3. Money and Credit 87
4. Globalisation and the Indian Economy 91

Revision

Last-night revision: one-liners + dates 95

Map list quick check 98

Last 7 days plan (is book se)

Day	Kya padhna hai
1-2	History notes + MIQ (Ch 1, 2, 3, 5)
3-4	Geography notes + MIQ + Map Work
5	Political Science (5 chapters)
6	Economics (4 chapters)
7	Last-night revision + Map quick check + Yaad karo boxes

Shivam Bhaiya says

Ye book ek one-shot notebook hai: har chapter mein dense notes, flowcharts, "Yaad karo" tricks, memes aur end mein **Most Important Questions** with answers. Pehle notes padho, phir bina dekhe questions solve karo.

Board paper pattern (80 marks)

Section	Type	Marks
A	20 MCQ / A-R	20 x 1
B	4 very short	4 x 2
C	5 short	5 x 3
D	4 long	4 x 5
E	3 case based	3 x 4
F	Map (History 2 + Geography 3)	5

Is book ko kaise padhein

- ✓ Yellow highlight = sabse important fact / date.
- ✓ **Red headings** = topic; green lines = Shivam Bhaiya ki baat.
- ✓ Orange "Yaad karo" box = mnemonic; purple box = meme.
- ✓ Answers green pen mein: pehle khud likho, phir milao.
- ✓ Map Work section mein saare CBSE map items.

Not in board exam (2026-27)

Age of Industrialisation: periodic test only. Global World: only "The Pre-modern World" for board. Lifelines: project + map pointing only. Consumer Rights: project work only (not included).

Exam hall tips

- → 15 min reading time: pehle map aur case-based dekho.
- → 5-mark answers: 5 points, har point ek line heading + explanation.
- → Dates aur names underline karo; map pe pencil dot + pen naam.

Unit-wise marks (theory 80)

Unit	Chapters in this book	Marks
History	Nationalism in Europe, Nationalism in India, Global World (pre-modern), Print Culture	20
Geography	Resources, Forest, Water, Agriculture, Minerals and Energy, Manufacturing, Lifelines (map)	20
Pol Science	Power-sharing, Federalism, Gender Religion Caste, Political Parties, Outcomes	20
Economics	Development, Sectors, Money and Credit, Globalisation	20

Rise of Nationalism in Europe

1. Sorrieu's Utopian Vision (1848)

Frédéric Sorrieu, French artist, made **4 prints in 1848**: dream of a world of **"democratic and social Republics"**.

- → Peoples of Europe and America march past the **Statue of Liberty** (torch of Enlightenment + Charter of the Rights of Man).
- → Ground: shattered symbols of absolutist institutions.
- → **USA and Switzerland** lead (already nation-states), then **France** (tricolour), then **Germany** (black, red, gold flag).
- → Christ, saints, angels gaze from heaven = **fraternity** among nations.

Sorrieu's print (1848): peoples of the world march past the Statue of Liberty

Key terms

Nation-state: a state where the majority of citizens (not only rulers) develop a sense of **common identity and shared history**.

Absolutist: a monarchy with no restraint on the ruler's power. **Utopian:** an ideal society that is unlikely to exist.

Plebiscite: direct vote by which all people of a region accept or reject a proposal.

2. French Revolution and the Idea of the Nation

First clear expression of nationalism: **French Revolution, 1789**. Sovereignty passed from the monarch to the body of **French citizens**: "the people would constitute the nation".

Measures to create collective identity (5 marks fav!)

1. Ideas of **la patrie** (the fatherland) and **le citoyen** (the citizen): one community, equal rights under a constitution.
2. New French flag, the **tricolour**, replaced the royal standard.
3. Estates General elected by active citizens and renamed the **National Assembly**.
4. New hymns, oaths, martyrs commemorated in the name of the nation.
5. **Centralised administration**: uniform laws for all citizens.
6. Internal customs duties abolished; **uniform weights and measures**.
7. Regional dialects discouraged; **French of Paris** = common language.

Students and educated middle class across Europe set up **Jacobin clubs**; French armies carried nationalism to Holland, Belgium, Switzerland and much of Italy in the 1790s.

Yaad karo: "PF-NHC-CL"

Patrie-citoyen, Flag, National Assembly, Hymns, Central admin, Customs gone, Language. 7 points, 5 likho = full marks.

3. Napoleon and the Civil Code of 1804

Napoleon destroyed democracy in France but made administration rational and efficient. **Napoleonic Code (1804)** exported to areas under French control:

- ✓ Did away with **privileges based on birth**; **equality before law**; **right to property** secured.
- ✓ Simplified administrative divisions; **feudal system abolished**, peasants freed from serfdom and manorial dues.
- ✓ Towns: **guild restrictions removed**; transport and communication improved.
- ✓ Uniform laws, standardised weights and measures and a **common national currency** helped businessmen and small producers.

Meme samjho

Napoleon: "Civil Code de diya, equality before law mil gayi." Log: "Democracy bhi milegi? **Guarantee deta hai??**"

Asli baat: No. Code gave equality and property rights, but Napoleon ruled as a monarch: censorship, taxes, conscription.

Welcomed as liberty → Higher taxes, censorship → Forced conscription into French army → Hostility

4. Making of Nationalism in Europe

Mid-18th century: no nation-states. Germany, Italy, Switzerland divided into kingdoms, duchies, cantons. **Habsburg Empire** (Austria-Hungary) = patchwork: Alpine Tyrol, Austria, Sudetenland, Bohemia (German-speaking aristocracy), Italian-speaking **Lombardy and Venetia**, Magyar-speaking Hungary, Polish-speaking Galicia. Only tie: **loyalty to the emperor**.

Aristocracy	New middle class
Socially, politically dominant; small group; estates + town houses; spoke **French**; linked by marriage. Peasantry worked under them.	Born of **industrialisation** (England, 2nd half of 18th c.): industrialists, businessmen, professionals. Ideas of **national unity** spread among the educated liberals.

What did Liberal Nationalism stand for?

Liberalism from Latin **liber = free**.

→ **Political:** government by consent; end of autocracy and clerical privileges; constitution + representative govt through parliament; inviolability of private property.
→ **Limit:** equality did not mean universal suffrage. In France only **property-owning men** voted; women and non-propertied men excluded; Napoleonic Code reduced women to **minors**.
→ **Economic:** freedom of markets, no state restrictions on goods and capital. 39 German states, each with own currency and weights. Hamburg to Nuremberg = **11 customs barriers**, ~5% duty each; the **elle** (unit of measuring cloth) differed by region.

Zollverein, 1834

Customs union at the initiative of **Prussia**, joined by most German states. Abolished tariff barriers; currencies cut from over 30 to 2. Network of **railways** followed. Economic nationalism strengthened the wider national feeling.

5. New Conservatism after 1815

Conservatives believed in tradition: **monarchy, Church, social hierarchies, property, family**. But they accepted modern changes (army, bureaucracy, economy) to strengthen the monarchy.

Treaty of Vienna, 1815

Hosted by Austrian Chancellor Duke Metternich; powers: **Britain, Russia, Prussia, Austria**. Aim: undo Napoleon's changes.

→ **Bourbon dynasty** restored in France; France lost territories annexed under Napoleon.
→ States set up on France's borders: **Netherlands** (with Belgium) in north, **Genoa added to Piedmont** in south.
→ **Prussia** got new territories on its western frontier; **Austria** got control of northern Italy.
→ German confederation of 39 states left untouched. **Russia** got part of Poland; Prussia got a portion of Saxony.

Yaad karo: Vienna = "BPRA-BNPA"

Hosts Britain, Prussia, Russia, Austria. Gains: Bourbons back, Netherlands buffer, Prussia west, Austria north Italy.

Conservative regimes were **autocratic**: no criticism, censorship of newspapers, books, plays and songs.

6. Revolutionaries

After 1815, fear of repression drove liberal-nationalists **underground**: secret societies in many states to train revolutionaries.

Quick fact Frederic Sorrieu (French artist) made 4 prints in 1848 visualising a world of 'democratic and social Republics'.

Do you know? Treaty of Constantinople (1832) recognised Greece as an independent nation.

Giuseppe Mazzini (born Genoa, 1807)
Member of **Carbonari**; exiled in 1831. Founded Young Italy (Marseilles) and **Young Europe** (Berne). Believed God meant nations to be natural units of mankind, so Italy must be one **unified republic**. Metternich called him "the most dangerous enemy of our social order".

7. Age of Revolutions: 1830 to 1848

July 1830 France: Bourbon kings overthrown by liberal revolutionaries; constitutional monarchy under **Louis Philippe**. Metternich: "When France sneezes, the rest of Europe catches cold." Belgium broke away from the United Kingdom of the Netherlands.
1821 to 1832 Greek War of Independence against the Ottoman Empire; support of West Europeans and poets (Lord Byron, died 1824). **Treaty of Constantinople, 1832** recognised Greece as independent.
1848 Food shortages, unemployment: Paris revolt, Louis Philippe fled; National Assembly proclaimed a Republic, **suffrage to all adult males above 21**, right to work.

Romanticism and national feeling

→ Cultural movement: emotions, intuition, mystical feelings over reason; aimed at a **collective heritage**.
→ **Johann Gottfried Herder** (German): true German culture lies among common people, das volk; folk songs, poetry, dances.
→ Poland (partitioned, no state): **Karol Kurpinski** used opera and music, **polonaise and mazurka** = folk dances as national symbols.
→ Russian occupation forced Russian language; 1831 armed rebellion crushed. Clergy used **Polish** in Church gatherings, many priests jailed or sent to **Siberia**. Polish language = symbol of struggle.
→ **Grimm Brothers** (Jacob and Wilhelm): collected German folktales; saw French domination as a threat to German culture.

Hunger, hardship and popular revolt

1830s: population rise, unemployment, migration to slums, small producers faced cheap machine goods from England. **1845 Silesia:** weavers revolted against contractors who cut payments.

8. 1848: The Revolution of the Liberals

→ Educated middle classes demanded **constitutionalism with national unification**.
→ **18 May 1848**: 831 elected representatives took their places in the Frankfurt Parliament, St Paul's Church; drafted a constitution for a German nation headed by a monarchy under parliament.
→ Crown offered to **Friedrich Wilhelm IV**, King of Prussia: he rejected it and joined other monarchs to oppose it. Aristocracy and military opposed; middle class lost mass support since they resisted workers' and artisans' demands. Troops disbanded the assembly.

→ Women formed associations and newspapers, yet were denied the vote; admitted only as observers in the visitors' gallery.

→ Result: autocrats introduced some changes: **serfdom and bonded labour abolished** in Habsburg dominions and Russia; Habsburgs gave Hungarians more autonomy in 1867.

9. Making of Germany (1871)

1848 liberal effort fails

↓

Prussia leads; chief minister **Otto von Bismarck**

↓

3 wars in 7 years with Austria, Denmark, France

↓

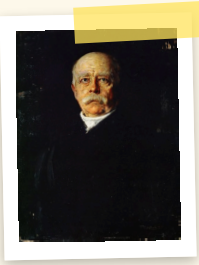

Prussia wins

↓

Jan 1871, Versailles: **Kaiser William I** proclaimed German Emperor

→ Bismarck used the Prussian **army and bureaucracy** (not people's movement): unity "from above".

→ New state: modernised currency, banking, legal and judicial systems. Prussian measures became a model.

Otto von Bismarck: Prussia's chief minister, architect of German unity ("blood and iron", army + bureaucracy)

10. Making of Italy (1861)

Italy: divided into **7 states**; only **Sardinia-Piedmont** ruled by an Italian princely house. North under Austrian Habsburgs, centre under the Pope, south under Bourbon kings of Spain. Even Italian language had many regional forms.

Leader	Role
Mazzini	Young Italy; revolutionary uprisings of 1831 and 1848 failed.
Victor Emmanuel II	King of Sardinia-Piedmont; unify by war. Proclaimed King of united Italy, 1861.
Count Cavour	Chief minister; not a revolutionary or democrat; spoke French better than Italian. Diplomatic alliance with **France**: defeated Austria in **1859**.
Giuseppe Garibaldi	Armed volunteers (Red Shirts); **1860** marched into South Italy and the Kingdom of the Two Sicilies; won support of local peasants, drove out Spanish rulers.

Yaad karo: Italy ke 4 hero = "MVCG"

Mazzini (soul, idea) | Victor Emmanuel II (king) | Cavour (brain, diplomacy) | Garibaldi (sword, Red Shirts). Dates: **59** Austria haara, **60** South liya, **61** King bana.

↳ Most of the people (high illiteracy) remained unaware of liberal-nationalist ideology. Peasants thought "La Talia" was Victor Emmanuel's wife!

11. The Strange Case of Britain

No sudden revolution: a long-drawn-out process. Before the 18th century: English, Welsh, Scot, Irish ethnic identities.

1688 English Parliament seized power from monarchy

↓

Act of Union 1707: England + Scotland = United Kingdom of Great Britain

↓

Scottish Highlanders' Gaelic language and dress banned

↓

Ireland (Catholic vs Protestant) crushed; revolt of 1798 (Wolfe Tone) failed; **1801** Ireland incorporated

Symbols of new Britain: **British flag (Union Jack)**, national anthem **God Save Our Noble King**, English language.

12. Visualising the Nation

Artists represented nations as **female figures** (allegory): the female form became an allegory of the nation.

Allegory	Nation	Symbols
Marianne	France	Red cap, tricolour, cockade; statues in public squares; image on coins and stamps
Germania	Germany	Crown of oak leaves (German oak = heroism)

Germania (Philip Veit, 1848): crown of oak leaves, black-red-gold flag, sword

Symbol	Meaning	Symbol	Meaning
Broken chains	Being freed	Crown of oak	Heroism
Breastplate with eagle	Strength (German empire)	Sword	Readiness to fight
Olive branch around sword	Willingness to make peace	Black, red, gold tricolour	Flag of liberal-nationalists 1848
Rays of rising sun	Beginning of a new era	Red cap	Liberty (freed slaves)

13. Nationalism and Imperialism

Last quarter of the 19th century: nationalism became **narrow, intolerant**, hostile to each other. Most serious tension: the Balkans.

→ Balkans: modern Romania, Bulgaria, Albania, Greece, Macedonia, Croatia, Bosnia-Herzegovina, Slovenia, Serbia, Montenegro; inhabitants broadly **Slavs**; large part under the **Ottoman Empire**.

→ Ottoman disintegration + romantic nationalism = explosive. Each state jealous of the others, wanted more territory.

→ Great powers (**Russia, Germany, England, Austria-Hungary**) competed over trade, colonies and military might: series of wars, finally First World War (1914).

→ Colonised peoples used nationalism to oppose imperialism: anti-imperial movements everywhere inspired by the idea of nation-states.

1 minute timeline

- **1789** French Revolution
- **1797** Napoleon invades Italy; **1804** Civil Code
- **1814–15** Fall of Napoleon; Vienna Peace Settlement
- **1821** Greek struggle begins; **1832** Treaty of Constantinople
- **1830** July Revolution, Belgium free; **1834** Zollverein
- **1848** Revolutions, Frankfurt Parliament
- **1859–70** Unification of Italy (King 1861, Rome 1870)
- **1866–71** Unification of Germany (Kaiser, Jan 1871)
- **1905** Slav nationalism in Habsburg and Ottoman empires
- **1914** First World War

Exam Alert

Germany = Bismarck + army (from above). Italy = Cavour diplomacy + Garibaldi's volunteers. **Don't mix 1859, 1860, 1861, 1871.** Marianne = France, Germania = Germany.

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Who hosted the Congress of Vienna in 1815? 1M Board fav
(a) Bismarck (b) Cavour (c) Duke Metternich (d) Louis Philippe
Ans. (c) Duke Metternich.

Q2. Which treaty recognised Greece as an independent nation? 1M
Ans. Treaty of Constantinople, 1832.

Q3. **A:** The Zollverein helped the economic unification of Germany. **R:** It abolished tariff barriers and cut the number of currencies from over thirty to two. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true and R explains A.

Q4. Match: Marianne, Germania, Zollverein, Young Italy with Germany, France, Mazzini, Prussia. 1M
Ans. Marianne–France; Germania–Germany; Zollverein–Prussia; Young Italy–Mazzini.

Q5. What did the crown of oak leaves on Germania stand for? 1M
Ans. Heroism.

Q6. Who was proclaimed King of united Italy in 1861? 1M Board fav
(a) Cavour (b) Victor Emmanuel II (c) Garibaldi (d) Mazzini
Ans. (b) Victor Emmanuel II.

Q7. Which of these was NOT a part of the Habsburg Empire? 1M
(a) Lombardy (b) Bohemia (c) Hungary (d) Prussia
(contd.) (d) Prussia (it was a separate German kingdom).

Q8. The polonaise and mazurka were used as nationalist symbols in: 1M
(a) Greece (b) Poland (c) Hungary (d) Italy
Ans. (b) Poland (Karol Kurpinski).

Short answer (2–3 marks)

Q9. What were the main aims of the Treaty of Vienna, 1815? Give any three provisions. 3M Board fav
Ans. Aim: undo changes of the Napoleonic wars. (i) Bourbon dynasty restored in France (ii) states set up on France's borders: Netherlands (with Belgium), Genoa added to Piedmont (iii) Prussia got territories on western frontier; Austria got northern Italy; Russia got part of Poland.

Q10. Describe the role of Giuseppe Mazzini in the unification of Italy. 3M
Ans. Born Genoa 1807, member of Carbonari; exiled 1831; founded Young Italy (Marseilles) and Young Europe (Berne); believed Italy must be a single unified republic; inspired a generation; Metternich called him the most dangerous enemy of social order.

Q11. How did the Zollverein help in the economic unification of Germany? 2M
Ans. Prussian-led customs union of 1834 abolished tariff barriers and reduced currencies from over 30 to 2; railways network followed, creating one market and boosting national feeling.

Q12. Explain how culture (Romanticism) contributed to nationalism in Europe. 3M Board fav
Ans. Romantic artists and poets stressed emotion and collective heritage; Herder: folk culture of das volk; Grimm Brothers' folktales; in Poland, Kurpinski's operas, polonaise and mazurka; Polish language in Church = weapon against Russian rule.

Q13. Explain any three features of liberalism in the political and economic spheres. 3M
Ans. Political: government by consent, end of autocracy and clerical privileges, constitution and representative government, inviolability of private property. Economic: freedom of markets, abolition of state restrictions on goods and capital (Zollverein 1834). Note: vote only for property-owning men.

Q14. How did Britain become a nation-state? Explain. 3M Board fav
Ans. Not by revolution but a long process. 1688: Parliament took power from monarchy. Act of Union 1707: England + Scotland = United Kingdom of Great Britain; Scottish culture (Gaelic, dress) suppressed. Ireland's 1798 revolt (Wolfe Tone) failed; incorporated in 1801. New symbols: Union Jack, national anthem, English language.

Q15. How did artists in the 18th and 19th centuries personify a nation? 3M
Ans. As female allegories: Marianne (France: red cap, tricolour, cockade; on coins and stamps) and Germania (Germany: crown of oak leaves = heroism). Symbols: broken chains, sword, olive branch, rising sun.

Q16. Why did the Greek War of Independence (1821) gain the support of West Europeans? 3M

> **Ans.** Greece was seen as the cradle of European civilisation; poets and artists (Lord Byron, who died in 1824) praised it and organised public opinion; nationalists in Greece got support from exiled Greeks too. Treaty of Constantinople (1832) recognised Greece as independent.

Q17. Describe the conditions of Europe in the 1830s that led to popular revolts. 3M

> **Ans.** Rise in population, more job seekers than jobs; rural migrants in overcrowded slums; small producers faced cheap machine-made goods from England; peasants under feudal dues in aristocratic areas; food shortages and price rise; e.g. Silesian weavers' revolt, 1845.

Long answer (5 marks)

Q18. Describe the process of unification of Germany. 5M Board fav

> **Ans.** (i) 1848 liberal Frankfurt Parliament failed: crown rejected by Friedrich Wilhelm IV; army and aristocracy opposed (ii) Prussia took leadership; Bismarck the architect, with army and bureaucracy (iii) three wars in seven years with Austria, Denmark, France, Prussia won (iv) Jan 1871, William I proclaimed Kaiser at Versailles (v) new state modernised currency, banking, legal and judicial systems.

Q19. "Napoleon had destroyed democracy in France, but in the administrative field he had incorporated revolutionary principles." Explain. 5M

> **Ans.** Civil Code 1804: no privileges by birth, equality before law, right to property; simplified administrative divisions; abolished feudal system, freed peasants from serfdom and manorial dues; removed guild restrictions; improved transport; uniform laws, weights, measures, common currency. Later hostility due to taxes, censorship, conscription.

Q20. Why did the Balkan region become a source of tension after 1871? 5M

> **Ans.** Mix of ethnic groups (Slavs) under the Ottoman Empire; Ottoman disintegration + romantic nationalism made it explosive; states jealous, wanted more land; great powers Russia, Germany, England, Austria-Hungary competed for control; series of wars led to the First World War, 1914.

Q21. Describe the process of unification of Italy. 5M Board fav

> **Ans.** (i) Italy split into 7 states; only Sardinia-Piedmont under an Italian prince (ii) Mazzini's Young Italy; 1831 and 1848 uprisings failed (iii) Sardinia-Piedmont under Victor Emmanuel II took the lead; Cavour's diplomatic alliance with France defeated Austria in 1859 (iv) Garibaldi's armed volunteers marched into South Italy and the Kingdom of the Two Sicilies in 1860 (v) 1861: Victor Emmanuel II proclaimed King of united Italy.

Q22. Describe the main events of the 1848 revolution of the liberals in Germany. 5M

> **Ans.** (i) Middle classes demanded a constitution with national unification (ii) 831 elected representatives met in the Frankfurt Parliament, St Paul's Church, 18 May 1848 (iii) drafted a constitution for a German nation under a monarchy (contd.) controlled by parliament (iv) Friedrich Wilhelm IV of Prussia rejected the crown; aristocracy and military opposed (v) middle class lost workers' support; troops disbanded the assembly. Women denied political rights.

Source based (4 marks)

Q23. "The 1848 Frankfurt Parliament convened in St Paul's Church; 831 elected representatives drafted a constitution..." (i) Who was offered the crown? (ii) Why did the Parliament fail? (iii) How were women treated? 4M

> **Ans.** (i) Friedrich Wilhelm IV of Prussia, who rejected it (ii) opposed by king, aristocracy and military; middle class lost support of workers and artisans; troops disbanded it (iii) denied the vote; only observers in the visitors' gallery.

Q24. "Marianne's statues were erected in public squares; her image was marked on coins and stamps. Germania wears a crown of oak leaves." (i) What is an allegory? (ii) Why were female figures used? (iii) What did the oak leaves stand for? 4M

> **Ans.** (i) An abstract idea (liberty, nation) shown through a person or thing (ii) to give the abstract idea of a nation a concrete, easily recognised form and remind people of national unity (iii) heroism.

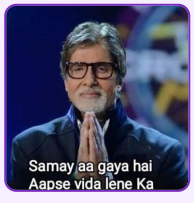

Last minute: 10 one-liners

1. First clear expression of nationalism: French Revolution, 1789.
2. Civil Code 1804 = Napoleonic Code.
3. Vienna 1815 host: Duke Metternich.
4. Young Italy: Marseilles; Young Europe: Berne.
5. Greece independent: Treaty of Constantinople, 1832.
6. Zollverein: 1834, Prussia; currencies 30+ to 2.
7. Frankfurt Parliament: 18 May 1848, St Paul's Church.
8. Italy united 1861 (Victor Emmanuel II); Germany 1871 (Kaiser William I).
9. Act of Union 1707: England + Scotland.
10. Marianne = France; Germania = Germany; Balkans = powder keg before WWI.

Ek nazar mein: nation kaise bane

Nation	Year	How / Who
Greece	1832	War vs Ottomans; Treaty of Constantinople
Belgium	1830	Broke away from Netherlands (July Revolution wave)
Italy	1861	Mazzini, Cavour, Garibaldi; King Victor Emmanuel II
Germany	1871	Bismarck, Prussian army; Kaiser William I
Britain	1707	Act of Union (England + Scotland); Ireland 1801

Meme samjho

Napoleon to Europe, 1815: "Devi aur sajjano, samay aa gaya hai vida lene ka."
Asli baat: Britain, Russia, Prussia, Austria defeated him in 1815; at Vienna they restored the Bourbons and conservative rule.

Most asked: NCM vs CDM, Salt March, social groups, Poona Pact

NATIONALISM IN INDIA

In India (as in other colonies) modern nationalism grew with the anti-colonial movement. People discovered their unity in the struggle against colonialism. Different classes felt colonial oppression differently; the **Congress under Gandhi** tried to forge them into one movement.

1. First World War and India (1914–18)

→ Huge **defence expenditure**: paid by war loans and higher taxes; customs duties raised, income tax introduced.
→ **Prices doubled** between 1913 and 1918: hardship for common people.
→ **Forced recruitment** of villagers into the army: widespread anger.
→ Crops failed in **1918–19 and 1920–21**: acute food shortage + **influenza epidemic**. Census 1921: 12 to 13 million died.

↳ War ke baad bhi hardship khatam nahi hui: yahi gussa national movement ka fuel bana.

2. The Idea of Satyagraha

Gandhi returned from **South Africa in January 1915**, where he had fought racist rule with a novel method of mass agitation: satyagraha.

✓ Emphasised the **power of truth** and the need to search for truth.
✓ If the cause is true and the fight is against injustice, **physical force is not needed**.
✓ Without seeking vengeance or being aggressive, a satyagrahi wins by **appealing to the conscience of the oppressor**; truth is bound to triumph.
✓ Gandhi believed this **dharma of non-violence** could unite all Indians.

Satyagraha	Where, why
1917 Champaran	Bihar: peasants against the oppressive indigo plantation system
1917 Kheda	Gujarat: peasants hit by **crop failure + plague**, could not pay revenue, demanded relaxation of revenue collection
1918 Ahmedabad	Gujarat: among **cotton mill workers**

3. Rowlatt Act and Jallianwala Bagh (1919)

Rowlatt Act, 1919: hurriedly passed by the **Imperial Legislative Council** despite the united opposition of Indian members. Gave the government enormous powers to repress political activities; allowed detention of political prisoners without trial for two years.

→ Gandhi's nationwide **satyagraha** against the "unjust law": began with a **hartal on 6 April 1919**; rallies, railway workshop strikes, shops shut.
→ British alarmed (railways, telegraph might be disrupted): local leaders picked up in Amritsar, Gandhi barred from Delhi. **10 April**: police fired on a peaceful procession in Amritsar; **martial law** under **General Dyer**.

13 April 1919: Jallianwala Bagh, Amritsar

Crowd in the enclosed ground: some to protest, others for the annual **Baisakhi fair**; many villagers unaware of martial law. Dyer **blocked the exit points and opened fire**, killing hundreds. His aim: to "produce a moral effect", i.e. create terror in the minds of satyagrahis.

→ Aftermath: crowds in many north Indian towns: strikes, clashes, attacks on government buildings. Brutal repression: satyagrahis forced to **rub noses on the ground, crawl on streets, salute all sahibs**; villages around **Gujranwala (Punjab)** bombed.
→ Violence spread, so Gandhi called off the Rowlatt satyagraha.

Jallianwala Bagh, Amritsar (13 April 1919): General Dyer ordered firing on a peaceful crowd

4. The Khilafat Issue

→ Rowlatt satyagraha was limited mostly to **cities and towns**; Gandhi wanted a broad-based movement, impossible without bringing Hindus and Muslims closer.
→ WW1 ended with the defeat of **Ottoman Turkey**; rumours of a harsh peace treaty on the Ottoman emperor, the **Khalifa** (spiritual head of the Islamic world).
→ To defend the Khalifa's temporal powers: **Khilafat Committee, Bombay, March 1919**; leaders: brothers **Muhammad Ali and Shaukat Ali**.
→ **Calcutta session, September 1920**: Gandhi convinced leaders to start non-cooperation in support of **Khilafat as well as swaraj**.

5. Why Non-Cooperation?

Hind Swaraj (1909): British rule was established with the cooperation of Indians and survived only because of it. If Indians refused to cooperate, British rule would collapse **within a year** and swaraj would come.

Stage 1: surrender of titles awarded by the government
↓
Stage 2: boycott of civil services, army, police, courts, legislative councils, schools and foreign goods
↓
Stage 3: if govt used repression, a full **civil disobedience** campaign

Many in Congress were reluctant: did not want to boycott the **council elections of Nov 1920**

, feared violence. After intense debate (Sep to Dec), a compromise at the Nagpur session, December 1920: Non-Cooperation programme adopted.

Yaad karo: "Calcutta Proposes, Nagpur Adopts"

Sep 1920 Calcutta = proposal; Dec 1920 Nagpur = adoption; Jan 1921 = movement starts; Feb 1922 Chauri Chaura = withdrawn.

Key terms (NCERT glossary)

Boycott: refusal to deal and associate with people, or to buy and use things; a form of protest. **Picketing**: protesters block the entrance to a shop, factory or office. **Begar**: labour that villagers were forced to give without any payment. **Forced recruitment**: colonial state forcing people to join the army. **Hartal**: shutting shops, offices and work as protest.

6. Differing Strands within the Movement

Non-Cooperation-Khilafat began in **January 1921**. Various groups joined, each with its own aspirations; swaraj meant different things to different people.

(a) Movement in the towns

→ Led by the **middle class**: thousands of students left government schools, headmasters and teachers resigned, lawyers gave up practice.

→ Council elections boycotted in most provinces **except Madras**: the **Justice Party** (non-Brahmans) saw entering the council as a way to gain power usually open only to Brahmans.

→ Economic front: foreign goods boycotted, liquor shops **picketed**, foreign cloth burnt in huge bonfires. Import of foreign cloth halved 1921-22: Rs 102 crore to Rs 57 crore. Merchants refused to trade in foreign goods; production of Indian textile mills and handlooms went up.

Why it slowed down in cities

(i) **Khadi** was often more expensive than mass-produced mill cloth: the poor could not afford it. (ii) Boycott of British institutions needed **Indian alternatives**, which came up slowly: students and teachers drifted back to govt schools, lawyers to courts.

(b) Rebellion in the countryside

Group	Leader, issue, meaning of swaraj
Peasants of Awadh	**Baba Ramchandra**, a sanyasi (earlier indentured labourer in Fiji); against **talukdars and landlords**: high rents, **begar**. Demands: reduce revenue, abolish begar, social boycott of oppressive landlords (**nai-dhobi bandhs**). **Oudh Kisan Sabha, Oct 1920** (Nehru, Baba Ramchandra). 1921: talukdars' houses attacked, grain hoards taken over in Gandhi's name.
Tribals of Gudem Hills (Andhra Pradesh)	Early 1920s militant **guerrilla movement**: forests closed, grazing, fuelwood and fruit collection banned; begar for road building. **Alluri Sitaram Raju**: claimed special powers, praised Gandhi but believed India could be liberated only by force; captured and executed in **1924**. Swaraj = rights over forests.
Plantation workers of Assam	**Inland Emigration Act, 1859**: could not leave tea gardens without permission. Swaraj = right to move freely in and out of the confined space and keep a link with the village. Many left for home; stranded by a railway and steamer strike, brutally beaten by police.

Quick fact Satyagraha = the idea of the power of truth and the need to search for truth; Gandhiji's first satyagraha in India: Champaran (1917).

↳ Sabne Gandhi ka naam liya, par swaraj ka matlab apne hisaab se samjha. 3-mark ka sawal yahin se aata hai.

Yaad karo: NCM ke 4 strands = "Mummy Baba Alluri Plantation"

Middle class in towns (boycott, picketing) | **Baba** Ramchandra and Awadh peasants | **Alluri** Sitaram Raju and Gudem tribals (guerrilla) | **Plantation** workers of Assam (Inland Emigration Act 1859). Har group ka swaraj alag tha!

Importance of the Non-Cooperation Movement

★ **First mass movement**: took the national struggle from the educated few to students, peasants, tribals, workers and merchants.

★ **Hindu-Muslim unity** through Khilafat + swaraj.

★ **Swadeshi boost**: foreign cloth imports halved; Indian mills and handlooms gained.

★ Congress became a **mass organisation**; people lost their fear of British power and learnt to resist peacefully.

↳ Local leaders kabhi kabhi kehte the "Gandhi ne kaha tax mat do, zameen baanto": Gandhi ka naam, par samajh apni.

7. Towards Civil Disobedience (1922-29)

→ **February 1922, Chauri Chaura** (Gorakhpur): peaceful demonstration turned into a violent clash with police. Gandhi withdrew Non-Cooperation: satyagrahis needed proper training.

→ **Swaraj Party** formed by **C.R. Das and Motilal Nehru** to return to council politics. Younger leaders **Jawaharlal Nehru and Subhas Chandra Bose** pressed for radical mass agitation and full independence.

→ **Worldwide economic depression**: agricultural prices began to fall from **1926** and collapsed after **1930**: turmoil in the countryside.

→ **Simon Commission**: set up by the Tory government in Britain under Sir John Simon to look into the functioning of the constitutional system. Arrived **1928**; no Indian member, so greeted with **"Go back Simon"**; all parties (Congress, Muslim League) demonstrated.

→ **October 1929**: Viceroy **Lord Irwin** announced a vague offer of **dominion status** (unspecified future) and a Round Table Conference.

→ **Lahore session, December 1929**, under **Jawaharlal Nehru**: demand of **Purna Swaraj** formalised; **26 January 1930** celebrated as Independence Day.

Key terms

Dominion status: self-government within the British Empire (like Canada, Australia), not full freedom. **Purna Swaraj**: complete independence. **Round Table Conferences**: talks in London (1930-32) between the British and Indian leaders on constitutional reform; Congress attended only the **Second** (1931).

Meme samjho

"Simon Commission India ka future decide karega." Members: sab British, ek bhi Indian nahi. **Hain? Ye kaise ho gaya?**

Asli baat: The Simon Commission (1928) had no Indian member, so it was greeted with "Go back Simon" by Congress and the Muslim League.

8. The Salt March and Civil Disobedience

Why salt? Consumed by **rich and poor alike**, one of the most essential items of food; the **tax on salt and government monopoly** over its production = most oppressive face of British rule. A powerful symbol to unite the nation.

- **31 Jan 1930** Letter to Irwin with **11 demands** (some general, some for specific classes, from industrialists to peasants); most stirring: **abolish salt tax**. Ultimatum: else CDM after **11 March**.
- **12 Mar 1930** Irwin unwilling to negotiate: Salt March from **Sabarmati ashram** with **78 volunteers**; **240 miles in 24 days** (about 10 miles a day) to Dandi, Gujarat coast.
- **6 Apr 1930** At **Dandi**, Gandhi ceremonially violated the law by making salt from boiling sea water: **Civil Disobedience begins**.

Non-Cooperation (1921-22)	Civil Disobedience (1930-34)
Only **refuse cooperation** with the British: surrender titles, boycott schools, courts, councils, foreign goods.	Refuse cooperation **and break colonial laws**: salt law broken, foreign cloth boycotted, liquor shops picketed, peasants refused **revenue and chaukidari taxes**, village officials resigned, forest people violated **forest laws**.
Khilafat + swaraj; Hindu-Muslim unity high.	Purna Swaraj; many Muslims and Dalits stayed away.

Yaad karo: CDM ke 5 kaam = "Namak Kapda Lagaan Naukri Jungle"

Namak (salt law broken) | **Kapda** (foreign cloth boycott, liquor picketing) | **Lagaan** (revenue, chaukidari tax refused) | **Naukri** (village officials resigned) | **Jungle** (forest laws violated).

→ Repression: leaders arrested. **Abdul Ghaffar Khan** arrested (April 1930): angry crowds in **Peshawar** faced armoured cars and firing. Gandhi arrested a month later: workers in **Sholapur** attacked police posts, municipal buildings, law courts, railway stations. **Over 100,000 people arrested.**

→ **Gandhi-Irwin Pact, 5 March 1931**: Gandhi called off the movement, agreed to attend the **Second Round Table Conference** (London); govt agreed to **release political prisoners**.

→ Conference failed (Dec 1931); Gandhi relaunched CDM; by **1934** it lost momentum.

Salt March (12 March to 6 April 1930): Gandhi and 78 volunteers walked 240 miles from Sabarmati to Dandi

9. How Participants Saw the Movement

Group	Why joined	Limits
Rich peasants (**Patidars** of Gujarat, **Jats** of UP)	Commercial crop producers hit by trade depression and falling prices; wanted **revenue reduced**; swaraj = struggle against high revenue.	Deeply disappointed when CDM was called off in 1931 without revenue cut; many refused to rejoin in 1932.
Poor peasants	Small tenants on rented land; wanted **unpaid rent remitted**; joined radical movements (often Socialists, Communists).	Congress unwilling to support **no-rent campaigns** (feared upsetting rich peasants, landlords): relationship uncertain.
Business classes	Wanted protection against foreign imports and a rupee-sterling ratio that discouraged imports. **Indian Industrial and Commercial Congress (1920)**, **FICCI (1927)**; **Purshottamdas Thakurdas, G.D. Birla**. Gave money, refused to buy or sell imports.	After the failed RTC, less enthusiastic; feared militant activities, socialism among younger Congress members.
Industrial workers	Except **Nagpur region**, joined little. Some selected the boycott of foreign goods; railway workers (1930), dock workers (1932), **Chotanagpur tin mine** workers wore Gandhi caps.	Congress kept workers' demands out to avoid alienating industrialists.
Women	Large-scale participation: salt marches, made salt, **picketed liquor and foreign cloth shops**, many went to jail (mostly high-caste urban, rich peasant families).	No change in status; Gandhi saw home as their place; Congress reluctant to give them authority.

Yaad karo: CDM mein kaun aaya = "Rich Poor Business Workers Women"

Rich peasants (revenue cut) | **Poor** peasants (rent remission) | **Business**

class (FICCI 1927, against colonial controls) | industrial **Workers** (Nagpur, railway, mine strikes) | **Women** (marches, salt, picketing). Dalits and many Muslims stayed away.

10. Limits of Civil Disobedience

(a) Dalits ("untouchables")

→ Congress ignored them for fear of offending sanatanis (conservative high-caste Hindus). Gandhi called them **harijans** (children of God), organised satyagraha for **temple entry**, use of public wells, tanks, roads, schools; himself cleaned toilets to dignify the work of the bhangi (sweepers).

→ Dalit leaders wanted political empowerment: **reserved seats, separate electorates**. Participation in CDM was limited (esp. Maharashtra, Nagpur).

→ **Dr B.R. Ambedkar**: organised Depressed Classes Association, 1930; clashed with Gandhi at the Second RTC demanding separate electorates. Gandhi: separate electorates would slow integration into society; began a **fast unto death**.

Poona Pact, September 1932

Ambedkar accepted Gandhi's position. Depressed Classes (later **Scheduled Castes**) got reserved seats in provincial and central legislative councils, but were to be **voted in by the general electorate**.

(b) Muslims

→ After the decline of Non-Cooperation-Khilafat, a large section felt alienated; Congress seen as close to the **Hindu Mahasabha**; communal clashes and riots deepened the distance.

→ **M.A. Jinnah** (Muslim League) was willing to give up separate electorates if Muslims got reserved seats in the Central Assembly and representation in proportion to population in the Muslim-dominated provinces (**Bengal, Punjab**).

→ **All Parties Conference, 1928**: compromise failed when **M.R. Jayakar** of the Hindu Mahasabha opposed it. Many Muslims doubtful of their status as a minority in a Hindu-majority India.

Swaraj meant different things (3M/5M fav)

Group	What swaraj meant to them
Middle class (towns)	End of British institutions; boycott of schools, courts, foreign goods
Awadh peasants	Lower rents, end of begar, freedom from oppressive landlords
Gudem tribals	Rights over forests (grazing, fuelwood, fruit); won by force
Assam plantation workers	Right to move freely in and out of the tea garden, return to the village
Rich peasants	Struggle against high revenue
Business classes	End of colonial restrictions on business; trade and industry free to grow
Dalits	Political empowerment: reserved seats, separate electorates, social equality

How Gandhi made it a mass movement

→ A new method, **satyagraha**: non-violent, open to all.

→ Joined **Khilafat with swaraj** to bring Hindus and Muslims together.

→ Chose **simple symbols** everyone felt: salt, khadi, the charkha.

→ Reached **peasants, tribals, workers, women** through local issues.

→ **Social work**: harijan upliftment, temple entry, khadi.

11. The Sense of Collective Belonging

Nationalism spreads when people believe they are part of the same nation: through **united struggles** and through history and fiction, folklore and songs, popular prints and symbols.

Medium	How it united people
Bharat Mata	1870s **Bankim Chandra Chattopadhyay** wrote "**Vande Mataram**" (later in novel **Anandamath**), sung in the Swadeshi movement of Bengal. **Abanindranath Tagore** painted Bharat Mata as an **ascetic figure**: calm, composed, divine, spiritual. Later images: with **trishul**, beside a lion and an elephant = power and authority.
Folklore	Folk tales, songs, legends = true picture of traditional culture; restored pride in the past. **Rabindranath Tagore**: ballads, nursery rhymes, myths (Bengal). **Natesa Sastri**: **The Folklore of Southern India**, 4 volumes of Tamil folk tales (Madras); folklore = national literature.
Flags	Swadeshi (Bengal): tricolour **red, green, yellow, 8 lotuses** (8 provinces), **crescent moon** (Hindus and Muslims). **1921 Swaraj flag** (Gandhi): red, green, white with a **spinning wheel** = self-help; carrying it in marches = symbol of defiance.
Reinterpretation of history	British called Indians backward, unfit to rule. Indians wrote of the **glorious ancient past** (art, architecture, science, mathematics, law, philosophy, crafts, trade) and decline under colonial rule; urged pride and struggle.

Problem point (write it!)

The past glorified was **Hindu**; images drawn from Hindu iconography, so people of other communities felt left out.

Bharat Mata by Abanindranath Tagore: calm, spiritual; holds learning, food and clothing

Yaad karo: collective belonging = "B-F-F-H"

Bharat Mata image (Bankim's Vande Mataram, Abanindranath's painting) | **F**

olklore revival (Rabindranath Tagore, Natesa Sastri) | **Flag and icons** (Swadeshi flag 1905, Swaraj flag 1921) | **History reinterpreted** (glorious ancient India).

Map items (CBSE 2026-27)

INC sessions: Calcutta (Sep 1920), Nagpur (Dec 1920), Madras (1927). **Satyagraha:** Champaran (Bihar, indigo, 1917), Kheda (Gujarat, peasants, 1917), Ahmedabad (Gujarat, mill workers, 1918). **Amritsar** (Punjab, Jallianwala Bagh, 1919). **Dandi** (Gujarat, salt law broken, 1930).

↳ Map: see Map Work section.

Ek nazar mein: NCM vs CDM

Point	Non-Cooperation (1920-22)	Civil Disobedience (1930-34)
Aim	Swaraj; Khilafat; Punjab wrongs	Purna Swaraj
Method	Refuse cooperation: boycott of titles, councils, schools, courts, foreign goods	Break colonial laws: salt law, forest laws, refuse taxes
Start	Calcutta (Sep), Nagpur (Dec) 1920	Dandi March, 12 Mar to 6 Apr 1930
End	Chauri Chaura, Feb 1922	Gandhi-Irwin Pact 1931; relaunched, faded by 1934
Muslims	Joined (Khilafat)	Many stayed away
Business	Limited	Strong support at first (FICCI)

Poora chapter ek flowchart mein

Sense of collective belonging: Bharat Mata, folklore, flags, history

1 minute timeline

- **Jan 1915** Gandhi back from South Africa
- **1917** Champaran, Kheda; **1918** Ahmedabad
- **1919** Rowlatt Act (hartal 6 Apr); Jallianwala 13 Apr; Khilafat Committee (Mar)
- **1920** Calcutta (Sep) proposes, Nagpur (Dec) adopts NCM; Oudh Kisan Sabha (Oct)
- **Feb 1922** Chauri Chaura: NCM withdrawn
- **1924** Alluri Sitaram Raju executed; **1927** FICCI, Madras session
- **1928** Simon Commission; All Parties Conference
- **Dec 1929** Lahore: Purna Swaraj; **26 Jan 1930** Independence Day
- **12 Mar-6 Apr 1930** Dandi March: CDM; Depressed Classes Association
- **5 Mar 1931** Gandhi-Irwin Pact; Dec 1931 Second RTC
- **Sep 1932** Poona Pact; **1934** CDM loses momentum

Exam Alert

NCM = refuse cooperation; CDM = **break laws**. Calcutta = proposed, Nagpur = adopted. Rowlatt = detention **2 years without trial**. Swadeshi flag (8 lotuses, red-green-yellow) is NOT the Swaraj flag (charkha, red-green-white).

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. At which session of the Congress was the Non-Cooperation programme finally adopted? 1M Board fav

(a) Calcutta, Sep 1920 (b) Madras, 1927 (c) Nagpur, Dec 1920 (d) Lahore, Dec 1929

Ans. (c) Nagpur, December 1920.

Q2. Arrange in order: (I) Dandi March (II) Simon Commission arrives (III) Second Round Table Conference (IV) Chauri Chaura. 1M

(a) IV, II, III, I (b) IV, II, I, III (c) II, IV, I, III (d) I, IV, II, III

Ans. (b) IV, II, I, III (1922, 1928, 1930, 1931).

Q3. **A:** The Salt March became an effective tool of resistance against colonial rule. **R:** Salt was consumed by the rich and poor alike, and the tax on it was oppressive. 1M Board fav

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q4. **A:** Dalits supported the Civil Disobedience Movement wholeheartedly. **R:** Dr B.R. Ambedkar organised the Depressed Classes Association in 1930 and demanded separate electorates. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (d) A false (their participation was limited), R true.

Q5. Match: Champaran, Kheda, Ahmedabad with (A) cotton mill workers (B) indigo planters (C) crop failure and revenue. 1M

Ans. Champaran-B; Kheda-C; Ahmedabad-A.

Q6. The lion and elephant beside the later image of Bharat Mata stood for: 1M

(a) Peace (b) Spirituality (c) Power and authority (d) Wealth

Ans. (c) Power and authority.

