1 mark each, five per subject. Aim for 30 seconds to 1 minute per question.
2. Q21 and Q22: case-based, 4 marks each. Q23 (History, 2 marks) and Q24 (Geography, 3 marks): mark the places on an outline map of India.
3. Every question here is new: none of them appears in Mock Tests 1 to 3.

A History

Q1 to Q5 | 5 marks

1 The Treaty of Vienna of 1815 was drawn up by delegates at a congress hosted by: (1)

(a) Otto von Bismarck (b) Duke Metternich
(c) Giuseppe Mazzini (d) Count Cavour

2 Under the Inland Emigration Act of 1859, plantation workers in Assam were not allowed to: (1)

(a) grow their own food
(b) leave the tea gardens without permission
(c) join the Congress
(d) buy foreign cloth

3 By 1448 Gutenberg had perfected his printing system. The first book he printed was the: (1)

(a) Diamond Sutra (b) Bible
(c) Ninety-Five Theses (d) Bibliotheque Bleue

4 **Assertion (A):** In the first books printed by Gutenberg, every page of each copy was different.
Reason (R): Borders and decorations were added by hand by artists, as the rich wanted space left for this. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

5 The silk routes of the pre-modern world are a good example of trade and cultural links between: (1)

(a) America and Europe
(b) Asia, Europe and northern Africa
(c) Australia and Asia
(d) Africa and America

B Geography

Q6 to Q10 | 5 marks

6 **Assertion (A):** Colonies rich in resources were the main attraction for foreign invaders.
Reason (R): Colonisers used better technology to exploit these resources and drained wealth to their own countries. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

7 Corbett National Park, one of the earliest tiger reserves, is in which state? (1)

(a) Assam (b) Rajasthan
(c) Uttarakhand (d) Madhya Pradesh

8 Choose the correct sequence in the textile industry chain: (1)

(a) Spinning, fibre production, weaving, dyeing
(b) Fibre production, spinning, weaving, dyeing
(c) Weaving, spinning, dyeing, fibre production
(d) Fibre production, weaving, spinning, dyeing

9 A crop needs high temperature, heavy rainfall and well-drained fertile soil, grows mostly in the Ganga-Brahmaputra delta and is called the golden fibre. It is: (1)

(a) Cotton (b) Jute
(c) Rubber (d) Sugarcane

10 **Assertion (A):** Manufacturing reduces the heavy dependence of people on agricultural income.
Reason (R): Manufacturing replaces the secondary and tertiary sector activities. (1)

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

C Political Science

Q11 to Q15 | 5 marks

11 The two main language groups of Belgium are speakers of: (1)

(a) Dutch and French (b) English and German
(c) French and Italian (d) German and Spanish

12 Which statement is against the spirit of democracy?
(I) It promotes equality among citizens. (II) It enhances the dignity of the individual. (III) It leaves no room to correct mistakes. (IV) It provides a method to resolve conflicts. (1)

(a) Only (I) and (II) (b) Only (III)
(c) Only (IV) (d) All four

13 Which subject is in the Union List? (1)

(a) Police (b) Agriculture
(c) Defence (d) Education

14 In rural and urban local bodies, what share of positions is reserved for women? (1)

(a) One-fourth (b) One-third
(c) One-half (d) One-fifth

15 To be recognised as a national party, a party must secure at least 6 per cent of votes in Lok Sabha or Assembly elections in four states and win at least: (1)

(a) two Lok Sabha seats (b) four Lok Sabha seats
(c) ten Lok Sabha seats (d) one seat in each state

D Economics

Q16 to Q20 | 5 marks

16 Infant mortality rate shows the number of children who die before the age of one year: (1)

(a) per 100 live births (b) per 1,000 live births
(c) per 10,000 people (d) per 1,000 people

17 Which activity belongs to the tertiary sector? (1)

(a) Fishing
(b) Making bricks
(c) Transporting goods by truck
(d) Weaving cloth in a mill