Q7. The Swaraj Party was formed by: 1M

(a) Nehru and Bose (b) C.R. Das and Motilal Nehru (c) Ali brothers (d) Thakurdas and Birla

(contd.) (b) C.R. Das and Motilal Nehru.

Q8. Which party did not boycott the 1921 council elections in Madras, and why? 1M

Ans. The Justice Party (non-Brahmans): entering the council was a way to gain power usually open only to Brahmans.

Q9. The Swaraj flag designed by Gandhiji in 1921 had at its centre: 1M
(a) a lotus (b) a crescent moon (c) a spinning wheel (d) the Ashoka Chakra

Ans. (c) a spinning wheel (symbol of self-help).

Q10. Who published *The Folklore of Southern India*, a collection of Tamil folk tales? 1M

Ans. Natesa Sastri (4 volumes).

Q11. **A:** Rich peasant communities were deeply disappointed when the Civil Disobedience Movement was called off in 1931. **R:** The movement was called off without the revenue rates being revised. 1M Board fav
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A; so many refused to rejoin in 1932.

Q12. Under which Act were plantation workers in Assam not allowed to leave the tea gardens without permission? 1M

Ans. The Inland Emigration Act of 1859.

Short answer (2-3 marks)

Q13. What was the Rowlatt Act? Why did Indians oppose it? 3M Board fav

Ans. Passed in 1919 by the Imperial Legislative Council despite united opposition of Indian members. Gave the government enormous powers to repress political activities and detain political prisoners without trial for two years: an attack on civil liberties. Opposed through hartal (6 April 1919), rallies, strikes.

Q14. Describe the Jallianwala Bagh incident. 3M Board fav

Ans. 13 April 1919, Amritsar: crowd (protesters + people at the Baisakhi fair) unaware of martial law gathered in the enclosed ground; General Dyer blocked exits and fired, killing hundreds, to "produce a moral effect" of terror. Led to strikes, clashes and brutal repression; Gandhi called off the movement.

Q15. Explain with examples how the First World War created economic problems in India. 3M

Ans. (i) Huge defence expenditure met by war loans and higher taxes; customs duties raised, income tax introduced (ii) prices doubled 1913–18 (iii) forced recruitment of villagers (iv) crop failures 1918–21, food shortage and influenza: 12–13 million died (Census 1921).

Q16. Why did Gandhi take up the Khilafat issue? 2M

Ans. Rowlatt satyagraha was limited to cities; a broad-based movement needed Hindu-Muslim unity. Khilafat (defence of the Ottoman Khalifa after WW1; committee in Bombay, March 1919) was joined with swaraj in Non-Cooperation (Calcutta, Sep 1920).

Q17. Why did the Non-Cooperation Movement slow down in the cities? 3M Board fav

Ans. (i) Khadi was costlier than mill cloth; the poor could not afford it (ii) boycott of British institutions needed Indian alternatives, (contd.) which came up slowly (iii) so students and teachers returned to government schools and lawyers to courts.

Q18. What did swaraj mean to (i) plantation workers of Assam (ii) tribals of Gudem Hills? 3M

Ans. (i) Right to move freely in and out of the tea gardens (barred by Inland Emigration Act 1859) and keep links with their village (ii) rights over forests closed by the government; under Alluri Sitaram Raju they waged guerrilla war, believing swaraj could come only by force.

Q19. Why did Gandhi withdraw the Non-Cooperation Movement? What followed? 3M

Ans. Feb 1922, Chauri Chaura (Gorakhpur): peaceful demonstration turned violent; Gandhi felt satyagrahis needed proper training. Then C.R. Das and Motilal Nehru formed the Swaraj Party for council politics; Nehru and Bose pressed for mass agitation and full independence.

Q20. What was the Poona Pact of 1932? 2M Board fav

Ans. Agreement between Gandhi and Dr B.R. Ambedkar (Sep 1932) after Gandhi's fast against separate electorates: Depressed Classes got reserved seats in provincial and central councils, but were to be voted in by the general electorate.

Q21. "Gandhi found in salt a powerful symbol to unite the nation." Explain. 3M

Ans. (i) Salt was eaten by rich and poor alike (ii) salt tax and government monopoly on its production hurt everyone (iii) 11 demands to Irwin (31 Jan 1930); Salt March from Sabarmati, 240 miles in 24 days with 78 volunteers; making salt at Dandi (6 April 1930) began CDM.

Q22. Why was the Simon Commission opposed? 2M

Ans. A statutory commission set up by Britain (arrived 1928) to look into the constitutional system had no Indian member; so all parties, including Congress and the Muslim League, protested with "Go back Simon".

Q23. How did Indian merchants and industrialists relate to the Civil Disobedience Movement? 3M

Ans. (i) Wanted protection against imports and a rupee-sterling ratio discouraging imports; formed FICCI (1927) under Purshottamdas Thakurdas and G.D. Birla (ii) gave financial help, refused to buy or sell imported goods (iii) after the failed Round Table Conference and spread of militant activity they lost enthusiasm.

Q24. How did the worldwide economic depression affect the Indian countryside? 2M

Ans. Agricultural prices began to fall from 1926 and collapsed after 1930; demand for agricultural goods and exports fell, so peasants found it hard to sell harvests and pay revenue. The countryside was in turmoil and ready to join the Civil Disobedience Movement.

Q25. How was Alluri Sitaram Raju's movement different from Gandhiji's ideas? 2M

Ans. Raju praised Gandhi and persuaded people to give up drinking, but he believed India could be liberated **only by the use of force**, not non-violence. The Gudem rebels fought a guerrilla war, attacked police stations; Raju was captured and executed in 1924.

Q26. Describe the Salt March. 3M Board fav

Ans. (i) 31 Jan 1930: Gandhi sent Irwin 11 demands, chief one the

(contd.) abolition of the salt tax (ii) Irwin refused, so on 12 March 1930 Gandhi set out from Sabarmati with 78 volunteers (iii) walked 240 miles in 24 days to Dandi, addressing crowds on the way (iv) on 6 April 1930 he made salt from sea water, breaking the law: the start of CDM.

Q27. Why did industrialists become less enthusiastic about the Civil Disobedience Movement after 1932? 2M

Ans. After the failure of the Second Round Table Conference they were (i) alarmed by the spread of militant activities and feared prolonged disruption of business (ii) worried about the growing influence of socialism among the younger members of the Congress.

Q28. Explain the importance of the Non-Cooperation Movement. 3M

Ans. (i) First mass movement: students, peasants, tribals, workers and merchants joined (ii) Khilafat and swaraj together built Hindu-Muslim unity (iii) import of foreign cloth halved (Rs 102 crore to Rs 57 crore in 1921-22), Indian mills and handlooms gained (iv) Congress became a mass organisation and people lost the fear of British power.

Q29. Why did Gandhiji organise satyagrahas in Kheda (1917) and Ahmedabad (1918)? 2M

Ans. Kheda (Gujarat): peasants hit by crop failure and a plague epidemic could not pay revenue and demanded relaxation of revenue collection. Ahmedabad: to support cotton mill workers in their struggle with mill owners.

Long answer (5 marks)

Q30. Explain the role and limits of different social groups in the Civil Disobedience Movement. 5M Board fav

Ans. (i) Rich peasants (Patidars, Jats): wanted revenue cut; disappointed in 1931, did not rejoin in 1932 (ii) poor peasants wanted rent remitted; Congress refused no-rent campaigns (iii) business classes (FICCI, Thakurdas, Birla) wanted protection; cooled after the RTC failure (iv) workers joined little except Nagpur region (v) women joined in large numbers (salt, picketing) but status unchanged. Dalits and many Muslims stayed away.

Q31. How did people develop a sense of collective belonging? Explain. 5M Board fav

Ans. (i) United struggles (ii) Bharat Mata image: Vande Mataram (Bankim Chandra), painting by Abanindranath Tagore (iii) folklore: Rabindranath Tagore, Natesa Sastri (iv) flags: Swadeshi tricolour, Gandhi's Swaraj flag 1921 (v) reinterpretation of history: glorious past, decline under British. Problem: Hindu images made other communities feel left out.

Q32. Explain the effects of the Non-Cooperation Movement on the economic front. 5M

Ans. (i) Foreign goods boycotted, liquor shops picketed (ii) foreign cloth burnt in bonfires (iii) import of foreign cloth halved, Rs 102 crore to Rs 57 crore (1921-22) (iv) merchants refused to trade in foreign goods (v) production of Indian textile mills and handlooms rose.

Q33. Why did Dalits and many Muslims keep away from the Civil Disobedience Movement? 5M

Ans. Dalits: (i) Congress ignored them fearing sanatanis (ii) wanted reserved seats and separate electorates; Ambedkar formed the (contd.) Depressed Classes Association (1930), clashed with Gandhi at the Second RTC; Poona Pact 1932. Muslims: (iii) alienated after Khilafat decline, Congress linked with Hindu Mahasabha (iv) communal riots (v) 1928 All Parties Conference failed (M.R. Jayakar opposed Jinnah's compromise); fear of minority status.

Q34. Who founded the Oudh Kisan Sabha and when? 1M

Ans. Jawaharlal Nehru, Baba Ramchandra and others, October 1920.

Q35. Why did Gandhiji call off the Non-Cooperation Movement in February 1922? 2M

Ans. The movement was turning violent (Chauri Chaura, where a mob set a police station on fire); Gandhi felt satyagrahis needed proper training before mass struggles.

Q36. How did the First World War create a new economic and political situation in India? 3M

Ans. Huge rise in defence expenditure financed by war loans and higher taxes (customs duties raised, income tax introduced); prices doubled 1913-1918; forced recruitment of soldiers in villages; crop failures and influenza epidemic (12-13 million died). Anger fed the national movement.

Q37. Why did the Dalits (depressed classes) not join the Civil Disobedience Movement in large numbers? 3M

Ans. Congress ignored them for fear of offending conservative high-caste Hindus; Dalit leaders wanted reserved seats and separate electorates; Dr B.R. Ambedkar organised the Depressed Classes Association (1930); clash with Gandhi at the Second RTC; Poona Pact (Sep 1932) gave reserved seats but voting by the general electorate.

Q38. What steps did Gandhiji take to improve the condition of the Dalits? 3M

Ans. (i) Called them *harijans* (children of God) (ii) organised satyagraha to secure them entry into temples and access to public wells, tanks, roads and schools (iii) himself cleaned toilets to dignify the work of the bhangi (sweepers) (iv) persuaded upper castes to give up untouchability.

Q39. What was decided at the Lahore session of the Congress in December 1929? 2M

Ans. Under Jawaharlal Nehru the demand for **Purna Swaraj** (complete independence) was formalised, and **26 January 1930** was to be celebrated as Independence Day, with people taking a pledge to struggle for complete independence.

Q40. What was the role of women in the Civil Disobedience Movement? 2M

Ans. Large-scale participation: during the Salt March thousands of women came out to listen to Gandhi; they joined protest marches, manufactured salt and picketed foreign cloth and liquor shops; many went to jail. In urban areas mostly high-caste women, in rural areas rich peasant households.

Q41. Describe how the Non-Cooperation Movement spread in the countryside. 5M

Ans. (i) **Awadh**: Baba Ramchandra led peasants against talukdars; demanded lower revenue, end of begar, social boycott (nai-dhobi bandh); Oudh Kisan Sabha (Oct 1920) (ii) 1921: talukdars' houses attacked, grain hoards seized (iii) **Gudem Hills (AP)**: tribals against forest closure and begar; Alluri Sitaram Raju's guerrilla war (iv) **Assam**

(contd.) : plantation workers left tea gardens, defying the Inland Emigration Act 1859 (v) each group gave swaraj its own meaning and used Gandhi's name.

Competency based (3 marks)

Q42. A Patidar farmer of Gujarat and a poor tenant of UP both joined the Civil Disobedience Movement. Analyse why their demands differed and why the Congress backed only one of them fully. 3M

Ans. The Patidar (rich peasant) grew commercial crops, was hit by falling prices and wanted **revenue reduced**. The tenant cultivated rented land and wanted **unpaid rent remitted**, often joining no-rent campaigns. Congress did not support no-rent campaigns because it feared upsetting rich peasants and landlords, so its link with poor peasants stayed uncertain.

Q43. You are asked to choose one symbol to unite people of different regions and classes. Using the salt tax and the Swaraj flag as examples, explain what makes a symbol unifying, and give one limit seen in the national movement. 3M

Ans. A unifying symbol is used or felt by **everyone** (salt was eaten by rich and poor), is linked to a **shared grievance** (the salt tax hurt all) and is **easy to carry or show** (the Swaraj flag with the spinning wheel, carried in marches as defiance). Limit: images drawn mainly from **Hindu iconography** (Bharat Mata) made other communities feel left out.

Q44. Evaluate Gandhiji's decision to withdraw the Non-Cooperation Movement after Chauri Chaura (1922). 3M

Ans. For: the movement was turning violent (a police station was set on fire); Gandhi held that satyagrahis needed proper training and that non-violence was the basis of the struggle. Against: many leaders felt it stopped the movement at its height. Result: the Swaraj Party took up council politics, while younger leaders (Nehru, Bose) pressed for radical mass agitation.

Source based (4 marks)

Q45. "Gandhiji's letter was, in a way, an ultimatum. If the demands were not fulfilled by 11 March, the Congress would launch a civil disobedience campaign..." (i) To whom was the letter written and when? (ii) Why salt? (iii) How was CDM different from NCM? 4M

Ans. (i) Viceroy Lord Irwin, 31 January 1930 (ii) used by rich and poor alike; tax and monopoly oppressive (iii) in CDM people were asked not only to refuse cooperation but also to break colonial laws (salt, forest laws, revenue).

Q46. "When Gandhiji himself was arrested, industrial workers in Sholapur attacked police posts, municipal buildings, law courts and railway stations..." (i) Which movement? (ii) Whose arrest earlier caused protests in Peshawar? (iii) Why was the movement called off in 1931 and what did Gandhi agree to? 4M

Ans. (i) Civil Disobedience Movement (1930) (ii) Abdul Ghaffar Khan (iii) violence and brutal repression; Gandhi-Irwin Pact (5 March 1931): he agreed to attend the Second Round Table Conference, govt agreed to release political prisoners.

Yaad rakho 13 April 1919: General Dyer opened fire at Jallianwala Bagh, Amritsar, during a peaceful gathering on Baisakhi day.

Q47. "In his famous book *Hind Swaraj* (1909), Gandhi declared that British rule was established in India with the cooperation of Indians and had survived only because of this cooperation. If Indians refused to cooperate, British rule would collapse within a year, and swaraj would come." (i) What was Gandhi's main argument? (ii) Name the stages in which non-cooperation was to unfold. (iii) Why were some Congress leaders reluctant? (1+2+1) 4M Board fav

Ans. (i) British rule rested on Indian cooperation; refusing it would bring swaraj (ii) surrender of government titles, then boycott of civil services, army, police, courts, legislative councils, schools and foreign goods; full civil disobedience if repressed (iii) they did not want to boycott the council elections of November 1920 and feared popular violence.

Q48. "In Awadh, peasants were led by Baba Ramchandra, a sanyasi who had earlier been to Fiji as an indentured labourer. The movement was against talukdars and landlords who demanded very high rents and a variety of other cesses." (i) What were the peasants' demands? (ii) What forms of protest did they use? (iii) How did their idea of swaraj differ from that of the Congress? (1+1+2) 4M

Ans. (i) reduction of revenue, abolition of begar, social boycott of oppressive landlords (ii) nai-dhobi bandhs (barbers and washermen withheld services); in 1921 houses of talukdars and merchants were attacked and grain hoards taken over (iii) for them swaraj meant freedom from landlord oppression, and local leaders told them Gandhi had said no taxes were to be paid and land would be redistributed; the Congress wanted non-violent non-cooperation and was unhappy with such violence.

Q49. "It was in the twentieth century, with the growth of nationalism, that the identity of India came to be visually associated with the image of Bharat Mata." (i) Who painted the famous image of Bharat Mata, and how is she portrayed? (ii) How did later images differ? (iii) Why did some communities feel left out? (2+1+1) 4M

Ans. (i) Abanindranath Tagore: an ascetic figure, calm, composed, divine and spiritual, holding learning, food and clothing (ii) later she was shown with a trishul, beside a lion and an elephant: symbols of power and authority (iii) the images and the past being glorified came from Hindu iconography, so people of other communities felt excluded.

Last minute: 10 one-liners

1. Satyagraha = power of truth and non-violence; Gandhi's first in India: Champaran 1917.
2. Rowlatt Act 1919: detention without trial up to 2 years.
3. Jallianwala Bagh: 13 April 1919, General Dyer, Amritsar.
4. Khilafat Committee: Bombay, March 1919 (Muhammad Ali, Shaukat Ali).
5. NCM: proposed Calcutta (Sep 1920), adopted Nagpur (Dec 1920); withdrawn after Chauri Chaura (Feb 1922).
6. Swaraj Party: C.R. Das and Motilal Nehru.
7. Simon Commission 1928: "Go back Simon".
8. Lahore Congress Dec 1929: Purna Swaraj; 26 Jan 1930 Independence Day.
9. Dandi March: 12 Mar to 6 Apr 1930, 240 miles, 78 volunteers.
10. Poona Pact Sep 1932: Gandhi and Ambedkar; Vande Mataram by Bankim Chandra.

MAKING OF A GLOBAL WORLD

Board scope 2026-27

Only **Section 1: The Pre-modern World** is evaluated in the board paper. 19th century, inter-war and post-war sections = **project / periodic work only** (1 compact box at the end).

Globalisation usually means the economic system that emerged over the **last 50 years or so**; but the making of the global world has a long history of trade, migration, people in search of work, movement of capital.

1. How Societies Got Linked

→ Travellers, traders, priests, pilgrims travelled vast distances for **knowledge, opportunity, spiritual fulfilment**, or to **escape persecution**.

→ They carried goods, money, values, skills, ideas, inventions, and even germs and diseases.

→ As early as **3000 BCE**: active coastal trade linked the **Indus valley civilisation** with present-day West Asia.

→ For more than a millennium, **cowries** (Hindi cowdi, seashells used as money) from the **Maldives** reached China and East Africa.

→ Long-distance spread of disease-carrying germs: traced to the **7th century**; by the 13th century an unmistakable link.

2. The Silk Routes Link the World

Name points to the importance of **West-bound Chinese silk cargoes**. Several routes, **over land and by sea**, knitting Asia together and linking Asia with **Europe and northern Africa**. Existed before the Christian Era, thrived almost till the **15th century**.

Trade links	Cultural links
Chinese **silk and pottery** went west; **textiles and spices** from India and South-east Asia; in return **precious metals (gold, silver)** flowed from Europe to Asia.	**Buddhism** emerged from eastern India and spread in several directions; early **Christian missionaries** and, a few centuries later, **Muslim preachers** travelled these routes.

↳ Silk West-bound tha, East-bound nahi: A-R ka favourite trap!

Silk routes: land and sea links that carried Chinese silk, Indian textiles and spices, precious metals, and also faiths and ideas

Yaad karo: Silk Routes ne kya kya bheja = "SPICE-R"

Silk (China) | Pottery (Chinese) | Indian textiles and spices | Cultures and faiths (Buddhism, Christianity, Islam travelled) | Exchange of gold and silver from Europe | Route both land and sea. Pre-Christian era to about the 15th century.

3. Food Travels: Spaghetti and Potato

→ Traders and travellers introduced new crops. **Noodles** travelled west from China to become **spaghetti**; perhaps **Arab traders** took pasta to 5th-century **Sicily** (Italy). Similar foods known in India and Japan, so origins uncertain.

→ **Potatoes, soya, groundnuts, maize, tomatoes, chillies, sweet potatoes** were unknown to our ancestors until about **five centuries ago**.

→ Reached Europe and Asia only after **Christopher Columbus** accidentally discovered the Americas; came from America's original inhabitants, the **American Indians**.

→ **Life or death:** with the potato, Europe's poor ate better and lived longer. Ireland's poorest peasants were so dependent on it that when disease destroyed the crop in the **mid-1840s**, hundreds of thousands died of starvation (Irish Potato Famine, 1845-49).

Meme samjho

Noodles China se, spaghetti Italy mein, aur aloo America se Europe pahuncha? **ACHHAA!!**

Asli baat: Food travelled with traders: noodles possibly reached Italy (spaghetti) via Arab traders to Sicily; potato, soya, groundnut, maize, tomatoes, chillies, sweet potatoes came from America after Columbus.

4. Conquest, Disease and Trade

→ **16th century**: European sailors found a **sea route to Asia** and crossed the western ocean to **America**: the pre-modern world **shrank greatly**.

→ Before this, the **Indian subcontinent** was central to the Indian Ocean trade; now these flows were redirected towards Europe.

→ America's vast lands, abundant crops and minerals transformed trade. **Silver** from mines in present-day **Peru and Mexico** enhanced Europe's wealth and financed its trade with Asia. Legends of **El Dorado**, the fabled city of gold, sent many expeditions to South America (17th century).

→ Portuguese and Spanish conquest of America decisively under way by the **mid-16th century**.

Yaad karo: Potato ka sabak = "Ireland 1845-49"

Poor in Europe ate better with potatoes; but in **Ireland** potato blight (disease) destroyed crops in the mid-1840s:

Great Irish Famine (1845–49), about 1 million died of starvation, double that number emigrated.

Deadliest weapon = germs, not guns

Spanish carried **smallpox**. America's original inhabitants, isolated for long, had no immunity. Smallpox spread deep into the continent, **even ahead of the Europeans**, killing and decimating whole communities; conquest became easy.

Europe till 19th c.: poverty, hunger, crowded cities, deadly diseases; **religious dissenters** persecuted

↓

Thousands fled to America; **slaves captured in Africa** grew cotton and sugar on plantations for Europe

↓

China and India (richest till 18th c.); but from the 15th c. **China restricted overseas contacts**

↓

Centre of world trade shifted westwards: **Europe**

Project only (not in board): 19th century

Flows of **trade, labour, capital.** Britain's **Corn Laws** abolished: cheap food imports; land cleared in America, Australia; railways, ports; **refrigerated ships** carried meat. **Rinderpest** (1890s, Africa) killed 90% cattle: Africans forced into wage labour. **Indentured labour** from Bihar, UP, central India to Caribbean, Fiji, Mauritius (Hosay festival, chutney music). Indian bankers: **Shikaripuri shroffs, Nattukottai Chettiars.** Britain's trade surplus with India helped balance its deficits with other countries; plus **"home charges"**.

Project only: inter-war and post-war

Inter-war: WW1 (1914–18), first modern industrial war; US became international creditor. **Henry Ford**'s assembly line = mass production. Great Depression 1929: agricultural prices fell, US loans withdrawn. India: exports and imports nearly halved (1928–34), wheat prices fell 50%, gold exported; peasants in debt.

Post-war: Bretton Woods conference, July 1944: IMF and **World Bank** (IBRD), fixed exchange rates (dollar linked to gold). Decolonisation; developing countries formed **G-77** to demand a **NIEO**; MNCs spread; 1970s Bretton Woods ended, industry shifted to Asia (China).

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q2. Which of these foods reached Europe and Asia only after Columbus discovered America? 1M
(a) Rice, wheat, millets (b) Tea, silk, spices (c) Potato, maize, tomato (d) Noodles, pasta

(contd.) (c) Potato, maize, tomato.

Q1. A: The name "silk routes" points to the importance of East-bound Chinese silk cargoes. **R:** There were several silk routes over land and by sea linking vast regions of Asia. 1M Board fav
(a) Both true, R explains A (b) Both true, R does not explain A
(c) A true, R false (d) A false, R true

Ans. (d) A false (cargoes were West-bound), R true.

Q3. Identify the continent: long cut off from contact; people had no immunity to outside diseases; vast lands, crops and minerals. 1M

Ans. America.

Q4. A: The pre-modern world shrank greatly in the 16th century. **R:** European sailors found a sea route to Asia and crossed the western ocean to America. 1M
(a) Both true, R explains A (b) Both true, R does not explain A
(c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q5. Name the fabled city of gold in South America sought by 17th-century Europeans. 1M

Ans. El Dorado.

Q6. What was used as a form of currency from the Maldives to China and East Africa for over a thousand years? 1M

Ans. Cowries (seashells).

Short answer (2–3 marks)

Q7. "The silk routes are a good example of vibrant pre-modern trade and cultural links." Explain. 3M Board fav

Ans. Land and sea routes linked Asia, Europe and northern Africa. Trade: Chinese silk and pottery, Indian and South-east Asian textiles and spices went west; gold and silver came east. Culture: Buddhism spread from eastern India; Christian missionaries and later Muslim preachers used the same routes.

Q8. "Sometimes new crops could make the difference between life and death." Explain. 3M Board fav

Ans. American crops (potato, maize, tomato) came to Europe and Asia after Columbus. With the potato Europe's poor ate better and lived longer. But Irish peasants depended on it so much that when disease destroyed the crop in the mid-1840s, hundreds of thousands died of starvation.

Q9. "From ancient times, travellers, traders, priests and pilgrims covered vast distances." Support with examples. 3M

Ans. (i) 3000 BCE coastal trade linked Indus valley with West Asia (ii) cowries from the Maldives reached China and East Africa (iii) silk routes carried goods, people, ideas, Buddhism, Christianity, Islam (iv) germs travelled too, traced back to the 7th century.

Q10. How did germs help the Spanish conquer America? 3M

Ans. Not guns but germs like smallpox were the deadliest weapon; America's long-isolated people had no immunity; smallpox spread ahead of the Europeans and wiped out whole communities, making conquest easy.

Long answer (5 marks)

Q11. What do we mean by "the world shrank" in the 16th century? How did Europe become the centre of world trade? 5M Board fav

Ans. (i) Sea route to Asia and crossing to America made far lands reachable (ii) silver from Peru and Mexico enriched Europe and financed Asian trade (iii) people fleeing poverty, disease and religious persecution settled America; African slaves grew cotton and sugar for Europe (iv) China restricted overseas contacts from the 15th century (v) rise of the Americas moved the centre of world trade west to Europe.

Q12. Which crops came to Europe and Asia from America after its discovery? 2M

Ans. Potatoes, soya, groundnuts, maize, tomatoes, chillies, sweet potatoes.

Q13. What were "silk routes"? Why are they so called? 2M

Ans. Land and sea routes linking Asia with Europe and northern Africa; named after the importance of west-bound Chinese silk cargoes along them.

Q14. How did the Portuguese and Spanish conquest of America take place? 3M

Ans. Not by superior firepower alone: the most powerful weapon was germs like smallpox carried by the conquerors; America's original inhabitants had no immunity; smallpox killed whole communities, paving the way for conquest. 16th century.

Q15. "In the 16th century the pre-modern world shrank greatly." Explain. 3M

Ans. European sailors found a sea route to Asia and crossed the western ocean to America; America's vast lands, crops and minerals (silver) transformed trade and lives everywhere; Europe became the centre of world trade.

Q16. Who discovered America for the Europeans and when? 1M

Ans. Christopher Columbus, 1492.

Q17. Explain any three effects of the "discovery" of America on the world. 3M

Ans. New crops (potato, maize, tomato, chillies) changed diets and let the poor in Europe eat better and live longer; precious metals (silver) from Peru and Mexico enhanced Europe's wealth and financed its trade with Asia; conquest and colonisation of America, deaths from smallpox, slave trade from Africa to plantations.

Q18. Why did thousands of Europeans flee to America until the 19th century? 2M

Ans. Until the 19th century poverty and hunger were common in Europe; cities were crowded and deadly diseases widespread; religious conflicts and persecution of dissenters; America offered land and opportunities.

Quick fact Silk Routes linked China to Central Asia, West Asia and Europe; they also carried Buddhism, Christianity and Islam.

Source based (4 marks)

Q19. "Europe's conquest of America was not just a result of superior firepower. The most powerful weapon of the Spanish conquerors was not a conventional military weapon at all..." (i) What was this weapon? (ii) Why were Americans defenceless against it? (iii) Name two things from America that enriched Europe. 4M

Ans. (i) Germs such as smallpox (ii) long isolation, so no immunity; smallpox spread even ahead of the Europeans (iii) silver from Peru and Mexico; crops like potato and maize (also cotton and sugar from plantations).

Ek nazar mein: kya, kahan se, kahan

What travelled	From	To / effect
Silk, pottery	China	West Asia, Europe (silk routes)
Textiles, spices	India, SE Asia	Europe, Africa; gold and silver flowed back to Asia
Buddhism	Eastern India	Spread in many directions along silk routes
Noodles	China	West as spaghetti (possibly via Arab traders, Sicily)
Potato, maize, tomato, chillies	America	Europe, Asia after 1492 (Irish Famine 1845–49)
Silver	Peru, Mexico	Enhanced Europe's wealth, financed trade with Asia
Smallpox germs	Spanish conquerors	Killed American natives, helped conquest

Last minute: 8 one-liners

1. Silk routes: pre-Christian era to about the 15th century.
2. Cowries (Maldives) used as currency, reached China and East Africa.
3. Indus valley civilisation linked with present-day West Asia (trade, shells) around 3000 BCE.
4. Christian missionaries, Muslim preachers and Buddhist monks travelled the silk routes.
5. America: "discovered" by Europeans in 1492 (Columbus).
6. Until the 18th century, China and India were among the world's richest countries.
7. Europe's poor fled to America; slaves captured in Africa sent to plantations.
8. Deadliest weapon of the conquistadors: smallpox, not guns.

Yaad rakho Noodles travelled west from China to become spaghetti (a possible story); potato, maize, tomato, chillies came from the Americas.

Do you know? Smallpox germs carried by Spanish conquerors killed millions in America in the 16th century: a weapon more powerful than guns.

AGE OF INDUSTRIALISATION

1. Before the Industrial Revolution

Proto-industrialisation: large-scale industrial production for the international market before factories (17th–18th c.). Merchants from towns moved to the countryside (urban **guilds** restricted entry), gave money to peasants and artisans to produce for them. Controlled by merchants; a network of commercial exchanges; household-based.

2. Coming Up of the Factory

→ Earliest factories in England by the **1730s**; cotton = first symbol of the new era; cotton mill created by **Richard Arkwright**. Cotton and **iron and steel** = most dynamic industries.

→ **James Watt** improved Newcomen's steam engine, patented **1781** (with Matthew Boulton). **Spinning Jenny** (James Hargreaves, 1764): women feared unemployment and attacked it.

→ **Pace of change was slow**: in Victorian Britain labour was **cheap and abundant**, many industries seasonal, aristocrats preferred hand-made goods, so industrialists preferred hand labour over costly machines.

Life of the workers (Britain)

Abundance of labour, so **jobs scarce**; got jobs through friends and kin; **seasonal unemployment** (gasworks, breweries, ports busy in winter only); real wages rose a little but poverty; in bad years up to **35–75%** unemployed in some cities; fear of new technology (Spinning Jenny attacked). After the 1840s building work (roads, railways, sewers) gave more jobs.

3. Industrialisation in the Colonies (India)

→ **Age of Indian textiles**: fine cottons and silks exported via Afghanistan and ports **Surat, Masulipatam, Hoogly**; Gujarati Banias, Bohras, Parsis traded. After the 1750s European companies took over; **gomasthas** (paid supervisors) controlled weavers, advances tied weavers; clashes with weavers.

→ **Manchester comes to India**: by the early 19th century cotton piece goods exports fell; machine-made British imports flooded India; weavers lost markets, faced shortage of raw cotton (exported to Britain, esp. 1860s American Civil War).

- **1854** first cotton mill, Bombay; **1855** first jute mill, Bengal; **1860s** Elgin Mill, Kanpur; **1861** Ahmedabad; **1874** Madras
- **1912** J.N. Tata set up TISCO, Jamshedpur; **1917** Seth Hukumchand: first Indian jute mill, Calcutta

Early entrepreneurs (China trade, finance): **Dwarkanath Tagore** (Bengal), **Dinshaw Petit, Jamsetjee Jeejeebhoy** (Bombay). Workers recruited by **jobbers** (got jobs, also controlled lives). Indian mills made **coarse yarn**; **Swadeshi movement** and **WW1** boosted Indian industry; **handloom** survived and grew (fly shuttle).

Market for goods

Advertisements, **labels** ("MADE IN MANCHESTER"; Indian gods and goddesses on labels gave divine approval), **calendars** hung in tea shops and homes; Indian makers advertised a nationalist message ("**Buy swadeshi**").

Yaad karo: Indian weavers ki 2 problems = "Kam Cotton, Kam Market"

Raw cotton exports raised its price (**kam cotton**), and Manchester imports flooded Indian markets while export markets collapsed (**kam market**).

MOST IMPORTANT QUESTIONS

Periodic test practice | answers green mein

Q1. What is proto-industrialisation? 1M

Ans. Large-scale production for the international market before factories, organised by merchants in the countryside.

Q2. Who improved the steam engine and patented it in 1781? 1M

Ans. James Watt.

Q3. Who were gomasthas? 1M

Ans. Paid servants of the East India Company who supervised weavers, collected supplies and checked cloth quality.

Q4. Why did industrialists in Victorian Britain prefer hand labour? 3M

Ans. Labour was cheap and plentiful; many industries were seasonal; machines were costly and needed repair; aristocrats and the rich preferred hand-made goods.

Q5. Why did Indian weavers suffer in the 19th century? 3M

Ans. Cheap Manchester imports took their markets; exports collapsed; raw cotton was exported, so it became scarce and costly (esp. 1860s); gomasthas and advances tied them down.

Q6. How did Indian industrialists' early capital come, and how did workers get factory jobs? 3M

Ans. Many earned capital in the China trade (opium), shipping and finance: Dwarkanath Tagore, Dinshaw Petit, Jamsetjee Jeejeebhoy. Workers came from nearby districts; jobbers (old trusted workers) recruited them, helped them settle, but demanded money and gifts and controlled their lives.

Q7. How did manufacturers use labels and calendars to sell goods? 2M

Ans. Labels showed the place of making ("Made in Manchester") and images of Indian gods to give divine approval; calendars hung in shops and homes advertised daily; Indian makers added a nationalist "swadeshi" message.

Print Culture and Modern World

1. The First Printed Books: China

→ China, Japan, Korea: earliest print technology = hand printing. From AD 594 China printed books by rubbing paper against the inked surface of **woodblocks**.

→ Thin porous sheet printed on one side only: traditional Chinese **"accordion book"**, folded and stitched at the side.

→ Imperial state = major producer: textbooks for the **civil service examination**.

→ **17th century**: urban culture bloomed, uses diversified: merchants (trade information), reading as leisure (fiction, poetry, autobiographies, romantic plays), **rich women read** and published; wives of scholar-officials wrote about their lives.

→ Late 19th c.: Western mechanical presses; **Shanghai** = hub of new print culture (Western-style schools).

2. Print in Japan

→ Buddhist missionaries from China brought hand printing around **AD 768–770**.

→ Oldest Japanese book: Buddhist Diamond Sutra, AD 868: six sheets of text with woodcut illustrations.

→ Pictures on textiles, playing cards, paper money. Late 18th c. **Edo (Tokyo)**: illustrated books, urban culture; books on women, music, tea ceremony, flower arrangement, etiquette, cooking.

→ **Kitagawa Utamaro** (born Edo, 1753): **ukiyo** ("pictures of the floating world"): ordinary human experiences, urban life.

Diamond Sutra (868 CE): the oldest Japanese book, six sheets of text with woodcut illustrations

3. Print Comes to Europe

11th c.: Chinese paper reached Europe via the **silk route**

↓

1295: **Marco Polo** returned to Italy from China with knowledge of woodblock printing

↓

Italians made woodblock books; technology spread over Europe

→ Luxury editions still **handwritten on expensive vellum** for aristocrats and rich monastic libraries (they scoffed at printed books as cheap vulgarities); merchants and university students bought cheaper printed copies.

→ Booksellers exported books, held **book fairs**; one bookseller could employ **50+ scribes**.

→ Early 15th c.: woodblocks widely used for textiles, playing cards, religious pictures with short texts.

Why manuscripts could not meet demand

Copying was expensive, laborious, time-consuming; manuscripts were **fragile**, awkward to handle, could not be carried around or read easily.

4. Gutenberg and the Printing Press

Johann Gutenberg (Strasbourg)

Son of a merchant, grew up on a large agricultural estate: saw **wine and olive presses**. Master **goldsmith**: made lead moulds. Adapted the olive press, cast **metal types** for letters. Perfected the system by 1448. First book: **the Bible**, about **180 copies in 3 years**.

→ Early printed books **resembled manuscripts**: metal letters imitated ornamental handwriting; borders illuminated by hand; space for decoration left blank, so **each copy was different**.

→ **1450–1550**: presses set up in most countries of Europe. 2nd half of 15th c.: **20 million** copies; 16th c.: about **200 million**.

→ Shift from hand printing to mechanical printing = print revolution.

Gutenberg's press: adapted the olive and wine press; first book printed: the Bible (about 1448–1450, 180 copies)

Yaad karo: Gutenberg = "Olive press + Goldsmith + Bible"

Son of a merchant, grew up on a farm (**olive and wine presses**); learnt **goldsmith** work (metal letters); perfected the press by 1448; first book: the **Bible**, about 180 copies in 3 years.

5. The Print Revolution and Its Impact

A new reading public

✓ Cost of books fell; time and labour per book fell; multiple copies produced easily; books flooded the market.

✓ Earlier reading was for elites; common people lived in an **oral culture** (heard sacred texts read out, ballads, folk tales). Now a hearing public became a reading public.

✓ Literacy low, so printers published **popular ballads and folk tales with pictures**, sung and recited at gatherings: oral culture entered print; the line between them blurred.

Religious debates and the fear of print

→ Print could spread new ideas and debate; many feared **rebellious and irreligious thoughts**. **Erasmus** (Latin scholar, Catholic reformer) criticised it: books "swarm" everywhere, "stupid, slanderous, scandalous".

→ **1517: Martin Luther** wrote **Ninety Five Theses** criticising practices and rituals of the **Roman Catholic Church**; a printed copy posted on a church door in **Wittenberg**. Printed in vast numbers; led to division in the Church: the **Protestant Reformation**. His New Testament: 5,000 copies sold in a few weeks, 2nd edition in 3 months.

→ Luther: "Printing is the ultimate gift of God and the greatest one."

→ **Menocchio** (16th c. Italian miller) read books and gave his own view of God and Creation; hauled up twice by the **Inquisition** and executed.

→ Church imposed controls on publishers and booksellers; from **1558** kept an **Index of Prohibited Books**.

Martin Luther (1517): his 95 Theses criticising the Church led to the Protestant Reformation; "Printing is the ultimate gift of God"

6. The Reading Mania (17th–18th c.)

→ Churches set up village schools; literacy reached **60 to 80 per cent** in some parts of Europe by the end of the 18th century.

→ Pedlars roamed villages with little books: **almanacs** (ritual calendars), ballads, folktales; also entertainment.

England	France
Penny chapbooks: pocket-size books sold for a penny by petty pedlars called **chapmen**; even the poor could buy.	**Bibliotheque Bleue**: low-priced small books on poor quality paper, bound in cheap **blue covers**.

→ Romances (4–6 pages), histories (stories of the past). **Periodical press** (early 18th c.): current affairs + entertainment; newspapers, journals.

→ Ideas of scientists and philosophers reached common people: **Isaac Newton, Thomas Paine, Voltaire, Rousseau** widely read.

→ **Louise-Sebastien Mercier** (French novelist): "The printing press is the most powerful engine of progress"; "Tremble, therefore, tyrants of the world! Tremble before the virtual writer!"

Quick fact Earliest print technology: hand printing in China (from about 594 AD) on rubbing paper; Japan's oldest printed book: Diamond Sutra (868 AD).

Meme samjho

Menocchio ne print ki books padh ke Bible ki nayi interpretation di. Church: "Isko roko!" Printer: *bas ek aur edition chhaap deta hoon*

Asli baat: The Roman Catholic Church feared new readings of religion; it imposed controls on publishers and maintained an Index of Prohibited Books from 1558. Menocchio, an Italian miller, was executed.

7. Print Culture and the French Revolution

Historians' 3 arguments: how print created conditions for the French Revolution.

1. Popularised ideas of **Enlightenment thinkers** (Voltaire, Rousseau): attacked tradition, superstition, despotism; argued for the **rule of reason**, rationality, questioning.
2. Created a new culture of **dialogue and debate**: all values, norms and institutions re-evaluated; public became aware of the power of reason.
3. By the **1780s**, literature and cartoons **mocked the royalty** and criticised their morality: monarchy absorbed in pleasures while common people suffered.

↳Lekin print ne seedha dimaag nahi badla: people also read royal and Church propaganda. Print ne "differently sochne ka possibility" diya.

8. The Nineteenth Century

New readers	What happened
Children	Primary education compulsory (late 19th c.). Children's press in **France, 1857**. **Grimm Brothers** (Germany) compiled peasant folk tales, published **1812** (dropped "unsuitable" content).
Women	Important readers and writers: penny magazines, manuals on behaviour and housekeeping; novelists **Jane Austen, Bronte sisters, George Eliot**: new type of woman with will, strength, determination.
Workers	**Lending libraries** (17th c. onwards) educated white-collar workers, artisans, lower-middle class; some wrote political tracts and autobiographies.

Further innovations

Mid-19th c.: **Richard M. Hoe** (New York) perfected the power-driven **cylindrical press**: 8,000 sheets per hour (newspapers). Late 19th c.: **offset press**, up to six colours. 20th c.: electrically operated presses; serialised novels; **Shilling Series** (1920s, England); dust covers; cheap **paperbacks** in the 1930s Depression.

9. India and the World of Print

Before print: rich tradition of **handwritten manuscripts**

in Sanskrit, Arabic, Persian and vernaculars, on **palm leaves or handmade paper**; expensive, fragile, varied scripts: not widely used in everyday life. Pre-colonial Bengal: network of village primary schools (pathshalas); students did not read texts, teachers dictated from memory.

- **Mid-16th c.** First press in **Goa**, by **Portuguese missionaries**; Jesuits learnt **Konkani**, printed tracts. By 1674, 50 books in Konkani and Kanara.
- **1579** Catholic priests printed the **first Tamil book** at **Cochin**; **1713** first **Malayalam** book. By 1710 Dutch Protestant missionaries printed 32 Tamil texts.
- **1780 James Augustus Hickey**: **Bengal Gazette**, weekly, "a commercial paper open to all, but influenced by none"; ads (even import and sale of slaves), gossip about Company officials. **Warren Hastings** persecuted him, encouraged officially sanctioned papers.
- **First Indian newspaper**: weekly **Bengal Gazette** of **Gangadhar Bhattacharya** (close to Rammohun Roy).

Religious reform and public debates

→ Early 19th c.: debates on **widow immolation, monotheism, Brahmanical priesthood, idolatry**; printed tracts in vernaculars reached common people.

→ **Rammohun Roy**: **Sambad Kaumudi (1821)**; Hindu orthodoxy replied with **Samachar Chandrika**. **1822**: Persian papers **Jam-i-Jahan Nama, Shamsul Akhbar**; Gujarati **Bombay Samachar**.

→ North India: **ulama** feared colonial rulers and conversion; used cheap lithographic presses, Persian and Urdu translations of holy scriptures. **Deoband Seminary (1867)** published thousands of **fatwas**.

→ Hindus: first printed **Ramcharitmanas** of Tulsidas, **Calcutta 1810**. From the 1880s **Naval Kishore Press (Lucknow)** and **Shri Venkateshwar Press (Bombay)** printed religious texts in vernaculars: read aloud to the illiterate.

→ Print connected communities across regions: **pan-Indian identities**.

New forms of publication

→ **Novel** (European origin) took Indian forms; lyrics, short stories, essays on social and political matters.

→ **Raja Ravi Varma**: images for mass circulation. Cheap prints and calendars in bazaars; poor could buy and decorate homes.

→ By the **1870s**: **caricatures and cartoons** in journals: some mocked educated Indians' fascination with Western tastes and clothes, others showed fear of social change.

Women and print

→ Liberal fathers and husbands educated women; women's schools in cities. Conservatives: Hindus feared literate girls would be widowed; Muslims feared corruption by Urdu romances.

→ **Rashsundari Debi** (orthodox household, East Bengal): learnt to read secretly in her kitchen; autobiography **Amar Jiban (1876)**: first full-length autobiography in Bengali.

→ From the 1860s Bengali women like **Kailashbashini Debi** wrote about women's experiences. 1880s Maharashtra: **Tarabai Shinde, Pandita Ramabai** wrote with anger about the miserable lives of upper-caste Hindu women, especially **widows**.

→ Hindi: **Ram Chaddha's Istri Dharm Vichar** taught women to be obedient wives. **Battala** (central Calcutta) printed cheap popular books.

→ **Begum Rokeya Sakhawat Hossein** (1926): condemned men for withholding education from women in the name of religion.

Print and the poor people

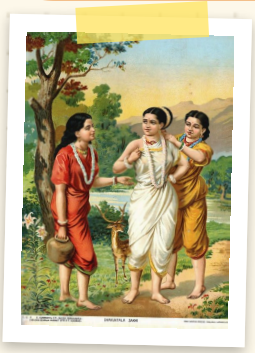

→ Very cheap small books sold at crossroads (Madras); public libraries (19th c.) in cities and towns.

→ **Jyotiba Phule**: **Gulamgiri (1871)** on injustices of the caste system. **B.R. Ambedkar** (Maharashtra) and **E.V. Ramaswamy Naicker (Periyar)** (Madras) wrote powerfully on caste.

→ Kanpur mill worker **Kashibaba**: **Chhote Aur Bade Ka Sawal (1938)** on caste and class exploitation. Poems of **Sudarshan Chakr**: **Sacchi Kavitayan (1935)**. Bangalore cotton millworkers set up libraries (1930s).

Yaad karo: 19th-century readers = "Children, Women, Workers"

Children: school textbooks, children's press in France (1857), Grimm Brothers folk tales | **Women**: penny magazines, novels (Jane Austen, Bronte sisters, George Eliot) | **Workers**: lending libraries in England, self-improvement, Thomas Wood's autobiography.

Raja Ravi Varma's prints: mass-produced images of gods and mythology reached ordinary homes

Handwritten manuscript	Printed book
Copied by hand by scribes; slow, laborious	Many copies quickly by machine
Expensive, fragile, hard to handle	Cheaper; easy to carry and own
Read by a few rich and learned people	Reached common people; new reading public
Copying errors common	Uniform text in every copy

Print and Indian nationalism

Vernacular papers reported **colonial misrule** and encouraged nationalist activities; cheap books, pamphlets and calendars spread ideas across regions; debates on reform built **pan-Indian identities**; repression (VPA 1878, Tilak's arrest 1908) only produced more protest.

Yaad karo: India timeline = "Goa ke Cochin mein Hickey ne Sambad padha"

Goa first press, mid-16th c. (Portuguese) → **Cochin** first Tamil book 1579 → **Hickey** Bengal Gazette 1780 → **Sambad** Kaumudi 1821 (Rammohun Roy) → then VPA 1878, Tilak jailed 1908.

10. Print and Censorship

→ Before 1798 colonial state not much concerned; early controls aimed at **Englishmen** critical of Company misrule. **1835**: Governor-General **Bentinck** agreed to revise press laws; **Thomas Macaulay** restored earlier freedoms.

→ **After the Revolt of 1857**: attitude changed. Vernacular papers became assertively nationalist.

Vernacular Press Act, 1878

Modelled on the **Irish Press Laws**. Gave govt extensive rights to censor reports and editorials in the vernacular press. Govt tracked papers; if a report was judged **seditious**, the paper was **warned**; if ignored, the press could be **seized** and printing machinery **confiscated**.

→ Nationalist papers grew anyway, reported misrule, encouraged activities. **1907**: Punjab revolutionaries deported; **Bal Gangadhar Tilak** wrote with great sympathy in his Kesari; imprisoned in **1908**: widespread protests.

Who wrote what (1-mark gold)

Person	Work	Person	Work
Luther	95 Theses (1517)	Hickey	Bengal Gazette (1780)
Rammohun Roy	Sambad Kaumudi (1821)	Phule	Gulamgiri (1871)
Rashsundari Debi	Amar Jiban (1876)	Ram Chaddha	Istri Dharm Vichar
Kashibaba	Chhote Aur Bade Ka Sawal (1938)	Sudarshan Chakr	Sacchi Kavitayan (1935)
Tilak	Kesari	Utamaro	Ukiyo prints

Exam Alert

Gutenberg = **1448**, Bible first. Luther = **1517**. Index of Prohibited Books = **1558**. Hickey = **1780**. VPA = **1878**. Diamond Sutra = Japan **868**; China woodblock = **594**. Silk cargo, Marco Polo 1295.

Yaad rakho Gutenberg's first printed book: the Bible (about 180 copies); between 1450 and 1550 presses came up in most European countries.

Most Important Questions

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. The oldest Japanese printed book, the Diamond Sutra, was printed in: 1M Board fav
(a) AD 594 (b) AD 868 (c) AD 1295 (d) AD 1448

Ans. (b) AD 868.

Q2. Who wrote the Ninety Five Theses, and against whom? 1M Board fav

Ans. Martin Luther (1517), against practices and rituals of the Roman Catholic Church.

Q3. **A:** The Roman Catholic Church began an Index of Prohibited Books from 1558. **R:** Print let people like Menocchio read and interpret religion in their own way. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q4. Penny chapbooks were sold in England by petty pedlars called: 1M
(a) Scribes (b) Gomasthas (c) Chapmen (d) Jobbers

Ans. (c) Chapmen.

Q5. Which act of 1878 was modelled on the Irish Press Laws? 1M

Ans. The Vernacular Press Act.

Q6. Match: Gulamgiri, Amar Jiban, Sambad Kaumudi, Kesari with Rammohun Roy, Tilak, Jyotiba Phule, Rashsundari Debi. 1M

Ans. Gulamgiri–Phule; Amar Jiban–Rashsundari Debi; Sambad Kaumudi–Rammohun Roy; Kesari–Tilak.

Q7. Low-priced small books on poor paper with cheap blue covers sold in France were called: 1M

Ans. Bibliotheque Bleue.

Q8. Which weekly, edited from 1780, called itself "a commercial paper open to all, but influenced by none"? 1M
(a) Sambad Kaumudi (b) Bengal Gazette (c) Kesari (d) Bombay Samachar

Ans. (b) Bengal Gazette of James Augustus Hickey.

Q9. Who perfected the power-driven cylindrical press in the mid-19th century? 1M

Ans. Richard M. Hoe of New York (8,000 sheets per hour).

Short answer (2-3 marks)

Q10. Why could manuscripts not satisfy the growing demand for books? 2M Board fav

Ans. Copying was expensive, laborious and time-consuming; manuscripts were fragile, awkward to handle, could not be carried around or read easily.

Q11. Describe Gutenberg's contribution to printing. 3M

Ans. Son of a merchant, saw wine and olive presses; as a goldsmith made lead moulds; adapted the olive press and cast metal types for letters; perfected the system by 1448; printed the Bible, about 180 copies in 3 years. Start of the print revolution.

Q12. "Print created a new reading public." Explain. 3M Board fav

Ans. Books became cheaper, faster to produce, reached a wider readership; reading no longer only for elites; oral culture gave way: hearing public became a reading public; ballads and folk tales with pictures printed for the less literate.

Q13. Why were some people afraid of the effects of easily available printed books? Give one European and one Indian example. 3M

Ans. Feared spread of rebellious and irreligious thoughts, undermining of authority. Europe: Erasmus criticised "swarms" of books; Church (Luther, Menocchio) kept an Index of Prohibited Books from 1558. India: conservative Hindus and Muslims feared women's literacy; colonial govt passed Vernacular Press Act 1878.

Q14. What was the Vernacular Press Act, 1878? 3M Board fav

Ans. Modelled on the Irish Press Laws; gave govt extensive rights to censor reports and editorials in vernacular papers; a seditious paper was warned, and if ignored its press could be seized and machinery confiscated. Passed after 1857 as vernacular papers turned nationalist.

Q15. How did print help women in 19th-century India? 3M

Ans. Women learnt to read (Rashsundari Debi, Amar Jiban); wrote about their lives (Kailashbashini Debi; Tarabai Shinde and Pandita Ramabai on upper-caste widows); journals for women; Begum Rokeya condemned denial of education in the name of religion.

Q16. How did print help spread ideas of caste reform? 2M

Ans. Jyotiba Phule's Gulamgiri (1871), writings of Ambedkar and Periyar exposed caste injustice; Kashibaba's Chhote Aur Bade Ka Sawal (1938) linked caste and class exploitation.

Q17. How did the uses of print diversify in China by the 17th century? 3M

Ans. Urban culture bloomed: merchants used print for trade information; reading became leisure (fiction, poetry, autobiographies, romantic plays); rich women read and published poetry and plays; wives of scholar-officials and courtesans wrote about their lives. (Earlier mainly civil service textbooks.)

Q18. What new forms of publication and visual culture came with print in India? 3M

Ans. Novels, lyrics, short stories, essays on social and political issues; Raja Ravi Varma's images for mass circulation; cheap prints and calendars bought by the poor; by the 1870s caricatures and cartoons on social and political issues (e.g. mocking Western tastes).

Long answer (5 marks)

Q19. How did print culture create conditions for the French Revolution? 5M Board fav

Ans. (i) Popularised ideas of Enlightenment thinkers like Voltaire and Rousseau (ii) attacked tradition, superstition, despotism; argued for the rule of reason (iii) created a culture of dialogue and debate; values and institutions re-evaluated (iv) by the 1780s literature and cartoons mocked the royalty and (contd.) its morality (v) but print only opened the possibility of thinking differently; people also read royal propaganda.

Q20. Explain the impact of print on religious reform and debates in 19th-century India. 5M

Ans. (i) Debates on widow immolation, monotheism, idolatry reached a wider public (ii) Rammohun Roy's Sambad Kaumudi (1821) vs Samachar Chandrika (iii) Deoband Seminary (1867) fatwas; Persian and Urdu translations of scriptures (iv) Ramcharitmanas (1810), Naval Kishore and Venkateshwar Presses printed religious texts in vernaculars (v) connected communities: pan-Indian identities.

Q21. "Print revolution transformed lives in Europe." Explain the 19th-century spread of print to children, women and workers. 5M

Ans. (i) Compulsory primary education; children's press in France (1857); Grimm Brothers' folk tales (1812) (ii) women readers and writers: penny magazines, manuals; Jane Austen, Brontes, George Eliot (iii) lending libraries educated workers, artisans; some wrote political tracts (iv) Hoe's cylindrical press (8,000 sheets/hour), offset press (v) Shilling Series, cheap paperbacks in the Depression.

Q22. Who started the Bengal Gazette and when? 1M

Ans. James Augustus Hickey, 1780.

Q23. What was the Vernacular Press Act (1878) modelled on, and what did it do? 2M

Ans. Modelled on the Irish Press Laws; gave the government extensive rights to censor reports and editorials in the vernacular press; papers could be warned, presses seized and machinery confiscated.

Q24. How did print culture help women in 19th-century India? 3M

Ans. Women's reading increased; liberal husbands and fathers educated them at home; schools for women opened; journals by women discussed education, widowhood, widow remarriage; Rashsundari Debi wrote Amar Jiban (1876); Kailashbashini Debi, Tarabai Shinde and Pandita Ramabai wrote about upper-caste women's miserable lives.

Q25. How did print help spread the ideas of social reform among the poor and lower castes? 3M

Ans. Jyotiba Phule wrote Gulamgiri (1871) about the caste system; B.R. Ambedkar and E.V. Ramaswamy Naicker (Periyar) wrote against caste; local protest movements and sects created journals and tracts; Kashibaba wrote Chhote Aur Bade Ka Sawal (1938) about caste and class exploitation.

Source based (4 marks)

Q26. "Printing is the ultimate gift of God and the greatest one." (i) Who said this? (ii) What did he write in 1517? (iii) How did print help the Reformation? 4M

Ans. (i) Martin Luther (ii) Ninety Five Theses, criticising practices and rituals of the Roman Catholic Church (iii) printed in vast numbers and read widely; New Testament sold 5,000 copies in weeks; led to division in the Church and the Protestant Reformation.

Q27. "In 1907, when Punjab revolutionaries were deported, Balgangadhar Tilak wrote with great sympathy about them in his Kesari..." (i) What happened to Tilak? (ii) Which law of 1878 tried to control the vernacular press? (iii) Give two provisions of it. 4M

> **Ans.** (i) Imprisoned in 1908, provoking widespread protests (ii) Vernacular Press Act, 1878 (modelled on Irish Press Laws) (iii) govt could censor reports and editorials; a seditious paper was warned, and if it ignored the warning, its press could be seized and machinery confiscated.

More source and competency based (4 marks / 3 marks)

Q28. "Erasmus, a Latin scholar and a Catholic reformer, who criticised the excesses of Catholicism but kept his distance from Luther, expressed a deep anxiety about printing. He wrote that there was hardly any place on earth free of swarms of new books, some of which might have something worth knowing, but most of which were harmful to scholarship..." (i) Who was Erasmus? (ii) Why was he anxious about print? (iii) Give one way the Church tried to control print. 4M

> **Ans.** (i) A Latin scholar and Catholic reformer who criticised Catholic excesses but kept away from Luther. (ii) He feared that the flood of new books would spread stupid, slanderous, irreligious and seditious ideas and harm scholarship. (iii) The Roman Catholic Church imposed control over publishers and booksellers and began an Index of Prohibited Books from 1558 (Menocchio was tried and executed).

Q29. "Rashsundari Debi, a young married girl in a very orthodox household, learnt to read in the secrecy of her kitchen. Later, she wrote her autobiography Amar Jiban which was published in 1876." (i) Why did she have to learn secretly? (ii) What is the importance of Amar Jiban? (iii) Name one other woman writer of the 19th century and her theme. 4M

> **Ans.** (i) Orthodox families opposed women's education (Hindus believed a literate girl would be widowed). (ii) It was the first full-length autobiography published in the Bengali language. (iii) Tarabai Shinde or Pandita Ramabai (Maharashtra, 1880s): wrote with passionate anger about the miserable lives of upper-caste Hindu women, especially widows (or Kailashbashini Debi on women's experiences).

Q30. Competency: Today a government blocks news websites that criticise it. Compare this with the Vernacular Press Act of 1878. 3M

> **Ans.** Both try to **silence criticism** of those in power. The VPA (modelled on Irish Press Laws) let the colonial govt censor reports and editorials in the vernacular press; papers judged seditious were warned, then their press seized and machinery confiscated. Such censorship limits people's right to information; in 1878, as now, it often led to more protest.

Q31. Competency: Explain how print created a culture of debate and discussion in 19th-century India, with two examples. 3M

> **Ans.** (i) Debates on widow immolation, monotheism, Brahmanical priesthood and idolatry were carried out in printed tracts and newspapers that reached common people. (ii) Rammohun Roy's (contd.) Sambad Kaumudi (1821) was answered by the orthodox Samachar Chandrika. (iii) The Deoband Seminary's fatwas and the ulama's cheap lithographed tracts guided Muslims, while reformers argued in vernacular print.

Q32. Who printed the first Tamil book in 1579, and where? 1M
(a) Portuguese missionaries at Goa (b) Catholic priests at Cochin (c) Dutch Protestants at Madras (d) Hickey at Calcutta

> **Ans.** (b) Catholic priests at Cochin

Q33. A: Penny magazines were especially meant for women in 19th-century England. R: Women became important as readers as well as writers. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

> **Ans.** (a) Both true, R explains A

Q34. "Print did not only stimulate the publication of conflicting opinions amongst communities, but it also connected communities and people in different parts of India." Explain how print shaped Indian society in the 19th century. 5M

> **Ans.** (i) Religious and social reform debates (widow immolation, caste, idolatry) reached common people in vernaculars (ii) religious texts (Ramcharitmanas 1810; Naval Kishore and Shri Venkateshwar Press) became cheap and were read aloud to the illiterate (iii) women became readers and writers (Rashsundari Debi, Tarabai Shinde, Pandita Ramabai) (iv) the poor and lower castes found a voice (Phule's Gulamgiri, Ambedkar, Periyar, Kashibaba); public libraries spread (v) newspapers linked regions and built pan-Indian identities and nationalism.

Q35. Why did Warren Hastings persecute James Augustus Hickey? 2M

> **Ans.** Hickey's Bengal Gazette (1780) published gossip about the Company's senior officials in India. Upset by this, Governor-General Warren Hastings persecuted him and encouraged officially sanctioned newspapers to counter the flow of information that hurt the colonial government's image.

Q36. Competency: How did cheap calendars and Raja Ravi Varma's prints change who could own art in India? 2M

> **Ans.** Mass-produced prints of gods and mythological scenes by Raja Ravi Varma and cheap calendars sold in bazaars could be bought even by the poor, who used them to decorate their homes. Art was no longer only for the rich; ideas of modernity, tradition and religion spread visually.

Last minute: 10 one-liners

1. Earliest print: China, hand printing from wooden blocks (from AD 594).
2. Oldest Japanese book: Diamond Sutra, AD 868.
3. Marco Polo brought woodblock printing knowledge to Italy (1295).
4. Gutenberg's press by 1448; first book the Bible.
5. Martin Luther: 95 Theses, 1517.
6. Index of Prohibited Books: from 1558.
7. Portuguese missionaries brought the press to Goa, mid-16th century.
8. First Tamil books printed by Catholic priests in Cochin, 1579.
9. Bengal Gazette: James Augustus Hickey, 1780.
10. Vernacular Press Act: 1878 (modelled on Irish Press Laws).

Most asked: Types of resources, resource planning, soils (black, alluvial), erosion control

RESOURCES AND DEVELOPMENT

1. What is a Resource?

Everything in our environment that can be used to satisfy our needs, provided it is technologically accessible, economically feasible and culturally acceptable, is a **resource**.

→ Resources are not free gifts of nature: they are a function of **human activities**. Humans are an essential component: they transform materials into resources.

→ Interdependent relationship: **Nature + Technology + Institutions**.

Physical environment ↔ Technology + Institutions ↔ Human beings → Resources

2. Classification of Resources

Basis	Types	Examples
Origin	**Biotic** (from biosphere, have life); **Abiotic** (non-living)	Humans, flora, fauna, fisheries, livestock; rocks, metals
Exhaustibility	**Renewable** (renewed by physical, chemical, mechanical processes); **Non-renewable** (millions of years to form)	Solar, wind, water, forests, wildlife; minerals, fossil fuels
Ownership	Individual, Community, National, International	Own land, houses; grazing grounds, ponds, parks; minerals, forests, water, land; oceans beyond 200 nm
Status of development	Potential, Developed, Stock, Reserves	Wind/solar in Rajasthan, Gujarat; hydrogen in water; water in dams

→ **Renewable** may be **continuous/flow** (solar, wind) or **biological** (forests, wildlife). Non-renewable: **recyclable** (metals) or **non-recyclable** (fossil fuels get used up).

→ **National:** all minerals, water, forests, wildlife, land within political boundaries and oceanic area up to 12 nautical miles (territorial water). Govt can acquire even private property for public good.

→ **International:** oceanic resources beyond 200 nautical miles of the **Exclusive Economic Zone**: no country can use them without the consent of international institutions.

Key terms (status of development)

Potential: found in a region but not yet utilised (wind, solar in Rajasthan, Gujarat).

Developed: surveyed; quality and quantity determined for use. Depends on technology and feasibility.

Stock: could satisfy needs but we lack the technology to access them (hydrogen and oxygen in water as energy).

Reserves: subset of stock, usable with **existing** technology but use not yet started (water in dams, forests).

Yaad karo: 4 bases of classification = "O-E-O-S"

Origin: biotic, abiotic | **E**xhaustibility: renewable, non-renewable | **O**wnership: individual, community, national, international | **S**tatus: potential, developed, stock, reserves. "Om Eats Only Sweets".

3. Development of Resources

Indiscriminate use of resources led to:

1. **Depletion** of resources to satisfy the greed of a few.
2. **Accumulation** of resources in few hands: society divided into haves and have-nots (rich and poor).
3. **Global ecological crises**: global warming, ozone depletion, environmental pollution, land degradation.

Sustainable development

Development should take place without damaging the environment, and development in the present should not compromise the needs of **future generations**.

Rio de Janeiro Earth Summit, June 1992

First International Earth Summit, Brazil: **over 100 heads of state** met on environmental protection and socio-economic development. Signed **Declaration on Global Climatic Change and Biological Diversity**; endorsed Global Forest Principles; adopted Agenda 21 for sustainable development in the 21st century.

Agenda 21: declaration to achieve global sustainable development; aims to combat environmental damage, **poverty and disease** through global cooperation on common interests, mutual needs and shared responsibilities. Every **local government** should draw its own local Agenda 21.

4. Resource Planning in India

India has enormous **diversity**: regions rich in some resources but deficient in others.

Region	Rich in	Lacks
Jharkhand, MP, Chhattisgarh	Minerals, coal deposits	-
Arunachal Pradesh	Water resources	Infrastructural development
Rajasthan	Solar and wind energy	Water resources
Ladakh (cold desert)	Rich cultural heritage	Water, infrastructure, some vital minerals

So balanced resource planning is needed at national, state, regional and local levels.

Steps of resource planning (3M fav!)

1. **Identification and inventory** of resources across regions: surveying, mapping, qualitative and quantitative estimation and measurement
↓
2. **Evolving a planning structure** with appropriate technology, skill and institutional set up
↓
3. **Matching** resource development plans with overall **national development plans**

→ Since the **First Five Year Plan**, India has made concerted efforts for resource planning.
→ Resources contribute to development only with **technological development and institutional changes**. Colonisers exploited colonies due to higher technology. In India development involves availability of resources + technology + quality of human resources + historical experiences of people.

5. Conservation of Resources

Irrational consumption and over-utilisation lead to socio-economic and environmental problems: conservation at various levels is important.

- **Gandhiji** "There is enough for everybody's need and not for anybody's greed." Greedy, selfish individuals and exploitative modern technology = root cause of depletion. Wanted production by the masses, not mass production.
- **1968 Club of Rome**: first advocated resource conservation in a systematic way.
- **1974 Schumacher**, book *Small is Beautiful*: Gandhian philosophy presented again.
- **1987 Brundtland Commission Report**: concept of sustainable development; book *Our Common Future*.
- **1992** Rio Earth Summit: Agenda 21.

6. Land Resources

Land is a natural resource of **utmost importance** but of limited magnitude: supports natural vegetation, wildlife, human life, economic activities, transport and communication. Use with careful planning.

Relief	Area	Importance
Plains	~43%	Facilities for agriculture and industry
Mountains	~30%	Perennial flow of rivers, tourism, ecological aspects
Plateaus	~27%	Rich reserves of minerals, fossil fuels and forests

Land utilisation (categories)

1. **Forests**
2. **Land not available for cultivation:** (a) barren and waste land (b) land put to non-agricultural uses: buildings, roads, factories.
3. **Other uncultivated land** (excluding fallow): (a) permanent pastures and grazing land (b) land under miscellaneous tree crops and groves (c) **culturable waste land**: left uncultivated for more than 5 agricultural years.
4. **Fallow lands:** (a) **current fallow**: left uncultivated for one or less than one agricultural year (b) **other than current fallow**: 1 to 5 agricultural years.
5. **Net sown area:** area actually sown in a year. Net sown area + area sown more than once = gross cropped area.

Land use pattern in India

→ Total geographical area: 3.28 million sq km; land use data available for only about **93%** (most of NE states except Assam not reported; parts of J and K occupied by Pakistan and China not surveyed).
→ Land under **permanent pasture has decreased**: problem for feeding huge cattle population.
→ **Net sown area** varies: over 80% in **Punjab and Haryana**; less than 10% in **Arunachal Pradesh, Mizoram, Manipur, Andaman and Nicobar**.
→ Forest area far below the desired 33% of geographical area as per the **National Forest Policy (1952)**: needed to maintain ecological balance. Livelihood of millions living on forest fringes depends on it.
→ Waste land includes rocky, arid and desert areas; non-agricultural land includes settlements, roads, railways, industry.

↳ Continuous use of land over a long time without conservation = land degradation. Aaj ka sabse bada issue!

7. Land Degradation and Conservation

About 130 million hectares of degraded land in India: ~28% forest degraded area, ~56% water eroded area, rest saline and alkaline deposits.

Cause	States
Mining (deep scars, overburden left)	Jharkhand, Chhattisgarh, MP, Odisha
Overgrazing	Gujarat, Rajasthan, MP, Maharashtra
Over-irrigation (waterlogging, salinity, alkalinity)	Punjab, Haryana, western UP
Mineral processing (grinding limestone for cement, calcite, soapstone for ceramics): dust retards infiltration	-
Industrial effluents as waste	Many areas

Ways to solve land degradation

✓ **Afforestation** and proper management of **grazing**.
✓ Planting **shelter belts** of plants; control on overgrazing.
✓ Stabilisation of sand dunes by growing thorny bushes.
✓ Proper management of **waste lands**; control of **mining** activities.
✓ Proper discharge and disposal of industrial effluents and wastes **after treatment**.

Yaad karo: State + cause

Mining = Jharkhand, Odisha (khaan wale); **Overgrazing** = Gujarat, Rajasthan (registaan, pashu); **Over-irrigation** = Punjab, Haryana (nehar wale). State likhoge to full marks.

Ravines in the Chambal basin: badlands formed by gully erosion

8. Soil as a Resource

Soil = most important renewable natural resource; medium of plant growth; supports living organisms. Takes **millions of years** to form soil up to a few cm in depth.

Relief + Parent rock (bed rock) + Climate + Vegetation, life forms + Time → Soil

Change in temperature, running water, wind, glaciers, decomposers help formation. Chemical and organic changes are also important. Soil also has organic (humus) and inorganic materials.

Classification of soils

(1) Alluvial soil (most widespread, most important)

- → Entire **northern plains**: deposited by 3 Himalayan river systems: Indus, Ganga, Brahmaputra. Extends into **Rajasthan and Gujarat** through a narrow corridor; also in eastern coastal plains: deltas of **Mahanadi, Godavari, Krishna, Kaveri**.
- → Varying proportions of **sand, silt and clay**. Coarse near the break of slope and in piedmont plains: **Duars, Chos, Terai**; particles bigger inland.
- → By age: **Bangar** (old alluvium): more kanker nodules; **Khadar** (new alluvium): more fine particles, more fertile.
- → Rich in **potash, phosphoric acid and lime**: ideal for **sugarcane, paddy, wheat**, other cereals and pulses. Intensively cultivated, densely populated. Drier areas: more alkaline, productive after treatment and irrigation.

(2) Black soil (Regur)

- → Black in colour; ideal for cotton: **black cotton soil**. Climate + parent rock (**lava/basalt**) = formation.
- → Found in **Deccan trap** (basalt) region of NW Deccan plateau: plateaus of **Maharashtra, Saurashtra, Malwa, MP, Chhattisgarh**; extends SE along **Godavari and Krishna valleys**.
- → Extremely **fine clayey** material; well known for capacity to hold moisture.
- → Rich in **calcium carbonate, magnesium, potash and lime**; poor in phosphoric content.
- → Develops **deep cracks** in hot weather: helps **aeration**. Sticky when wet: tilled immediately after the first shower or during pre-monsoon.

(3) Red and Yellow soil: develops on **crystalline igneous rocks** in areas of **low rainfall** in eastern and southern Deccan; Odisha, Chhattisgarh, southern middle Ganga plain, piedmont zone of Western Ghats. Reddish due to diffusion of **iron** in crystalline and metamorphic rocks; looks yellow when hydrated.

(4) Laterite soil: from Latin **'later' = brick**. Develops under **high temperature and heavy rainfall**; result of intense leaching. Deep to very deep, acidic (pH < 6.0), deficient in plant nutrients; humus removed fast by bacteria. Found in southern states, **Western Ghats** of Maharashtra, Odisha, parts of West Bengal and NE. With manures and fertilisers: **tea and coffee** (Karnataka, Kerala, TN); red laterite of TN, AP, Kerala good for **cashew nuts**.

(5) Arid soil: red to brown; **sandy** texture, **saline** (common salt obtained by evaporating water in some areas). Dry climate, high temperature: fast evaporation; lacks **humus and moisture**. Lower horizons occupied by kankar (calcium content increases downwards) which restricts infiltration. Cultivable after irrigation: **western Rajasthan**.

(6) Forest soil: in hilly, mountainous areas with sufficient rain forests; texture varies with environment: **loamy and silty** in valley sides, **coarse grained** in upper slopes. Snow-covered Himalayas: acidic, low humus (denudation). Fertile in lower valleys, river terraces and alluvial fans.

Point	Alluvial	Black
Formed by	Deposition by Himalayan rivers	Weathering of lava (basalt) rocks
Texture	Sand, silt, clay (loamy)	Fine clayey
Moisture	Moderate	Holds moisture for long
Rich / poor in	Potash, phosphoric acid, lime	Rich: lime, potash, magnesium, $CaCO_3$; poor: phosphorus
Crops	Sugarcane, paddy, wheat, pulses	Cotton
Area	Northern plains, deltas	Deccan trap: Maharashtra, Malwa

Ek nazar mein: 6 soils

Soil	Found in	Key feature	Crops
Alluvial	Northern plains, eastern coastal deltas	Sand, silt, clay; potash, lime rich	Sugarcane, paddy, wheat, pulses
Black	Deccan trap: Maharashtra, Saurashtra, Malwa, MP	Holds moisture; cracks in summer	Cotton
Red and yellow	Eastern, southern Deccan; Odisha, Chhattisgarh	Iron gives red colour; yellow when hydrated	Millets, pulses (with irrigation)
Laterite	Western Ghats, Kerala, Karnataka, TN, NE	Intense leaching; acidic, low humus	Tea, coffee, cashew (with manure)
Arid	Western Rajasthan	Sandy, saline, kankar below	Cultivable after irrigation
Forest	Himalayan hills, mountain slopes	Loamy in valleys, coarse on slopes	Fertile in lower valleys

Yaad karo: 6 soils = "Aloo Bhindi Roti Lassi Achaar Phal"

Alluvial (northern plains, most widespread) | **Black** (regur, Deccan trap, cotton) | **Red and yellow** (crystalline igneous rocks, iron) | **Laterite** (heavy rain, intense leaching) | **Arid** (Rajasthan, sandy, saline) | **Forest** (hilly, mountain areas).

Meme samjho

Kisaan: "Har saal ek hi fasal, khoob paani, khoob fertiliser. Mitti kabhi kharab nahi hogi." **Guarantee deta hai??**

Asli baat: No. Over-irrigation causes waterlogging and salinity (Punjab, Haryana, western UP); overgrazing, mining and deforestation also degrade land. Solutions: crop rotation, shelter belts, contour ploughing, strip cropping.

9. Soil Erosion and Conservation

Soil erosion = denudation of the soil cover and subsequent washing down. Formation and erosion go on simultaneously, generally balanced; balance disturbed by **human activities** (deforestation, overgrazing, construction, mining) and **natural forces** (wind, glacier, water).

- → **Gully erosion:** running water cuts through clayey soils, makes deep channels (**gullies**): land unfit for cultivation = bad land; in **Chambal basin** called **ravines**.
- → **Sheet erosion:** water flows as a sheet over large areas down a slope; top soil washed away.
- → **Wind erosion:** wind blows off loose soil from flat or sloping land.
- → **Defective farming:** ploughing up and down the slope forms channels for quick flow of water.

Method	How it saves soil
Contour ploughing	Ploughing along contour lines decelerates flow of water down slopes
Terrace farming	Steps cut on slopes restrict erosion; well developed in **western and central Himalayas**
Strip cropping	Large fields divided into strips; **strips of grass** left between crops break force of wind
Shelter belts	Rows of trees check wind; helped stabilise **sand dunes** and desert in western India

Yaad karo: mitti bachao = "Cute Turtles Save Soil"

Contour ploughing (slopes) | Terrace farming (Himalayan slopes) | Strip cropping (grass strips break wind) | Shelter belts (trees, sand dunes of western India). Slope = C, T; wind = S, S.

Shivam Bhaiya says

Soil ka 5-marker: **Black soil ke 5 features** ya **Alluvial vs Black** table. Map mein soil sirf identify karni hai: Black = Maharashtra-Malwa, Laterite = Western Ghats-Kerala, Arid = West Rajasthan.

↳ Map items: Major soil types (identification only). Map: see Map Work section.

Exam Alert

Stock vs Reserves mat mixao: stock = technology nahi; reserves = technology hai, use baaki. **12 nm** = territorial water, **200 nm** = EEZ. Khadar = new + fertile; Bangar = old + kanker. Club of Rome **1968**, Brundtland **1987**, Rio **1992**.

1 minute recap

- **Resource** = technologically accessible + economically feasible + culturally acceptable
- **4 bases**: origin, exhaustibility, ownership, status of development
- **12 nm** territorial water (national); **200 nm** beyond EEZ (international)
- **3 steps** of planning: inventory, structure, match with national plans
- **Land**: plains 43, mountains 30, plateaus 27 (%); forest target 33% (1952)
- **Soils**: alluvial, black, red-yellow, laterite, arid, forest
- **Erosion**: gully, sheet, wind; **Fix**: contour, terrace, strip, shelter belt

Terrace farming on hill slopes checks soil erosion (western and central Himalayas)

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which of these is an example of a **stock** resource? 1M Board fav

(a) Water in dams (b) Solar energy in Rajasthan (c) Hydrogen in water (d) Forests

Ans. (c) Hydrogen in water (we lack the technology to use it as energy).

Q2. Match: A. Club of Rome, B. *Small is Beautiful*, C. Brundtland Report, D. Rio Earth Summit with 1. 1987, 2. 1968, 3. 1992, 4. 1974. 1M

Ans. A-2, B-4, C-1, D-3.

Q3. Which soil is the result of intense leaching due to heavy rainfall? 1M

(a) Black (b) Laterite (c) Alluvial (d) Arid

Ans. (b) Laterite soil.

Q4. **A:** Black soil does not need frequent irrigation. **R:** Black soil has a high capacity to hold moisture. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true, R explains A.

Q5. **A:** Alluvial soil is ideal for paddy, wheat, cereal and pulse crops. **R:** Alluvial soil is best known for its capacity to hold moisture. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

> **Ans.** (c) A true, R false (holding moisture is the feature of black soil; alluvial is rich in potash, phosphoric acid, lime).

Q6. In which states is over-irrigation the main cause of land degradation? 1M

> **Ans.** Punjab, Haryana and western Uttar Pradesh (waterlogging, salinity, alkalinity).

Q7. Identify: A develops on crystalline igneous rocks in low-rainfall areas; B is found in hilly areas with sufficient rain forests. 1M

> **Ans.** A: Red and yellow soil; B: Forest soil.

Q8. Which relief feature has rich reserves of minerals, fossil fuels and forests? 1M

(a) Plains (b) Plateaus (c) Mountains (d) Islands

> **Ans.** (b) Plateaus (about 27% of land area).

Q9. Land left uncultivated for more than 5 agricultural years is called: 1M

> **Ans.** Culturable waste land.

Q10. Deep channels cut by running water in clayey soil are called ____; such land in the Chambal basin is called ____. 1M

> **Ans.** Gullies; ravines (bad land).

Q11. Which soil develops deep cracks in hot weather, helping in its aeration? 1M

(a) Alluvial (b) Black (c) Laterite (d) Arid

> **Ans.** (b) Black soil.

Q12. Resources owned by the government, such as minerals and land within political boundaries, are called: 1M

(a) Community (b) Individual (c) National (d) International

> **Ans.** (c) National resources.

Q13. Oceanic resources beyond 200 nautical miles of the Exclusive Economic Zone are an example of which type of resource? 1M

> **Ans.** International resources (no country can use them without the consent of international institutions).

Short answer (2-3 marks)

Q14. Explain the three stages of resource planning in India. 3M Board fav

> **Ans.** (i) Identification and inventory of resources: surveying, mapping, qualitative and quantitative estimation (ii) evolving a planning structure with appropriate technology, skill and institutional set up (iii) matching resource development plans with overall national development plans.

Q15. Distinguish between stock and reserves with examples. 3M

> **Ans.** Stock: materials that can satisfy human needs but we lack the technology to access them, e.g. hydrogen in water. Reserves: subset of stock that can be used with existing technology but use has not started, e.g. water in dams, forests. Reserves are usable now; stock is not.

Q16. Why is resource planning essential in India? Give examples. 3M Board fav

> **Ans.** Resources are unevenly distributed: Jharkhand, MP, Chhattisgarh rich in minerals and coal; Arunachal has water but lacks infrastructure; Rajasthan has solar and wind energy but lacks water; Ladakh has cultural heritage but lacks water and minerals. So balanced planning at national, state, regional and local levels is needed.

Q17. What was the significance of the Rio de Janeiro Earth Summit (1992)? 3M

> **Ans.** Over 100 heads of state met in June 1992 on environmental protection and socio-economic development; signed the Declaration on Global Climatic Change and Biological Diversity; endorsed Global Forest Principles; adopted Agenda 21 to combat environmental damage, poverty and disease through global cooperation for sustainable development.

Q18. Classify resources on the basis of ownership with examples. 3M

> **Ans.** Individual: owned privately (own land, houses, plots). Community: accessible to all members (grazing grounds, village ponds, parks, playgrounds). National: within political boundaries and ocean up to 12 nm (minerals, forests, water). International: oceans beyond 200 nm of EEZ, used only with consent of international institutions.

Q19. Name the soil of western Rajasthan. Give two features that limit its cultivation. 3M

> **Ans.** Arid soil. (i) Sandy and saline; lacks humus and moisture due to dry climate and high temperature (ii) kankar in lower horizons restricts infiltration of water. It becomes cultivable after proper irrigation.

Q20. Distinguish between current fallow and other than current fallow land. What is gross cropped area? 3M

> **Ans.** Current fallow: left uncultivated for one or less than one agricultural year. Other than current fallow: left uncultivated for 1 to 5 agricultural years. Gross cropped area = net sown area + area sown more than once in a year.

Q21. What is Agenda 21? State its main aim. 2M

> **Ans.** A declaration signed by world leaders at the 1992 Rio Earth Summit; aim: achieve global sustainable development and combat environmental damage, poverty and disease through global cooperation; every local government to draw its own local Agenda 21.

Q22. Which factors are important in the formation of soil? Why is soil called a renewable resource? 3M

> **Ans.** Relief, parent rock (bed rock), climate, vegetation, other forms of life and time; also changes in temperature, running water, wind, glaciers and decomposers. Renewable: it is formed continuously by natural processes, though a few cm take millions of years, so it must be conserved.

Q23. Explain three human activities that have caused land degradation in India, with states. 3M

> **Ans.** (i) **Mining**: deep scars and overburden left behind (Jharkhand, Chhattisgarh, MP, Odisha) (ii) **Overgrazing** (Gujarat, Rajasthan, MP, Maharashtra) (iii) **Over-irrigation**: waterlogging raises salinity and alkalinity (Punjab, Haryana, western UP). Also mineral processing dust (cement, ceramics) and industrial effluents.

Q24. What problems arose from the indiscriminate use of resources? 3M

Ans. (i) Depletion of resources to satisfy the greed of a few individuals (ii) accumulation of resources in a few hands, dividing society into haves and have-nots (rich and poor) (iii) global ecological crises such as global warming, ozone layer depletion, environmental pollution and land degradation.

Q25. Describe the land use pattern in India. 3M

Ans. (i) Total area 3.28 million sq km; land use data available for only about 93% (ii) net sown area varies: over 80% in Punjab and Haryana, under 10% in Arunachal Pradesh, Mizoram, Manipur, Andaman and Nicobar (iii) forest area is far below the 33% desired by the National Forest Policy (1952) (iv) permanent pasture has decreased, making it hard to feed the huge cattle population.

Q26. Distinguish between renewable and non-renewable resources with examples. 2M

Ans. **Renewable**: can be renewed or reproduced by physical, chemical or mechanical processes (solar and wind energy, water, forests, wildlife). **Non-renewable**: take millions of years to form and get exhausted (minerals, fossil fuels); some are recyclable (metals), others are used up (fossil fuels).

Long answer (5 marks)

Q27. Describe any five features of black soil. 5M Board fav

Ans. (i) Black in colour, called regur; ideal for cotton (black cotton soil) (ii) formed from lava (basalt) parent rock of the Deccan trap; Maharashtra, Saurashtra, Malwa, MP, Chhattisgarh, Godavari-Krishna valleys (iii) fine clayey, holds moisture well (iv) rich in calcium carbonate, magnesium, potash, lime; poor in phosphoric content (v) develops deep cracks in hot weather (aeration); sticky when wet, tilled after first shower.

Q28. What is soil erosion? Explain its types and suggest methods of soil conservation. 5M Board fav

Ans. Soil erosion: denudation of soil cover and its washing down. Types: gully erosion (deep channels, bad land, ravines of Chambal), sheet erosion (top soil washed over large areas), wind erosion, defective farming (ploughing up and down slope). Conservation: contour ploughing, terrace farming (western and central Himalayas), strip cropping (grass strips), shelter belts (stabilised sand dunes in western India), plugging gullies.

Q29. Describe the main features of alluvial soil. Distinguish between Bangar and Khadar. 5M

Ans. (i) Most widespread and important; entire northern plains, deposited by Indus, Ganga, Brahmaputra; also Rajasthan-Gujarat corridor and deltas of Mahanadi, Godavari, Krishna, Kaveri (ii) sand, silt, clay; coarse in Duars, Chos, Terai (iii) rich in potash, phosphoric acid, lime (iv) good for sugarcane, paddy, wheat, pulses; densely populated. Bangar: old alluvium, more kanker nodules; Khadar: new alluvium, more fine particles, more fertile.

Q30. "Land degradation is a serious problem in India." Explain its causes and suggest five measures to solve it. 5M Board fav

Ans. Causes: deforestation, mining (Jharkhand, Chhattisgarh, MP, Odisha), overgrazing (Gujarat, Rajasthan, MP, Maharashtra), over-irrigation causing waterlogging and salinity (Punjab, Haryana, western UP), dust from mineral processing, industrial effluents. Measures: (i) afforestation and proper management of grazing (ii) shelter belts (iii) stabilising sand dunes with thorny bushes (iv) (contd.) proper management of waste lands and control of mining (v) treated discharge of industrial effluents.

Competency based (3 marks)

Q31. A farmer in Uttarakhand loses topsoil every monsoon from his sloping field, while a farmer in western Rajasthan loses soil to strong winds. Suggest suitable conservation methods for each and justify. 3M

Ans. Uttarakhand (water erosion on slopes): **terrace farming** (steps cut on slopes restrict erosion) and **contour ploughing** (ploughing along contours slows the water). Rajasthan (wind erosion): **shelter belts** of trees to check wind and stabilise sand dunes, **strip cropping** with grass strips, and growing **thorny bushes** on dunes.

Q32. Rajasthan is rich in solar and wind energy but lacks water; Arunachal Pradesh has abundant water but lacks infrastructure. Analyse what this shows about resource planning in India. 3M

Ans. (i) Resources are unevenly distributed, so some regions are self-sufficient while others are deficient (ii) a resource helps development only with technology and institutions (Arunachal's water needs infrastructure) (iii) so India needs **balanced resource planning** at national, state, regional and local levels: inventory, a planning structure and matching with national plans.

Source based (4 marks)

Q33. "Resources can contribute to development only when they are accompanied by appropriate technological development and institutional changes..." (i) What helped colonisers exploit colonies? (ii) When do resources contribute to development? (iii) What does resource development in India involve besides availability? 4M

Ans. (i) Higher level of technological development (ii) only when accompanied by appropriate technology and institutional changes (iii) technology, quality of human resources and historical experiences of the people, besides availability of resources.

Q34. "Running water cuts through clayey soils and makes deep channels... Defective farming, like ploughing up and down the slope, also causes erosion." (i) What is soil erosion? (ii) Name two human causes. (iii) Suggest two ways to check it on slopes. 4M

Ans. (i) Denudation of soil cover and its washing down (ii) deforestation, overgrazing, construction, mining (any two) (iii) contour ploughing along contour lines; terrace cultivation (steps on slopes).

Q35. "Sustainable economic development means development should take place without damaging the environment, and development in the present should not compromise with the needs of the future generations." (i) Which report popularised this concept and when? (ii) Name the document adopted at the 1992 Earth Summit. (iii) Give two ways in which a local body can follow it. (1+1+2) 4M Board fav

Ans. (i) Brundtland Commission Report, 1987 (*Our Common Future*) (ii) Agenda 21, at the Rio de Janeiro Earth Summit (iii) every local government draws up its own local Agenda 21: e.g. waste segregation and recycling, rainwater harvesting, planting trees, protecting local water bodies and controlling pollution.

Quick fact Resource Planning was emphasised in India from the First Five Year Plan after Independence.

Forest and Wildlife Resources

1. Why Forests and Wildlife Matter

→ We share the planet with millions of living beings: biodiversity is immensely rich and closely integrated with our lives.

→ Forests are **primary producers**: all other living beings depend on them. Plants, animals and micro-organisms re-create the quality of air, water and soil.

→ India: one of the world's richest countries in biodiversity, nearly 8% of world species.

Species categories (IUCN, as in NCERT)

Category	Meaning	Examples
Normal	Population normal for survival	Cattle, sal, pine, rodents
Endangered	In danger of extinction	Blackbuck, crocodile, Indian wild ass, Indian rhino, lion-tailed macaque, sangai (Manipur)
Vulnerable	Likely to become endangered soon	Blue sheep, Asiatic elephant, Gangetic dolphin
Rare	Small population, may become endangered	Himalayan brown bear, wild Asiatic buffalo, desert fox, hornbill
Endemic	Found only in a particular area	Andaman teal, Nicobar pigeon, Andaman wild pig, mithun (Arunachal)
Extinct	Not found after searches	Asiatic cheetah, pink head duck

Causes of depletion

→ **Colonial period**: expansion of railways, agriculture, commercial and scientific forestry, mining.

→ **Agricultural expansion**: 1951 to 1980, over 26,200 sq km of forest converted to farmland; shifting (slash and burn) cultivation.

→ **Large development projects**: since 1951 over 5,000 sq km cleared for river valley projects; Narmada Sagar (MP) to submerge 40,000 ha.

→ **Mining**: e.g. dolomite mining threatens the **Buxa Tiger Reserve** (West Bengal). Also grazing, fuelwood, hunting, poaching, pollution, forest fires.

Himalayan Yew in trouble

Himalayan Yew (Taxus wallachiana): medicinal evergreen tree of Himachal Pradesh and Arunachal Pradesh. Taxol from its bark, needles, twigs and roots is used to treat some **cancers**: the biggest-selling anti-cancer drug. Over-exploitation dried up thousands of trees: now threatened.

2. Conservation of Forest and Wildlife

Conservation preserves **ecological diversity** and our life support systems: water, air and soil; also preserves **genetic diversity** of plants and animals for better growth and breeding. E.g. in agriculture we still depend on traditional crop varieties; fisheries depend on aquatic biodiversity.

Indian Wildlife (Protection) Act, 1972

Demand for a national programme in the 1960s and 1970s. Provisions:

- ✓ **All-India list** of protected species published.
- ✓ Hunting banned; habitats given legal protection.
- ✓ Trade in wildlife **restricted** (not totally banned).
- ✓ Central and state govts set up **national parks and wildlife sanctuaries**.

→ Projects for specific animals: **tiger, one-horned rhinoceros, Kashmir stag (hangul)**, three types of crocodiles (fresh water, saltwater, **gharial**), **Asiatic lion**.

→ Recently: **Indian elephant, blackbuck (chinkara), great Indian bustard (godawan), snow leopard** given full or partial legal protection against hunting and trade.

→ Focus now on biodiversity rather than a few components: under Wildlife Act notifications of **1980 and 1986**, several hundred butterflies, moths, beetles and one dragonfly added to protected list; in **1991**, plants added for the first time (6 species).

Project Tiger, 1973

Tiger population fell to **1,827 in 1973** from an estimated 55,000 at the turn of the century. Threats: poaching for trade (skins, bones for traditional medicines), shrinking habitat, depleting prey base, growing human population. India and Nepal host about two-thirds of surviving tigers.