18 An asset that a borrower owns and uses as a guarantee to the lender until the loan is repaid is called: (1)

(a) Interest (b) Collateral
(c) Deposit (d) Cheque

19 Which of these is NOT a telecommunication facility? (1)

(a) Mobile phone (b) Cars
(c) E-mail (d) Fax

20 At the G20 summit in New Delhi in September 2023, which body became a permanent member of the G20? (1)

(a) European Union (b) African Union
(c) ASEAN (d) SAARC

E Case-based

Q21 and Q22 | 8 marks

21 Read the source and answer the questions that follow. (4)

Resource planning in India involves: (i) identifying and making an inventory of resources across regions, which includes surveying, mapping and qualitative and quantitative estimation of resources; (ii) evolving a planning structure with suitable technology, skill and institutions to implement resource development plans; and (iii) matching these plans with overall national development plans. India has made efforts towards resource planning right from the First Five Year Plan. Availability of resources is necessary for development, but without matching changes in technology and institutions, it may even hinder development. Some regions rich in resources are economically backward, while some regions with poor resources are developed.

(i) What does identifying and making an inventory of resources involve? (1)
(ii) Why is resource planning called a complex process? (1)
(iii) Why is the mere availability of resources not enough for the development of a region? Give an example from the source. (2)

22 Read the source and answer the questions that follow. (4)

Self Help Groups (SHGs) are a newer way of giving loans to the poor. A typical SHG has 15 to 20 members, usually from one neighbourhood, who meet and save regularly. Saving per member varies from Rs 25 to Rs 100 or more, depending on their ability. Members can take small loans from the group to meet their needs; the group charges interest, but less than the moneylender. After a year or two, if the group saves regularly, it becomes eligible for a loan from the bank. The loan is sanctioned in the name of the group and is meant to create self-employment for members.

(i) Apart from saving and lending, state one other role of an SHG. (1)
(ii) How much does a member usually save? (1)
(iii) What must a group do to get a bank loan, and why is the loan given in the group's name? (2)

F Map work (practice)

Q23 and Q24 | 5 marks

23 On the outline map of India, locate and label the following with suitable symbols:
(a) The place where the Indian National Congress session was held in 1927.
(b) The place where Gandhiji organised a satyagraha of cotton mill workers in 1918. (2)

24 On the outline map of India, locate and label the following:
(a) Tungabhadra Dam (b) Ramagundam thermal power plant (c) Jamshedpur iron and steel plant (3)

Self-check score

Objective	Case 21	Case 22	Maps	Total
__/20	__/4	__/4	__/5	__/33

Half Mock: answer key and marking points

1-20 **Objective answers:** **1** (b) **2** (b) **3** (b) **4** (a) **5** (b) **6** (a) **7** (c) **8** (b) **9** (b) **10** (c) **11** (a) **12** (b) **13** (c) **14** (b) **15** (b) **16** (b) **17** (c) **18** (b) **19** (b) **20** (b)

21 • (i) Surveying, mapping and qualitative and quantitative estimation and measurement of resources.
• (ii) It involves several stages: inventory, a planning structure with technology, skill and institutions, and matching with national plans.
• (iii) Resources need suitable technology and institutions to be used; some resource-rich regions are backward while some resource-poor regions are developed.

22 • (i) SHGs help women become financially self-reliant; regular meetings let members discuss and act on social issues such as health, nutrition and domestic violence (any one).
• (ii) From Rs 25 to Rs 100 or more per member, depending on ability.
• (iii) Save regularly for a year or two; the loan is in the group's name so the group is responsible for repayment, which removes the need for individual collateral.

23 (a) Madras (Chennai, Tamil Nadu) (b) Ahmedabad (Gujarat).

24 (a) Tungabhadra: Karnataka (on the Tungabhadra river) (b) Ramagundam: Telangana (c) Jamshedpur: Jharkhand. 1 mark each.