Tiger reserves: Corbett NP (Uttarakhand), Sunderbans NP (WB), Bandhavgarh NP (MP), Sariska WS (Rajasthan), Manas TR (Assam), Periyar TR (Kerala).

Project Tiger (1973): tiger reserves like Corbett, Sunderbans, Bandhavgarh, Sariska, Manas, Periyar

3. Types and Distribution of Forests

Forests are owned and managed by the government through the **Forest Department**. Classified into:

Type	Meaning	High in
Reserved forests	More than half of total forest land; regarded as the **most valuable** for conservation of forest and wildlife	J and K, Andhra Pradesh, Uttarakhand, Kerala, Tamil Nadu, West Bengal, Maharashtra
Protected forests	About **one-third** of total forest area; protected from any further depletion	Bihar, Haryana, Punjab, Himachal Pradesh, Odisha, Rajasthan

Type	Meaning	High in
Unclassed forests	Other forests and wastelands belonging to both government and private individuals and communities	North-eastern states, parts of Gujarat (managed by local communities)

Permanent forest estates

Reserved + protected forests = **permanent forest estates**, maintained for timber, other forest produce and protection. Madhya Pradesh has the largest area under permanent forests: **75%** of its total forest area.

Yaad karo: R-P-U

Reserved = Richest share (half se zyada), Protected = Part (one-third), Unclassed = Under sabka (govt + private + community).

4. Community and Conservation

Forests are home to some traditional communities; local communities conserve habitats because their **long-term livelihood** depends on them.

Example	What happened
Sariska Tiger Reserve (Rajasthan)	Villagers fought against mining by citing the Wildlife Protection Act
Alwar district (Rajasthan)	5 villages declared **1,200 ha** as **Bhairodev Dakav 'Sonchuri'**: own rules, no hunting, protect wildlife from outside encroachment
Chipko movement (Himalayas)	Resisted **deforestation**; showed community afforestation with indigenous species can succeed
Beej Bachao Andolan (Tehri) and **Navdanya**	Diversified crop production **without synthetic chemicals** is possible and economically viable
Joint Forest Management	Local communities manage and restore **degraded forests**; first resolution: Odisha, 1988

Joint Forest Management (JFM)

Village institutions undertake protection activities mostly on **degraded forest land** managed by the forest department. In return, members get **non-timber forest produce** and share in the **timber harvested** by 'successful protection'.

Sacred groves and nature worship

- → Nature worship (age-old tribal belief): all creations of nature to be protected; sacred groves = forests of God and Goddesses, left virgin (untouched).
- → **Mundas and Santhals** (Chota Nagpur): worship **mahua** (Bassia latifolia) and **kadamba** (Anthocephalus cadamba). Tribals of **Odisha and Bihar**: **tamarind and mango** trees during weddings. Peepal and banyan sacred to many.
- → Macaques and langurs fed around temples; in **Bishnoi** villages (Rajasthan) herds of **blackbuck (chinkara), nilgai and peacocks** are part of the community.

Exam Alert

Wildlife Act 1972 ne trade **restrict** kiya, total ban nahi. Reserved = **most** valuable. MP = 75% permanent forest. Project Tiger **1973** (Act 1972 se 1 saal baad).

Shivam Bhaiya says

Chapter chhota hai par **case-based** pakka aata hai: Sariska, Alwar Sonchuri, Chipko, JFM. Har example ke saath state ka naam likho. JFM = Odisha 1988, ye MCQ fav hai!

1 minute recap

- **8%** of world species in India
- **1972** Wildlife (Protection) Act; **1973** Project Tiger
- **1980, 1986** insects added; **1991** plants added (6 species)
- **Reserved** > 1/2, **Protected** 1/3, **Unclassed** rest; MP 75% permanent
- **1988** JFM, Odisha; **Sonchuri** 1,200 ha, Alwar

Meme samjho

Bishnoi community, Rajasthan: blackbuck, chinkara, nilgai, peacocks ko protect karte hain. Inke gaon mein: **"Jalwa hai hamara yahan!"**
Asli baat: Communities conserve habitats: Bishnois protect blackbuck and chinkara; Chipko movement in the Himalayas against deforestation; Sariska villagers fought mining under the Wildlife Protection Act; Beej Bachao Andolan (Tehri) and Navdanya promote diverse crops without chemicals.

Yaad karo: Community conservation = "C-B-S-J-N"

Chipko (Himalaya, hug trees) | Bishnoi (Rajasthan, blackbuck) | Sariska (villagers vs mining; 5 Alwar villages: 1,200 ha "Bhairodev Dakav Sonchuri") | JFM (Odisha 1988, degraded forests) | Navdanya and Beej Bachao Andolan (Tehri).

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which state has the largest area under permanent forests (75% of its forest area)? 1M Board fav
(a) Odisha (b) Madhya Pradesh (c) Chhattisgarh (d) Uttarakhand
Ans. (b) Madhya Pradesh.

Q2. Joint Forest Management first began in 1988 in: 1M Board fav
(a) Odisha (b) Kerala (c) Rajasthan (d) Assam
Ans. (a) Odisha.

Q3. **A:** Reserved forests make up more than half of India's forest land. **R:** Reserved forests are regarded as the least valuable for conservation. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (c) A true, R false (they are the most valuable).

Q5. Which of these is an endemic species? 1M
(a) Blue sheep (b) Blackbuck (c) Andaman teal (d) Asiatic cheetah

(contd.) (c) Andaman teal.

Q4. Match: A. Bishnois, B. Tribals of Odisha and Bihar, C. Tehri farmers, D. Mundas and Santhals with 1. Beej Bachao Andolan, 2. mahua and kadamba, 3. blackbuck and nilgai, 4. tamarind and mango. 1M

Ans. A-3, B-4, C-1, D-2.

Q6. The Chipko movement was mainly against: 1M
(a) Dams (b) Mining (c) Tourism (d) Deforestation

Ans. (d) Deforestation.

Q7. In which year was Project Tiger launched? 1M

Ans. 1973.

Q8. Which tiger reserve in West Bengal is threatened by dolomite mining? 1M

Ans. Buxa Tiger Reserve.

Short answer (2-3 marks)

Q9. Distinguish between reserved, protected and unclassed forests. 3M Board fav

Ans. Reserved: more than half of forest land, most valuable for conservation (J and K, AP, Kerala). Protected: about one-third, protected from further depletion (Bihar, Haryana, Punjab). Unclassed: forests and wastelands of government, private individuals and communities (NE states, Gujarat).

Q10. State the main provisions of the Indian Wildlife (Protection) Act, 1972. 3M

Ans. All-India list of protected species; ban on hunting; legal protection to habitats; restriction on trade in wildlife; national parks and wildlife sanctuaries set up; projects for tiger, rhino, hangul, crocodiles, Asiatic lion.

Q11. "Nature worship has preserved several virgin forests." Support with examples. 3M Board fav

Ans. Sacred groves left untouched as forests of gods; Mundas and Santhals worship mahua and kadamba; tribals of Odisha and Bihar worship tamarind and mango at weddings; peepal and banyan sacred; Bishnois protect blackbuck, nilgai and peacocks.

Q12. What is Joint Forest Management? How does it benefit local communities? 3M

Ans. A programme involving local communities in managing and restoring degraded forests; began in Odisha, 1988. Village institutions protect degraded forest land of the forest department; members get non-timber forest produce and a share in timber harvested by successful protection.

Q13. Why is conservation of forests and wildlife essential? 3M

Ans. Preserves ecological diversity and life support systems (water, air, soil); preserves genetic diversity of plants and animals for better growth and breeding; agriculture depends on traditional crop varieties; fisheries depend on aquatic biodiversity.

Q14. Distinguish between endangered and vulnerable species with examples. 2M

Ans. Endangered: in danger of extinction if negative factors continue (blackbuck, crocodile, Indian rhino, lion-tailed macaque). Vulnerable: population declined to a level where they are likely to become endangered soon (blue sheep, Asiatic elephant, Gangetic dolphin).

Q15. Why was Project Tiger launched? Name any four tiger reserves. 3M

(contd.) Tiger population fell to 1,827 in 1973 due to poaching for skins and bones, shrinking habitat, depleting prey base and growing human population. Reserves: Corbett (Uttarakhand), Sunderbans (WB), Bandhavgarh (MP), Sariska (Rajasthan), Manas (Assam), Periyar (Kerala).

Q16. **A:** The blackbuck is listed as an endangered species. **R:** Blackbucks are hunted and poached in the wild. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true, R explains A (hunting and habitat loss reduced its numbers).

Q17. How have large-scale development projects contributed to the loss of forests? 3M

Ans. Since 1951 over 5,000 sq km of forest cleared for river valley projects; Narmada Sagar Project (MP) to submerge 40,000 ha; mining projects such as dolomite mining threaten Buxa Tiger Reserve (WB), disturbing habitats and blocking migration routes of animals like the elephant.

Q18. What are permanent forest estates? Which state has the largest area under them? 2M

Ans. Reserved and protected forests together, maintained for timber, other forest produce and protection. Madhya Pradesh: 75% of its forest area is permanent forest.

Q19. How did the Beej Bachao Andolan and Navdanya help conservation? 2M

Ans. Farmers and citizens of Tehri (Beej Bachao Andolan) and Navdanya showed that adequate levels of diversified crop production without synthetic chemicals are possible and economically viable, saving traditional seed varieties.

Long answer (5 marks)

Q20. Describe the role of communities in conserving forests and wildlife in India. 5M Board fav

Ans. (i) Sariska (Rajasthan): villagers fought mining citing the Wildlife Act (ii) Alwar: 5 villages declared 1,200 ha Bhairodev Dakav Sonchuri, no hunting (iii) Chipko movement resisted deforestation and promoted afforestation with indigenous species (iv) Beej Bachao Andolan (Tehri) and Navdanya: farming without synthetic chemicals (v) JFM since 1988 (Odisha); sacred groves and Bishnoi protection of blackbuck.

Q21. Explain the factors responsible for the depletion of forests and wildlife in India. 5M

Ans. (i) Colonial expansion of railways, agriculture, commercial forestry, mining (ii) agricultural expansion: 26,200 sq km forest converted 1951-80; shifting cultivation (iii) large river valley projects: 5,000 sq km cleared since 1951 (iv) mining, e.g. dolomite mining in Buxa Tiger Reserve (v) grazing, fuelwood, poaching, hunting, pollution and forest fires.

Source based (4 marks)

Q22. "The people of five villages in the Alwar district of Rajasthan have declared 1,200 hectares of forest as the Bhairodev Dakav Sonchuri..." (i) Where is Sariska? (ii) How did Sariska villagers help? (iii) Why is the Sonchuri important? 4M

Ans. (i) Rajasthan (ii) fought against mining by citing the Wildlife Protection Act (iii) community-made sanctuary with its own rules: no hunting, protection against outside encroachment; shows local people can protect habitats and biodiversity while securing livelihoods.

Most asked: Water scarcity, multipurpose projects (pros/cons), rainwater harvesting examples

WATER RESOURCES

1. Water: Facts First

→ Three-fourth of the earth's surface is water, but only a small part is **fresh water**: 96.5% of world water in oceans, only **2.5%** fresh water; nearly 70% of that is locked in ice sheets and glaciers.

→ Fresh water: mainly from **surface run-off and ground water**, continually renewed and recharged by the hydrological cycle: so water is a **renewable** resource.

2. Water Scarcity and Need for Conservation

Many regions face scarcity in spite of abundant water. Scarcity is **not only less quantity**: water may be available but of poor quality, polluted by domestic and industrial wastes, chemicals, pesticides and fertilisers.

Causes of water scarcity

1. **Over-exploitation**, excessive use and **unequal access** among social groups.
2. **Large and growing population**: more water for domestic use and to grow more food.
3. **Irrigated agriculture** (largest user): dry-season farming; farmers have own **wells and tube-wells**: falling ground water levels; water-intensive crops.
4. **Industrialisation**: industries are heavy users and need power from **hydroelectric** plants.
5. **Urbanisation**: dense cities, housing societies with own groundwater pumping devices; urban lifestyle adds to it.

Why conserve and manage water?

To safeguard ourselves from **health hazards**, to ensure food security, continuation of our **livelihoods** and productive activities, and to prevent degradation of natural **ecosystems**. Over-exploitation and mismanagement impoverish the resource and cause ecological crisis.

3. Multi-purpose River Projects

→ Ancient hydraulic structures: **1st century B.C.** Sringaverapura near Prayagraj: channelled Ganga flood water; Chandragupta Maurya: dams, lakes, irrigation; irrigation works in **Kalinga** (Odisha), **Nagarjunakonda** (AP), **Bennur** (Karnataka), **Kolhapur** (Maharashtra).

→ **11th century**: Bhopal Lake, one of the largest artificial lakes of its time. **14th century**: **Iltutmish** built the tank in **Hauz Khas**, Delhi, to supply water to Siri Fort area.

Dam

A barrier across flowing water that obstructs, directs or retards the flow, often creating a reservoir, lake or impoundment. ('Dam' refers to the reservoir rather than the structure.) Classified by structure, materials (timber, embankment, masonry) and height (large, major, low, medium, high).

Uses: why "multi-purpose"?

Irrigation | Electricity | Water supply (homes, industry) | Flood control | Recreation | Inland navigation | Fish breeding

→ Integrated uses: **Bhakra Nangal** (Sutlej): both **hydel power and irrigation**; **Hirakud** (Mahanadi): **conservation of water with flood control.**

→ **Jawaharlal Nehru** called dams the "temples of modern India": they would integrate agriculture and the village economy with rapid **industrialisation** and growth of the urban economy.

Why are big dams opposed?

Effect	Details
Ecological	Natural flow affected: **excessive sedimentation** at reservoir bottom, rockier stream beds, poor habitat for aquatic life; rivers **fragmented**: aquatic fauna cannot migrate for spawning; reservoirs **submerge** vegetation and soil
Social	Large-scale displacement of local communities, loss of livelihood; benefits go to landowners, large farmers, industrialists. **Narmada Bachao Andolan** (Sardar Sarovar, Gujarat), **Tehri Dam Andolan**
Inter-state disputes	Sharing costs and benefits: **Krishna-Godavari dispute**: Karnataka and AP objected to diversion of more water at **Koyna** by **Maharashtra**
Floods	Dams meant to control floods **triggered floods** due to sedimentation; 2006 Maharashtra and Gujarat floods worsened by release of dam water; loss of fertile silt for fields
Farming, health	Shift to **water-intensive and commercial crops**: salinisation of soil; induced **earthquakes**, water-borne diseases, pests, pollution

Narmada Bachao Andolan

An **NGO** mobilising tribal people, farmers, environmentalists and human rights activists against the **Sardar Sarovar Dam** on the Narmada (Gujarat). Focus first on environment (submergence of trees), later on rehabilitation of displaced people.

Dam (map list)	River	State
Salal	Chenab	Jammu and Kashmir
Bhakra Nangal	Sutlej	Himachal Pradesh / Punjab
Tehri	Bhagirathi	Uttarakhand
Rana Pratap Sagar	Chambal	Rajasthan
Sardar Sarovar	Narmada	Gujarat
Hirakud	Mahanadi	Odisha
Nagarjuna Sagar	Krishna	Telangana / AP
Tungabhadra	Tungabhadra	Karnataka

Map trick (north to south)

Salal, Bhakra, Tehri, Rana Pratap, Sardar Sarovar, Hirakud, Nagarjuna, Tungabhadra: "Sab Bachche Time pe Roz School Hi

Nahi, Tuition bhi jaate hain". Map: see Map Work section.

Bhakra Nangal dam on the Satluj: one of the earliest multipurpose projects

Yaad karo: Multipurpose project ke kaam = "Bijli, Paani, Baadh, Machhli, Sair, Naav"

Bijli (hydel power) | **Paani** (irrigation, domestic and industrial supply) | **Baadh** (flood control) | **Machhli** (fish breeding) | **Sair** (recreation) | **Naav** (inland navigation).

Meme samjho

Dam banaya flood control ke liye. Phir sedimentation se reservoir bhar gaya aur flood aur bhi aaya! **Hain? Ye kaise ho gaya?**

Asli baat: Dams meant to control floods have triggered floods due to sedimentation in reservoirs; they also cause excessive use of water, displacement of local people and loss of fertile silt downstream.

4. Rainwater Harvesting

Many thought dams were not viable (disadvantages, opposition), so rainwater harvesting systems: viable alternative, socio-economically and environmentally. Ancient India: rain water, ground water, river water, flood water harvested by **local ecological conditions**.

Region	Traditional system
Hills, mountains (**Western Himalayas**)	Diversion channels: 'guls' or 'kuls' for agriculture
Rajasthan (drinking water)	**Rooftop rainwater harvesting**
Flood plains of **Bengal**	**Inundation channels** to irrigate fields
Arid, semi-arid regions (Jaisalmer)	Agricultural fields as rain-fed storage: **'khadins'** (Jaisalmer), **'johads'**: water stands, moistens soil
Bikaner, Phalodi, Barmer	Underground tanks: 'tankas' connected to sloping roofs by pipe

Tankas (Rajasthan)

→ Part of well-developed rooftop system, built inside main house or courtyard; could be as large as a big room (Phalodi: 6.1 m deep, 4.27 m long, 2.44 m wide).

→ **First spell of rain not collected**: it cleans roofs and pipes; later showers stored.

→ Stored till the next rains: reliable source of drinking water when all other sources dry up, especially in summer. Rain water = 'palar pani': purest form of natural water.

→ Underground rooms built adjoining tankas: **cool** in summer.

→ Decline in western Rajasthan today: perennial **Indira Gandhi Canal** water available (though some still prefer the taste of tanka water).

Modern examples

✓ **Gendathur** (Mysuru, Karnataka): about **200 households** have rooftop harvesting; village rich in rainwater (about 1,00,000 litres a year).

✓ **Shillong** (Meghalaya): acute shortage though **Cherrapunjee and Mawsynram** (highest rainfall) are only 55 km away; nearly every household has rooftop harvesting (15 to 25% of total water use).

✓ Tamil Nadu: first state to make rooftop rainwater harvesting **compulsory** for all houses; legal provisions against defaulters.

Bamboo drip irrigation (Meghalaya)

200-year-old system: stream and spring water tapped by bamboo pipes. **18 to 20 litres** enter the system and reach the plant as 20 to 80 drops per minute. Channel sections and diversion units of bamboo reduce flow as water moves down.

Shivam Bhaiya says

Rainwater harvesting ka answer **place ke saath** likho: kuls = Western Himalaya, khadins = Jaisalmer, tankas = Bikaner-Phalodi-Barmer, bamboo drip = Meghalaya. Dams ka answer 2 column mein: fayde vs nuksaan.

Exam Alert

Water scarcity = quantity + **quality** dono. Tamil Nadu = compulsory rooftop. Koyna = Maharashtra. Nehru = "temples of modern India". Johads, khadins = **traditional**, not modern!

1 minute recap

- 2.5% fresh water; renewable via hydrological cycle
- Scarcity = over-use + unequal access + population + irrigation + industry + cities + pollution
- 11th c. Bhopal Lake; 14th c. Hauz Khas tank (Iltutmish)
- Bhakra Nangal power + irrigation; Hirakud water + flood control
- NBA vs Sardar Sarovar; Koyna dispute (Maharashtra)
- Kuls W Himalaya, khadins Jaisalmer, tankas Bikaner, bamboo drip Meghalaya, compulsory TN

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which state made rooftop rainwater harvesting compulsory for all houses? 1M Board fav

(a) Punjab (b) Assam (c) Haryana (d) Tamil Nadu

Ans. (d) Tamil Nadu.

Q2. Match: A. Barmer, B. Jaisalmer, C. Palar pani, D. Meghalaya with 1. Rainwater, 2. Bamboo drip irrigation, 3. Khadins, 4. Tankas. 1M

(contd.) A-4, B-3, C-1, D-2.

Q3. Why did Nehru call dams the "temples of modern India"? 1M Board fav

Ans. They would integrate the development of agriculture and the village economy with rapid industrialisation and the urban economy.

Q4. **A:** Water is a renewable resource. **R:** Freshwater from surface run-off and ground water is continually renewed and recharged through the hydrological cycle. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true, R explains A.

Q5. **A:** Johads and khadins are modern methods of water harvesting. **R:** They are found in western India, particularly Rajasthan. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (d) A false (they are traditional), R true.

Q6. The Krishna-Godavari dispute arose over diversion of water at Koyna by which state? 1M

Ans. Maharashtra (objected to by Karnataka and Andhra Pradesh).

Q7. On which river is the Hirakud dam built, and what does it integrate? 1M

Ans. Mahanadi (Odisha); conservation of water with flood control.

Q8. Which ruler built the tank in Hauz Khas, Delhi, in the 14th century? 1M

Ans. Iltutmish (to supply water to the Siri Fort area).

Q9. In which region is rooftop rainwater harvesting declining, and why? 1M

Ans. Western Rajasthan, because perennial water from the Indira Gandhi Canal is now available.

Short answer (2-3 marks)

Q10. "An area may have enough water yet suffer from water scarcity." Explain with examples. 3M Board fav

Ans. (i) Water may be polluted by domestic and industrial waste, chemicals, pesticides, fertilisers: unfit to use (ii) over-exploitation and unequal access among social groups (iii) large population and urban housing societies with own pumps; e.g. Shillong faces shortage though Cherrapunjee and Mawsynram are 55 km away.

Q11. Give three main causes of water scarcity in India. 3M

Ans. Large and growing population (more domestic and food needs); expansion of irrigated agriculture with private wells and tube-wells, water-intensive crops; industrialisation and urbanisation (industries, hydel power, city lifestyles, groundwater over-use).

Q12. Explain any three problems faced by local communities due to large dams. 3M Board fav

Ans. Large-scale displacement and loss of livelihood (Narmada Bachao Andolan, Tehri Dam Andolan); submergence of land, forests and homes; benefits go to rich farmers and industrialists; floods due to sedimentation and dam releases; water-borne diseases.

Q13. Describe the rooftop rainwater harvesting (tanka) system of Rajasthan. 3M

Ans. In Bikaner, Phalodi, Barmer, houses had underground tanks connected to sloping roofs by pipes; first spell of rain not collected (cleans roofs); rainwater (palar pani) stored for drinking till next rains; underground rooms next to tankas kept cool. Declining due to

(contd.) Indira Gandhi Canal.

Q14. What is bamboo drip irrigation? Where is it practised? 2M

Ans. A 200-year-old system in Meghalaya: stream and spring water carried through bamboo pipes; 18-20 litres entering the system reach the plant as 20-80 drops per minute.

Q15. Why is it necessary to conserve water resources? 3M

Ans. To safeguard from health hazards, ensure food security, continue livelihoods and productive activities, and prevent degradation of natural ecosystems; over-exploitation and mismanagement cause ecological crisis.

Q16. What is the Narmada Bachao Andolan? What were its main concerns? 3M

Ans. An NGO movement of tribal people, farmers, environmentalists and human rights activists against the Sardar Sarovar Dam on the Narmada (Gujarat). First focused on environmental issues like submergence of trees; later on rehabilitation of displaced poor people and their share in benefits.

Q17. "Dams built to control floods have triggered floods." Explain. 2M

Ans. Sedimentation in the reservoir reduces storage; excess water released during heavy rain worsens floods (Maharashtra and Gujarat, 2006); dams also stop fertile silt from reaching flood plains.

Q18. Name any two ancient sites with evidence of sophisticated irrigation works. 1M

Ans. Any two: Kalinga (Odisha), Nagarjunakonda (Andhra Pradesh), Bennur (Karnataka), Kolhapur (Maharashtra); Sringaverapura near Prayagraj.

Long answer (5 marks)

Q19. What are multipurpose river projects? Explain their advantages and disadvantages. 5M Board fav

Ans. Dams serving many purposes together. Advantages: irrigation, electricity, water supply for homes and industry, flood control, recreation, inland navigation, fish breeding (Bhakra Nangal, Hirakud). Disadvantages: sedimentation and poor aquatic habitat, fragmented rivers, submergence, displacement of people, inter-state disputes (Krishna-Godavari), induced floods, salinisation, earthquakes, water-borne diseases.

Q20. Describe the different rainwater harvesting methods practised in India. 5M Board fav

Ans. (i) Guls or kuls: diversion channels in Western Himalayas (ii) rooftop harvesting for drinking water in Rajasthan; tankas in Bikaner, Phalodi, Barmer (iii) inundation channels in Bengal flood plains (iv) khadins (Jaisalmer) and johads in arid Rajasthan (v) bamboo drip irrigation in Meghalaya; modern: Gendathur (Karnataka), Shillong, compulsory in Tamil Nadu.

Source based (4 marks)

Q21. "In Bikaner, Phalodi and Barmer, almost every house had an underground tank or tanka... the first spell of rain was usually not collected..." (i) Why was the first spell not collected? (ii) What is palar pani? (iii) How did tankas help beyond storage? 4M

Ans. (i) It cleaned the roofs and pipes (ii) rainwater, considered the purest form of natural water (iii) reliable drinking water in summer when other sources dried; underground rooms built beside tankas stayed cool in summer.

Most asked: Types of farming, rabi vs kharif, crop conditions (rice, wheat, tea, cotton), reforms

AGRICULTURE

India: an **agriculturally important** country; about two-thirds of population engaged in agricultural activities. Agriculture = primary activity: produces most of our food + **raw materials** for industries; some products (tea, coffee, spices) exported.

1. Types of Farming

Farming varies from subsistence to commercial type, depending on physical environment, technology and socio-cultural practices.

(a) Primitive subsistence farming

→ Small patches of land with **primitive tools**: hoe, dao, digging sticks; family or community labour.
→ Depends on **monsoon**, natural fertility of soil and suitability of other environmental conditions.
→ 'Slash and burn': clear a patch by felling and burning trees, grow food crops; when fertility falls, shift to a new patch; nature replenishes the soil. Low productivity (no fertilisers or modern inputs).

Name	Region
Jhumming	Assam, Meghalaya, Mizoram, Nagaland
Pamlou	Manipur
Dipa	Bastar (Chhattisgarh), Andaman and Nicobar
Bewar/dahiya; podu/penda; pama dabi/koman/bringa; kumari; valre/waltre; khil; kuruwa	MP; AP; Odisha; Western Ghats; SE Rajasthan; Himalayan belt; Jharkhand
Milpa; conuco; roca; masole; ladang; ray	Mexico, Central America; Venezuela; Brazil; Central Africa; Indonesia; Vietnam

(b) Intensive subsistence farming

→ In areas of **high population pressure** on land; **labour-intensive**.
→ High doses of **biochemical inputs** and irrigation for higher production.
→ 'Right of inheritance': land divided among successors: land holdings uneconomical and fragmented; farmers have no alternative livelihood: enormous pressure on land.

(c) Commercial farming

→ Higher doses of **modern inputs**: HYV seeds, chemical fertilisers, insecticides, pesticides; aim: sale in the market.
→ Degree varies by region: **rice** is commercial in **Punjab and Haryana**, but **subsistence** in **Odisha**.

Plantation (type of commercial farming)

Single crop grown on a **large area**; interface of agriculture and industry; large tracts, **capital-intensive** inputs, **migrant labour**; all produce used as raw material in industries. **Tea, coffee, rubber, sugarcane, banana.** Tea in Assam and North Bengal, **coffee** in Karnataka. Needs a well-developed transport network linking plantations, processing industries and markets.

Primitive subsistence (slash and burn) farming: jhumming in the north-east

Ek nazar mein: 3 types of farming

Point	Primitive subsistence	Intensive subsistence	Commercial
Land	Small patches, shifted	Small, fragmented holdings	Large areas (plantations)
Inputs	Hoe, dao, digging sticks; no fertiliser	High biochemical inputs, irrigation	HYV seeds, fertilisers, pesticides, machines
Labour	Family, community	Labour-intensive	Capital-intensive, migrant labour
Aim	Food for the family	Food for a big family on little land	Sale in the market, industry
Example	Jhum (NE), Dipa (Bastar)	Densely populated plains	Tea (Assam), coffee (Karnataka), rice (Punjab)

2. Cropping Pattern: 3 Seasons

Season	Sowing / Harvest	Crops	Notes
Rabi	Winter: **Oct to Dec** / Summer: **Apr to Jun**	Wheat, barley, peas, gram, mustard	Punjab, Haryana, HP, J and K, Uttarakhand, UP. Winter rain from western temperate cyclones helps; Green Revolution too
Kharif	With **onset of monsoon** / **Sep to Oct**	Paddy, maize, jowar, bajra, tur (arhar), moong, urad, cotton, jute, groundnut, soyabean	Assam, WB, coastal Odisha, AP, Telangana, TN, Kerala, Konkan coast (Maharashtra), UP, Bihar; now Punjab, Haryana too. Assam, WB, Odisha: **3 paddy crops: Aus, Aman, Boro**
Zaid	Short summer season between rabi and kharif	Watermelon, muskmelon, cucumber, vegetables, fodder	**Sugarcane** takes almost a year

Yaad karo

Rabi = Rajai (winter mein boya), **Kharif = Kheti monsoon wali**, **Zaid = Zara si** (short summer: tarbooz, kakdi).

Yaad karo: Season crops = "Kharif: Ri-Ma-Ju-Ka" | "Rabi: Gehu-Chana-Sarson"

Kharif (June–July sowing, Sep–Oct harvest): rice, maize, jowar, bajra, tur, moong, urad, cotton, jute, groundnut, soyabean. **Rabi** (Oct–Dec sowing, Apr–Jun harvest): wheat, barley, peas, gram, mustard. **Zaid** (short summer season): watermelon, muskmelon, cucumber, vegetables, fodder.

3. Major Crops

Main crops: rice, wheat, millets, pulses, tea, coffee, sugarcane, oilseeds, cotton, jute; also horticulture crops.

Food crops

Crop	Climate and soil	Main areas
Rice (kharif; staple of majority)	High temp above 25°C, high humidity, rainfall **above 100 cm**; irrigation in less rain areas. India **2nd largest** producer after China	Plains of north and NE, coastal and deltaic regions; with canals and tubewells: Punjab, Haryana, W UP, parts of Rajasthan
Wheat (rabi; 2nd most important cereal; main food of north and NW)	Cool growing season, **bright sunshine** at ripening; 50 to 75 cm rain evenly distributed	2 zones: **Ganga-Satluj plains** (NW), **black soil region of Deccan**. Punjab, Haryana, UP, MP, Bihar, Rajasthan
Jowar (3rd most important food crop by area and production)	Rain-fed, mostly in moist areas, hardly needs irrigation	**Maharashtra** (largest), Karnataka, AP, MP
Bajra	Sandy soils, shallow black soil	**Rajasthan** (largest), UP, Maharashtra, Gujarat, Haryana
Ragi	Dry regions; red, black, sandy, loamy, shallow black soils; very rich in iron, calcium, micronutrients, roughage	**Karnataka** (largest), TN, HP, Uttarakhand, Sikkim, Jharkhand, Arunachal
Maize (food + fodder; kharif, rabi in Bihar)	**21°C to 27°C**; old alluvial soil; HYV seeds, fertilisers, irrigation raised output	Karnataka, MP, UP, Bihar, AP, Telangana
Pulses (tur, urad, moong, masur, peas, gram)	Need less moisture, survive dry conditions; leguminous (**except arhar**) fix nitrogen: restore fertility, so rotated with other crops	India = **largest producer and consumer**. MP, Rajasthan, Maharashtra, UP, Karnataka

↳ Millets (jowar, bajra, ragi) = coarse grains but very high nutritional value. Ragi = iron + calcium ka khazana!

Food crops other than grains

Crop	Conditions / facts	Main areas
Sugarcane (tropical + subtropical)	**21°C to 27°C, 75 to 100 cm** rain; irrigation in low rain areas; manual labour from sowing to harvest. India **2nd after Brazil**. Source of sugar, gur, khandsari, molasses	**UP** (largest), Maharashtra, Karnataka, TN, AP, Telangana, Bihar, Punjab, Haryana
Oilseeds	**Groundnut** (kharif; about half of major oilseeds); **mustard, linseed** (rabi); **sesamum** (kharif in north, rabi in south); **castor** (both). Also coconut, soyabean, cotton seeds, sunflower. Used for cooking, raw material for soap, cosmetics, ointments	Groundnut: Gujarat (largest), Rajasthan, TN

Crop	Conditions / facts	Main areas
Tea (plantation; beverage crop introduced by British)	Tropical and subtropical; **deep, fertile, well-drained soil** rich in humus and organic matter; warm, moist, frost-free climate all year; frequent showers for tender leaves; **labour-intensive** (abundant, cheap, skilled); processed within the garden	**Assam**, Darjeeling and Jalpaiguri hills (WB), TN, Kerala; also HP, Uttarakhand, Meghalaya, AP, Tripura
Coffee (known for good quality)	**Arabica** variety brought from **Yemen**; first grown on the Baba Budan Hills	Nilgiri hills of Karnataka, Kerala, TN

Crop	Conditions / facts	Main areas
Horticulture	India: **2nd largest** producer of fruits and vegetables. Mango (Maharashtra, AP, Telangana, UP, WB), oranges (Nagpur, Cherrapunjee), banana (Kerala, Mizoram, Maharashtra, TN), lichi, guava (UP, Bihar), pineapple (Meghalaya), grapes (AP, Telangana, Maharashtra), apple, pear, apricot, walnut (J and K, HP)	Vegetables: pea, cauliflower, onion, cabbage, tomato, brinjal, potato

Non-food crops

Crop	Conditions / facts	Main areas
Rubber (equatorial, also tropical)	Moist humid climate, rainfall above 200 cm, temperature **above 25°C**; important industrial raw material	**Kerala**, TN, Karnataka, Andaman and Nicobar, Garo hills of Meghalaya
Cotton (fibre; India believed to be original home)	Drier parts of **black cotton soil** of Deccan; high temperature, light rainfall or irrigation, 210 frost-free days, bright sunshine; kharif, **6 to 8 months** to mature	Gujarat, Maharashtra, MP, Karnataka, AP, Telangana, TN, Punjab, Haryana, UP
Jute: 'golden fibre'	Well-drained fertile soils of **flood plains** renewed every year; high temperature at growth. Gunny bags, mats, ropes, yarn, carpets. Losing market to **synthetic fibres (nylon)** due to high cost	**West Bengal**, Bihar, Assam, Odisha, Meghalaya
Fibre crops	Cotton, jute, hemp, natural silk. First 3 from soil; silk from cocoons of silkworms fed on mulberry leaves: **sericulture**	-

Crop	Largest producer (map)	Other major states
Sugarcane	Uttar Pradesh	Maharashtra, Karnataka, TN
Tea	Assam	West Bengal, TN, Kerala
Coffee	Karnataka	Kerala, TN

Crop	Largest producer (map)	Other major states
Rubber	Kerala	TN, Karnataka
Cotton	Gujarat	Maharashtra, Telangana, MP
Jute	West Bengal	Bihar, Assam, Odisha

Quick crop chart (revision in 1 look)

Crop	Season	Temp / Rain	Soil / key
Rice	Kharif	>25°C / >100 cm	Alluvial, clayey; humid
Wheat	Rabi	Cool + sunshine / 50–75 cm	Ganga-Satluj plains, Deccan black soil
Maize	Kharif	21–27°C	Old alluvial
Jowar / Bajra / Ragi	Kharif	Rain-fed, dry	Moist / sandy, shallow black / red, black, sandy
Sugarcane	Almost 1 yr	21–27°C / 75–100 cm	Variety of soils; manual labour
Tea	Plantation	Warm, moist, frost-free; showers all year	Deep, fertile, well-drained, humus
Rubber	Plantation	>25°C / >200 cm	Moist humid, equatorial
Cotton	Kharif	High temp, light rain, 210 frost-free days	Black cotton soil
Jute	Kharif	High temp	Flood plain soils renewed yearly

Green Revolution: plus and minus

Plus: HYV seeds + fertilisers + irrigation (package technology) raised output of **wheat and rice**; India became self-sufficient in food grains; Punjab, Haryana, western UP prospered.

Minus: development concentrated in a few areas (**regional disparity**); overuse of chemicals and groundwater: soil degradation, waterlogging, salinity (see Ch 1).

Tea plantation: warm, moist, frost-free climate, well-drained soil rich in humus; Assam, Darjeeling, Jalpaiguri, Tamil Nadu, Kerala

Meme samjho

"Hari Kranti (Green Revolution) se sab kisaan ameer ho jaayenge." **Guarantee deta hai??**

Asli baat: The Green Revolution (HYV seeds, fertilisers, irrigation) raised output mainly in Punjab, Haryana and western UP; overuse of chemicals and water degraded soil; small farmers often benefited less.

4. Technological and Institutional Reforms

Agriculture practised for thousands of years: sustained use of land **without compatible techno-institutional changes** hindered development; farmers still depend on monsoon and natural fertility.

- **After 1947** Institutional reforms: **collectivisation, consolidation of holdings, cooperation, abolition of zamindari**; land reform = main focus of **First Five Year Plan** (laws passed, implementation lacking).
- **1960s–70s** Green Revolution (package technology) and **White Revolution (Operation Flood)** for milk; but development concentrated in a few areas.
- **1980s–90s** Comprehensive land development programme: institutional + technical reforms.

- ✓ **Crop insurance** against drought, flood, cyclone, fire and disease.
- ✓ **Grameen banks**, cooperative societies and banks for loans at **lower interest**.
- ✓ Kisan Credit Card (KCC) and **Personal Accident Insurance Scheme (PAIS)**.
- ✓ Special **weather bulletins** and agricultural programmes on radio and TV.
- ✓ **Minimum support price**, remunerative and procurement prices for important crops to check exploitation by **speculators and middlemen**.

Yaad karo: farmer ki madad = "I Got KCC With MSP"

Insurance (drought, flood, cyclone, fire, disease) | **G**rameen banks and cooperative credit | **K**CC and PAIS | **W**eather bulletins and farm programmes on radio, TV | **M**SP and procurement prices (against middlemen).

Key terms

Package technology: HYV seeds + chemical fertilisers + assured irrigation + pesticides used together (Green Revolution). **Operation Flood**: the White Revolution for milk. **Minimum support price (MSP)**: price announced by the government at which it buys a crop, so farmers are not exploited by speculators and middlemen. **Consolidation of holdings**: joining scattered small plots into one compact holding.

Bhoodan-Gramdan: the 'Blood-less Revolution'

Vinoba Bhave (Gandhiji's spiritual heir) did padyatra; at **Pochampalli** (Andhra Pradesh) landless villagers asked for land; **Shri Ram Chandra Reddy** offered 80 acres for 80 landless villagers: **Bhoodan**. Some zamindars offered whole villages: **Gramdan**. Some landowners donated to avoid land ceiling laws.

Challenges before farmers

- → **Small, fragmented holdings**; dependence on **monsoon** and natural fertility.
- → Low public investment in **irrigation, power, rural roads**, markets; reduced fertiliser subsidy raised **cost of production**.

→ Competition from cheap imports; falling profits; farmers quitting farming. Way out: diversify crops, irrigation, credit, insurance, MSP.

Shivam Bhaiya says
Crop questions mein **3 cheezein** likho: temperature, rainfall, soil + 2 states. Rice: 25°C, 100 cm; **Wheat: 50–75 cm; Sugarcane: 21–27°C, 75–100 cm; Rubber: 200 cm, 25°C; Cotton: 210 frost-free days.**

Exam Alert

Rice = commercial in Punjab, subsistence in Odisha. Arhar **nitrogen fix nahi** karta. Coffee = Baba Budan Hills, Arabica from Yemen. Operation Flood = **milk**. Aus, Aman, Boro = 3 paddy crops.

↳ Map items: major areas of rice and wheat; largest producer states of sugarcane, tea, coffee, rubber, cotton, jute. Map: see Map Work section.

1 minute recap

- **Farming**: primitive subsistence (slash and burn), intensive subsistence, commercial (plantation)
- **Jhum** NE, **Pamlou** Manipur, **Dipa** Bastar
- **Rabi** Oct-Dec / Apr-Jun; **Kharif** monsoon / Sep-Oct; **Zaid** summer
- **Largest**: sugarcane UP, tea Assam, coffee Karnataka, rubber Kerala, jute WB, jowar Maharashtra, bajra Rajasthan, ragi Karnataka
- **Reforms**: zamindari abolition, Green + White Revolution, insurance, Grameen banks, KCC, PAIS, MSP, Bhoodan

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Slash and burn agriculture is called 'Pamlou' in: 1M Board fav
(a) Mizoram (b) Manipur (c) Bastar (d) Nagaland
Ans. (b) Manipur.

Q2. Which crop needs rainfall above 200 cm and temperature above 25°C? 1M
(a) Tea (b) Coffee (c) Rubber (d) Sugarcane
Ans. (c) Rubber.

Q3. Watermelon, muskmelon and cucumber are grown in which season? 1M
(a) Kharif (b) Zaid (c) Rabi (d) Monsoon only
Ans. (b) Zaid.

Q4. Identify the crop: Arabica variety from Yemen; first grown on the Baba Budan Hills; now in the Nilgiris. 1M Board fav
Ans. Coffee.

Q5. Which millet is very rich in iron, calcium and roughage? 1M
(a) Ragi (b) Bajra (c) Jowar (d) Maize
Ans. (a) Ragi.

Q6. **A:** The Bhoodan-Gramdan movement is called the "Blood-less Revolution". **R:** Land was donated voluntarily to the landless without any violence. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true, R explains A.

Q7. **A:** Commercial farming uses heavy doses of modern inputs. **R:** Its main aim is to produce crops for sale in the market. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true, R explains A.

Q8. Operation Flood is related to: 1M
(a) Fish (b) Oilseeds (c) Food grains (d) Milk
Ans. (d) Milk production (White Revolution).

Q9. Which leguminous pulse does NOT fix nitrogen in the soil? 1M
Ans. Arhar (tur).

Q10. Which three paddy crops are grown in Assam, West Bengal and Odisha in a year? 1M
Ans. Aus, Aman and Boro.

Q11. Rice is a commercial crop in Punjab but a subsistence crop in: 1M Board fav
(a) Haryana (b) Uttar Pradesh (c) Odisha (d) Punjab
Ans. (c) Odisha.

Q12. Which state is the largest producer of coffee in India? 1M
(a) Tamil Nadu (b) Assam (c) Kerala (d) Karnataka
Ans. (d) Karnataka.

Q13. Name the scheme of the Government of India that gives farmers easy credit through a card. 1M
Ans. Kisan Credit Card (KCC).

Q14. Who started the Bhoodan-Gramdan movement? 1M
Ans. Vinoba Bhave.

Q15. Which of the following is a **plantation** crop? 1M
(a) Wheat (b) Gram (c) Rubber (d) Bajra
Ans. (c) Rubber.

Q16. The Green Revolution was based on: 1M
(a) organic farming (b) package technology (c) shifting cultivation (d) collectivisation
Ans. (b) package technology (HYV seeds, fertilisers, irrigation, pesticides).

Short answer (2–3 marks)

Q17. Distinguish between primitive subsistence farming and commercial farming. 3M Board fav
Ans. Primitive: small patches, primitive tools (hoe, dao, digging sticks), family labour, depends on monsoon and natural fertility, slash and burn, for own use. Commercial: large holdings, modern inputs (HYV seeds, fertilisers, insecticides), for sale in market, e.g. rice in Punjab and Haryana, plantations.

Q18. Distinguish between rabi and kharif crops. 3M Board fav
Ans. Rabi: sown in winter (Oct-Dec), harvested in summer

(contd.) (Apr–Jun); wheat, barley, peas, gram, mustard; NW states; helped by western temperate cyclones. Kharif: sown with onset of monsoon, harvested Sep–Oct; paddy, maize, jowar, bajra, cotton, jute, groundnut, soyabean.

Q19. Describe the geographical conditions required for the growth of rice. 3M Board fav

Ans. Kharif crop; high temperature above 25°C; high humidity; annual rainfall above 100 cm; irrigation in areas of less rainfall. Grown in plains of north and north-east, coastal and deltaic regions; canals and tubewells made it possible in Punjab, Haryana, western UP.

Q20. State the geographical conditions for wheat and name its two main growing zones. 3M

Ans. Rabi crop; cool growing season and bright sunshine at ripening; 50–75 cm rainfall evenly distributed. Zones: Ganga-Satluj plains in the north-west and black soil region of the Deccan. States: Punjab, Haryana, UP, MP, Bihar, Rajasthan.

Q21. Describe the conditions required for tea cultivation. 3M

Ans. Plantation crop; tropical and subtropical climate; deep fertile well-drained soil rich in humus and organic matter; warm, moist, frost-free climate all year; frequent showers spread over the year for tender leaves; abundant cheap skilled labour. Assam, Darjeeling, Jalpaiguri, TN, Kerala.

Q22. Give three geographical conditions for cotton and two states producing it. 3M

Ans. Drier parts of black cotton soil of Deccan; high temperature, light rainfall or irrigation; 210 frost-free days and bright sunshine; kharif crop, 6–8 months. States: Gujarat, Maharashtra, MP, Karnataka, Telangana.

Q23. Why are pulses important in Indian agriculture? 3M

Ans. Major source of protein in a vegetarian diet; need less moisture and survive dry conditions; leguminous crops (except arhar) fix nitrogen from air and restore soil fertility, so grown in rotation. India is the largest producer and consumer.

Q24. Describe any three features of intensive subsistence farming. 3M

Ans. Practised where population pressure on land is high; labour-intensive with high doses of biochemical inputs and irrigation; right of inheritance divides land into small uneconomical holdings; farmers continue to take maximum output from limited land.

Q25. Describe the geographical conditions for the growth of sugarcane. Name two producing states. 3M

Ans. Tropical and subtropical crop; 21°C to 27°C with hot humid climate; 75–100 cm annual rainfall, irrigation in low rainfall areas; grows on a variety of soils; needs manual labour from sowing to harvesting. Uttar Pradesh (largest), Maharashtra, Karnataka, Tamil Nadu.

Q26. Write three features of rubber cultivation in India. 3M

Ans. Equatorial crop also grown in tropical areas; needs moist humid climate, rainfall above 200 cm, temperature above 25°C; important industrial raw material. Grown in Kerala, Tamil Nadu, Karnataka, Andaman and Nicobar, Garo hills of Meghalaya.

Q27. Explain the importance of millets in India. Name the main millets with one leading state each. 3M

Ans. Coarse grains with very high nutritional value; grow in dry regions with little irrigation. Jowar: Maharashtra (rain-fed, moist (contd.) areas); bajra: Rajasthan (sandy, shallow black soils); ragi: Karnataka (dry regions, rich in iron, calcium, roughage).

Q28. What is slash and burn agriculture? Why is its productivity low? 2M

Ans. Farmers clear a patch of land by felling and burning trees, grow food crops, and shift to a new patch when soil fertility falls. Productivity is low because it uses primitive tools, no fertilisers or modern inputs, and depends on monsoon and natural soil fertility.

Q29. Give two examples each of rabi and zaid crops, and explain how western temperate cyclones help rabi crops. 2M

Ans. Rabi: wheat, barley, peas, gram, mustard. Zaid: watermelon, muskmelon, cucumber, fodder crops. Winter rainfall from western temperate cyclones helps the success of rabi crops in north and north-west India.

Q30. "India is the second largest producer of fruits and vegetables." Name four fruits with their main producing regions. 3M

Ans. Mangoes: Maharashtra, AP, Telangana, UP, WB; oranges: Nagpur and Cherrapunjee (Meghalaya); bananas: Kerala, Mizoram, Maharashtra, TN; lichi and guava: UP, Bihar; pineapples: Meghalaya; grapes: AP, Telangana, Maharashtra; apples, pears, apricots, walnuts: J and K, HP (any four).

Q31. Name the major oilseeds of India with their season. Which is the most important? 2M

Ans. Groundnut (kharif; about half of major oilseeds), mustard and linseed (rabi), sesamum (kharif in north, rabi in south), castor (both), soyabean, sunflower, coconut. Groundnut is the most important.

Q32. What is the "right of inheritance" problem in intensive subsistence farming? 2M

Ans. Land is divided among successors generation after generation, so holdings become small, fragmented and uneconomical; yet farmers, lacking other livelihoods, keep taking maximum output from them.

Q33. Name the institutional reforms introduced in agriculture after Independence. Why did they not fully succeed? 3M

Ans. Reforms: collectivisation, consolidation of holdings, cooperation and abolition of zamindari; land reform was the main focus of the First Five Year Plan. Laws were passed, but their **implementation was lacking or lukewarm**, so holdings stayed small and fragmented and the benefits did not reach all farmers.

Q34. Why is the development of transport important for plantation agriculture? 2M

Ans. Plantations produce for industries and markets, often far away; the produce (tea, coffee, rubber) must reach processing units quickly. So a well-developed network of transport and communication linking plantations, processing industries and markets is essential.

Long answer (5 marks)

Q35. Describe the technological and institutional reforms introduced in Indian agriculture. 5M Board fav

Ans. (i) Land reforms after independence: collectivisation, consolidation of holdings, cooperation, abolition of zamindari (First Five Year Plan) (ii) Green Revolution (package technology) and White Revolution (Operation Flood) (iii) 1980s–90s comprehensive

(contd.) land development: crop insurance against drought, flood, cyclone, fire, disease (iv) Grameen banks, cooperatives, KCC, PAIS for cheap credit (v) weather bulletins on radio, TV; MSP and procurement prices against middlemen.

Q36. Describe the features of plantation agriculture with examples. 5M

Ans. (i) Type of commercial farming; single crop on a large area (ii) interface of agriculture and industry; produce is industrial raw material (iii) large estates, capital-intensive inputs, migrant labour (iv) needs good transport, processing industries and markets (v) tea in Assam and North Bengal, coffee in Karnataka, rubber, sugarcane, banana.

Q37. Name the golden fibre. State its growing conditions, uses, main states and the problem it faces. 5M

Ans. Jute. Well-drained fertile soils of flood plains renewed every year; high temperature during growth. Uses: gunny bags, mats, ropes, yarn, carpets and other artefacts. States: West Bengal, Bihar, Assam, Odisha, Meghalaya. Problem: losing market to synthetic fibres and packing materials, especially nylon, due to high cost.

Q38. "Agriculture has been the backbone of the Indian economy, yet farmers face many challenges." Explain the challenges and suggest measures. 5M

Ans. Challenges: (i) small and fragmented holdings due to inheritance (ii) dependence on monsoon and natural fertility (iii) low public investment in irrigation, power, rural roads and markets (iv) reduced fertiliser subsidy raised cost of production; competition from imports lowers profits. Measures: (v) irrigation and power, cheap credit (KCC, Grameen banks), crop insurance, MSP, crop diversification, HYV seeds and research.

Q39. Compare rice and wheat cultivation in India on: season, temperature, rainfall, soil and main areas. 5M

Ans. **Rice**: kharif; above 25°C, high humidity; above 100 cm rain (irrigation in less-rain areas); alluvial clayey soil; plains of north and NE, coastal and deltaic areas, Punjab, Haryana, western UP, Rajasthan with canals. **Wheat**: rabi; cool growing season, bright sunshine at ripening; 50–75 cm evenly spread rain; Ganga-Satluj plains (NW) and black soil region of the Deccan; Punjab, Haryana, UP, MP, Rajasthan, Bihar.

Competency based (3 marks)

Q40. A farmer in Punjab grows rice for sale, while a tribal family in Mizoram grows rice on a forest patch they will leave after a few years. Classify each type of farming and give two differences. 3M

Ans. Punjab = **commercial farming**; Mizoram = **primitive subsistence (jhum, slash and burn)**. Differences: (i) commercial uses HYV seeds, fertilisers, pesticides and irrigation; jhum uses simple tools and no fertilisers (ii) commercial grows for the market with high yields; jhum grows food for the family with low productivity (iii) jhum shifts to a new patch when fertility falls.

Q41. A small farmer's crop is destroyed by a flood and a trader offers to buy his next harvest at a very low price. Which government measures can protect him? Explain any three. 3M

Ans. (i) **Crop insurance** against flood, drought, cyclone, fire and disease covers his loss (ii) **Kisan Credit Card**, Grameen banks and cooperative banks give loans at low interest for the next season (iii) **Minimum support price**

(contd.) and procurement prices let him sell to the government and escape exploitation by middlemen. Also PAIS and weather bulletins.

Source based (4 marks)

Q42. "Rice is the staple crop of a majority of the people. Wheat is the second most important cereal crop... India is the largest producer as well as the consumer of pulses... Sugarcane is a tropical as well as a subtropical crop." (i) Main food crop of north and north-west India? (ii) Largest sugarcane producer? (iii) Two conditions for sugarcane. 4M

Ans. (i) Wheat (ii) Uttar Pradesh (iii) temperature 21°C to 27°C; annual rainfall 75–100 cm (irrigation where rain is low); grows on a variety of soils and needs manual labour.

Q43. "The Green Revolution based on package technology and the White Revolution (Operation Flood) were strategies to improve Indian agriculture. But this led to development being concentrated in a few selected areas. So, in the 1980s and 1990s, a comprehensive land development programme was initiated..." (i) What was Operation Flood? (ii) What was the drawback of the Green Revolution? (iii) Name two reforms of the land development programme. 4M

Ans. (i) The White Revolution to raise milk production (ii) development was concentrated in a few selected areas (regional disparity) (iii) crop insurance against drought, flood, cyclone, fire and disease; Grameen banks and cooperative banks for loans at lower interest (also KCC, PAIS, MSP).

Q44. "Plantation is also a type of commercial farming. In this type of farming, a single crop is grown on a large area. The plantation has an interface of agriculture and industry." (i) What is meant by "interface of agriculture and industry"? (ii) Name two plantation crops with one state each. (iii) Give two features of plantation farming. (1+1+2) 4M

Ans. (i) All the produce is used as raw material in industries (tea leaves go to tea processing) (ii) tea: Assam, North Bengal; coffee: Karnataka; rubber: Kerala (any two) (iii) large tracts of land, capital-intensive inputs, migrant labour, single crop, needs a good transport network (any two).

Quick fact India is the largest producer of pulses and also a major consumer of pulses in the world.

Yaad rakho Rice: India is the second largest producer after China; needs above 25 C and above 100 cm rain.

Apne notes / galtiyan yahan likho

Most asked: Mode of occurrence, iron ore belts, mica, coal types, non-conventional energy, conservation

Minerals and Energy Resources

1. What is a Mineral?

Geologists: a mineral is a "homogenous, naturally occurring substance with a definable internal structure". Found in varied forms: from hardest **diamond** to softest **talc**.

- → **Rocks** = combinations of homogenous substances called minerals; some rocks (limestone) have a single mineral; most have several.
- → Colour, hardness, crystal forms, lustre and density depend on the **physical and chemical conditions** of formation.
- → Minerals are part of everyday life: from a pin to a towering building, a ship; our food too has minerals.

2. Mode of Occurrence

Where	How	Examples
Igneous and metamorphic rocks	In cracks, crevices, faults, joints: smaller = veins, larger = **lodes**; molten/gaseous forms forced up and cooled	Tin, copper, zinc, lead
Sedimentary rocks	In **beds or layers**: deposition, accumulation, concentration under heat and pressure; also by **evaporation** in arid regions	Coal, some iron ore; gypsum, potash salt, sodium salt
Decomposition of surface rocks	Soluble parts removed, **residual mass** of weathered material left	Bauxite
Alluvial deposits	Sands of valley floors and base of hills: 'placer deposits'; minerals not corroded by water	Gold, silver, tin, platinum
Ocean waters and beds	Dissolved in sea water; ocean beds rich in **manganese nodules**	Common salt, magnesium, bromine

Rat-hole mining

In **Jowai and Cherrapunjee** (Meghalaya), coal mined by family members in long **narrow tunnels**. In India minerals are owned by the **government**, but in the north-east mineral ownership is with **individuals or communities**.

- → **Uneven distribution**: peninsular rocks have most reserves of coal, metallic minerals, mica, other non-metallic minerals; sedimentary rocks on western and eastern flanks (**Gujarat, Assam**) have most **petroleum**; Rajasthan: many non-ferrous minerals; alluvial plains of north India are almost devoid of economic minerals.

Class	Minerals
Metallic	Ferrous: iron ore, manganese, nickel, cobalt | Non-ferrous: copper, lead, tin, bauxite | Precious: gold, silver, platinum
Non-metallic	Mica, salt, potash, sulphur, granite, limestone, marble, sandstone
Energy	Coal, petroleum, natural gas

3. Ferrous Minerals

About three-fourths of the total value of metallic minerals produced; strong base for metallurgical industries. India exports substantial quantities.

Iron ore

- → Basic mineral and **backbone of industrial development**. India has rich reserves.
- → **Magnetite**: finest iron ore, up to 70% iron; excellent magnetic qualities: valuable in **electrical industry**.
- → **Haematite**: most important industrial ore by quantity used; **50 to 60% iron**.

Iron ore belt	Key mines and facts
Odisha-Jharkhand	High grade haematite at **Badampahar** (Mayurbhanj, Kendujhar, Odisha); **Gua and Noamundi** (Singhbhum, Jharkhand)
Durg-Bastar-Chandrapur (Chhattisgarh, Maharashtra)	Bailadila range (Bastar): very high grade haematite; 14 deposits; hills look like the **hump of an ox**; exported to **Japan and South Korea** via **Visakhapatnam** port
Ballari-Chitradurga-Chikkamagaluru-Tumakuru (Karnataka)	Kudremukh (Western Ghats): **100% export unit**, one of the largest deposits in the world; ore sent as **slurry through a pipeline** to a port near **Mangaluru**
Maharashtra-Goa	Goa and Ratnagiri (Maharashtra); ore not very high quality but efficiently exploited; exported through **Marmagao** port

Manganese

Used in manufacturing **steel and ferro-manganese alloy**: nearly 10 kg of manganese for 1 tonne of steel; also bleaching powder, insecticides, paints.

Yaad karo: Iron ore belts = "O-D-B-M" (Odisha, Durg, Bellary, Maharashtra-Goa)

Odisha-Jharkhand belt | Durg-Bastar-Chandrapur (Chhattisgarh-Maharashtra; Bailadila hills) | Ballari-Chitradurga-Chikkamagaluru-Tumakuru (Karnataka; Kudremukh) | Maharashtra-Goa belt (exported via Marmagao). Magnetite best (70% iron), hematite most used (50-60%).

4. Non-Ferrous Minerals

India's reserves and production are not very satisfactory; yet copper, bauxite, lead, zinc, gold are vital for metallurgical, engineering and electrical industries.

Mineral	Features / uses	Areas
Copper	India critically **deficient**; malleable, ductile, good conductor: electrical cables, electronics, chemical industries	**Balaghat** (MP), **Khetri** (Rajasthan), Singhbhum (Jharkhand)
Bauxite	Clay-like substance from decomposition of rocks rich in **aluminium silicates**; ore of aluminium: strength of metals like iron with extreme lightness, good conductivity, great malleability	Amarkantak plateau, Maikal hills, plateau region of Bilaspur-Katni; Odisha largest: **Panchpatmali** (Koraput)

5. Non-Metallic and Rock Minerals

Mica

Made of a series of **plates or leaves**; splits easily into thin sheets; clear, black, green, red, yellow or brown. Excellent di-electric strength, low power loss factor, insulating properties, resistance to high voltage: indispensable in **electric and electronic** industries.

Areas: northern edge of Chota Nagpur plateau; **Koderma-Gaya-Hazaribagh** belt (Jharkhand) is the leading producer; **Ajmer** (Rajasthan); **Nellore** mica belt (Andhra Pradesh).

Limestone (rock mineral): found with rocks of calcium carbonates or calcium and magnesium carbonates; in **sedimentary rocks** of most geological formations. Basic raw material for cement; essential for smelting iron ore in the blast furnace.

Minerals at a glance

Mineral	Type	Main use	Main areas
Iron ore	Ferrous	Iron and steel	Odisha, Jharkhand, Chhattisgarh, Karnataka, Goa
Manganese	Ferrous	Steel, ferro-manganese alloy, bleaching powder, paints	Odisha, MP, Maharashtra, Karnataka
Copper	Non-ferrous	Electrical cables, electronics	Balaghat, Khetri, Singhbhum
Bauxite	Non-ferrous	Aluminium	Odisha (Panchpatmali), Amarkantak, Maikal hills
Mica	Non-metallic	Electric, electronic industry	Koderma-Gaya-Hazaribagh, Ajmer, Nellore
Limestone	Rock mineral	Cement; smelting iron ore	Sedimentary rocks, many states
Coal	Energy	Power, industry, domestic	Damodar valley, NE, Neyveli (lignite)
Uranium, thorium	Atomic	Nuclear power	Jharkhand, Aravalli; monazite sands of Kerala

Quick fact Mineral = a homogenous, naturally occurring substance with a definable internal structure.

6. Hazards of Mining

→ Miners inhale **dust and noxious fumes**: vulnerable to pulmonary diseases.
→ Risk of collapsing mine roofs, inundation and fires in coalmines: constant threat.
→ Water sources contaminated; dumping of waste and slurry degrades land, soil; increase in stream and river pollution.

↳ Isliye mining ko "killer industry" bhi kehte hain. Stricter safety regulations + environmental laws zaroori.

7. Conservation of Minerals

✓ Minerals are **finite and non-renewable**; geological processes take **millions of years**, while consumption is very fast.
✓ Continued extraction: cost rises as depth increases, quality falls.
✓ Use in a planned and sustainable manner; improved technologies to use **low-grade ores** at low cost.
✓ **Recycling** of metals, using scrap metals and other **substitutes**.

8. Energy Resources

Energy for cooking, lighting, heating, vehicles, machinery. Generated from fuel minerals (coal, petroleum, natural gas, uranium) and from electricity.

Conventional	Non-conventional
Firewood, cattle dung cake, coal, petroleum, natural gas, electricity (hydel and thermal)	Solar, wind, tidal, geothermal, biogas, atomic (nuclear) energy

Firewood and cattle dung cake: most common in rural India: more than 70% of rural household energy; decreasing forest area makes this difficult; dung cake better used as manure.

(a) Coal

Most **abundantly available** fossil fuel in India; a substantial part of energy needs: power generation, industry, domestic. Formed by compression of plant material over millions of years.

Type	Features
Peat	Decaying plants in swamps: low carbon, high moisture, low heating capacity
Lignite	Low grade **brown coal**; soft, high moisture; main reserves at Neyveli (Tamil Nadu): electricity
Bituminous	Buried deep, high temperature; most popular for commercial use; **metallurgical coal** (high grade) for smelting iron in blast furnaces
Anthracite	**Highest quality** hard coal

→ **Gondwana coal** (a little over **200 million years** old): Damodar valley (WB-Jharkhand): **Jharia, Raniganj, Bokaro**: important coalfields; also Godavari, Mahanadi, Son, Wardha valleys.
→ **Tertiary coal** (about **55 million years** old): north-east: **Meghalaya, Assam, Arunachal Pradesh, Nagaland.**
→ Coal is **bulky**, loses weight on use: heavy industries and thermal power stations located on or near coalfields.

(b) Petroleum

→ Next major energy source after coal: fuel for **heat and lighting**, lubricants for machinery, raw material for many industries. Refineries = "nodal industry" for synthetic textile, fertiliser and numerous chemical industries.

→ Occurs in **anticlines and fault traps** in rock formations of the **tertiary age**: oil trapped in porous layers below non-porous rock; in fault traps, oil and gas held between porous and non-porous rock. Gas (lighter) lies above oil.

→ About 63% from Mumbai High, 18% from Gujarat, 16% from Assam. **Ankeleshwar** = most important field of Gujarat. **Assam** = oldest oil producing state: **Digboi, Naharkatia, Moran-Hugrijan.**

(c) Natural gas

→ Found with or without petroleum; used as fuel and as **industrial raw material** in petrochemical industry; **power and fertiliser** industries; **CNG** as liquid fuel replacement in vehicles. Environment-friendly (low CO_2): fuel for present century.

→ Large reserves: **Krishna-Godavari basin**; also Mumbai High and allied fields (Gulf of Cambay), Andaman and Nicobar islands.

→ **Hazira-Vijaipur-Jagdishpur (HVJ)** pipeline: 1,700 km cross-country gas pipeline linking Mumbai High and Bassien with fertiliser, power and industrial complexes in western and northern India.

(d) Electricity

Hydro electricity	Thermal electricity
Fast flowing water; renewable. Multipurpose projects: **Bhakra Nangal, Damodar Valley Corporation, Kopili Hydel Project**	Burning **coal, petroleum, natural gas**; uses non-renewable fossil fuels. Over **300** thermal power plants in India

Coal: most abundant fossil fuel; Gondwana coal (Damodar valley: Jharia, Raniganj, Bokaro) and tertiary coal of the north-east

Meme samjho

Coal, petroleum: "Hum hamesha rahenge."
Geologist: *bas kuch saal aur...*

Asli baat: Fossil fuels are non-renewable and finite; their burning also pollutes. So India is promoting solar, wind, tidal, geothermal, biogas and nuclear energy.

9. Non-Conventional Sources

Growing consumption has made India dependent on fossil fuels; rising prices + environmental problems: need for **sustainable energy** from renewable sources.

Rising use of fossil fuels + rising prices

↓

Threat to future energy security + pollution, global warming

↓

Need: renewable, clean, locally available energy (solar, wind, tide, biomass, waste)

Source	Key facts
Nuclear / atomic	Energy by altering the structure of atoms (heat to generate electric power). Uranium and thorium: Jharkhand and **Aravalli** ranges (Rajasthan); **monazite sands of Kerala** rich in thorium
Solar	Tropical country: enormous potential. **Photovoltaic** technology converts sunlight into electricity. Solar plant at **Madhapur near Bhuj** (Gujarat) sterilises milk cans. Reduces dependence of rural households on firewood and dung cakes
Wind	Largest wind farm cluster: Nagarcoil to Madurai (Tamil Nadu); also AP, Karnataka, Gujarat, Kerala, Maharashtra, Lakshadweep. **Nagarcoil and Jaisalmer** known for effective use
Biogas	Shrubs, farm, animal, human waste: domestic use in rural areas; higher thermal efficiency than kerosene, dung cake, charcoal. **'Gobar gas plants'**: energy + improved quality of manure; prevent loss of trees and manure
Tidal	Floodgate dams across inlets: high tide water flows in, trapped; turbine on falling tide. Ideal: **Gulf of Khambhat, Gulf of Kachchh** (Gujarat west coast) and **Gangetic delta, Sunderban** (WB)
Geothermal	Heat from the interior of the earth (hot springs: groundwater heated by hot rocks). Experimental: **Parvati valley near Manikarn** (HP) and **Puga valley** (Ladakh)

Wind farms: largest cluster from Nagercoil to Madurai in Tamil Nadu; also Andhra Pradesh, Karnataka, Gujarat, Kerala, Maharashtra, Lakshadweep

Yaad karo: Non-conventional energy = "SWaN-TiG-B"

Solar (Madhapur, Bhuj: largest solar plant) | Wind (Nagercoil-Madurai) | Nuclear (uranium, thorium; monazite sands of Kerala) | Tidal (Gulf of Khambhat, Kuchchh) | Geothermal (Parvati valley near Manikarn, HP; Puga valley, Ladakh) | Biogas (gobar gas plants).

Conventional vs non-conventional (5M fav)

Point	Conventional	Non-conventional
Nature	Mostly exhaustible (coal, petroleum, gas take millions of years to form)	Renewable: sun, wind, tide, earth's heat, biomass
Pollution	Smoke, ash, greenhouse gases, global warming	Clean and eco-friendly (nuclear needs safe waste disposal)
Use	In use for a long time; firewood and dung cake in villages	Newer technology; growing fast

Point	Conventional	Non-conventional
Cost	Rising prices, oil imports	High set-up cost, low running cost
Examples	Coal, petroleum, natural gas, firewood, hydel and thermal power	Solar, wind, tidal, geothermal, biogas, nuclear

10. Conservation of Energy

Energy = basic requirement for development; every sector needs inputs of energy. India is presently one of the least energy efficient countries. Cautious approach for judicious use of limited energy:

- ✓ Use **public transport** instead of individual vehicles.
- ✓ **Switch off** electricity when not in use; use **power-saving devices**.
- ✓ Use **non-conventional** sources of energy. "Energy saved is energy produced."
- ✓ Get power equipment **regularly checked** for damages and leakages.

Yaad karo: urja bachao = "Bus, Switch, Saver, Suraj, Service"

Bus: public transport, not own vehicle | **Switch** off when not in use | **Saver**: power-saving devices | **Suraj**: non-conventional sources (solar, wind) | **Service**: check equipment for damage and leakage.

Map list (identify)

Iron ore: Mayurbhanj, Durg, Bailadila, Bellary, Kudremukh. **Coal:** Raniganj, Bokaro, Talcher, Neyveli. **Oil:** Digboi, Naharkatia, Mumbai High, Bassien, Kalol, Ankaleshwar. **Thermal:** Namrup, Singrauli, Ramagundam. **Nuclear:** Narora, Kakrapara, Tarapur, Kalpakkam. Map: see Map Work section.

Shivam Bhaiya says

5-marker pakka: **conventional vs non-conventional** ya **"why non-conventional energy?"**. Mica, Kudremukh slurry, Bailadila ox-hump, Mumbai High 63%: ye one-liners MCQ mein baar baar aate hain.

Exam Alert

Magnetite 70% (finest), haematite 50-60% (most used). Bauxite = **decomposition**, gold = **placer**. Neyveli = **lignite**. Mumbai High **samudra** mein hai! Gondwana 200 my, Tertiary 55 my.

1 minute recap

- **Occurrence**: veins/lodes (igneous), beds (sedimentary), residual (bauxite), placer (gold), ocean (salt, nodules)
- **Iron belts**: Odisha-Jharkhand, Durg-Bastar-Chandrapur, Karnataka, Maharashtra-Goa
- **Ports**: Bailadila to Visakhapatnam; Kudremukh slurry to Mangaluru; Goa to Marmagao
- **10 kg** manganese per tonne of steel
- **Coal**: peat, lignite, bituminous, anthracite; Gondwana 200 my, Tertiary 55 my
- **Oil**: Mumbai High 63, Gujarat 18, Assam 16 (%); HVJ gas pipeline
- **Wind** Nagarcoil-Madurai; **tidal** Khambhat, Kachchh, Sunderban; **geothermal** Manikarn, Puga

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which mineral is formed by the decomposition of surface rocks, leaving a residual mass? 1M Board fav
(a) Coal (b) Bauxite (c) Gold (d) Mica
Ans. (b) Bauxite.

Q2. Which is the finest iron ore with up to 70% iron content? 1M Board fav
(a) Haematite (b) Limonite (c) Magnetite (d) Siderite
Ans. (c) Magnetite.

Q3. Kudremukh iron ore is transported as slurry through a pipeline to a port near: 1M
Ans. Mangaluru.

Q4. Lignite (brown coal) reserves are mainly found at: 1M
(a) Neyveli (b) Jharia (c) Raniganj (d) Bokaro
Ans. (a) Neyveli, Tamil Nadu.

Q5. **A:** Heavy industries and thermal power stations are located on or near coalfields. **R:** Coal is a bulky material which loses weight on use. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true, R explains A.

Q6. Match: A. Koderma, B. Bailadila, C. Digboi, D. Puga valley with 1. Geothermal, 2. Mica, 3. Iron ore, 4. Petroleum. 1M
Ans. A-2, B-3, C-4, D-1.

Q7. Which mineral is the basic raw material for the cement industry? 1M
Ans. Limestone.

Q8. Gold, silver, tin and platinum found in the sands of valley floors are called: 1M
Ans. Placer deposits.

Q9. How much manganese is needed to make one tonne of steel? 1M
Ans. Nearly 10 kg.

Q10. Which is the oldest oil-producing state of India? 1M
(a) Gujarat (b) Assam (c) Maharashtra (d) Rajasthan
Ans. (b) Assam (Digboi, Naharkatia, Moran-Hugrijan).

Q11. **A:** Most minerals in the north-east are owned by individuals or communities. **R:** Rat-hole mining of coal is done by families in Jowai and Cherrapunjee, Meghalaya. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

(contd.) (b) Both true, R does not explain A.

Q12. Monazite sands of Kerala are rich in: 1M
(a) Uranium (b) Gold (c) Thorium (d) Mica
Ans. (c) Thorium.

Q13. Where is the largest wind farm cluster of India? 1M
Ans. From Nagarcoil to Madurai in Tamil Nadu.

Q14. Floodgate dams built across inlets are used to generate: 1M
(a) Geothermal energy (b) Wind energy (c) Tidal energy (d) Hydel energy
Ans. (c) Tidal energy.

Q15. Which is the highest quality hard coal, with the highest carbon content? 1M
Ans. Anthracite.

Short answer (2-3 marks)

Q16. Describe the modes of occurrence of minerals. 3M Board fav
Ans. (i) Igneous and metamorphic rocks: in cracks, crevices, faults as veins and lodes (tin, copper, zinc, lead) (ii) sedimentary rocks: in beds or layers (coal, iron ore, gypsum, potash) (iii) decomposition of surface rocks (bauxite) (iv) alluvial placer deposits (gold, silver, tin, platinum) (v) ocean waters and beds (salt, magnesium, bromine, manganese nodules).

Q17. Why is mica indispensable in the electric and electronic industries? Name its main producing areas. 3M Board fav
Ans. Excellent di-electric strength, low power loss factor, insulating properties and resistance to high voltage; splits into thin sheets. Areas: Koderma-Gaya-Hazaribagh belt (Jharkhand), Ajmer (Rajasthan), Nellore (AP).

Q18. Distinguish between ferrous and non-ferrous minerals with examples. 3M
Ans. Ferrous: contain iron; about three-fourths of metallic mineral value; iron ore, manganese, nickel, cobalt; base for metallurgical industries. Non-ferrous: no iron; copper, lead, zinc, bauxite, tin; India's reserves and production not satisfactory.

Q19. Why do we need to conserve mineral resources? Suggest ways. 3M Board fav
Ans. Finite and non-renewable; formation takes millions of years while consumption is fast; cost rises and quality falls with depth. Ways: planned and sustainable use, improved technology to use low-grade ores, recycling metals, using scrap and substitutes.

Q20. Explain the hazards of mining for miners and the environment. 3M
Ans. Dust and noxious fumes cause pulmonary diseases; risk of roof collapse, inundation and fires; water sources contaminated; dumping of waste and slurry degrades land and soil and pollutes rivers.

Q21. Describe the Durg-Bastar-Chandrapur and Karnataka iron ore belts. 3M
Ans. Durg-Bastar-Chandrapur (Chhattisgarh, Maharashtra): very high grade haematite in Bailadila hills (shape of an ox hump), 14 deposits; exported to Japan and South Korea via Visakhapatnam. Karnataka (Ballari-Chitradurga-Chikkamagaluru-Tumakuru): Kudremukh in Western Ghats, 100% export unit, ore sent as slurry to a port near Mangaluru.

Q22. Distinguish between Gondwana and Tertiary coal. 2M
Ans. Gondwana: a little over 200 million years old; Damodar valley (Jharia, Raniganj, Bokaro), Godavari, Mahanadi, Son, Wardha valleys; major part of reserves. Tertiary: about 55 million years old; north-east: Meghalaya, Assam, Arunachal Pradesh, Nagaland.

Q23. Why is natural gas considered an environment-friendly fuel? Where are its reserves found? 3M
Ans. Low carbon dioxide emissions, clean fuel; used in power and fertiliser industries and as CNG in vehicles. Reserves: Krishna-Godavari basin, Mumbai High and Gulf of Cambay, Andaman and Nicobar. HVJ pipeline links Mumbai High and Bassien to western and northern India.

Q24. Why is petroleum refinery called a "nodal industry"? How does petroleum occur? 3M
Ans. Refineries supply raw material for synthetic textile, fertiliser and many chemical industries, so they act as a nodal point. Petroleum occurs in anticlines and fault traps in tertiary rocks: oil held in porous layers below non-porous rock; gas, being lighter, lies above oil.

Q25. Distinguish between hydro electricity and thermal electricity. 3M
Ans. Hydro: generated by fast flowing water, renewable, clean; e.g. Bhakra Nangal, DVC, Kopili. Thermal: generated by burning coal, petroleum, natural gas; non-renewable, polluting; over 300 thermal plants in India.

Q26. What is biogas? Explain its two benefits in rural areas. 3M
Ans. Gas produced from decomposition of shrubs, farm waste, animal and human waste. Benefits: higher thermal efficiency than kerosene, dung cake and charcoal; gobar gas plants also give improved manure and prevent loss of trees and manure due to burning of fuel wood and cow dung cakes.

Q27. Explain the importance of copper and bauxite. Name one area each. 3M
Ans. Copper: malleable, ductile, good conductor; used in electrical cables, electronics, chemical industries; Balaghat (MP), Khetri (Rajasthan). Bauxite: ore of aluminium, a light, strong, conductive and malleable metal; Panchpatmali (Koraput, Odisha), Amarkantak.

Q28. How can tidal and geothermal energy be produced? Name the sites in India. 3M
Ans. Tidal: floodgate dams across inlets trap high tide water, released through turbine when tide falls; Gulf of Khambhat, Gulf of Kachchh, Sunderban. Geothermal: heat from earth's interior (hot springs); Parvati valley near Manikarn (HP), Puga valley (Ladakh).

Q29. What is rat-hole mining? Where is it practised? 2M
Ans. Coal mining by family members who dig long, narrow tunnels; practised in Jowai and Cherrapunjee (Meghalaya), where minerals are owned by individuals or communities.

Q30. Why is the use of firewood and cattle dung cake becoming difficult in rural India? 3M
Ans. (i) They meet more than 70% of the energy needs of rural households (ii) firewood is getting scarce because **forest area is decreasing** (iii) burning dung cake wastes the most valuable **manure**, which should go to the fields (iv) both cause smoke indoors. Alternatives: biogas (gobar gas) plants and solar energy.

Q31. State the uses of manganese. 2M

(contd.) Mainly used in the manufacture of **steel and ferro-manganese alloy** (nearly 10 kg of manganese for one tonne of steel); also used in making bleaching powder, insecticides and paints.

Q32. Where does limestone occur, and why is it important for industry? 2M

Ans. Found in association with rocks composed of calcium carbonates or calcium and magnesium carbonates; it occurs in **sedimentary rocks** of most geological formations. It is the basic raw material for the **cement industry** and essential for **smelting iron ore** in the blast furnace.

Long answer (5 marks)

Q33. "The use of non-conventional sources of energy is the need of the hour." Explain with examples. 5M Board fav

Ans. Growing consumption made India dependent on fossil fuels; rising prices, threat to supply, environmental problems. (i) Solar: photovoltaic; Madhapur near Bhuj (ii) wind: Nagarcoil-Madurai, Jaisalmer (iii) biogas/gobar gas: better manure, saves trees (iv) tidal: Gulf of Khambhat, Kachchh, Sunderban (v) geothermal: Parvati valley (Manikarn), Puga valley; nuclear: uranium, thorium (monazite of Kerala). These are renewable, cleaner and widely available.

Q34. Distinguish between conventional and non-conventional sources of energy. Suggest ways to conserve energy. 5M Board fav

Ans. Conventional: firewood, dung cake, coal, petroleum, natural gas, hydel and thermal electricity; mostly exhaustible, polluting, long in use. Non-conventional: solar, wind, tidal, geothermal, biogas, atomic; mostly renewable, cleaner, recent. Conservation: public transport, switch off electricity, power-saving devices, use non-conventional sources; energy saved is energy produced.

Q35. Describe the distribution of coal and petroleum in India. 5M

Ans. Coal: Gondwana coal in Damodar valley (Jharia, Raniganj, Bokaro), Godavari, Mahanadi, Son, Wardha valleys; Tertiary coal in Meghalaya, Assam, Arunachal, Nagaland; lignite at Neyveli. Petroleum: anticlines and fault traps of tertiary rocks; Mumbai High 63%, Gujarat 18% (Ankeleshwar most important), Assam 16% (oldest: Digboi, Naharkatia, Moran-Hugrijan).

Q36. Describe the importance and distribution of iron ore in India. 5M Board fav

Ans. Backbone of industrial development; magnetite (70%) and haematite (50-60%). (i) Odisha-Jharkhand: Badampahar (Mayurbhanj, Kendujhar), Gua, Noamundi (ii) Durg-Bastar-Chandrapur: Bailadila, exported to Japan and South Korea via Visakhapatnam (iii) Ballari-Chitradurga-Chikkamagaluru-Tumakuru: Kudremukh, 100% export unit, slurry to Mangaluru (iv) Maharashtra-Goa: Goa and Ratnagiri via Marmagao (v) India exports substantial quantities.

Competency based (3 marks)

Q37. A remote village in western Rajasthan has no grid electricity but plenty of sunshine, strong winds and many cattle. Suggest three energy sources for it and justify each. 3M

Ans. (i) **Solar energy**: tropical region with bright sunshine; photovoltaic panels convert sunlight into electricity for lights and pumps (ii) **Wind energy** (contd.) : strong winds (Jaisalmer is known for wind farms) (iii) **Biogas**: cattle dung in gobar gas plants gives cooking fuel and better manure, saving trees. All are renewable, local and clean.

Q38. Your school wants to cut its electricity bill and pollution. As the eco-club head, suggest three steps and explain how each helps. 3M

Ans. (i) Switch off fans and lights when classrooms are empty: no wasted power (ii) replace old bulbs with power-saving devices such as LEDs: same light, less energy (iii) install rooftop solar panels: renewable, clean power (iv) encourage buses and cycling instead of private cars: saves petroleum, reduces smoke. "Energy saved is energy produced."

Source based (4 marks)

Q39. "Mica is a mineral made up of a series of plates or leaves. It splits easily into thin sheets... Mica deposits are found in the northern edge of the Chota Nagpur plateau..." (i) Which belt is the leading producer? (ii) Name one more mica area. (iii) Why is mica used in electronics? 4M

Ans. (i) Koderma-Gaya-Hazaribagh belt of Jharkhand (ii) Ajmer (Rajasthan) or Nellore (Andhra Pradesh) (iii) excellent di-electric strength, low power loss factor, insulating properties and resistance to high voltage.

Q40. "Energy saved is energy produced... India is presently one of the least energy efficient countries in the world. We have to adopt a cautious approach for the judicious use of our limited energy resources." (i) What does "energy saved is energy produced" mean? (ii) Give two ways to save energy. (iii) Why must India use energy judiciously? 4M

Ans. (i) Every unit of energy saved is as good as an extra unit produced, without new fuel use (ii) use public transport; switch off electricity when not in use; power-saving devices; non-conventional sources (any two) (iii) limited, non-renewable fossil fuels, rising demand and prices, and low energy efficiency; development of every sector depends on energy.

Q41. "India is a tropical country. It has enormous possibilities of tapping solar energy. Photovoltaic technology converts sunlight directly into electricity. Solar energy is fast becoming popular in rural and remote areas." (i) What does photovoltaic technology do? (ii) Name a place in India known for a solar plant. (iii) Give two reasons why solar energy suits rural India. (1+1+2) 4M

Ans. (i) Converts sunlight directly into electricity (ii) Madhapur, near Bhuj (Gujarat), where solar energy is used to sterilise milk cans (iii) it reduces the dependence of rural households on firewood and dung cakes, which helps conserve forests and lets dung be used as manure; sunshine is abundant and free, and the energy is clean.

Yaad rakho Koderma (Jharkhand) is the leading producer of mica; Mumbai High, Gujarat and Assam are key oil areas.

Do you know? Bio-gas plants (gobar gas) give manure and fuel; they are common in rural India.

Apne notes / galtiyan yahan likho

Most asked: Importance, classification, jute and sugar, iron and steel, pollution control

MANUFACTURING INDUSTRIES

Production of goods in large quantities after processing raw materials into more valuable products = **manufacturing** (paper from wood, sugar from sugarcane, iron and steel from iron ore, aluminium from bauxite). People here work in the **secondary sector**.

1. Importance of Manufacturing

- ✓ Considered the **backbone of development**: helps **modernise agriculture**.
- ✓ Reduces heavy dependence on agricultural income by providing jobs in secondary and tertiary sectors.
- ✓ Industrial development = precondition for removing unemployment and poverty; aim of public sector and joint ventures: bring down regional disparities (tribal, backward areas).
- ✓ **Export** of manufactured goods expands trade and brings much-needed **foreign exchange**.
- ✓ Countries that turn raw materials into a wide variety of finished goods of **higher value** are prosperous.

Agriculture and industry go hand in hand

Agro-industries boost agriculture by raising productivity; industries depend on agriculture for raw materials. Industries sell farmers **irrigation pumps, fertilisers, insecticides, pesticides, PVC pipes, machines and tools**. Industry also makes production more efficient.

Contribution to national economy

- → Share of manufacturing in GDP stagnated at about 17% over two decades (out of 27% for industry, which includes 10% for mining, quarrying, electricity and gas).
- → Growth of manufacturing about **7% per annum** in the last decade; desired growth: **12%**.
- → Govt set up the National Manufacturing Competitiveness Council (NMCC) with appropriate policy interventions.

2. Industrial Location

Complex: depends on availability of raw material, labour, capital, power and market. Rarely all at one place, so industry locates where these are available or can be arranged at **lower cost**.

Industry starts → Urbanisation follows → City offers services → More industries cluster

Agglomeration economies

Many industries benefit from nearness to an urban centre (market) and its services: **banking, insurance, transport, labour, consultants, financial advice**; so they come together: agglomeration economies. Pre-independence, most industries were located from the overseas trade point of view: **Mumbai, Kolkata, Chennai**.

Yaad karo: Location factors = "Raju Lalu Ka Power Market"

Raw material | **L**abour | **C**apital | **P**ower | **M**arket (+ transport, government policy, banking). Cost of production lowest where these meet.

Industry	Main location factor	Where
Jute	Raw jute nearby, water, cheap water transport, port	Hugli basin (WB)
Sugar	Bulky cane loses sucrose in haulage: near farms	UP, Maharashtra, Karnataka
Iron and steel	Iron ore, coking coal, limestone close by	Chota Nagpur plateau
Aluminium	Cheap regular electricity + bauxite	Odisha, Chhattisgarh
Cement	Limestone, gypsum; port for export	Gujarat (Gulf market)
IT, electronics	Skilled labour, urban services, data links	Bengaluru, Hyderabad, Pune

↳ Competency Q mein factor + place dono likho: "near raw material because it is bulky" = full marks.

3. Classification of Industries

Basis	Types with examples
Source of raw material	**Agro-based**: cotton, woollen, jute, silk textile, rubber, sugar, tea, coffee, edible oil. **Mineral-based**: iron and steel, cement, aluminium, machine tools, petrochemicals
Main role	**Basic or key**: products are raw materials for others (iron and steel, copper smelting, aluminium smelting). **Consumer**: goods for direct use (sugar, toothpaste, paper, sewing machines, fans)
Capital investment	**Small scale** (investment within a set maximum limit) vs **large scale** (investment above it)
Ownership	**Public**: BHEL, SAIL. **Private**: TISCO, Bajaj Auto, Dabur. **Joint**: Oil India Ltd. (OIL). **Cooperative**: sugar (Maharashtra), coir (Kerala)
Bulk and weight	**Heavy**: iron and steel. **Light**: electrical goods (light raw materials and products)

Yaad karo: 5 bases = "Raju Roz Chai Order Bhejta"

Raw material (agro / mineral) | **R**ole (basic / consumer) | **C**apital (small / large scale) | **O**wnership (public, private, joint, cooperative) | **B**ulk and weight (heavy / light).

4. Agro-based Industries

(a) Textile industry

Unique: contributes significantly to industrial production, employment and foreign exchange. Only industry in India self-reliant and complete in the value chain: raw material to highest value-added products.

Cotton textiles

- → Ancient times: hand spinning and handloom weaving. 18th century onwards power-looms; British-era industrial goods hit traditional industries.
- → First successful mill: Mumbai, 1854. Early concentration in cotton belt of **Maharashtra and Gujarat**: raw cotton, market, transport, accessible **port**, labour, **moist climate**.
- → Close link with agriculture; provides livelihood to farmers, cotton boll pluckers, ginning, spinning, weaving, dyeing, designing, packaging, tailoring, sewing workers. Creates demand for chemicals, dyes, packaging, engineering works.
- → **Spinning** centralised in Maharashtra, Gujarat, TN; **weaving highly decentralised** (handloom, powerloom, mills) to include traditional skills. **Khadi** = large-scale employment to weavers at home (cottage industry).
- → India: world-class **yarn**; but weaving supplies low-quality fabric, cannot use much of the yarn. Yarn exported to Japan; cotton goods to USA, UK, Russia, France, East European countries, Nepal, Singapore, Sri Lanka, Africa.
- → Problems: erratic power supply, machinery needing upgrade (weaving, processing), low labour output, stiff competition from **synthetic fibre**.

(b) Jute textiles

- → India: largest producer of raw jute and jute goods; **second largest exporter** after Bangladesh. First mill near Kolkata at **Rishra, 1855**.
- → **1947 Partition**: mills stayed in India but **three-fourth of jute producing area** went to Bangladesh (East Pakistan).
- → Challenges: stiff competition from synthetic substitutes and from Bangladesh, Brazil, Philippines, Egypt, Thailand. Internal demand rising due to govt policy of **mandatory jute packaging**.
- → **National Jute Policy, 2005**: increase productivity, improve quality, ensure good prices to farmers, raise yield per hectare. Growing concern for eco-friendly, biodegradable materials = opportunity.

Why jute mills along the Hugli? (3M sure-shot)

1. Proximity of **jute producing areas**.
2. Inexpensive **water transport**, supported by good network of railways, roadways.
3. Abundant **water** for processing raw jute.
4. **Cheap labour** from WB and adjoining states (Bihar, Odisha, UP).
5. **Kolkata**: large urban centre with banking, insurance and **port** facilities for export.

(c) Sugar industry

- → India: second largest producer of sugar; **first** in gur and khandsari.
- → Raw material is **bulky** and loses **sucrose** in haulage: mills located near farms. Mills in UP, Bihar, Maharashtra, Karnataka, TN, AP, Gujarat, Punjab, Haryana, MP. **Seasonal** industry: suited to cooperative sector.
- → Shift to **southern and western states**, especially **Maharashtra**: cane has **higher sucrose**; **cooler climate** = longer crushing season; **cooperatives** more successful.
- → Challenges: seasonal nature, old and inefficient methods, transport delays in reaching cane to factories, need to maximise use of **bagasse**.

5. Mineral-based Industries

(a) Iron and steel: the basic industry

- → **Basic** (all other heavy, medium, light industries depend on it for machinery) and **heavy** (raw materials and finished goods are heavy and bulky: high transport cost).
- → Raw materials: **iron ore, coking coal, limestone** in ratio about 4 : 2 : 1; some **manganese** to harden steel.

Iron ore + coking coal + limestone (4:2:1)
↓
Blast furnace: smelting
↓
Pig iron (moulded) / slag removed
↓
Steel making: + manganese, nickel, chromium (ferro-alloys), oxidising impurities
↓
Steel: rolling, pressing, casting, forging
↓
Finished products to market

- → India: a leading producer of **crude steel** and largest producer of sponge iron; but **per capita steel consumption** is low.
- → Most public sector steel marketed through **SAIL**; **TISCO** markets its own (private).
- → **Chota Nagpur plateau** has maximum concentration: low cost of **iron ore**, high-grade raw materials in proximity, **cheap labour**, vast growth potential in home market.
- → Problems: high costs and limited availability of **coking coal**; lower productivity of labour; irregular supply of energy; poor infrastructure. Liberalisation and FDI gave a boost.

Plant (map list)	State
Durgapur	West Bengal
Bokaro, Jamshedpur (TISCO)	Jharkhand
Bhilai	Chhattisgarh
Vijayanagar	Karnataka
Salem	Tamil Nadu

(b) Aluminium smelting

Second most important metallurgical industry. Aluminium: light, resistant to corrosion, good conductor of heat, malleable, strong when mixed with other metals: aircraft, utensils, wires; substitute for steel, copper, zinc, lead. Raw material: bauxite (dark reddish rock). Prime factors: **regular supply of electricity** and assured raw material at minimum cost. Plants: Odisha, WB, Kerala, UP, Chhattisgarh, Maharashtra, TN.