MAP DRILL BEFORE YOU SLEEP

Take one blank outline map of India and mark every board item from the Day 40 list in 10 minutes: INC sessions (Calcutta, Nagpur, Madras), Champaran, Kheda, Ahmedabad, Amritsar, Dandi; the 8 dams; rice, wheat and the major crop states; the iron ore, coal, oil, thermal and nuclear sites; the cotton textile, iron and steel and software technology park cities. Whatever you miss, mark in red and repeat once tomorrow.

SHIVAM BHAIYA SAYS

Aaj ka half mock pure scoring wala hai: MCQ, case aur map. Jo galti hui, usko abhi Mistake Book mein likho, kal Day 60 pe sirf revise karna hai. Map pe 5 mein se 5 aane chahiye, ye free marks hain. Ab tum taiyaar ho!

DAY 59 COMPLETE?

- [ ] Half mock done in 90 minutes
- [ ] Checked with the key
- [ ] Missed map items marked in red

Next: Day 60, the calm last day

DAY 60

LAST 7 DAYS | THE CALM DAY

Day 60: Pack, Glance, Sleep

No new questions today. Only calm.

Aaj ka target

- [ ] Recall sheets pe bas 45 min nazar
- [ ] Shaam 7 baje tak exam kit pack
- [ ] Raat 10 baje tak so jaana
- [ ] Calm raho, tum ready ho

TODAY'S PLAN (LIGHT DAY)

Morning (30 min): read the four Last-7 recap Days (54 to 57) once, only the cards and timelines.

Afternoon (15 min): one slow look at your Mistake Book and the Exam Alerts of Day 58.

Evening: pack your kit, check the centre route, eat light, no new topic, no late-night phone.

Night: sleep by 10. A fresh mind earns more marks than one extra hour of reading.

EXAM KIT CHECKLIST: TICK EACH ONE TONIGHT

- [ ] Admit card (photocopy kept at home)
- [ ] School ID card
- [ ] 2 or 3 blue or black pens that write smoothly
- [ ] Sharp pencil, eraser and sharpener (for map work)
- [ ] Transparent pouch or clear bag
- [ ] Water bottle (transparent, no label)
- [ ] Wrist watch (analogue, if allowed)
- [ ] Reach the centre 45 minutes early

Your 3-hour time plan, section by section

15 min reading	Read the whole paper. Mark easy questions. Plan your internal choices (OR).
0:00 to 0:20	All 1-mark MCQs and A-R of all four sections (about 20 marks)
0:20 to 0:35	Both map questions (History 2 + Geography 3 marks): pencil, neat labels
0:35 to 1:35	2- and 3-mark answers: short, in points, key term first
1:35 to 2:35	Four 5-mark long answers: intro, 5 points, conclusion (about 12 to 14 min each)
2:35 to 2:50	Four case-based questions (4 marks each)
2:50 to 3:00	Check: question numbers right, nothing left blank; stuck anywhere? move on and come back

SHIVAM BHAIYA KA MESSAGE

Bas, aaj ka din sirf **shaanti** ka hai. Tumne 60 din ek ek din karke pura kiya hai: notes, questions, maps, mock tests, sab. Ab kuch naya mat padho. Raat ko jaldi so jao, subah halka nashta karke time pe centre pahuncho. Paper haath mein aaye to pehle 15 minute dhyan se padho, aasaan sawaal pehle karo, aur map wale marks kabhi mat chhodna. **Tumhari mehnat tumhare saath hai.** All the best, champ!

DAY 60 COMPLETE?

- [ ] Recap glanced
- [ ] Kit packed
- [ ] Time plan read
- [ ] Sleep by 10

All the best!

ASTRA SERIES | CBSE CLASS 10

SOCIAL SCIENCE IN 60 DAYS

One Day at a time: read, solve, check, revise.

60 DAYS

A complete day-by-day plan: what to read, how many questions, how long.

19 CHAPTERS

All four subjects, board syllabus 2026-27 only. Short, exam-focused notes.

3 + 1 MOCKS

Three full 80-mark papers in board pattern and a half mock, with answer keys.

EVERY MAP

All History and Geography map items, practised on outline maps.

"Roz ek Day. Sixty din baad tum wahi ho jo paper dekh ke muskurata hai."