(c) Chemical industry

- → **Inorganic**: sulphuric acid (fertilisers, synthetic fibres, plastics, adhesives, paints, dyes), nitric acid, alkalies, soda ash (glass, soaps, detergents, paper), caustic soda: widely spread.
- → **Organic**: **petrochemicals** for synthetic fibres, synthetic rubber, plastics, dye-stuffs, drugs, pharmaceuticals: located **near oil refineries** or petrochemical plants.

→ Chemical industry is its own largest consumer: basic chemicals are processed further to produce other chemicals.

(d) Fertiliser industry

Centred on **nitrogenous** (mainly **urea**), **phosphatic**, ammonium phosphate (**DAP**) and complex fertilisers (N, P, K). India has no reserves of commercially usable potash: entirely imported. Expanded after Green Revolution. **Gujarat, TN, UP, Punjab, Kerala** = half of production.

(e) Cement industry

Essential for construction (houses, factories, bridges, roads, airports, dams). Bulky raw materials: limestone, silica, gypsum + coal, power, rail. First plant: **Chennai, 1904**. Decontrol of price and distribution in **1989** and other reforms helped. Plants in **Gujarat** have access to markets in **Gulf countries**; Indian cement exported to East Asia, Middle East, Africa, South Asia.

(f) Automobile industry

Vehicles for quick transport of goods and people (trucks, buses, cars, motorcycles, scooters, three-wheelers). After **liberalisation**: new contemporary models, FDI, technology. Hubs: around **Delhi, Gurugram, Mumbai, Pune, Chennai, Kolkata, Lucknow, Indore, Hyderabad, Jamshedpur, Bengaluru**.

(g) Information technology and electronics

Transistor sets to TV, telephones, cellular telecom, pagers, radars, computers. Bengaluru = electronic capital of India. Major contribution: **employment** and **foreign exchange** through **Business Process Outsourcing (BPO)**. Software technology parks give single window service and high-speed data communication.

Map item	Places
Cotton textile	Mumbai, Indore, Surat, Kanpur, Coimbatore
Software technology parks	Noida, Gandhinagar, Mumbai, Pune, Hyderabad, Bengaluru, Chennai, Thiruvananthapuram

↳ Map: see Map Work section (textile, iron and steel, software parks).

Iron and steel: basic heavy industry; all other industries depend on it for machinery

Meme samjho

Iron and steel industry to baaki saari industries: "Tumhari machines hum banayenge. **Humare liye kaam karoge?**" **Asli baat:** Iron and steel is a basic industry: all heavy, medium and light industries depend on it for their machinery. Raw materials: iron ore, coking coal, limestone (4:2:1).

6. Industrial Pollution

Industries contributed to growth but also increased **pollution and environmental degradation** of land, water, air, noise.

Yaad karo: 4 pollutions = "Hawa Paani Garmi Shor" (+ zameen)

Hawa: smoke, sulphur dioxide, carbon monoxide | **Paani**: dyes, detergents, acids, heavy metals | **Garmi** (thermal): hot water from plants | **Shor** (noise): hearing loss, BP | Land: dumping of waste, glass, slag.

Type	Sources and effects
Air	High proportion of **sulphur dioxide, carbon monoxide**; smoke from chemical and paper factories, brick kilns, refineries, smelting plants, burning fossil fuels; toxic gas leaks hazardous; affects humans, animals, plants, buildings
Water	Organic, inorganic effluents from paper, pulp, chemical, textile and dyeing industries, refineries, tanneries, electroplating: dyes, detergents, acids, salts, heavy metals (lead, mercury), pesticides, fertilisers, plastics. Solid wastes: fly ash, phospo-gypsum, iron and steel slags
Thermal	**Hot water** from factories and thermal plants drained into rivers, ponds before cooling: harms aquatic life. Nuclear wastes, accidents: cancers, birth defects, miscarriages
Land and soil	Dumping of glass, harmful chemicals, industrial effluents, packaging, salts, garbage: soil useless; rain water carries pollutants to ground water
Noise	Irritation, anger, **hearing impairment**, higher heart rate and blood pressure; from machinery, generators, saws, pneumatic and electric drills

7. Control of Environmental Degradation

- ✓ **Water:** minimise use by **reusing and recycling** in two or more successive stages; **harvest rainwater**; treat hot water and effluents before release into rivers and ponds; regulate overdrawing of **ground water**.
- ✓ **Air:** fit smoke stacks with electrostatic precipitators, fabric filters, scrubbers, inertial separators; use **oil or gas instead of coal**.
- ✓ **Noise:** silencers, redesigned machinery, noise-absorbing material, ear plugs and earphones.

Effluent treatment	Process
Primary	Mechanical: screening, grinding, flocculation, sedimentation
Secondary	Biological process
Tertiary	Biological, chemical and physical: recycling of waste water

NTPC shows the way

NTPC (major power provider) has **ISO 14001** certification for its Environment Management System. Steps: optimum use of equipment, latest technology, upgrading; minimising waste by maximising **ash utilisation**; **green belts** for ecological balance; ash pond management, ash water recycling, liquid waste management; online ecological monitoring, reviews of environmental parameters.

Shivam Bhaiya says

Pakke questions: **importance of manufacturing, Hugli belt, sugar mills shifting south, iron-steel problems, pollution control.** Iron-steel ka flow chart bana do: examiner ko pasand hai.

Exam Alert

Mumbai 1854 (cotton), Rishra 1855 (jute), Chennai 1904 (cement). **4:2:1** = iron ore : coking coal : limestone. OIL = **joint** sector; coir Kerala = cooperative. Potash = fully imported.

1 minute recap

- **GDP share** 17% (stagnant); desired growth 12%; **NMCC**
- **Location**: raw material, labour, capital, power, market; agglomeration
- **Textile** = complete value chain; spinning centralised, weaving decentralised
- **Jute**: Rishra 1855; Hugli belt; NJP 2005. **Sugar**: shifting to Maharashtra
- **Iron-steel** 4:2:1; Chota Nagpur; largest sponge iron producer
- **Aluminium** 2nd metallurgical; **cement** Chennai 1904, decontrol 1989

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which of these is a joint sector industry? 1M Board fav
(a) BHEL (b) TISCO (c) Oil India Ltd. (d) Dabur
Ans. (c) Oil India Ltd. (OIL).

Q2. In what ratio are iron ore, coking coal and limestone needed for iron and steel? 1M Board fav
Ans. About 4 : 2 : 1.

Q3. Which city is called the electronic capital of India? 1M
(a) Hyderabad (b) Bengaluru (c) Pune (d) Chennai
Ans. (b) Bengaluru.

Q4. **A:** Sugar mills are shifting to southern and western states. **R:** Cane there has higher sucrose content and the cooler climate gives a longer crushing season. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true, R explains A.

Q5. Match: A. Mumbai 1854, B. Rishra 1855, C. Chennai 1904, D. Kerala coir with 1. Cement plant, 2. Cooperative sector, 3. Cotton mill, 4. Jute mill. 1M
Ans. A-3, B-4, C-1, D-2.

Q6. Which fertiliser raw material does India have to import entirely? 1M
Ans. Potash (no commercially usable reserves).

Q7. Which device is fitted on smoke stacks to reduce particulate air pollution? 1M
Ans. Electrostatic precipitators (also fabric filters, scrubbers, inertial separators).

Short answer (2-3 marks)

Q8. "Manufacturing sector is considered the backbone of development." Explain. 3M Board fav
Ans. Modernises agriculture; reduces dependence on agricultural income by creating jobs in secondary and tertiary sectors; helps (contd.) remove unemployment and poverty, reduces regional disparities; exports bring foreign exchange; converts raw materials into finished goods of higher value, bringing prosperity.

Q9. Why are most jute mills located along the banks of the Hugli? 3M Board fav
Ans. Proximity of jute producing areas; inexpensive water transport supported by rail and road; abundant water for processing; cheap labour from WB, Bihar, Odisha, UP; Kolkata provides banking, insurance and port facilities for export.

Q10. Why is the sugar industry shifting to southern and western states? 3M Board fav
Ans. Cane there has higher sucrose content; cooler climate ensures a longer crushing season; cooperatives are more successful in these states (especially Maharashtra).

Q11. Distinguish between basic (key) industries and consumer industries. 2M
Ans. Basic: supply their products as raw materials to manufacture other goods, e.g. iron and steel, copper smelting, aluminium smelting. Consumer: produce goods for direct use by consumers, e.g. sugar, toothpaste, paper, sewing machines, fans.

Q12. Explain any three problems faced by the iron and steel industry in India. 3M
Ans. High costs and limited availability of coking coal; lower productivity of labour; irregular supply of energy; poor infrastructure. (Liberalisation and FDI have given a boost.)

Q13. What are agglomeration economies? 2M
Ans. Benefits industries get by locating near an urban centre and each other: market and services such as banking, insurance, transport, labour, consultants and financial advice; so many industries cluster together.

Q14. Mention three challenges faced by the jute industry. State the aims of the National Jute Policy 2005. 3M
Ans. Challenges: stiff competition from synthetic substitutes; competition from Bangladesh, Brazil, Philippines, Egypt, Thailand; loss of jute area to Bangladesh after Partition. NJP 2005: increase productivity, improve quality, ensure good prices to jute farmers, enhance yield per hectare.

Q15. What are the factors responsible for the location of aluminium smelting plants? Name two states having them. 2M
Ans. Regular supply of cheap electricity and an assured source of raw material (bauxite) at minimum cost. Odisha, West Bengal, Kerala, UP, Chhattisgarh, Maharashtra, Tamil Nadu (any two).

Long answer (5 marks)

Q16. Describe the various types of industrial pollution and suggest measures to control environmental degradation. 5M Board fav
Ans. Air: SO2, CO, smoke (control: electrostatic precipitators, fabric filters, scrubbers, oil or gas instead of coal). Water: effluents, dyes, acids, heavy metals like lead and mercury (control: reuse, recycling, rainwater harvesting, primary-secondary-tertiary treatment, regulate groundwater). Thermal: hot water into rivers (cool before release). Land: dumping of waste. Noise: hearing impairment (silencers, redesigned machinery, earplugs).

Q17. Classify industries on the basis of raw material, role, ownership and bulk, with examples. 5M

(contd.) Raw material: agro-based (cotton, jute, sugar, tea) and mineral-based (iron and steel, cement, aluminium). Role: basic/key (iron and steel) and consumer (sugar, toothpaste, fans). Capital: small and large scale. Ownership: public (BHEL, SAIL), private (TISCO, Bajaj Auto, Dabur), joint (OIL), cooperative (sugar in Maharashtra, coir in Kerala). Bulk: heavy (iron and steel) and light (electrical goods).

Q18. Why is the iron and steel industry called a basic industry? Why is it concentrated in the Chota Nagpur plateau? 5M Board fav

Ans. Basic: all other heavy, medium and light industries depend on it for machinery; also heavy, as raw materials and products are bulky. Uses iron ore, coking coal and limestone (4:2:1) and manganese. Chota Nagpur: low cost iron ore; high-grade raw materials close by; cheap labour; vast growth potential in home market; plants at Jamshedpur, Bokaro, Durgapur, Bhilai nearby.

Source based (4 marks)

Q19. "NTPC is a major power providing corporation in India. It has ISO certification for EMS (Environment Management System) 14001..." (i) What is NTPC certified for? (ii) Give two steps NTPC takes to protect the environment. (iii) Why are thermal plants a source of pollution? 4M

Ans. (i) ISO 14001 for its Environment Management System (ii) maximising ash utilisation; green belts; ash pond management and ash water recycling; online ecological monitoring (any two) (iii) burning coal releases smoke, SO_2, CO and fly ash; hot water drained into rivers causes thermal pollution.

Case based and competency (4 marks / 3 marks)

Q20. "India is the largest producer of raw jute and jute goods and stands at second place as an exporter after Bangladesh. The first jute mill was set up near Kolkata in 1855 at Rishra. After Partition in 1947, the jute mills remained in India but three-fourth of the jute producing area went to Bangladesh..." (i) Why did India face a problem after 1947? (ii) State two challenges of the jute industry today. (iii) Why is demand for jute expected to rise? 4M

Ans. (i) Mills stayed in India but most jute growing area went to East Pakistan (Bangladesh), so raw jute was short. (ii) Stiff competition from synthetic substitutes; competition from Bangladesh, Brazil, Philippines, Egypt, Thailand. (iii) Govt policy of mandatory use of jute packaging and growing global concern for eco-friendly, biodegradable materials.

Q21. "Industries are responsible for four types of pollution: air, water, land and noise... Thermal pollution of water occurs when hot water from factories and thermal plants is drained into rivers and ponds before cooling." (i) Name two sources of water pollution by industries. (ii) What harm does thermal pollution do? (iii) Suggest two ways to reduce industrial water pollution. 4M

Ans. (i) Paper, pulp, chemical, textile and dyeing industries, refineries, tanneries, electroplating (any two). (ii) It harms aquatic life (fish and plants in rivers and ponds). (iii) Reuse and recycle water in successive stages; treat hot water and effluents (primary, secondary, tertiary treatment) before releasing them; harvest rainwater.

Yaad rakho The first successful textile mill was set up in Mumbai in 1854.

Q22. Competency: A company wants to set up an aluminium smelting plant. Which two factors should decide its location? Suggest one suitable state. 3M

Ans. Aluminium smelting needs (i) a **regular supply of cheap electricity** and (ii) an **assured source of raw material (bauxite)** at minimum cost. A suitable state: Odisha (bauxite + power; also Chhattisgarh, WB, Kerala, UP, Maharashtra, TN have plants).

Q23. Competency: Why does the cotton textile industry produce world-class yarn but sell low-quality fabric? What problems does it face? 3M

Ans. Spinning is centralised and modern, so yarn is world-class, but weaving is highly decentralised (handloom, powerloom, mills) and cannot use much of this high-quality yarn, so it supplies lower quality fabric. Problems: erratic power supply, machinery that needs upgrading, low labour output, stiff competition from synthetic fibre.

Q24. How do agriculture and industry go hand in hand? Give three points. 3M

Ans. (i) Agro-industries depend on agriculture for raw materials (cotton, jute, sugarcane). (ii) Industries sell farmers irrigation pumps, fertilisers, insecticides, pesticides, PVC pipes, machines and tools. (iii) Industry raises agricultural productivity and makes production more efficient; it reduces dependence on farm income by giving jobs.

Q25. What is the role of the IT and electronics industry in India? Name the electronic capital of India. 3M

Ans. (i) Major source of employment (ii) foreign exchange through Business Process Outsourcing (BPO) (iii) software technology parks give single window service and high-speed data links; products range from TV and telephones to computers and radars. Electronic capital: **Bengaluru**.

Q26. Which industry is its own largest consumer? 1M
(a) Cement (b) Iron and steel (c) Chemical (d) Fertiliser

Ans. (c) Chemical industry

Q27. A: Most of the iron and steel industry is concentrated in the Chota Nagpur plateau. R: The region has low-cost iron ore, high-grade raw materials close by and cheap labour. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true, R explains A

Q28. "Industrial development and environment can go together." Explain with the example of NTPC and other control measures. 5M

Ans. (i) NTPC has ISO 14001 certification for its Environment Management System (ii) optimum use of equipment, latest technology, upgrading old plants (iii) minimising waste by maximising ash utilisation; green belts; ash pond management, ash water recycling, liquid waste management (iv) electrostatic precipitators, fabric filters, scrubbers; oil or gas instead of coal (v) water recycling, effluent treatment, rainwater harvesting; silencers for noise.

Q29. Why is the sugar industry seasonal, and why is it suited to the cooperative sector? 2M

Ans. Sugarcane is harvested and crushed only in one season, so mills work for a few months a year (seasonal). Small cane farmers can jointly own and run mills near their farms, sharing costs and profits, so cooperatives (as in Maharashtra) suit it.

Project / map pointing only
Ports + airports on map

LIFELINES OF NATIONAL ECONOMY

Syllabus note

CBSE 2026-27: this chapter is for the **Interdisciplinary Project**; in the board paper only its **map items (pointing)** come: major sea ports and international airports (see Map Work, Map J). Read these 2 pages once for the project and for general awareness.

Movement of goods and services from supply to demand locations needs **transport**; traders deliver products through it. Dense, efficient transport + communication = lifelines of the national economy. Today the world is a "large village" thanks to them.

Transport + Communication + Trade → Economic development

1. Roadways

India: one of the largest road networks in the world. **Why roads over railways?**

- → Lower construction cost; can cross dissected and undulating (hilly) terrain.
- → Negotiate steep gradients (Himalayas); economical for few persons and small amounts of goods over short distances.
- → Door-to-door service, so loading-unloading cost is lower; act as **feeder** to other modes (link railway stations, air and sea ports).

Road type	Built / maintained by + key facts
Golden Quadrilateral	6-lane super highways joining **Delhi-Kolkata-Chennai-Mumbai-Delhi**; by **NHAI** (National Highway Authority of India).
N-S and E-W corridors	N-S: **Srinagar to Kanyakumari**; E-W: **Silchar (Assam) to Porbandar (Gujarat)**.
National Highways	Link extreme parts of the country; **CPWD** (Central Public Works Department). Primary road system.
State Highways	Link state capital with district HQs; **State PWD**.
District Roads	Connect district HQ with other places; **Zila Parishad**.
Other (rural) roads	Link villages and towns; boost under **Pradhan Mantri Grameen Sadak Yojana**.
Border Roads	**Border Roads Organisation (1960)**; strategic roads in north and north-eastern border areas.

Road density = length of roads per 100 sq km of area. Problems: roads inadequate for traffic, about half are unmetalled (useless in rainy season), highways congested, bridges and culverts old and narrow.

Yaad karo: "N-S = SriKanya, E-W = SilPor"

Srinagar to **Kanya**kumari; **Sil**char to **Por**bandar. Road types by builder: "N-C, S-S, D-Z, B-B"

: NH-CPWD, State-State PWD, District-Zila Parishad, Border-BRO.

2. Railways

- → Principal mode for freight and passengers; also aids business, sightseeing, pilgrimage. **Largest public sector undertaking** in India; first train **Mumbai to Thane, 1853**.
- → Distribution depends on **physiographic, economic, administrative** factors: northern plains (flat, dense population, rich agriculture) = dense network; hilly terrain of the peninsula, Himalayas (high relief, sparse population) and Rajasthan desert, Gujarat swamps, forested MP, Chhattisgarh, Odisha, Jharkhand = few lines.
- → **Konkan railway** along the west coast made movement easier in a difficult stretch.
- → Problems: ticketless travel, theft and damage of railway property, unnecessary stopping by pulling chains.

3. Pipelines

Transport crude oil, petroleum products and natural gas from fields to refineries, fertiliser factories and thermal plants; even solids in slurry form. High initial cost but low running cost; no trans-shipment losses or delays.

- ★ Upper Assam oil fields to **Kanpur** (UP) via Guwahati, Barauni, Allahabad; branches Barauni-Haldia, Rajbandh-Maurigram, Guwahati-Siliguri.
- ★ **Salaya** (Gujarat) to **Jalandhar** (Punjab) via Viramgam, Mathura, Delhi, Sonipat; branch to Koyali (Vadodara).
- ★ Gas pipeline **Hazira-Vijaipur-Jagdishpur (HVJ)**: Mumbai High and Bassien gas fields to fertiliser, power and industrial plants in western and northern India.

4. Waterways

Cheapest means of transport; fuel-efficient and eco-friendly; good for heavy and bulky goods.

National Waterway	Stretch
NW 1	Ganga: Allahabad to Haldia (1620 km)
NW 2	Brahmaputra: Sadiya to Dhubri (891 km)
NW 3	West-Coast Canal, Kerala: Kottapuram to Kollam with Udyogamandal and Champakkara canals (205 km)

5. Major Sea Ports (map items!)

95% of India's foreign trade (by volume) moves by sea. India has 12 major and 200 notified non-major ports.

Port	Fact to remember
Kandla (Gujarat)	First port developed after Independence (Partition loss of Karachi); tidal port; renamed Deendayal Port.

Port	Fact to remember
Mumbai	Biggest port, spacious natural and well-sheltered harbour.
Jawaharlal Nehru	Planned to decongest Mumbai; hub port.
Marmagao (Goa)	Premier iron ore exporting port (about 50% of India's iron ore exports).
New Mangalore	Exports iron ore of Kudremukh mines.
Kochi (Kerala)	Extreme south-western port at the entrance of a lagoon, natural harbour.
Tuticorin (TN)	Extreme south-east; natural harbour, rich hinterland; trade with Sri Lanka, Maldives.
Chennai	One of the oldest artificial ports.
Visakhapatnam	Deepest landlocked and well-protected port.
Paradip (Odisha)	Specialises in export of iron ore.
Kolkata / Haldia	Kolkata: inland riverine port; Haldia developed as a subsidiary to ease pressure on it.

Yaad karo: coast ke saath ghoomo

West: **"Ka-Mu-Ma-NM-Ko"** = Kandla, Mumbai, Marmagao, New Mangalore, Kochi; south tip **Tuticorin**; East: **"Che-Vi-Pa-Ha"** = Chennai, Visakhapatnam, Paradip, Haldia.

Meme samjho

Reporter: "Kandla, aap itne special kyun?"
Kandla: "Partition mein Karachi port chala gaya, tab mujhe banaya gaya!"
Asli baat: Kandla (Gujarat) was the first port developed after Independence to ease the loss of Karachi port; a tidal port.

6. Airways

Fastest, most comfortable, prestigious mode; covers difficult terrain (high mountains, deserts, forests, long oceanic stretches). Air India (international) and others; Pawanhans Helicopters for ONGC offshore and hilly areas. Not within reach of common people. International airports on map: **Amritsar, Delhi, Mumbai, Chennai, Kolkata, Hyderabad.**

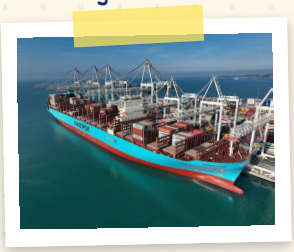

7. Communication, Trade, Tourism

→ **Personal:** India Post handles parcels and personal written communication. **First class mail** (cards, envelopes; airlifted, land + air). **Second class mail** (book packets, registered newspapers, periodicals; surface mail by land and water). Six mail channels: Rajdhani, Metro, Green, Business, Bulk mail, Periodical.

→ India has one of the largest telecom networks in Asia; STD facility. **Mass communication:** radio, TV, newspapers, films; **Akashvani**, Doordarshan; India is the largest producer of feature films; Central Board of Film Certification.

→ **International trade** = exchange of goods among countries; the economic barometer of a country. **Balance of trade** = difference between exports and imports: **favourable** if exports exceed imports, **unfavourable** if imports exceed exports.

→ **Tourism as a trade:** grown over decades; employs lakhs directly; promotes national integration, supports handicrafts and cultural pursuits, earns foreign exchange. Types: heritage, eco, adventure, cultural, medical, business tourism.

Container cargo at a sea port: about 95% of India's foreign trade by volume goes by sea

Most Important Questions

Project + map practice | answers green mein

Quick practice (periodic test / project)

Q1. Which is the first port developed after Independence? 1M
Ans. Kandla (Deendayal Port), Gujarat.

Q2. Which port is the premier iron ore exporting port of India? 1M
Ans. Marmagao (Goa).

Q3. Name the authority that builds and maintains the Golden Quadrilateral. 1M
Ans. National Highway Authority of India (NHAI).

Q4. Why are roadways still important in spite of railways? Give three reasons. 3M
Ans. Low construction cost; can cross hilly, dissected terrain and steep gradients; economical for few persons and small loads over short distances; door-to-door service; feeder to railways, ports and airports.

Q5. What is balance of trade? When is it favourable? 2M
Ans. Difference between a country's exports and imports; favourable when the value of exports exceeds the value of imports.

Q6. "Waterways are the cheapest means of transport." Explain with the national waterways. 3M
Ans. Fuel-efficient, eco-friendly, best for heavy bulky goods. NW1 Ganga Allahabad-Haldia (1620 km), NW2 Brahmaputra Sadiya-Dhubri (891 km), NW3 West Coast Canal Kerala Kottapuram-Kollam (205 km).

Q7. Distinguish between first class and second class mail. 2M
Ans. First class: cards and envelopes, airlifted between stations (land and air). Second class: book packets, registered newspapers and periodicals, carried by surface mail (land and water).

Q8. Why is the density of railways low in the Himalayan region and Rajasthan? 2M
Ans. Himalayas: high relief, sparse population, lack of economic opportunities. Rajasthan: sandy desert plains; also swampy Gujarat and forested central India are difficult for laying lines.

Q9. Name the pipeline that carries gas from Mumbai High and Bassien to northern India. 1M
Ans. Hazira-Vijaipur-Jagdishpur (HVJ) gas pipeline.

MAP WORK History Ch2 + Geography (CBSE 2026-27 list)

Map question = direct marks
Locate + identify on outline map

ALL MAPS IN ONE PLACE

Map marking rules (full marks)

- ✓ Sharp pencil: a small dot or the asked symbol exactly at the place; name neatly beside it with pen.
- ✓ Coastal items (ports, Tarapur, Kalpakkam, Mumbai High offshore) must touch the coast / sit in the sea.
- ✓ Learn by state: e.g. Gujarat = Kheda, Ahmedabad, Dandi, Kandla, Kalol, Ankaleshwar, Kakrapara, Surat, Gandhinagar, Sardar Sarovar.
- ✓ Identify questions: name written on the blank line given; spelling counts.

CBSE 2026-27 map list (locate / identify)

History Ch2: INC sessions Calcutta (Sep 1920), Nagpur (Dec 1920), Madras (1927); Champaran (indigo planters), Kheda (peasant satyagraha), Ahmedabad (cotton mill workers), Amritsar (Jallianwala Bagh), Dandi (Civil Disobedience).

Geo Ch1: major soil types (identify). **Ch3:** dams Salal, Bhakra Nangal, Tehri, Rana Pratap Sagar, Sardar Sarovar, Hirakud, Nagarjuna Sagar, Tungabhadra. **Ch4:** major rice and wheat areas; largest producer states of sugarcane, tea, coffee, rubber, cotton, jute (identify).

Ch5: iron ore: Mayurbhanj, Durg, Bailadila, Bellary, Kudremukh | coal: Raniganj, Bokaro, Talcher, Neyveli | oil: Digboi, Naharkatia, Mumbai High, Bassien, Kalol, Ankaleshwar | thermal: Namrup, Singrauli, Ramagundam | nuclear: Narora, Kakrapara, Tarapur, Kalpakkam.

Ch6: cotton textile: Mumbai, Indore, Surat, Kanpur, Coimbatore | iron and steel: Durgapur, Bokaro, Jamshedpur, Bhilai, Vijayanagar, Salem | software parks: Noida, Gandhinagar, Mumbai, Pune, Hyderabad, Bengaluru, Chennai, Thiruvananthapuram.

Ch7 (pointing only): ports Kandla, Mumbai, Marmagao, New Mangalore, Kochi, Tuticorin, Chennai, Visakhapatnam, Paradip, Haldia | airports Amritsar, Delhi, Mumbai, Chennai, Kolkata, Hyderabad.

Yaad karo: nuclear plants "NaKa TaKa"

Narora (UP), **Ka**krapara (Gujarat), **Ta**rapur (Maharashtra), **Ka**lpakkam (Tamil Nadu). Thermal "NaSi Ram": **Na**mrup, **Si**ngrauli, **Ra**magundam.

Locate tip: dams Follow the river: Salal on Chenab (J and K), Bhakra Nangal on Satluj, Tehri on Bhagirathi, Hirakud on Mahanadi, Nagarjuna Sagar on Krishna.

Locate tip: oil Digboi and Naharkatia sit in upper Assam (far north-east); Kalol and Ankaleshwar near the Gulf of Khambhat; Mumbai High is offshore in the Arabian Sea.

Locate tip: coal Raniganj and Bokaro lie in the Damodar valley (Gondwana coal); Neyveli in Tamil Nadu is lignite; Talcher is in Odisha.

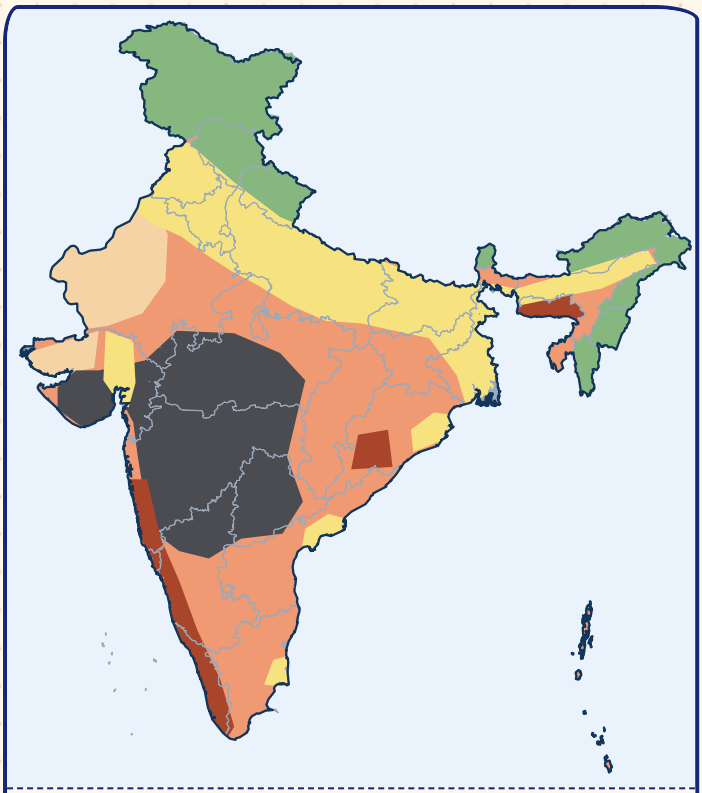

Map A History Ch2: INC sessions and places of the national movement.

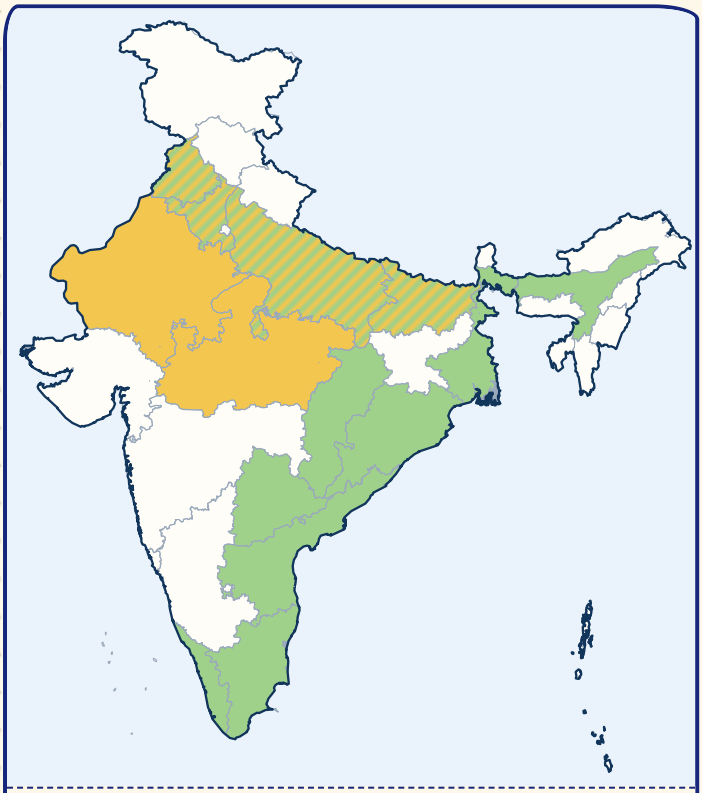

Map B Geography Ch3: the 8 dams (triangles).

Locate tip: nuclear Tarapur (Maharashtra coast, north of Mumbai), Kalpakkam (Tamil Nadu coast, south of Chennai), Narora (UP, on the Ganga), Kakrapara (Gujarat, near Surat).

Map C Geography Ch1: major soil types (identification).

Alluvial | Black (regur) | Red and yellow | Laterite | Arid | Forest and mountain

Map D Geography Ch4: rice (green), wheat (gold), both (striped).

Locate tip: iron ore Bailadila (Chhattisgarh, south) gives the finest hematite; Kudremukh (Karnataka, Western Ghats) exports ore via New Mangalore port.

Locate tip: software parks South-heavy list: Bengaluru, Chennai, Hyderabad, Thiruvananthapuram; west: Mumbai, Pune, Gandhinagar; north: Noida only.

Map E Largest producer states: sugarcane, tea, coffee, rubber, cotton, jute.

Map F Geography Ch5: iron ore mines.

Locate tip: ports West coast north to south: Kandla, Mumbai, Marmagao, New Mangalore, Kochi; east coast south to north: Tuticorin, Chennai, Visakhapatnam, Paradip, Haldia.

Locate tip: History Champaran is in north Bihar (Nepal border); Kheda between Ahmedabad and Vadodara; Dandi on the south Gujarat coast near Navsari.

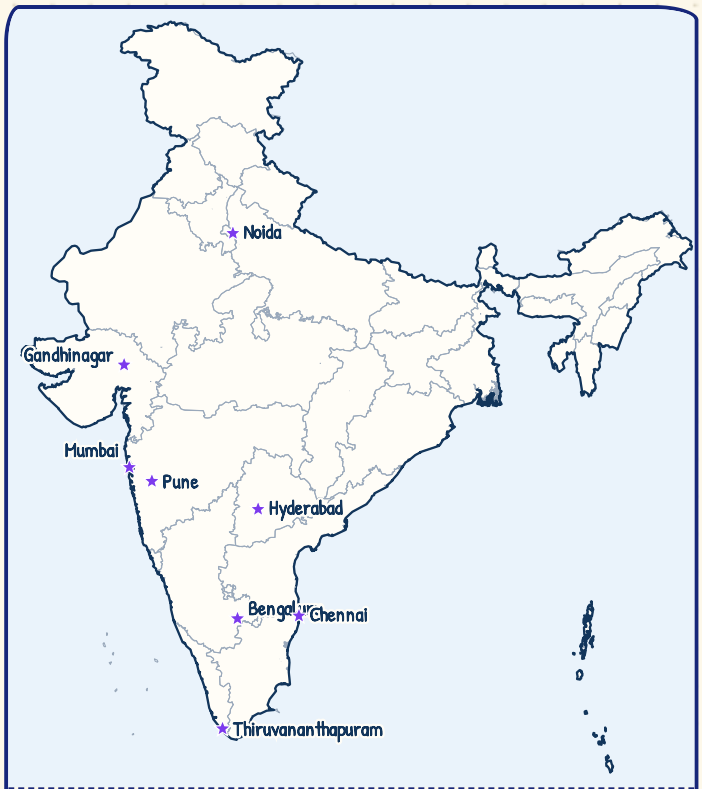

Map G Coal mines (square), oil fields (blue dot), thermal (triangle), nuclear (star).

Map H Geography Ch6: cotton textile (blue dot), iron and steel (square).

Identify tip: soils Black soil = Deccan plateau (Maharashtra, MP, Gujarat); laterite = Western Ghats and hilly Odisha; arid = western Rajasthan; alluvial = northern plains.

Airports Amritsar, Delhi, Mumbai, Chennai, Kolkata, Hyderabad.

Map I Software technology parks.

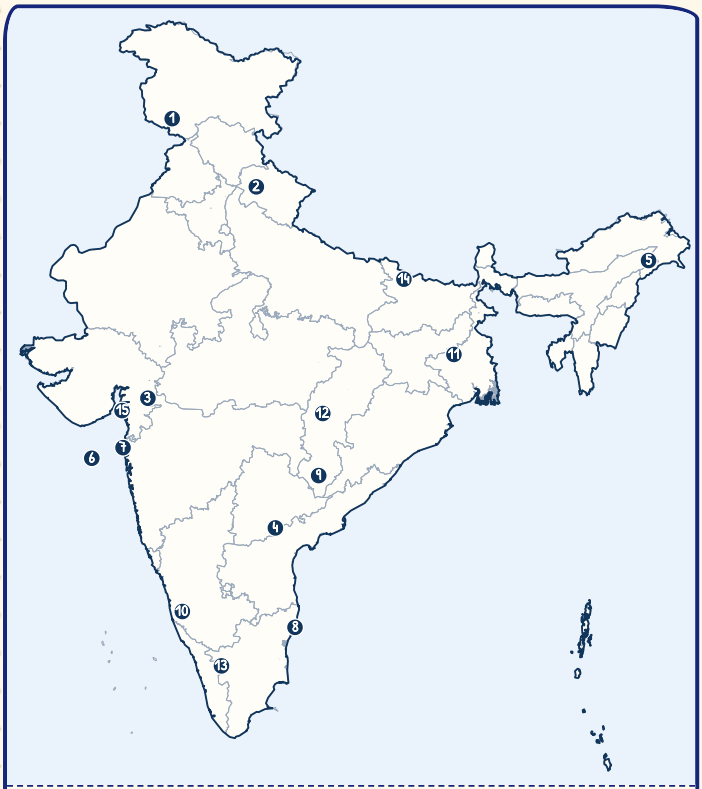

Map J Major ports (blue dot) and international airports (A). Mumbai and Chennai have both a port and an airport.

State-wise: sab map items ek table mein

State	Map items
J and K	Salal dam
Himachal / Punjab	Bhakra Nangal dam; Amritsar (Jallianwala Bagh, airport)
Uttarakhand	Tehri dam
Rajasthan	Rana Pratap Sagar dam

State	Map items
Gujarat	Kheda, Ahmedabad, Dandi; Sardar Sarovar; Kalol, Ankaleshwar (oil); Kakrapara (nuclear); Surat (cotton); Gandhinagar (STP); Kandla (port)
Maharashtra	Mumbai (port, airport, cotton, STP); Mumbai High, Bassien (oil); Tarapur (nuclear); Pune (STP); Nagpur (INC 1920)
Madhya Pradesh	Indore (cotton); Singrauli (thermal)
Uttar Pradesh	Narora (nuclear); Kanpur (cotton); Noida (STP)
Delhi	International airport
Bihar	Champaran
Jharkhand	Bokaro (coal, iron and steel); Jamshedpur (iron and steel)
West Bengal	Calcutta (INC 1920, airport); Raniganj (coal); Durgapur (steel); Haldia (port)
Odisha	Mayurbhanj (iron ore); Talcher (coal); Hirakud dam; Paradip (port)
Chhattisgarh	Durg, Bailadila (iron ore); Bhilai (iron and steel)
Assam	Digboi, Naharkatia (oil); Namrup (thermal)
Telangana / AP	Ramagundam (thermal); Hyderabad (STP, airport); Nagarjuna Sagar dam; Visakhapatnam (port)
Karnataka	Bellary, Kudremukh (iron ore); Tungabhadra dam; Vijayanagar (steel); Bengaluru (STP); New Mangalore (port)
Goa / Kerala	Marmagao (port) | Kochi (port); Thiruvananthapuram (STP)
Tamil Nadu	Madras (INC 1927) = Chennai (port, airport, STP); Neyveli (coal); Kalpakkam (nuclear); Coimbatore (cotton); Salem (steel); Tuticorin (port)

Practice Cover the answers: identify the 15 numbered places, then check.

Map practice: apne galat items yahan likho

Practice map answers

1 Salal dam, 2 Tehri dam, 3 Sardar Sarovar dam, 4 Nagarjuna Sagar dam, 5 Digboi oil field, 6 Mumbai High, 7 Tarapur (nuclear), 8 Kalpakkam (nuclear), 9 Bailadila (iron ore), 10 Kudremukh (iron ore), 11 Raniganj (coal), 12 Bhilai (iron and steel), 13 Coimbatore (cotton textile), 14 Champaran, 15 Dandi.

Practice 2 Locate and label: Rana Pratap Sagar, Tungabhadra, Narora, Singrauli, Talcher, Mayurbhanj, Kalol, Bokaro, Kanpur, Vijayanagar, Gandhinagar, Madras (INC 1927), Nagpur (INC 1920), Kheda, Amritsar. Check with Maps A to I.

Textile cities Mumbai, Indore, Surat, Kanpur, Coimbatore.

Map practice: apne galat items yahan likho

Most asked: Belgium vs Sri Lanka, reasons, 4 forms of power sharing

POWER-SHARING

Two countries with more than one language community: **Belgium shared power**, **Sri Lanka chose majority rule**. Results opposite: that is the lesson of the chapter.

1. Belgium: The Story

Small European country, area smaller than Haryana; borders **France, Netherlands, Germany, Luxembourg**; population a little over 1 crore.

Community	Country	Brussels (capital)
Dutch (Flemish region)	59%	20%
French (Wallonia)	40%	80%
German	1%	-

→ French-speaking minority was **rich and powerful**; Dutch speakers got the benefit of economic development and education much later: resentment.

→ Dutch = **majority in the country**, minority in Brussels. Tensions peaked in the **1950s and 1960s**, sharper in Brussels.

Accommodation in Belgium (Belgian model)

Constitution amended four times between 1970 and 1993:

1. Number of **Dutch and French-speaking ministers shall be equal** in the central government; some special laws need the support of the majority of members from each linguistic group: **no single community can take decisions unilaterally**.
2. Many powers of the central government given to **state governments** of the two regions; state governments are not subordinate to the central government.
3. **Brussels** has a separate government with **equal representation** of both communities (French accepted equality in Brussels as the Dutch accepted equality at the centre).
4. **Community government**: a third kind, elected by people of one language community (Dutch, French, German) **wherever they live**; power on cultural, educational and language issues.

↳ Model complicated hai, par civic strife aur partition dono ruk gaye. Brussels = headquarters of the European Union.

Yaad karo: Belgian model = "Chalo Sab Barabar Chalein" (C-S-B-C)

Centre: equal Dutch and French ministers | State govts not subordinate to Centre | Brussels: separate govt, equal representation | Community govt: elected by one language community (culture, education, language).

2. Sri Lanka: Majoritarianism

Island nation off Tamil Nadu; population about 2 crore. **Sinhala 74%, Tamil 18%** (**Sri Lankan Tamils 13%**, Indian Tamils 5%: brought as plantation workers in the colonial period). Sri Lankan Tamils concentrated in the **north and east**. Most Sinhala = **Buddhist**; most Tamils = Hindu or Muslim; ~7% Christians (both).

Majoritarianism

Belief that the **majority community should rule** a country in whichever way it wants, disregarding the wishes and needs of the minority.

1948 independence; Sinhala leaders dominate government by virtue of majority

↓

1956 Act: Sinhala the only official language, disregarding Tamil

↓

Preference to Sinhala applicants for **university positions and government jobs**; Constitution: state shall **protect and foster Buddhism**

↓

Tamils felt alienated: parties demanded Tamil as official language, regional autonomy, equal opportunity; denied repeatedly

↓

By 1980s: demand for independent **Tamil Eelam** (north, east)

↓

Civil war: thousands killed, many refugees; ended in **2009**

Point	Belgium	Sri Lanka
Approach	Accommodation, power sharing	Majoritarianism
Language	Dutch and French equal	Sinhala only (1956)
Minority	Equal ministers, community govt	Denied jobs, seats, language
Result	Unity, peace, EU headquarters	Alienation, civil war (till 2009)

Meme samjho

Sri Lanka: "Majority ki baat maano, sab theek ho jayega." Result: distrust aur civil war. **Hain? Ye kaise ho gaya?**

Asli baat: Majoritarian measures (Sinhala as the only official language, 1956; preferences in jobs and universities; Buddhism protected) alienated the Tamils and led to a civil war.

3. Why is Power Sharing Desirable?

Prudential reason

Based on **careful calculation of gains and losses**. Reduces the possibility of **conflict** between social groups; social conflict leads to violence and instability, so power sharing ensures stability of political order. Tyranny of the majority harms the majority too in the long run.

Moral reason

Power sharing is the **very spirit of democracy**. People affected by policies must be consulted and have a say. A **legitimate government** is one where citizens, through participation, acquire a **stake in the system**. Valuable in itself.

4. Forms of Power Sharing

Old idea: undivided power in one person or group. Democracy: power **shared among many**, people = source of all political power, self-government through institutions.

Form	Meaning + example
1. Among organs (horizontal)	Legislature, executive, judiciary at the **same level**; none has unlimited power: **checks and balances**. Ministers answerable to Parliament; judges appointed by the executive can check it.
2. Among levels (vertical)	General government for the whole country (**Union**) + governments at provincial level (**State**): **federal government**. India also has local government (municipality, panchayat).
3. Among social groups	Religious and linguistic groups: **community government** in Belgium; **reserved constituencies** in India for socially weaker sections and women.
4. Among parties, pressure groups, movements	Competition among parties ensures power does not stay in one hand; **coalition government** (alliance of two or more parties); interest groups of traders, businessmen, industrialists, farmers, workers influence decisions.

Exam Alert

Belgium has **both** horizontal (equal ministers) and vertical (regional govts) sharing; community govt = sharing among **social groups**. "Belgium adopted majoritarianism" is always wrong. Sri Lankan Tamils = **13%**, all Tamils 18%.

Key terms

Ethnic: social division based on shared culture (common descent). **Civil war:** violent conflict between opposing groups within a country, so intense it looks like a war. **Prudence:** careful calculation of gains and losses. **Coalition government:** government of two or more parties. **Federal government:** general government for the whole country + governments at provincial or regional level.

Power sharing in India (examples)

- → **Horizontal:** Parliament makes laws, executive implements, Supreme Court can strike down unconstitutional laws.
- → **Vertical:** Union government, state governments, and local governments (panchayats, municipalities; made constitutional in 1992).
- → **Social groups:** reserved constituencies for SCs, STs and women (local bodies).
- → **Parties:** coalition governments at the centre and in states; pressure groups of farmers, workers, traders.

Yaad karo: "O-L-S-P"

Organs, **L**evels, **S**ocial groups, **P**arties: 4 forms. Har form ke saath ek example, 5 marks pakke. Belgium = **4 moves**, Sri Lanka = **1956**, war ended **2009**.

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. What percentage of Belgium's population speaks French? 1M Board fav

(a) 59% (b) 80% (c) 40% (d) 1%

Ans. (c) 40%.

Q2. Which Act of 1956 in Sri Lanka made Sinhala the only official language? 1M

Ans. The Act of 1956 (Sinhala Only Act) recognised Sinhala as the only official language, disregarding Tamil.

Q3. **A:** Belgium amended its Constitution four times between 1970 and 1993. **R:** Its leaders wanted to accommodate the regional differences and cultural diversities. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q4. "Power sharing reduces the possibility of conflict between social groups." This is a: 1M Board fav

(a) Prudential reason (b) Moral reason (c) Legal reason (d) Economic reason

Ans. (a) Prudential reason.

Q5. Power shared among legislature, executive and judiciary is called: 1M

Ans. Horizontal distribution of power (checks and balances).

Q6. **A:** In a democracy, power should be concentrated in one organ for quick decisions. **R:** People are the source of all political power in a democracy. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (d) A false (power is shared to avoid concentration), R true.

Short answer (2-3 marks)

Q7. What is majoritarianism? How did it affect Sri Lanka? 3M Board fav

Ans. Belief that the majority community should rule in

(contd.) whichever way it wants, ignoring minorities. Sri Lanka: 1956 Sinhala-only Act, preference to Sinhalas in jobs and universities, state to protect Buddhism; Tamils alienated, demanded Tamil Eelam; civil war till 2009.

Q8. Describe any three elements of the Belgian model of accommodation. 3M Board fav

Ans. (i) Equal number of Dutch and French ministers at the centre; no community decides alone (ii) state governments of regions with powers, not subordinate to the centre (iii) Brussels government with equal representation (iv) community government for cultural, educational and language issues.

Q9. Give the prudential and moral reasons for power sharing. 3M Board fav

Ans. Prudential: reduces conflict between social groups, ensures political stability; majority tyranny harms all. Moral: spirit of democracy; people affected must have a say; legitimate government gives citizens a stake in the system.

Q10. Why did the Sri Lankan Tamils feel alienated? State their demands. 3M

Ans. Alienated by Sinhala-only Act, job and university preferences for Sinhalas, state support for Buddhism; felt constitution denied equal rights. Demands: Tamil as official language, regional autonomy, equal opportunity in education and jobs; later independent Tamil Eelam.

Q11. Explain "checks and balances" with an example. 2M

Ans. Organs at the same level (legislature, executive, judiciary) exercise different powers and check each other; e.g. ministers are answerable to Parliament; judges appointed by the executive can check its functioning.

Q12. Why is power sharing called the very spirit of democracy? 2M

Ans. Democracy means rule by the people; people affected by policies must be consulted and have a say; citizens acquire a stake in the system through participation, which makes the government legitimate.

Q13. How is power shared among political parties, pressure groups and movements? 3M

Ans. Competition among parties ensures power keeps changing hands; when no party wins a majority, two or more parties form a coalition government and share power; pressure groups and movements of traders, farmers, workers influence decisions through participation in committees and protests.

Q14. Distinguish between horizontal and vertical division of power. 3M Board fav

Ans. Horizontal: among organs at the same level (legislature, executive, judiciary); checks and balances; e.g. ministers answerable to Parliament. Vertical: among governments at different levels (Union, state, local); higher and lower levels; e.g. federal division in India and Belgium.

Q15. What caused tension between Dutch and French speakers in Belgium? 2M

Ans. The French-speaking minority was richer and more powerful; Dutch speakers got economic development and (contd.) education later and resented it; Dutch were a majority in the country but a minority in Brussels. Tension peaked in the 1950s-60s.

Long answer (5 marks)

Q16. Describe the different forms of power sharing in modern democracies with examples. 5M Board fav

Ans. (i) Horizontal: among legislature, executive, judiciary; checks and balances (ii) vertical: Union, state, local governments (federal) (iii) among social groups: community government in Belgium, reserved constituencies in India (iv) among parties, pressure groups and movements: competition, coalition governments (v) interest groups (traders, farmers, workers) influence decisions.

Q17. Compare the ways in which Belgium and Sri Lanka dealt with diversity. 5M

Ans. Belgium: (i) recognised regional and cultural diversity (ii) four amendments 1970-93: equal ministers, regional govts, Brussels govt, community govt (iii) avoided civic strife, stayed united. Sri Lanka: (iv) majoritarian measures from 1956: Sinhala only, preferences, Buddhism (v) Tamil alienation, Tamil Eelam demand, civil war till 2009. Lesson: accommodation keeps a country united.

Q18. "Power sharing is good for democracy." Justify with reference to Belgium and Sri Lanka. 5M

Ans. (i) Reduces conflict between groups (prudential): Belgium avoided civic strife, Sri Lanka slid into civil war (ii) ensures political stability (iii) majority tyranny harms the majority too: Sri Lanka lost thousands of lives, economy hurt (iv) spirit of democracy: people affected get a say (moral) (v) legitimacy: citizens get a stake; Belgium's community and Brussels governments kept all groups loyal.

Source based (4 marks)

Q19. "Belgium is a small country in Europe... 59 per cent lives in the Flemish region and speaks Dutch, 40 per cent lives in Wallonia and speaks French..." (i) Why was there tension in Brussels? (ii) How was Brussels' problem solved? (iii) Name the third kind of government in Belgium. 4M

Ans. (i) Dutch were a majority in the country but a minority in Brussels; the French minority was richer and powerful (ii) separate government for Brussels with equal representation of both communities (iii) community government (cultural, educational, language issues).

Q20. "A series of majoritarian measures were adopted to establish Sinhala supremacy... The distrust between the two communities turned into widespread conflict." (i) Name one majoritarian measure. (ii) What did Tamil parties demand? (iii) What was the result for the country? 4M

Ans. (i) 1956 Act: Sinhala the only official language (or job/university preference, state protection of Buddhism) (ii) Tamil as official language, regional autonomy, equal opportunity; later independent Tamil Eelam (iii) civil war: thousands killed, many families refugees, huge loss to social, cultural and economic life; ended in 2009.

Most asked: features, 3 lists, coming vs holding, language policy, 1992 amendment

FEDERALISM

1. What is Federalism?

Key term: Federalism

A system of government in which power is divided between a central authority and its various constituent units. Usually two levels: one for the **entire country** (subjects of common national interest) and one at the level of **provinces or states** (day-to-day administering of their area). Both levels enjoy power **independent of each other**.

Unitary system	Federal system
Only one level of govt, or sub-units **subordinate** to the centre; centre can pass orders to them. e.g. **Sri Lanka**, UK.	Centre **cannot order** the state govt to do something; state govt has powers of its own, not answerable to the centre. e.g. **India, USA**; Belgium became federal in **1993**.

2. Key Features of Federalism

1. There are **two or more levels (tiers)** of government.
2. Different tiers govern the **same citizens**, but each has its own **jurisdiction** in specific matters of legislation, taxation and administration.
3. Jurisdictions are **specified in the constitution**: existence and authority of each tier constitutionally guaranteed.
4. Fundamental provisions of the constitution cannot be unilaterally changed by one level; changes need consent of both.
5. **Courts** interpret the constitution and powers of different levels; highest court = **umpire** in disputes.
6. Sources of revenue for each level clearly specified: **financial autonomy**.
7. **Dual objective**: safeguard and promote unity of the country + accommodate **regional diversity**. Two aspects crucial: mutual trust and agreement to live together.

↳ Ideal balance of power differs: federalism ka asli kaam = trust + "saath rehne ka agreement".

Yaad karo: 7 features = "Lucky Jeet Gaya, Ab CFO bana"

Levels: 2 or more | Jurisdiction of each level specified | Guaranteed by constitution | Amendment needs consent of both levels | Courts act as umpire | Financial autonomy: own sources of revenue | Objectives: unity of the country + accommodate regional diversity.

3. Two Routes to a Federation

Coming together	Holding together
Independent states **come together on their own** to form a bigger unit; pool sovereignty, retain identity, increase security.	A **large country decides to divide its power** between constituent states and the national government.
All units usually have **equal power**; strong vis-a-vis the federal government.	Central govt tends to be **more powerful**; units may have **unequal powers** (some get special powers).
USA, Switzerland, Australia	India, Spain, Belgium

Meme samjho

Coming together: "Chalo sab states milke ek bada desh banate hain" (USA, Switzerland). Holding together: "Bada desh hai, power states mein baant do" (India, Spain, Belgium). *Smart move!*

Asli baat: In coming together federations states are usually equally powerful; in holding together ones the Centre tends to be more powerful and some units get special powers.

4. What Makes India a Federal Country?

Constitution declared India a **Union of States**; not using the word federation, but based on federal principles. Originally **two tiers** (Union + State); third tier (**panchayats and municipalities**) added in **1992**. Each tier enjoys separate jurisdiction.

Union Govt (whole country) → **State Govts** (each state) →

Local Govts (panchayats, municipalities (1992))

Key terms

Jurisdiction: the area over which someone has legal authority (geographic boundaries or kinds of subjects). **Residuary subjects:** subjects not in any of the three lists. **Union Territory:** area run directly by the Union govt. **Coalition government:** govt formed by two or more parties. **Gram Sabha:** all voters of a village.

Three-fold distribution of legislative powers

List	Subjects	Who makes laws
Union List	National importance: **defence, foreign affairs, banking, communications, currency**; uniform policy needed	Union govt only
State List	State and local importance: **police, trade, commerce, agriculture, irrigation**	State govts only
Concurrent List	Common interest: **education, forest, trade unions, marriage, adoption, succession**	Both; in conflict Union law prevails
Residuary	Subjects in no list, came up later, e.g. **computer software**	Union govt

- → **Holding together** federation: not all states have identical powers. Some states like **Assam, Nagaland, Arunachal Pradesh, Mizoram** enjoy special powers under **Article 371** (peculiar social and historical circumstances): protection of **land rights of indigenous peoples**, their culture, preferential government employment. Non-residents cannot buy land or house there.
- → **Union Territories**: areas too small to become independent states and could not be merged; no powers of a state; Union govt has special powers to run them, e.g. **Chandigarh, Lakshadweep, Delhi**.
- → Sharing of power cannot be changed unilaterally: change needs both Houses of Parliament with at least two-thirds majority + ratification by at least **half of the State legislatures**.
- → **Judiciary** (High Courts, Supreme Court) supervises implementation; settles disputes about division of powers.
- → Union and State govts can raise resources by levying **taxes**.

Yaad karo

Union = **desh ki suraksha aur paisa** (defence, foreign, banking, currency). State = **roz ka kaam** (police, agriculture, irrigation, trade). Concurrent = **parivar aur padhai** (marriage, adoption, education). Clash = Union jeetega.

5. How is Federalism Practised?

Constitutional provisions necessary, but the real success of federalism in India = nature of democratic politics: **respect for diversity, desire for living together**.

(a) Linguistic states

- → **First and major test** for democratic politics. After 1947 boundaries of old states changed so that people speaking the **same language** lived in the same state (1956 onwards).
- → Some states created on **culture, ethnicity or geography**, not language: **Nagaland, Uttarakhand, Jharkhand**.
- → Many leaders feared disintegration; Centre resisted for a while. Experience: country became more united, administration easier.

(b) Language policy

- → Constitution gave **no national language** status to any one language. **Hindi = official language**, but mother tongue of only about **40%** of Indians.
- → Besides Hindi, 22 Scheduled Languages (Eighth Schedule). Central govt exam candidates may write in any of them. States have their own official languages; govt work in the state's language.
- → English was to stop for official purposes in **1965**; non-Hindi states (esp. **Tamil Nadu**, movement turned violent) demanded it continue: Centre agreed to continue **English along with Hindi**.
- → Promotion of Hindi continues, but govt **cannot impose** it on non-Hindi states. Flexibility avoided a Sri Lanka-type situation.

Shivam Bhaiya says

Sri Lanka ne ek language thopi (Sinhala only, 1956) to civil war hua. India ne **22 languages** ko jagah di aur Hindi **impose nahi** ki: yahi flexibility India ko united rakhti hai. Case-based mein ye comparison likho, examiner khush!

(c) Centre-State relations

Long period: **same party** ruled Centre and most states: states did not use rights as autonomous units

↓

Different party in a state: Centre often misused the Constitution to dismiss rival state governments

↓

After 1990: rise of **regional parties**, era of **coalition governments** at the Centre

↓

New culture of power sharing and respect for state autonomy; **Supreme Court judgement** made arbitrary dismissal of state govts difficult

↳ Aaj federal power sharing zyada effective hai jitna Constitution ke shuru mein tha.

6. Decentralisation in India

Decentralisation

When power is taken away from Central and State governments and given to local government. Idea: many problems best settled locally; people know local needs; **direct participation** in decision-making; local self-government.

Before 1992: local govts under direct control of state govts; elections not held regularly; no own powers or resources.

Before 1992	After 1992 amendment
Local govts under direct control of state govts	Constitutional status; third tier
Elections irregular, often postponed	Regular elections mandatory (State Election Commission)
No powers or resources of their own	States to share powers and revenue
Few women, weaker sections	At least 1/3 seats for women; SC, ST, OBC reservation

1992 Constitutional Amendment (make the 3rd tier powerful)

1. Constitutionally **mandatory to hold regular elections** to local bodies.
2. Seats reserved in elected bodies and executive heads for **SCs, STs and OBCs**.
3. At least one-third of all positions reserved for women.
4. An independent **State Election Commission** in each state conducts panchayat and municipal elections.
5. State govts must **share some powers and revenue** with local bodies; nature varies across states.

Gram Sabha: all voters of the village; meets at least twice or thrice a year; approves annual budget, reviews the panchayat

↓

Gram Panchayat (village / group of villages): ward members (**panch**) + president (**sarpanch**), elected by all adults; decision-making body

↓

Panchayat Samiti (block / mandal): members elected by all panchayat members of the area

↓

Zilla Parishad (district): most members elected; Lok Sabha MPs, MLAs of the district and some officials also members; chairperson = political head

Rural (Panchayati Raj)	Urban
Gram Panchayat, Panchayat Samiti, Zilla Parishad	**Municipalities** (towns), **Municipal Corporations** (big cities); elected representatives; political head of a corporation = **Mayor**; municipal chairperson in towns

Gains

Largest experiment in democracy anywhere; women's representation boosted; deepened democracy, local participation.

Problems

Gram sabhas not held regularly; most states have **not transferred significant powers and resources**; far from the ideal of self-government.

Local government today: NCERT facts

- → About **36 lakh elected representatives** in panchayats and municipalities: bigger than the population of many countries.
- → **Constitutional status** for local govt has helped to **deepen democracy** in India.
- → Reservation for women gave them **voice and confidence**; more women in power than ever before.
- → **Idea behind decentralisation:** many problems and issues are best settled at the local level; people have better knowledge of their own problems; local govt makes **direct participation** in decision-making possible.

Yaad karo: 1992 amendment = "ERWSS"

Elections regular | Reservation for SC, ST, OBC | Women: at least 1/3 | State Election Commission | Sharing of powers and revenue. Line: "*Ek Rupaye Wala Samosa Sasta*".

Belgium (Ch 1 link)	Sri Lanka (Ch 1 link)
Became **federal in 1993**; regional govts got constitutional powers; community govt for language groups	Remains a **unitary** system in practice; national govt has all the power; majoritarian measures led to civil war
Accommodation kept the country united	Denial of autonomy to Tamils caused conflict

Do you know? Residuary subjects (e.g. computer software) come under the Union Government.

1 minute revision

- **Federalism** = centre + units, each independent in its own field; 7 features
- **Coming together**: USA, Switzerland, Australia; **Holding together**: India, Spain, Belgium
- **Lists**: Union, State, Concurrent (Union wins), Residuary (Union)
- **Change**: 2/3 both Houses + half the states; courts = umpire
- **Practice**: linguistic states (1956), language policy (22, English after 1965), coalition era after 1990
- **1992**: elections, reservation, 1/3 women, SEC, sharing powers and revenue

Exam Alert

India = **holding together**. Concurrent conflict = **Union law prevails**. Residuary = **Union**. Amendment = **2/3 of both Houses + half the states**. Women = **at least 1/3**. Hindi = official language, **not national**.

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which of these is an example of a "holding together" federation? 1M Board fav

(a) USA (b) Switzerland (c) India (d) Australia

Ans. (c) India.

Q2. In case of a conflict over a subject in the Concurrent List, whose law prevails? 1M Board fav

Ans. The Union government's law.

Q3. Under which list does "computer software" come? 1M

(a) Union List (b) State List (c) Concurrent List (d) Residuary

Ans. (d) Residuary subjects (Union legislates).

Q4. **A:** India has no national language. **R:** The Constitution recognises Hindi as the official language and 22 Scheduled Languages, and Hindi cannot be imposed. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q5. **A:** In a federation the central government can order the state government to do something. **R:** Both levels of government in a federation enjoy powers independent of each other. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (d) A false, R true.

Q6. What proportion of seats in local bodies is reserved for women? 1M

Ans. At least one-third.

Q7. Which subject is in the State List? 1M

(a) Banking (b) Agriculture (c) Defence (d) Marriage

Ans. (b) Agriculture.

Q8. Which of these states enjoys special powers under Article 371? 1M

(a) Nagaland (b) Punjab (c) Haryana (d) Gujarat

Ans. (a) Nagaland.

Short answer (2-3 marks)

Q9. Distinguish between "coming together" and "holding together" federations. 3M Board fav

Ans. Coming together: independent states join on their own to form a bigger unit; units equally powerful; e.g. USA, Switzerland, Australia. Holding together: a large country divides its power between states and the centre; centre more powerful, units may have unequal powers; e.g. India, Spain, Belgium.

Q10. Distinguish between federal and unitary governments. 3M

Ans. Federal: two or more levels with constitutionally guaranteed powers; centre cannot order states (India, USA). Unitary: one level, or sub-units subordinate to the centre, which can pass orders (Sri Lanka, UK).

Q11. Explain the three-fold distribution of legislative powers in India. 3M Board fav

Ans. Union List (defence, foreign affairs, banking, currency): Union only. State List (police, trade, agriculture, irrigation): states only. Concurrent List (education, forest, trade unions, marriage, adoption): both, Union law prevails in conflict. Residuary (computer software): Union.

Q12. How did the creation of linguistic states strengthen Indian federalism? 3M

Ans. Boundaries redrawn so that same-language speakers live in one state (also culture, ethnicity, geography: Nagaland, Uttarakhand, Jharkhand). Feared disintegration, but it made the country more united and administration easier; accommodated diversity.

Q13. Explain the language policy of India. 3M Board fav

Ans. No national language; Hindi official language (mother tongue of about 40%); 22 Scheduled Languages, exams in any; states have own official languages; English continued with Hindi after 1965 (Tamil Nadu protests); Hindi cannot be imposed.

Q14. How did Centre-State relations change after 1990? 3M

Ans. Earlier the same party ruled Centre and most states, and the Centre often dismissed rival state governments misusing the Constitution. After 1990 regional parties rose, coalition governments at the Centre needed them: new culture of power sharing and respect for state autonomy; a Supreme Court judgement made arbitrary dismissal difficult.

Q15. What is decentralisation? Give two reasons for it. 2M

Ans. Taking power from Central and State governments and giving it to local government. Reasons: many problems are best settled locally as people know their needs; it allows direct participation of people in decision-making (local self-government).

Q16. Why are special provisions given to some states like Nagaland and Mizoram? 2M

Ans. Because of their peculiar social and historical circumstances (Article 371): to protect land rights of (contd.) indigenous peoples, their culture and preferential employment in government service.

Q17. What is the role of the judiciary in a federation like India? 2M

Ans. Courts interpret the constitution and powers of different levels; High Courts and the Supreme Court act as umpire in disputes over division of powers; supervise implementation of constitutional provisions.

Q18. How can the power-sharing arrangement between the Union and states be changed? 2M

Ans. Not unilaterally: an amendment must be passed by both Houses of Parliament with at least a two-thirds majority and then ratified by the legislatures of at least half of the total states.

Q19. Describe the structure of rural local government. 3M

Ans. Gram Sabha (all voters) approves the budget and reviews work; Gram Panchayat of panches and sarpanch; Panchayat Samiti at block level elected by panchayat members; Zilla Parishad at district level with MPs, MLAs, chairperson as political head.

Long answer (5 marks)

Q20. Describe any five key features of federalism. 5M Board fav

Ans. (i) Two or more levels of government (ii) same citizens, separate jurisdiction in legislation, taxation, administration (iii) jurisdiction specified and guaranteed by the constitution (iv) fundamental provisions cannot be changed by one level alone (v) courts act as umpire; revenue sources specified for financial autonomy; dual objective of unity and diversity.

Q21. Describe the major steps taken in 1992 towards decentralisation. What problems remain? 5M Board fav

Ans. (i) Regular elections to local bodies made mandatory (ii) seats reserved for SCs, STs, OBCs (iii) at least one-third positions for women (iv) independent State Election Commission (v) states to share powers and revenue with local bodies. Problems: gram sabhas not held regularly; most states have not transferred significant powers and resources.

Q22. "India is a federal country." Justify with five points. 5M

Ans. (i) Three tiers: Union, State, local (ii) three lists and residuary powers divide legislative powers (iii) basic structure cannot be changed unilaterally: 2/3 of both Houses + half of states (iv) judiciary umpires disputes (v) both levels raise taxes; special status for some states (Art. 371) and Union Territories show holding together.

Q23. "Federalism has succeeded in India because of the nature of democratic politics." Explain with examples of linguistic states, language policy and Centre-State relations. 5M Board fav

Ans. (i) Linguistic states: boundaries redrawn by language (also culture, geography), country became more united, administration easier (ii) language policy: no national language, 22 Scheduled Languages, English continued, Hindi not imposed (iii) Centre-State: after 1990 coalition era, regional parties, respect for state autonomy (iv) Supreme Court curbed arbitrary dismissal of state govts (v) respect for diversity and desire to live together made federalism work.

Source based (4 marks)

Q24. "The Constitution originally provided for a two-tier system... the third tier was added in 1992... Gram Sabha approves the annual budget of the gram panchayat..." (i) Name the three tiers of Panchayati Raj. (ii) Who are the members of the Gram Sabha? (iii) Who is the political head of a municipal corporation? 4M

> **Ans.** (i) Gram Panchayat (village), Panchayat Samiti (block), Zilla Parishad (district) (ii) all voters of the village (iii) the Mayor.

Q25. "The Constitution did not give the status of national language to any one language... Besides Hindi, there are 21 other languages recognised as Scheduled Languages..." (i) What is the official language of India? (ii) Why did Tamil Nadu oppose ending English? (iii) How has this policy helped unity? 4M

> **Ans.** (i) Hindi (ii) non-Hindi speakers feared Hindi imposition and loss in jobs and exams; the movement turned violent, so the Centre continued English along with Hindi (iii) accommodating all languages and not imposing Hindi avoided a Sri Lanka-type conflict and kept India united.

Case based and competency (4 marks / 3 marks)

Q26. "Not all States in the Indian Union have identical powers. Some States enjoy a special status. States such as Assam, Nagaland, Arunachal Pradesh and Mizoram enjoy special powers under Article 371 due to their peculiar social and historical circumstances..." (i) Which type of federation gives unequal powers to units? (ii) Why do these States get special powers? (iii) Name two areas that are too small to become States and are run by the Union. 4M

> **Ans.** (i) Holding together federation (like India). (ii) Peculiar social and historical circumstances: to protect the land rights of indigenous peoples, their culture, and preferential employment in government service. (iii) Union Territories, e.g. Chandigarh, Lakshadweep (or Delhi, the capital).

Q27. "After 1990, many regional political parties rose in the States. No single party got a clear majority in the Lok Sabha, so major national parties had to enter into alliances with many parties, including regional ones, to form a government at the Centre..." (i) What is a coalition government? (ii) How did this change Centre-State relations? (iii) Which court judgement made it difficult to dismiss State governments arbitrarily? 4M

> **Ans.** (i) A government formed by two or more parties together. (ii) It led to a new culture of power sharing and respect for the autonomy of State governments; the Centre could no longer misuse its power easily. (iii) A judgement of the Supreme Court.

Q28. Competency: The government of a State wants to pass its own law on banking and currency. Can it do so? Give reason. Which list would a law on "computer software" fall in? 3M

> **Ans.** No. Banking and currency are on the **Union List** (subjects of national importance needing a uniform policy), so only the Union govt can make laws on them. Computer software is a **residuary subject** (in no list), so the Union govt legislates on it.

Q29. Competency: Parliament and a State legislature both pass laws on adoption that contradict each other. Which law will be followed and why? 3M

> **Ans.** Adoption is on the **Concurrent List**; both can make laws on it, but in case of a conflict the **law made by the Union govt prevails**. If there is a dispute about powers, the courts (the Supreme Court as umpire) decide.

Q30. Competency: In village X the gram sabha has not met for two years, and the panchayat depends fully on funds the State gives it. Which two weaknesses of local government in India does this show? 3M

> **Ans.** (i) Gram sabhas are not held regularly, so people cannot review the panchayat or approve its budget. (ii) Most State governments have not transferred significant powers and resources to local governments, so the panchayat is not really self-governing.

Q31. Which body conducts panchayat and municipal elections? 1M

(a) Election Commission of India (b) State Election Commission (c) Zilla Parishad (d) Gram Sabha

> **Ans.** (b) State Election Commission

Q32. A: India is a holding together federation. R: In India the Central government tends to be more powerful and some units enjoy special powers. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

> **Ans.** (a) Both true, R explains A

Q33. "Federalism has dual objectives." Explain, with the two aspects crucial to its success. 3M

> **Ans.** (i) To safeguard and promote the **unity of the country**. (ii) To **accommodate regional diversity**. The two aspects crucial for federalism: governments at different levels should agree to some rules of power sharing, and they should trust that each will abide by its part of the agreement (mutual trust and agreement to live together).

Q34. "Decentralisation in India is the largest experiment in democracy." Evaluate with merits and limits. 5M

> **Ans.** Merits: (i) about 36 lakh elected representatives, a huge base of democracy (ii) constitutional status since 1992; regular elections by State Election Commission (iii) at least 1/3 seats for women gave them voice (iv) reservation for SC, ST, OBC; local problems solved by local people with direct participation. Limits: (v) gram sabhas not held regularly; States have not transferred significant powers and resources, so self-government is still far away.

Q35. Competency: A State government says it will set up its own State police force rules without asking the Centre. Is it within its powers? Give reason. 2M

> **Ans.** Yes. **Police** is on the **State List**, so only the State govt can make laws on it; the Centre cannot order a State govt on such matters. This shows that each tier has its own jurisdiction.

Q36. What is the political head of a Zilla Parishad called? 1M

> **Ans.** The chairperson of the Zilla Parishad.

Most asked: Forms of communalism, secular state, caste in politics, women's status

Gender, Religion and Caste

↳ 3 social divisions jo politics mein dikhte hain: gender (har jagah), religion (har jagah), caste (sirf India special). Inme democracy kaise kaam karti hai, wahi chapter hai.

1. Gender and Politics

Gender division = a form of hierarchical social division seen everywhere, but rarely recognised in politics. It is not based on biology but on **social expectations and stereotypes**.

Public / private division

- → Boys and girls are brought up to believe that the main responsibility of women is **housework and bringing up children**.
- → Men also cook, tailor, wash, but **outside the home and for money** (hotel cooks, tailors); women do the same work inside the home, unpaid.
- → Women also work outside: fetch water, collect fuel, work in fields; poor urban women as domestic helpers. Yet their work is not valued, not recognised.
- → Result: **public sphere** (politics, decision-making) dominated by men; women confined to the **private sphere**.

Key terms

Sexual division of labour: all work inside the home is done by the women of the family or organised by them through domestic helpers.

Feminist: a woman or a man who believes in equal rights and opportunities for women and men.

Patriarchy: literally "rule by father"; a system that values men more and gives them power over women.

Feminist movements

- → Women organised for equal rights: first **voting rights (suffrage)**, then better political and legal status, education and career opportunities.
- → Radical women's movements aimed at **equality in personal and family life** too.
- → Political expression of gender issues helped improve women's role in public life: today women are scientists, doctors, engineers, lawyers, managers, university teachers.
- → Participation of women in public life is very high in Scandinavian countries: Sweden, Norway, Finland.

Where women still lag behind in India (5 marks fav!)

Area	Fact (NCERT)
Literacy	Women 54% vs men 76%; fewer girls go for higher studies; parents prefer to spend on boys' education.
Jobs and pay	Few women in high-paid, valued jobs. An Indian woman works **one hour more** than a man daily, much of it unpaid. **Equal Remuneration Act, 1976**: equal wages for equal work, yet women paid less in almost all areas (sports, cinema, factories, fields).
Sex ratio	Son preference, **sex-selective abortion**: child sex ratio fell to 919 girls per 1000 boys (Census 2011), much lower in some places.
Safety	Harassment, exploitation, violence at home and outside; urban areas particularly unsafe.

Women's political representation

- → Women's well-being issues get little attention as women are **poorly represented** in legislatures.
- → Lok Sabha: women MPs touched 14.36% for the first time in 2019; state assemblies **less than 5%**.
- → **Panchayati Raj:** one-third seats in local bodies (panchayats, municipalities) reserved for women; **over 10 lakh** elected women representatives.
- → **2023: Women's Reservation Act (Nari Shakti Vandan Adhiniyam)**: one-third seats in Lok Sabha and State Legislative Assemblies reserved for women.

Exam Alert

Local bodies wala one-third reservation (1992 amendment) aur 2023 Act (Lok Sabha + assemblies) alag hain. "Gender division is biological" = galat; social expectations hai.

Yaad karo: Women ki problems = "LEWS-P"

Literacy lower (54% vs 76% men) | Employment: paid less, high-paid jobs fewer | Work unpaid at home (avg woman works 1 hr more daily) | Sex ratio low, sex-selective abortion (919 child sex ratio) | Politics: women MPs only around 14% (2019, first time crossed 14%).

2. Religion, Communalism and Politics

Religious differences are expressed in politics. Not always bad:

- ✓ **Gandhiji:** religion can never be separated from politics; he meant moral values common to all religions, not any one faith.
- ✓ **Human rights groups:** most victims of communal riots are religious minorities; govt must protect them.
- ✓ **Women's movement:** family laws of all religions discriminate against women; govt should change them to be more equitable.
- ✓ People may express needs and demands as members of a religious community, as long as the state treats all religions equally.

Communalism

When one religion's beliefs are shown as **superior**, demands of one religious group are formed **in opposition** to another, and **state power** is used for one religious group's domination. Communal politics = idea that religion is the principal basis of social community; followers of one religion form one community with the same fundamental interests. A secular person sees many voices inside every religion.

Forms of communalism in politics

1. **Everyday beliefs:** religious prejudices, stereotypes of religious communities, belief in the superiority of one's religion.
2. **Majoritarian dominance** (majority community); for minorities, the desire to form a **separate political unit**.
3. **Political mobilisation on religious lines:** sacred symbols, religious leaders, emotional appeal and plain fear, e.g. in electoral politics.
4. **Communal violence, riots and massacre:** India and Pakistan suffered some of the worst riots at the time of Partition; post-Independence too.

Yaad karo: "BMPV"

Beliefs, **M**ajoritarian dominance, **P**olitical mobilisation, **V**iolence. 4 forms, examples ke saath likho.

Secular state: India (3 marks fav!)

- ✓ No official religion (unlike Buddhism in Sri Lanka, Islam in Pakistan, Christianity in England).
- ✓ Freedom to **profess, practise and propagate** any religion, or not to follow any.
- ✓ **Prohibits discrimination** on grounds of religion.
- ✓ State **may intervene** in religion to ensure equality within religious communities, e.g. bans untouchability.

↳ Secularism is not just an ideology of parties; it is a foundation of our country. Communalism = major challenge to democracy.

Meme samjho

Ghar ka kaam: "ye to ladkiyon ka kaam hai." Wahi kaam bahar paise mein: chef, tailor sab ladke. *Wah re sexual division of labour*

Asli baat: Sexual division of labour: women do housework and childcare unpaid at home; when the same work is paid (cooking, tailoring), men often do it outside.

3. Caste and Politics

Caste inequalities

→ Caste division is special to India. Hereditary division of occupations was **sanctioned by rituals**; same caste = same occupation, married within, did not eat with others.

→ Based on exclusion of and discrimination against "**outcaste**" **groups** (untouchability).

→ Reformers: **Jotiba Phule, Gandhiji, B.R. Ambedkar, Periyar Ramaswami Naicker**.

→ Weakened by urbanisation, literacy and education, occupational mobility, weakening of landlords in villages.

→ Constitution **prohibits caste-based discrimination**. Yet caste has not disappeared: most marry within caste; untouchability not ended fully.

→ Caste still linked to **economic status**: upper castes best off, Dalits and Adivasis worst off, backward classes in between; every caste now has some rich and some poor.

Key terms

Caste hierarchy: ladder-like formation of caste groups from "highest" to "lowest". **Urbanisation:** shift of population from rural areas to cities. **Occupational mobility:** shift from one occupation to another, usually across generations.

Caste in politics

→ Parties pick candidates by **caste composition** of the electorate.

→ Appeals to caste sentiment; some parties favour some castes.

→ **Universal adult franchise** and one-person-one-vote: leaders mobilise; new consciousness among low castes.

Politics in caste

→ Each caste grows by **incorporating neighbouring castes**.

→ Castes form **coalitions** with other castes.

→ New groups enter politics: "backward" and "forward" castes.

Caste alone does not decide elections

→ **No parliamentary constituency** has a clear majority of one single caste: every party needs more than one caste.

→ No party wins all votes of a caste; "vote bank" means a large share, not all.

→ Many voters have more than one candidate from their caste, many have none.

→ Ruling party and sitting MPs/MLAs **frequently lose**: voters weigh govt performance, leaders' popularity, issues.

Positive: Dalits, OBCs get access to power ↔ Negative: diverts from poverty, corruption; tension

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which law provides equal wages for equal work for men and women? 1M Board fav

(a) Wages Act (b) Equal Wages Act (c) Equal Remuneration Act (d) Labour Code

(contd.) (c) Equal Remuneration Act, 1976.

Q2. A: The child sex ratio in India has fallen to 919 girls per thousand boys. R: Many parents prefer sons and get the girl child aborted. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q3. A: Caste has disappeared from contemporary India. R: Untouchability has been banned by the Constitution. 1M Board fav
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (d) A false (caste still exists: marriages within caste), R true.

Q4. In which bodies is at least one-third of seats reserved for women since the 1992 amendment? 1M

Ans. Local government bodies: panchayats and municipalities.

Q5. Who among these worked for a society free of caste inequality? 1M
(a) Jotiba Phule (b) Rabindranath Tagore (c) Jawaharlal Nehru (d) Sardar Patel

Ans. (a) Jotiba Phule (also Gandhiji, Ambedkar, Periyar).

Short answer (2-3 marks)

Q6. What is the sexual division of labour? How does it affect women's role in public life? 3M Board fav

Ans. All work inside the home is done or organised by women; men work outside for money. Women stay in the private sphere, their work unpaid and unrecognised; public sphere (politics, decisions) dominated by men.

Q7. Mention three constitutional provisions that make India a secular state. 3M Board fav

Ans. (i) No official religion (unlike Sri Lanka, Pakistan, England) (ii) freedom to profess, practise and propagate any religion or none (iii) no discrimination on grounds of religion (iv) state can intervene to ensure equality within religions, e.g. ban on untouchability.

Q8. Distinguish between "caste in politics" and "politics in caste". 3M

Ans. Caste in politics: candidates chosen by caste composition, appeals to caste sentiment, universal franchise led to mobilisation. Politics in caste: castes incorporate neighbouring castes, form coalitions, new groups like backward and forward castes.

Q9. How has caste hierarchy weakened in modern India? Has caste disappeared? 3M

Ans. Reformers (Phule, Gandhiji, Ambedkar, Periyar); urbanisation, literacy and education, occupational mobility, weakening of landlords; Constitution bans caste discrimination. Not disappeared: most marry within caste, untouchability persists, caste still linked to economic status.

Q10. Give two ways to increase women's representation in legislatures. 2M

Ans. (i) Legally reserve a fair proportion of seats: one-third in (contd.) local bodies; Women's Reservation Act 2023 for Lok Sabha and assemblies (ii) parties give more tickets to women.

Q11. Why is gender division called a social division and not a biological one? 2M

Ans. It rests on social expectations and stereotypes, not on biology: boys and girls are brought up to believe housework and child care are women's work. Women can do any job men do (pilots, scientists).

Q12. How is a secular state different from a state with an official religion? 2M

Ans. Secular state: no official religion, treats all religions equally (India). Other state: gives official status to one religion (Buddhism in Sri Lanka, Islam in Pakistan).

Long answer (5 marks)

Q13. "Women in India still face discrimination and oppression in various ways." Support with five facts. 5M Board fav

Ans. (i) Literacy 54% vs 76% for men; fewer girls in higher studies (ii) few women in high-paid jobs; work 1 hour more daily, mostly unpaid (iii) paid less despite Equal Remuneration Act 1976 (iv) son preference, sex-selective abortion, child sex ratio 919 (v) harassment and violence, cities unsafe; low share in legislatures (14.36% Lok Sabha, 2019).

Q14. Describe the various forms communalism takes in politics. 5M Board fav

Ans. (i) Everyday beliefs: prejudices, stereotypes, superiority of one religion (ii) majoritarian dominance; minorities may want a separate political unit (iii) political mobilisation using sacred symbols, religious leaders, emotional appeal, fear (iv) communal violence, riots, massacre, e.g. Partition (v) religion treated as the basis of nation; state power used for one group's domination.

Q15. "Caste alone cannot determine election results in India." Explain. 5M

Ans. (i) No constituency has a clear majority of one caste (ii) parties need support of more than one caste (iii) no party gets all votes of a caste; vote bank = large share only (iv) many voters have several or no candidates of their caste (v) ruling parties and sitting MPs often lose: performance, leadership, issues and party matter.

Source based (4 marks)

Q16. "Caste has not disappeared from contemporary India. Even now most people marry within their own caste or tribe. Untouchability has not ended completely, despite constitutional prohibition." (i) What does the Constitution say about untouchability? (ii) One sign that caste still exists. (iii) Two factors that weakened caste hierarchy. 4M

Ans. (i) It prohibits untouchability and caste discrimination (ii) most people marry within their own caste (iii) urbanisation, growth of literacy and education, occupational mobility (any two).

Quick fact Feminist movements: radical women's movements that aim at equality in personal and family life and public affairs.

Most asked: Functions, national vs state party, 4 challenges + reforms

POLITICAL PARTIES

1. What is a Political Party?

A **political party** = a group of people who come together to contest elections and hold power in the government. They agree on some policies and programmes for society with a view to promote the **collective good**.

- → Parties try to persuade people that their policies are better; they seek to implement them by winning popular support through elections.
- → A party reflects **fundamental political divisions** in a society: it is a *part* of society, so it involves partisanship.
- → A party is known by which part it stands for, which policies it supports and whose interests it upholds.

3 components:

Leaders + Active members + Followers

Key terms

Partisan: a person strongly committed to a party, group or faction; takes one side, cannot take a balanced view.
Partisanship: tendency to take a side.
Ruling party: the party that runs the govt. **Opposition:** parties that lose and criticise the govt.

2. Functions of Political Parties (5 marks fav!)

1. **Contest elections:** candidates put up by parties. USA: members and supporters choose candidates; **India: top party leaders** choose.
2. **Put forward policies and programmes:** reduce a vast variety of opinions to a few basic positions; govt is expected to follow the ruling party's line.
3. **Make laws:** laws debated and passed in the legislature; members follow the direction of party leadership.
4. **Form and run governments:** recruit leaders, train them, make them ministers.
5. **Play opposition:** losing parties voice different views, criticise govt failures and wrong policies, mobilise opposition.
6. **Shape public opinion:** raise and highlight issues; lakhs of activists; launch movements for people's problems.
7. **Access to govt machinery and welfare schemes:** easier for a citizen to approach a local party leader than a govt officer; parties must listen or be rejected.

Yaad karo: 7 functions

"Chunav, Policy, Kanoon, Sarkar, Virodh, Rai, Pahunch" = Elections, Policies, Laws, Govt, Opposition, Opinion, Access. 7 mein se koi 5, ek-ek line explain.

Quick fact A political party has 3 components: the leaders, the active members and the followers.

Parliament House: parties contest elections, form the government or sit in opposition and make laws

3. Why Do We Need Parties?

- → Without parties every candidate = **independent**: no one can promise major policy changes.
- → Govt may be formed but its **utility uncertain**; representatives accountable only to their constituency; no one responsible for how the country is run.
- → Even in **non-party panchayat elections**, villages split into factions with "panels" of candidates.
- → Rise of parties is directly linked to the emergence of representative democracies: large societies need agencies to gather views, present them to govt, and bring representatives together to form a **responsible government** and to support or restrain it.

Key terms

Partisan: a person strongly committed to a party, group or faction. **Partisanship:** a tendency to take a side; a party is known by which part it stands for. **Ruling party:** party/parties that form the govt. **Opposition:** parties that lose; they criticise govt, voice different views and mobilise people. **Defection:** changing party allegiance from the party on which a person got elected to a different party.

Party in India

Candidates chosen by **top leaders** of the party.

Party in USA

Members and supporters choose candidates (**primaries**).

4. How Many Parties? Party Systems

Any group of citizens is free to form a party. More than **750 parties** are registered with the Election Commission of India, but only a handful are serious contenders.

System	Meaning	Example
One-party	Only one party allowed to control and run govt. Not a democratic option: no meaningful choice; at least two parties must compete fairly.	China (Communist Party)
Two-party	Power usually changes between two main parties; others exist but only two have a serious chance of majority.	USA, UK

Yaad rakho Partisanship: a tendency to take a side and not see a balanced view on an issue.

System	Meaning	Example
Multiparty	Several parties compete; more than two have a reasonable chance of power on their own or in alliance.	India

→ **Alliance / front:** parties join hands to contest and win power. 2004 Lok Sabha: NDA, UPA and Left Front.

→ Multiparty system often looks **messy**, leads to instability, but lets a **variety of interests and opinions** enjoy political representation.

→ No country chooses its party system: it evolves from **nature of society, social and regional divisions, history, system of elections**. India: social and geographical diversity = multiparty.

Multiparty: merits	Multiparty: demerits
Variety of interests and opinions get representation; regional and social groups get a voice; more choice to voters.	Looks messy; coalition govts can be unstable; small parties may bargain hard; slow decisions.

Shivam Bhaiya says

"Which party system is best?" ka answer: **koi ek ideal system nahi**, har desh ki conditions pe depend karta hai. A-R mein "two-party is best" = galat.

5. National and State Parties

Every party must **register with the Election Commission**. Large, established parties get special facilities and a unique election symbol (only their official candidates can use it): **recognised political parties**.

State party	National party
At least 6% votes in a State Legislative Assembly election + wins at least 2 seats.	At least 6% votes in Lok Sabha elections or Assembly elections in 4 States + at least 4 Lok Sabha seats.
Commonly called regional parties; many have national ambitions and a federal outlook.	Units in several states; follow the same policies and programmes decided at the national level.
Examples in the table below.	Six in 2023 (below).

State party (examples)	State	State party	State
Biju Janata Dal	Odisha	DMK, AIADMK	Tamil Nadu
Samajwadi Party	Uttar Pradesh	Telugu Desam Party	Andhra Pradesh
Shiromani Akali Dal	Punjab	Mizo National Front	Mizoram
Jharkhand Mukti Morcha	Jharkhand	Rashtriya Janata Dal	Bihar

Six national parties (2023)

Yaad karo: founding order

INC 1885 → CPI(M) 1964 → BJP 1980 → BSP 1984 → AAP 2012 → NPP 2013.

Party	Year	Symbol	Key points
INC	1885	Hand	One of the oldest parties of the world; ruled at Centre till 1977, then 1980 to 1989; centrist; secularism, welfare of weaker sections and minorities.
BJP	1980	Lotus	Revived the Bharatiya Jana Sangh (Syama Prasad Mukherjee, 1951); **cultural nationalism (Hindutva)** central to its idea of Indian nationhood.
BSP	1984	Elephant	Led by **Kanshi Ram**; represents bahujan samaj (dalits, adivasis, OBCs, religious minorities); inspired by Sahu Maharaj, Phule, Periyar, Ambedkar.
CPI(M)	1964	Hammer, sickle, star	Marxism-Leninism; socialism, secularism, democracy; opposes imperialism and communalism.
NPP	2013	Book	First party from the North-East to get national party status.
AAP	2012	Broom	Aam Aadmi Party; recognised national party.

Rise of state parties: their number and strength grew over the last three decades; Parliament became more diverse; national parties had to form **alliances** with state parties: strengthened federalism and democracy.

Meme samjho

Ek party, ek parivar, saalon se top pe wahi log: "Jalwa hai hamara yahan!"

Asli baat: Dynastic succession is a challenge: top positions go to family members of leaders; ordinary members get no fair chance. Other challenges: lack of internal democracy, money and muscle power, lack of meaningful choice.

6. Challenges to Political Parties

Parties are the most visible face of democracy, so people blame them for what is wrong. Popular dissatisfaction focuses on **4 problems**:

1. **Lack of internal democracy:** power in one or few leaders; no membership registers, no regular meetings or internal elections; members who disagree have to leave; loyalty to leader over principles.
2. **Dynastic succession:** top positions controlled by one family; people without experience or popular support get power; unfair to other members.
3. **Money and muscle power:** parties nominate those who can raise money; rich people and companies who fund parties influence policies; parties support criminals who can win.
4. **Lack of meaningful choice:** ideological differences have reduced worldwide (e.g. UK Labour and Conservative); leaders keep **shifting parties**.

Yaad karo: 4 challenges = "IDMM"

Internal democracy missing | Dynastic succession | Money and muscle power | Meaningful choice lacking. Line: "*Iss Desh Mein Mushkil*".

Challenge	Real-life sign (competency)
Lack of internal democracy	No internal elections for years; one leader decides tickets; critics expelled
Dynastic succession	Party president's son/daughter made leader without experience
Money and muscle power	Ticket to a rich candidate or one with criminal cases because he "can win"
Lack of meaningful choice	Two big parties offer almost the same policies; same leaders keep shifting parties

7. How Can Parties Be Reformed?

Steps already taken

- ✓ **Anti-defection law** (Constitution amended): MLA/MP who changes party loses the seat. But it made dissent harder: members must accept whatever leaders decide.
- ✓ **Supreme Court:** every candidate files an **affidavit** with details of property and criminal cases (no check yet on truth of the information).
- ✓ **Election Commission:** parties must hold **organisational elections** and file **income tax returns**.

Suggestions

- ★ A **law to regulate internal affairs**: membership register, own constitution, independent authority to judge disputes, open elections to highest posts.
- ★ Minimum **one-third tickets to women**; quota for women in decision-making bodies of parties.
- ★ **State funding of elections:** govt gives parties money (kind: petrol, paper, telephone; or cash on basis of votes).
- ★ People's pressure: **petitions, publicity, agitations**, media, pressure groups, movements.
- ★ Those who want reform should **join parties** themselves. Note: legal reforms should not go too far, else parties find ways around them.

Challenge	Matching reform
Lack of internal democracy	Law to regulate internal affairs; organisational elections (EC)
Dynastic succession	Open elections to top posts; independent party authority
Money and muscle power	Affidavits (SC); IT returns; state funding of elections
Lack of meaningful choice	People's pressure; anti-defection law; reformers join parties

Exam Alert

Affidavit = **Supreme Court**; organisational elections + tax returns = **Election Commission**; anti-defection = **Constitution amendment**. State party 6% + 2 seats; national 6% (LS or 4 states) + 4 LS seats.

1 minute recap

- **Party** = contest elections + hold power; leaders, active members, followers
- **7 functions** elections, policies, laws, govt, opposition, opinion, access
- **Systems** one (China), two (USA, UK), multi (India: NDA, UPA, Left Front 2004)
- **Recognition** state 6% + 2 seats; national 6% LS / 4 states + 4 LS seats
- **6 national** INC, BJP, BSP, CPI(M), NPP, AAP
- **Challenges** internal democracy, dynasty, money-muscle, no choice
- **Reforms** anti-defection, affidavit (SC), org. elections + IT returns (EC)

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Party ABC gets 6% of the votes in a State Assembly election and wins 2 seats. It will be recognised as a: 1M Board fav
(a) National party (b) State party (c) Ruling party (d) Opposition party
Ans. (b) State party.

Q2. Which party, formed in 2013, was the first from the North-East to get national party status? 1M
(a) NCP (b) AAP (c) NPP (d) BJP
Ans. (c) National People's Party.

Q3. **A:** A one-party system is not a good option for democracy. **R:** In a democracy at least two parties must have a fair chance to compete for power. 1M Board fav
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true and R explains A.

Q4. **A:** The anti-defection law has made dissent within parties more difficult. **R:** MPs and MLAs have to accept whatever the party leaders decide. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true and R explains A.

Q5. Who ordered that every candidate must file an affidavit giving details of property and criminal cases? 1M
(a) Election Commission (b) Parliament (c) Supreme Court (d) President
Ans. (c) Supreme Court.

Q6. Arrange by year of formation, earliest first: BSP, BJP, INC, CPI(M). 1M
Ans. INC (1885), CPI(M) (1964), BJP (1980), BSP (1984).

Q7. A person who is strongly committed to a party, group or faction is called a: 1M
(a) Activist (b) Leader (c) Partisan (d) Follower
Ans. (c) Partisan.

Q8. Match the 2004 alliances: INC, BJP, CPI(M) with NDA, UPA, Left Front. 1M

Ans. INC-UPA; BJP-NDA; CPI(M)-Left Front.

Q9. In which country do the members and supporters of a party choose its candidates? 1M

(a) India (b) USA (c) China (d) Sri Lanka

Ans. (b) USA (in India, top party leaders choose).

Short answer (2-3 marks)

Q10. What is a political party? Name its three components. 3M

Ans. A group of people who come together to contest elections and hold power, agreeing on policies and programmes for the collective good. Components: leaders, active members, followers.

Q11. Distinguish between a national party and a state party. 3M Board fav

Ans. State party: at least 6% votes in a State Assembly election and at least 2 seats. National party: at least 6% votes in Lok Sabha or Assembly elections in 4 States and at least 4 Lok Sabha seats. E.g. state: BJD, DMK; national: INC, BJP, BSP, CPI(M), NPP, AAP.

Q12. Explain the three types of party systems with examples. Which is not democratic and why? 3M

Ans. One-party: only one party allowed (China); two-party: power alternates between two main parties (USA, UK); multiparty: several parties, power alone or in alliance (India). One-party is not democratic: no meaningful choice.

Q13. Mention three efforts made in India to reform political parties. 3M Board fav

Ans. (i) Anti-defection law: legislator changing party loses the seat (ii) Supreme Court: affidavits on property and criminal cases (iii) Election Commission: organisational elections and income tax returns.

Q14. Why can no one party system be called ideal for all countries? 2M

Ans. Party system is not chosen; it evolves from the nature of society, its social and regional divisions, its history and its system of elections. India's diversity gives a multiparty system.

Q15. How do state parties strengthen federalism and democracy in India? 3M

Ans. Their number and strength grew; got a chance to rule at state level and share power in coalitions at the Centre; national parties had to ally with them; made Parliament more diverse and gave regional interests a voice.

Q16. What is meant by lack of internal democracy and dynastic succession? 2M

Ans. Internal democracy lacking: power with one or few leaders; no membership registers, meetings or internal elections. Dynastic succession: top posts held by one family, so people without experience or support rise.

Q17. What is defection? How has the anti-defection law affected parties? 2M

Ans. Defection: changing party after being elected on its ticket. The law makes such a legislator lose the seat; it curbed defection but made dissent harder, members must obey leaders.

Q18. How do political parties shape public opinion? 2M

Ans. They raise and highlight issues; have lakhs of members and (contd.) activists spread across the country; pressure groups are their extensions; they launch movements to solve people's problems; people's opinions often form on the lines parties take.

Q19. What is meant by state funding of elections? 2M

Ans. Govt gives parties money to support their election expenses, in kind (petrol, paper, telephone) or in cash on the basis of votes secured in the last election; it can cut the role of money power.

Q20. Why is a political party called a "part" of society and why does it involve partisanship? 2M

Ans. A party stands for one section and its policies, not for all; it reflects fundamental political divisions in society, so it takes a side on issues: that is partisanship.

Q21. "Lack of meaningful choice" is a challenge for parties. Explain. 2M

Ans. Ideological differences among parties have reduced in most parts of the world (e.g. Labour and Conservative in UK); leaders keep shifting parties, so voters do not get really different options.

Q22. "Rise of political parties is directly linked to the emergence of representative democracy." Justify. 3M

Ans. Large societies need representative democracy; parties gather different views on issues and present them to govt; bring representatives together to form a responsible govt; support or restrain govt; make policies and justify or oppose them. Hence parties are needed.

Long answer (5 marks)

Q23. Describe any five functions of political parties in a democracy. 5M Board fav

Ans. (i) Contest elections (India: leaders choose candidates) (ii) put forward policies and programmes (iii) make laws in legislature (iv) form and run governments (v) play opposition, shape public opinion, give citizens access to govt machinery and welfare schemes.

Q24. Describe the four major challenges faced by political parties in India. 5M Board fav

Ans. (i) Lack of internal democracy: power with a few leaders, no registers, meetings or internal elections (ii) dynastic succession: top posts within one family (iii) money and muscle power: rich donors influence policy, criminals get tickets (iv) lack of meaningful choice: ideological differences reduced, leaders switch parties.

Q25. "Political parties are a necessary condition for democracy." Explain. 5M

Ans. (i) Without parties every candidate is independent; no one can promise policy change (ii) govt's utility uncertain; no one responsible for running the country (iii) parties gather and present different views (iv) they form responsible govts and an opposition to restrain them (v) rise of parties linked to representative democracy; even non-party panchayats form factions.

Q26. Suggest five ways to reform political parties. 5M

Ans. (i) Law to regulate internal affairs: membership register, internal elections (ii) one-third tickets to women (iii) state funding of elections (iv) pressure from people, media and movements through petitions and agitations (v) reform-minded people should join parties; also affidavits, anti-defection law.

Q27. Describe any five national parties of India with one feature each. 5M

> **Ans.** (i) INC 1885: one of the oldest, centrist, secularism and welfare of weaker sections (ii) BJP 1980: revived Bharatiya Jana Sangh, cultural nationalism (iii) BSP 1984: Kanshi Ram, bahujan samaj (iv) CPI(M) 1964: Marxism-Leninism, socialism, secularism (v) NPP 2013: first from the North-East; AAP 2012.

Source based (4 marks)

Q28. "Every party has to register with the Election Commission. The Commission treats all parties equally but offers special facilities to large and established parties; they get a unique symbol." (i) What are such parties called? (ii) Who can use the unique symbol? (iii) Condition for recognition as a national party. 4M

> **Ans.** (i) Recognised political parties (ii) only the party's official candidates (iii) at least 6% votes in Lok Sabha or Assembly elections in four States and at least four Lok Sabha seats.

Q29. "A multiparty system often appears very messy and leads to political instability. At the same time it allows a variety of interests and opinions to enjoy political representation." (i) Define a multiparty system. (ii) What is an alliance? Name one from 2004. (iii) Why has India adopted a multiparty system? 4M

> **Ans.** (i) Several parties compete and more than two have a reasonable chance of power on their own or in alliance (ii) parties joining hands to contest elections and win power; NDA / UPA / Left Front (iii) social and geographical diversity of India cannot be absorbed by two or three parties.

Case based and competency (4 marks / 3 marks)

Q30. "Popular dissatisfaction and criticism has focussed on four problem areas in the working of political parties... Most parties do not keep membership registers, do not hold organisational meetings and do not conduct internal elections regularly..." (i) Which challenge is described here? (ii) Name two other challenges. (iii) Which body has made it necessary for parties to hold organisational elections? 4M

> **Ans.** (i) Lack of internal democracy (power concentrated in one or a few leaders). (ii) Dynastic succession; growing role of money and muscle power (or lack of meaningful choice). (iii) The Election Commission (also made filing of income tax returns necessary).

Q31. "The Constitution was amended to prevent elected MLAs and MPs from changing parties... Now the law says that if any MLA or MP changes parties, he or she will lose the seat in the legislature." (i) Name this law. (ii) Why was it needed? (iii) Mention one unintended effect of it. 4M

> **Ans.** (i) Anti-defection law. (ii) Many elected representatives were indulging in defection to become ministers or for cash rewards. (iii) It has made dissent more difficult: MPs and MLAs have to accept whatever the party leaders decide.

Q32. Competency: In State Y, party P won 7% of the votes in the Assembly election and 3 seats. In the next Lok Sabha election it wins 4 seats and gets 6% of votes in Assembly polls of 4 States. What status does P get each time? 3M

> **Ans.** First: a **State party** (at least 6% votes in the State Assembly election and at least 2 seats). Later: a **National party** (contd.) (at least 6% votes in Assembly elections of 4 States and at least 4 Lok Sabha seats). It then gets a reserved symbol across the country.

Q33. Competency: A citizen says "All parties are the same, I will not vote." Which challenge does this reflect? Suggest two ways ordinary citizens can reform parties. 3M

> **Ans.** It reflects **lack of meaningful choice** (ideological differences have reduced). Citizens can (i) put pressure through petitions, publicity, agitations, media and movements, and (ii) join political parties themselves to change them from inside; voting carefully also rewards better parties.

Q34. Why is the opposition party important in a democracy? Give three points. 3M

> **Ans.** (i) It criticises the govt for its failures or wrong policies (ii) voices different views and mobilises people against the govt (iii) keeps the ruling party accountable and offers voters an alternative for the next election.

Q35. Which of these is NOT a recognised national party (2023)? 1M

(a) NPP (b) AAP (c) Samajwadi Party (d) CPI(M)

> **Ans.** (c) Samajwadi Party (a state party of Uttar Pradesh)

Q36. A: State parties have strengthened federalism and democracy in India. R: National parties have had to form alliances with State parties to form govts at the Centre. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

> **Ans.** (a) Both true, R explains A

Q37. "Political parties need to be reformed, but legal steps should not go too far." Examine the suggested reforms and this caution. 5M

> **Ans.** (i) A law to regulate internal affairs: membership register, constitution, open elections (ii) one-third tickets to women (iii) state funding of elections (in kind or cash on the basis of votes) (iv) pressure from people, media, movements; reformers joining parties (v) Caution: over-regulation can be counterproductive; parties find ways to get around laws; reform must come from people and parties themselves.

Q38. Competency: Before an election, a party gives a ticket to a candidate facing serious criminal cases because he has money and local influence. Which challenge is this, and which reform step helps voters know about it? 3M

> **Ans.** Growing role of **money and muscle power**. The **Supreme Court** order that every candidate must file an **affidavit** giving details of property and criminal cases pending against him helps voters judge candidates (though there is no system yet to check the truth of the information).

Q39. Why are political parties called the "most visible institution" of a democracy? Give two reasons. 2M

> **Ans.** (i) For most ordinary citizens democracy means political parties: they contest elections, form govts and run them. (ii) They are the face people see and blame when something goes wrong, so they are the most visible (and often the least trusted) institution.

Apne notes / galtiyan yahan likho

Most asked: Accountable govt, growth vs dictatorship, dignity of women and dalits

OUTCOMES OF DEMOCRACY

1. How Do We Assess Democracy?

Democracy is better than other forms because it:

- ✓ Promotes **equality among citizens**; enhances the dignity of the individual.
- ✓ Improves the **quality of decision-making**; provides a method to **resolve conflicts**.
- ✓ Allows **room to correct mistakes**.

↳ Democracy problems solve nahi karti, sirf conditions banati hai goals achieve karne ki. Democracies differ a lot in social, economic, cultural achievements.

Yaad karo: Democracy ke outcomes = "A-R-L-E-D"

Accountable, responsive, Legitimate govt | Economic growth (not always better) | inequality and poverty (weak) | Dignity, freedom, social diversity (strong). Political outcomes best, economic outcomes average.

2. Accountable, Responsive, Legitimate Govt

Quality	What it means
Accountable	Citizens have the right and means to examine decision-making = transparency. Decisions follow norms and procedures: slower but **more acceptable and effective**. Cost of time is worth it.
Responsive	To needs and expectations of people. Democracies often frustrate (corruption, ignore majority demands) but do **better than dictatorships**.
Legitimate	People's own government. May be slow, less efficient, not always clean, yet overwhelming support for democracy worldwide. Ability to generate its own support is itself an outcome.

How accountability is ensured: regular, **free and fair elections**; open public debate on major policies and legislation; citizens' right to information about govt.

Dictatorship: quick decisions **vs** Democracy: slower, but acceptable

3. Economic Growth and Development

- → All democracies vs all dictatorships, 1950 to 2000: dictatorships had a **slightly higher** rate of economic growth.
- → Growth depends on **population size, global situation, cooperation from other countries, economic priorities**, not only on the form of govt.
- → Difference is negligible; democracy has many other positive outcomes, so it is preferred.

Yaad rakho Accountable government: citizens can know how and why a decision was taken (transparency).

4. Reduction of Inequality and Poverty

- → Democracies are based on political equality: every citizen has an equal say (one vote) in electing representatives.
- → But **economic inequalities have grown**: a small number of ultra-rich enjoy a highly disproportionate share of wealth and income; those at the bottom have very little.
- → Poor are a large part of voters, yet governments are not as keen on poverty as expected. **Bangladesh:** more than half the population lives in poverty.

Shivam Bhaiya says

Report card: political equality **A+**, growth mein dictatorship se thoda peeche, economic inequality mein kaam baaki. 5-mark answer mein **dono side** likho, balance dikhta hai.

5. Social Diversity, Dignity and Freedom

Accommodation of social diversity

- → Democracies develop a procedure to conduct competition and handle social differences **peacefully**; non-democracies ignore or suppress them. No society resolves conflicts permanently.
- → Two conditions: (i) **majority works with the minority**; (ii) majority rule must not become rule by a majority community of religion, race or language.

Dignity and freedom of citizens

- ✓ Democracy is far superior in promoting dignity and freedom of the individual.
- ✓ **Women:** long struggles created sensitivity that respect and equal treatment of women are necessary; once recognised, easier to fight what is legally and morally unacceptable.
- ✓ **Caste:** democracy strengthened claims of disadvantaged castes for **equal status and opportunity**; atrocities still occur but lack moral and legal foundations.
- ✓ **Expectations:** people get benefits, then ask for more and complain. Complaints = testimony to democracy's success: people moved from **subjects to citizens**.

Exam Alert

"Democracy removes economic inequality" ya "dictatorship resolves conflicts permanently" = hamesha **galat** options. Dictatorship growth slightly higher (1950–2000), gap negligible.

Yaad karo: Democracy ka report card

Political outcomes (accountable, legitimate govt): **A+** | Dignity and freedom: **A** | Social diversity: **B+** | Economic growth: **B** | Reducing inequality and poverty: **C**. Yaad rakho: democracy is better, not perfect.

Most Important Questions

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. The right of citizens to examine the process of decision-making is called: 1M Board fav
(a) Legitimacy (b) Responsiveness (c) Transparency (d) Equality

Ans. (c) Transparency.

Q2. Between 1950 and 2000, which had a slightly higher rate of economic growth? 1M
(a) Democracies (b) Dictatorships (c) Both equal (d) Monarchies

Ans. (b) Dictatorships, but the difference is negligible.

Q3. A: Democracies are based on political equality. R: All individuals have an equal say in electing representatives. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q4. In which country, as per NCERT, does more than half the population live in poverty? 1M
(a) India (b) Bangladesh (c) Pakistan (d) Nepal

Ans. (b) Bangladesh.

Q5. Choose the correct statement. 1M
(a) Non-democratic decisions are more acceptable (b) Dictatorship resolves conflicts permanently (c) Democracies differ a lot from each other (d) Monarchies are democracies

Ans. (c) Democracies differ a lot in social, economic and cultural achievements.

Q6. Match: Accountable, Responsive, Legitimate with (i) people's own govt (ii) to citizens (iii) to needs and expectations. 1M

Ans. Accountable-(ii) to citizens; Responsive-(iii) to needs and expectations; Legitimate-(i) people's own govt.

Short answer (2-3 marks)

Q7. How is a democratic government accountable to citizens? 3M Board fav

Ans. Transparency: citizens can examine decision-making; regular free and fair elections; open public debate on policies and laws; right to information about govt and its functioning.

Q8. Give three reasons why democracy is a better form of government than dictatorship. 3M Board fav

Ans. Promotes equality and dignity of individuals; better quality decisions through discussion; peaceful method to resolve conflicts; room to correct mistakes; legitimate, people's own govt (any three).

Q9. "Complaints about democracy are a testimony to its success." Explain. 3M

Ans. As people get benefits they expect more and complain; this shows awareness and the ability to judge rulers critically; people have moved from being subjects to citizens and believe they can hold govt to account.

Q10. How does democracy accommodate social diversity? Give two conditions. 2M

Ans. It creates procedures to handle social differences (contd.) peacefully. Conditions: majority must work with minority; majority rule must not become rule by a majority community of religion, race or language.

Q11. "Democratic decisions take more time but are better." Justify. 2M

Ans. Decisions follow norms and procedures with deliberation and negotiation; people's views are heard; so they are more acceptable to people and more effective; the cost of time is worth it.

Q12. Why are democracies not very successful in reducing economic inequality? Give two points. 2M

Ans. A small number of ultra-rich hold a disproportionate share of wealth and income while incomes at the bottom shrink; govts do not address poverty as keenly as expected though the poor are a large voting group.

Long answer (5 marks)

Q13. Evaluate democracy in terms of economic growth and reduction of inequality and poverty. 5M Board fav

Ans. (i) Dictatorships grew slightly faster 1950-2000 (ii) growth depends on population, global situation, cooperation, priorities; gap negligible (iii) political equality exists in democracies (iv) but economic inequality has grown: ultra-rich hold a disproportionate share, poor have little (v) Bangladesh: over half in poverty; still democracy preferred for its other outcomes.

Q14. "Democracy is far superior in promoting dignity and freedom of citizens." Explain. 5M

Ans. (i) Recognises respect and dignity of every individual (ii) women: equal treatment accepted; easier to struggle against what is legally and morally wrong (iii) caste: disadvantaged castes claim equal status and opportunity; atrocities lack legal and moral support (iv) people become citizens, not subjects (v) expectations and complaints show a free, aware people.

Q15. Explain how democracy produces an accountable, responsive and legitimate government. 5M

Ans. (i) Accountable: transparency, citizens examine decision-making (ii) regular free and fair elections, open debate, right to information (iii) responsive: attends to needs and expectations better than dictatorships, though not always (iv) legitimate: people's own govt; overwhelming support worldwide (v) slower decisions but more acceptable and effective.

Source based (4 marks)

Q16. "A democratic government is people's own government. It may be slow, less efficient, not always very responsive or clean, but there is overwhelming support for democracy all over the world." (i) Which outcome is described? (ii) Why are democratic decisions slower? (iii) Two ways citizens can check the govt. 4M

Ans. (i) Legitimate government (ii) they follow norms and procedures, discussion and negotiation, so they take time but are more acceptable and effective (iii) free and fair elections; right to information; open public debate (any two).

DEVELOPMENT

1. What Development Promises

Different people, different goals: life situations differ, so ideas of development differ.

Category	Development goals
Landless rural labourers	More days of work, better wages; local school with quality education; no social discrimination; they too can be leaders in the village.
Prosperous farmers (Punjab)	Assured high income through higher support prices; hard-working, cheap labourers; settle children abroad.
Farmers depending only on rain	Irrigation facilities; better crop price.
Rural woman from a landowning family	Regular job, freedom, education for children.
Urban unemployed youth	Regular job with good wages.
Girl from a rich urban family	As much freedom as her brother; free to decide her life, study abroad.
Adivasi from Narmada valley	No displacement; land and livelihood.

→ Goals can be conflicting: what is development for one may be **destruction for another**. E.g. industrialist wants a dam for electricity; tribals displaced by it oppose (**Sardar Sarovar, Narmada**).

Income and other goals

→ People want **more income**: regular work, better wages, fair crop prices.

→ Also non-material goals: equal treatment, freedom, security, respect. Money cannot buy everything.

→ Women in paid jobs: dignity in household and society rises; a **safe and secure environment** lets more women take jobs or run businesses.

→ Better job may be refused if it has no security or no time for family; developmental goals = a **mix of goals**.

Exam Alert

"Development for one may be destruction for another" + dam example = seedha 3 marks. Goals: income + non-material (freedom, security, respect).

2. National Development: Comparing Countries

Ideas of national development differ, so we need a fair way to compare. For countries, **income** is one of the most important attributes: higher income = more developed.

Per capita income (average income)

Per capita income = Total income of country ÷ Total population. The **World Bank** uses it in the **World Development Report** to classify countries into high income (rich), middle income and low income. India = **low middle income** country. Rich countries (except Middle East and some small ones) are called **developed countries**.

Monthly income (Rs)	Country A	Country B
Citizens I to IV	9,500; 10,500; 9,800; 10,000	500 each
Citizen V	10,200	48,000
Average	**10,000**	**10,000**

Same average, very different lives: Country A is better, income **equitably distributed**. Averages hide disparities.

Why average income is not enough

★ It is an average: hides **distribution and inequality**.

★ Ignores **health, education, freedom**, quality of life.

★ Says nothing about **public facilities** or sustainability.

3. Income and Other Criteria

State	Per capita income 2023-24 (Rs)	IMR (2020)	Literacy % (2017-18)
Haryana	3,25,759	28	82
Kerala	2,81,001	6	94
Bihar	60,337	27	62

↳ Net Attendance Ratio (secondary, age 15-17, 2017-18): Haryana 73, Kerala 94, Bihar 69.

→ Haryana highest income, Bihar lowest. But **Kerala** leads on health and education: IMR 6 vs Haryana 28.

→ Reason: Kerala has adequate provision of basic health and educational facilities (and a well-run PDS).

→ In Bihar about one-third of children aged 15 to 17 do not attend secondary school.

→ So income alone is **not a complete indicator** of goods and services people can use.

Key terms

Infant Mortality Rate (IMR): number of children who die before the age of one year as a proportion of 1000 live children born in that year.

Literacy rate: proportion of literate population in the **7 and above** age group.

Net Attendance Ratio: total number of children of a given age group attending school as a percentage of all children of that age group.

Meme samjho

"Bas income badh jaaye, baaki sab apne aap theek ho jayega." **Guarantee deta hai??**

Asli baat: No. Money cannot buy pollution-free air, unadulterated medicine or protection from infectious diseases. Kerala has lower IMR than Haryana despite lower per capita income, because of public facilities.

4. Public Facilities

→ Money cannot buy a **pollution-free environment** or ensure **unadulterated medicines**; it cannot protect from infectious diseases unless the whole community acts.

→ Cheaper to provide **collective facilities** (security, schools, health centres, clean water) than for each person to buy them.

→ Where **PDS** (Public Distribution System) works well, health and nutrition are better (e.g. Kerala).

Body Mass Index (BMI)

BMI = weight in kg ÷ (height in m)^2. Adult with BMI **below 18.5 = undernourished**; above 25 = overweight. Not suitable for growing children.

Different people, different goals: a landless rural labourer wants more days of work and better wages

Yaad karo: Development goals = "IFS-R"

Income (more pay) | Freedom and equal treatment | Security and respect | Right to a pollution-free environment. Different persons, different (even conflicting) goals.

5. Human Development Index (HDI)

Human Development Report of **UNDP** compares countries on **educational levels, health status and per capita income**. World Bank looks at income only; UNDP takes a wider view.

Country	Life expectancy	Mean years of schooling	HDI rank
Sri Lanka	77.5	10.8	89
India	72	6.9	**130**
Bangladesh	74.7	6.8	130
Nepal	70.4	4.5	145
Myanmar	66.9	6.4	150
Pakistan	67.6	4.3	168

↳ Source: Human Development Report 2025 (data 2023). Rank ka number jitna chhota, utna better: Sri Lanka 89, India 130. Chhota padosi humse aage!

Key terms

Life expectancy at birth: average expected length of life of a person at the time of birth. **Mean years of schooling:** average years of schooling of people aged 25 and above. **Gross enrolment ratio:** enrolment ratio for primary, secondary and higher education. **GNI per capita:** gross national income per person (in PPP dollars).

6. Sustainability of Development

Sustainable development: development that meets present needs **without harming future generations**. Present levels may not be sustainable.

→ **Groundwater** (renewable, but overused): about **300 districts** report a fall of **over 4 metres** in 20 years; nearly **one-third of the country** overuses it.

→ **Crude oil** (non-renewable, fixed stock): world reserves would last only a few decades at present rate; India imports much of its oil.

→ Consequences of environmental degradation do not respect national or state boundaries: sustainability is a **global issue**.

Yaad karo: 3 formulas

Per capita income = total income ÷ population. IMR = deaths before age 1 per 1000 live births. BMI = kg ÷ m^2 (below 18.5 = undernourished). Numerical aaye to **formula pehle likho**.

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Which criterion does the World Bank use to classify countries? 1M Board fav

(a) Population (b) Area (c) Per capita income (d) Literacy

Ans. (c) Per capita income.

Q2. Kerala has a much lower Infant Mortality Rate than Haryana mainly because Kerala has: 1M Board fav

(a) adequate basic health and education facilities (b) higher per capita income (c) more industries (d) more military facilities

Ans. (a) adequate provision of basic health and educational facilities.

Q3. **A:** Besides better income, people also seek security, respect, equal treatment and freedom. **R:** Money, or material things it can buy, is not all that we need to live well. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q4. Haryana's Net Attendance Ratio at the secondary stage is 73. How many children per 100 are not attending school? 1M

Ans. 27 (100 – 73).

Q5. An adult weighs 45 kg and is 1.6 m tall. Find the BMI. Is the person undernourished? 1M

Ans. BMI = 45 ÷ (1.6)^2 = 45 ÷ 2.56 = 17.6; below 18.5, so undernourished.

Q6. Which developmental goal is different in nature from the others? 1M

(a) Better employment (b) Rise in income (c) Equality among sexes (d) Construction of big dams

Ans. (d) Dams can displace people; the other three directly improve lives.

Q7. **A:** Kerala has a lower infant mortality rate than many richer states. **R:** Kerala has adequate provision of basic health and educational facilities. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (a) Both true and R explains A.

Q8. Which organisation publishes the Human Development Report? 1M

Ans. UNDP (United Nations Development Programme).

Q9. The literacy rate measures the proportion of literate population in which age group? 1M

Ans. 7 years and above.

Short answer (2-3 marks)

Q10. "Different people have different, even conflicting, developmental goals." Explain with examples. 3M Board fav

Ans. Life situations differ: landless labourers want more work and better wages; rich farmers want high support prices; urban girl wants freedom like her brother. Conflict: industrialist wants a dam for power, displaced tribals oppose it: development for one is destruction for another.

Q11. Why is per capita income not a complete measure of development? Give three reasons. 3M Board fav

Ans. (i) It is an average and hides inequality: Countries A and B both average Rs 10,000 but B is unequal (ii) ignores health and education: Haryana richer, Kerala better IMR (iii) money cannot buy pollution-free environment or pure medicines; public facilities matter.

Q12. How is the UNDP criterion different from the World Bank criterion? Why is it better? 3M Board fav

Ans. World Bank: only per capita income. UNDP (Human Development Report): per capita income + health (life expectancy) + education (mean years of schooling). Better: covers quality of life, not just income.

Q13. Why is it cheaper to provide public facilities collectively? Give examples. 3M

Ans. Collective provision (security, schools, health centres, clean water) costs far less than each person buying them; some things money cannot buy individually (pollution-free environment). Kerala's health and education services and PDS give low IMR and better nutrition.

Q14. Define (i) Infant Mortality Rate (ii) Literacy Rate. 2M

Ans. (i) Number of children dying before age one per 1000 live births in that year (ii) proportion of literate population in the 7 and above age group.

Q15. Five families earn Rs 20,000, 30,000, 40,000, 50,000 and 60,000 a month. Find the average income. What is its limitation? 2M

Ans. Average = 2,00,000 ÷ 5 = Rs 40,000. Limitation: it hides how income is distributed; it says nothing about health, education or facilities.

Q16. How does a safe and secure environment help women's development? 2M

Ans. It allows more women to take up jobs or run businesses; paid work raises their dignity in the household and society; security and respect are non-material goals of development.

Q17. What is the Public Distribution System? How does it help development? 2M

Ans. PDS supplies foodgrains and other essentials at low prices through ration shops. Where it works well (e.g. Kerala), people's health and nutritional status improve.

Long answer (5 marks)

Q18. What is sustainable development? Why is it essential? Give examples from India. 5M Board fav

Ans. (i) Development meeting present needs without harming future generations (ii) resources limited: groundwater overused in

(contd.) about one-third of the country; 300 districts fell over 4 m in 20 years (iii) crude oil is non-renewable, reserves will last only a few decades (iv) degradation crosses state and national borders (v) hence protect resources for future growth; a global concern.

Q19. "Money in your pocket cannot buy all the goods and services you need to live well." Explain with five points. 5M

Ans. (i) Pollution-free environment cannot be bought (ii) unadulterated medicines not ensured by money (iii) protection from infectious diseases needs collective action (iv) public facilities like schools, health centres, PDS are cheaper collectively; Kerala example (v) non-material needs: security, respect, freedom, equal treatment.

Q20. Compare India with its neighbours on the HDI. What lessons does it give? 5M

Ans. (i) Sri Lanka rank 89, far ahead of India (130) despite being small (ii) Bangladesh ties India at 130; Nepal 145, Myanmar 150, Pakistan 168 behind (iii) Sri Lanka: higher life expectancy (77.5) and schooling (10.8 years) (iv) lesson: health and education matter as much as income (v) India must invest in public health, education, nutrition to rise in HDI.

Source based (4 marks)

Q21. Table: Haryana per capita income Rs 3,25,759, IMR 28; Kerala Rs 2,81,001, IMR 6; Bihar Rs 60,337, IMR 27. (i) Which state has the highest per capita income? (ii) Which has the lowest IMR and why? (iii) What does the table show about income as an indicator? 4M

Ans. (i) Haryana (ii) Kerala (6): adequate basic health and educational facilities (iii) higher income does not ensure better health and education; income alone is not a complete indicator of development.

Q22. "Groundwater is an example of a renewable resource. Yet over 300 districts have reported a decline of over 4 metres in the water level during the past 20 years. Nearly one-third of the country is overusing it." (i) Why is groundwater called renewable? (ii) What does overuse show about present development? (iii) Suggest two ways to make its use sustainable. 4M

Ans. (i) It is replenished by nature, e.g. rainfall recharge (ii) present development is not sustainable; resources are used faster than replaced, harming future generations (iii) rainwater harvesting, drip/sprinkler irrigation, less water-intensive crops, regulating tube wells (any two).

Quick fact Per capita income = total income of the country / total population; World Bank uses it to compare countries.

Apne notes / galtiyan yahan likho

Most asked: organised vs unorganised, public vs private, GDP, MGNREGA

Sectors of the Indian Economy

1. Sectors of Economic Activities

Sector	Meaning	Examples
Primary (agriculture and related)	Goods produced by exploiting natural resources directly.	Farming, dairy, fishing, forestry, mining
Secondary (industrial)	Natural products changed into other forms through manufacturing; follows primary.	Cotton to yarn, sugarcane to sugar, earth to bricks
Tertiary (service)	Activities that help the primary and secondary sectors; produce services, not goods.	Transport, storage, communication, banking, trade; teachers, doctors, IT

Farmer grows cotton (P) → Mill spins yarn, weaves cloth (S) → Truck, shop sell it (T)

Interdependence

→ Farmers refuse to sell sugarcane: sugar mill shuts. **Secondary depends on primary.**

→ Companies stop buying cotton: farmers suffer. **Primary depends on secondary.**

→ Transport strike: farmers cannot sell, factories get no raw material. Tertiary supports both.

Historical change

Early stage: **primary** most important (most people farmers)

↓

New methods of manufacturing (100+ years): **secondary** most important

↓

Last 100 years in developed countries: **tertiary** most important (most production and jobs)

Tricky classifications (MCQ trap)

Activity	Sector	Why
Mining iron ore, quarrying	Primary	Natural resource taken directly
Making bricks, generating power, construction	Secondary	Industrial: something is made or built
Courier, ATM, call centre, tuition teacher	Tertiary	Service, no good produced
Basket weaving from cane	Secondary	Cane changed into a new product

Yaad karo: 3 sectors = "Paida, Banao, Seva"

Primary = paida karo (agriculture, dairy, fishing, forestry, mining) | **Secondary** = banao (manufacturing: cloth from cotton, sugar from cane) | **Tertiary** = seva do (transport, banking, trade, IT, teaching). Tertiary also called service sector.

2. Comparing Sectors: GDP

→ Count only **final goods**: reach the consumer. **Intermediate goods** (wheat, flour) are used up in making final goods.

→ NCERT example: flour worth **Rs 25** goes into biscuits sold for **Rs 80**; Rs 80 already includes the flour. Counting each separately = double counting.

Gross Domestic Product (GDP)

Value of all final goods and services produced **within a country** during a **particular year**. Sum of production of the three sectors; shows **how big the economy** is. In India measured by a **central government ministry** with help from state and UT departments.

Wheat Rs 8 → Flour Rs 10 → Biscuits Rs 60 → GDP adds **Rs 60 only**

↳ Wheat aur flour ka value pehle se Rs 60 ke andar hai; 8 + 10 + 60 jodoge to double counting ho jayegi.

Final goods	Intermediate goods
Reach the consumer for final use (biscuits, cloth, car).	Used up in producing final goods (wheat, flour, yarn, steel sheets).
Counted in GDP.	Not counted separately (already inside final value).

3. Sectors in India: Production vs Jobs

→ 1977-78 to 2017-18 (40 years): production grew in all sectors, **most in tertiary**. Tertiary became the largest producing sector, replacing primary.

Share in employment (%)	Primary	Secondary	Tertiary
1977-78	71	11	18
2017-18	44	25	31

Why tertiary grew (3 marks fav!)

1. **Basic services** (hospitals, schools, post and telegraph, police, courts, municipal corporations, defence, transport, banks, insurance) = govt's duty.
2. Development of agriculture and industry needs **transport, trade, storage.**
3. Rising **income**: demand for eating out, tourism, shopping, private hospitals and schools, professional training.
4. **New services** based on information and communication technology (IT) grew fast.

↳ Par saari tertiary services fast nahi badhin: skilled, educated workers wale (IT, finance) badhe; small shopkeepers, repair persons, transport workers still survive on low pay.

Tertiary that grew fast	Tertiary still weak
IT, finance, banking, telecom, professional services: need **skilled, educated** workers.	Small shopkeepers, repair persons, transport and domestic workers: **low earnings**, no security.

Jobs did not shift with production

→ Industry: production up **more than 9 times**, employment only **about 3 times**. Services: production up **14 times**, employment about **5 times**.

→ Primary = still the **largest employer**: more than half of workers, producing only about **one-sixth** of the value of output (GVA).

Underemployment / disguised unemployment

People appear to work but all are made to work **less than their potential**; removing some does not reduce output. E.g. Laxmi's family of 5 works on a small plot that 3 could manage: 2 can leave for other work and production stays the same. In cities: casual workers, painters, plumbers, street vendors who find work only some days.

Disguised unemployment	Seasonal unemployment
More people than needed on a job; extra workers add nothing.	No work for some months of the year (farm labourers after sowing/harvest).

Meme samjho

Laxmi ke khet pe 5 log kaam kar rahe hain, zarurat sirf 3 ki. 2 log hata do, production same! **Hain? Ye kaise ho gaya?**

Asli baat: This is disguised unemployment (underemployment): people appear to be working but their productivity is zero; common in agriculture. Removing them does not reduce output.

4. How to Create More Employment

✓ **Cheap credit** for a well / irrigation: farmers grow a second crop (rabi), more work on the same land.

✓ Build **dams, canals**; rural **roads and transport**; **storage** (cold storage) for crops.

✓ **Banks** give credit at reasonable rates to farmers and small units.

✓ Promote **agro-processing** (honey, pulses, vegetables), **tourism**, regional crafts, IT. Planning Commission study: tourism can give jobs to **more than 35 lakh** people every year.

✓ Local schools and health centres: more teachers, nurses, health workers.

Cheap credit → Irrigation → 2nd crop → More jobs

NCERT example: a **dam + canals** can employ many people in the village itself; **cold storage** and better roads let farmers sell at the right time and in bigger markets (e.g. **arhar dal** growers selling to traders in towns).

Yaad karo: rural jobs = "CID-STAR"

Credit cheap | **I**rrigation (dams, canals) | **D**istribution (roads, transport) | **S**torage | **T**ourism, crafts, IT | **A**gro-processing | **R**ight to Work (MGNREGA)

✓ Gives income and **reduces disguised unemployment** in villages.

✓ Builds useful assets: ponds, wells, roads, check dams, tree planting.

✓ Cuts **distress migration** of rural poor to cities in the lean season.

MGNREGA 2005

Mahatma Gandhi National Rural Employment Guarantee Act, 2005: implements the **Right to Work**. All who are able to and in need of work in rural areas are guaranteed **100 days of employment in a year**. If govt fails, it gives **unemployment allowance**. Work that increases production from land is preferred. The Act also says at least **one-third** of the jobs go to **women**.

5. Organised and Unorganised Sectors

Basis: **nature of employment conditions**.

Organised sector	Unorganised sector
Terms of employment **regular**; assured work.	Small, scattered units largely outside govt control.
Registered with govt; follow laws: Factories Act, Minimum Wages Act, Payment of Gratuity Act, Shops and Establishments Act.	Rules exist but are **not followed**.
Job security; fixed hours, paid overtime; paid leave, holidays; provident fund, gratuity, medical benefits, pension.	Low-paid, irregular jobs; no overtime, paid leave, holidays or sick leave.
Safe working environment.	No job security: can be asked to leave without reason.
E.g. **Kanta**: office job, monthly salary, PF, medical allowance.	E.g. **Kamal**: daily wage labourer, paid only for days worked.

↳ Organised companies bhi contract pe workers rakhti hain bina benefits ke: wo jobs bhi unorganised nature ki hain.

Yaad karo: organised ke 4 Acts = "Fact Mini Gift Shop"

Factories Act | **Mini**mum Wages Act | Payment of **Gratuity** Act | **Shop**s and Establishments Act

Organised to unorganised: a worrying trend

Since the **1990s** many organised units close or cut staff

↓

Workers lose secure jobs; firms hire on **contract**, give work to small units

↓

Workers forced into the unorganised sector: low, irregular earnings, no security

Who is in the unorganised sector?

→ **Rural:** landless agricultural labourers, small and marginal farmers, sharecroppers, artisans (weavers, blacksmiths, carpenters, goldsmiths).

→ **Urban:** workers in small-scale industry, casual workers in construction, trade, transport; street vendors, head-load workers, garment makers, rag pickers.
→ Most workers from SC, ST and backward communities and many women.

How to protect them (5 marks fav!)

1. Govt fixes **minimum wages and working hours** and ensures they are followed.
2. **Small farmers:** support for seeds, fertilisers, credit, storage and marketing at fair prices.
3. **Small industries:** help with procuring raw material and marketing output.
4. **Casual workers:** regular jobs, **health and social security.**
5. Protection and support for SC, ST, backward communities and women workers.

Construction workers: mostly unorganised sector, no job security, low pay, no paid leave or PF

6. Public and Private Sectors

Basis: **ownership of assets.**

Public sector	Private sector
Govt owns most assets and provides all services.	Ownership of assets and delivery of services with **private individuals or companies.**
Motive: **welfare**, not just profit.	Motive: **earning profits.**
Railways, post office, BPCL.	TISCO (Tata Iron and Steel), Reliance Industries.
Raises money through taxes.	Charges price for services.

Why the public sector is needed

→ Huge spending beyond private capacity: **roads, bridges, railways, harbours, power, dams**; collecting money from thousands of users is hard.
→ Govt supplies **electricity at low rates** to support small industries, bearing part of the cost.
→ Buys **wheat and rice at fair price** from farmers, sells at lower price through **ration shops.**
→ Duty to provide **schools, quality education, health facilities, nutrition** (e.g. midday meals); reduce IMR, illiteracy.

Key terms

Gratuity: lump sum paid by employer when a worker retires or leaves after years of service. **Provident fund (PF):** savings from salary (with employer's share) given at retirement. **Paid leave:** holiday with salary.

Classification	Basis	Example
Primary, secondary, tertiary	Nature of activity	Fishing, sugar mill, bank
Organised, unorganised	Employment conditions	Govt office, street vendor
Public, private	Ownership of assets	Railways, Reliance

Yaad karo: 3 ways, 3 bases

P-S-T = nature of activity; **Organised-Unorganised** = employment conditions; **Public-Private** = ownership. Ye table MCQ mein seedha aata hai.

Exam Alert

Largest **producing** sector = tertiary; largest **employer** = primary. GDP = **final** goods only. MGNREGA = **100 days**, 2005, rural, unemployment allowance.

1 minute recap

- P / S / T use nature, manufacture, serve the other two
- GDP final goods + services, within country, one year
- Largest producer tertiary; largest employer primary (44%, 2017-18)
- Disguised unemployment more workers than needed (Laxmi's family)
- MGNREGA 2005 100 days, Right to Work, allowance
- Organised registered, secure; unorganised scattered, insecure
- Public govt, welfare; private owners, profit

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Economic activities are classified into primary, secondary and tertiary on the basis of: 1M Board fav
(a) ownership (b) nature of activity (c) employment conditions (d) number of workers
Ans. (b) nature of the economic activity.

Q2. Five family members work on a plot that three could manage; if two leave, output does not fall. This is: 1M Board fav
(a) Seasonal (b) Disguised (c) Open (d) Educated unemployment
Ans. (b) Disguised unemployment.

Q3. **A:** Not every good produced needs to be counted to know total production. **R:** The value of final goods already includes the value of the intermediate goods used in making them. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true and R explains A.

Q4. **A:** The main motive of the public sector is to earn profits. **R:** Govt runs railways and supplies electricity at low rates to support small industries. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (d) A false (motive is welfare), R true.

Q5. Under MGNREGA 2005, how many days of work in a year are guaranteed, and what if govt fails? 1M Board fav

Ans. 100 days of employment; otherwise unemployment allowance.

Q6. BPCL is an example of the ____ sector and Reliance Industries of the ____ sector. 1M

Ans. Public; private.

Q7. Match: (A) Dairy (B) Sugar from sugarcane (C) Banking (D) Fishing with (I) Primary (II) Secondary (III) Tertiary. 1M

Ans. A-I, B-II, C-III, D-I.

Q8. In 2017-18, which sector had the largest share in production in India? 1M

(a) Primary (b) Secondary (c) Agriculture (d) Tertiary

Ans. (d) Tertiary.

Q9. Rohit works in a big hotel with fixed hours, monthly salary, paid leave and medical benefits. He works in the: 1M

(a) Unorganised (b) Primary (c) Organised (d) Informal sector

Ans. (c) Organised sector.

Q10. Which body replaced the Planning Commission? 1M

Ans. NITI Aayog.

Q11. **A:** GDP shows how big a country's economy is. **R:** GDP is the value of all intermediate goods and services produced in a year. 1M

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true

Ans. (c) A true, R false (GDP counts final goods).

Q12. Underemployment means: 1M

(a) No work at all (b) More people work than needed (c) Work only in cities (d) Overtime paid

Ans. (b) More people work than are actually needed.

Short answer (2-3 marks)

Q13. What is GDP? Why are only final goods counted? 3M Board fav

Ans. Value of all final goods and services produced within a country in a particular year. Final goods include the value of intermediate goods (flour in biscuits: Rs 25 inside Rs 80), so counting intermediates would mean double counting.

Q14. Why is the tertiary sector becoming so important in India? Give three reasons. 3M Board fav

Ans. (i) Basic services (hospitals, schools, police, courts, banks) are govt's duty (ii) growth of agriculture and industry needs transport, trade, storage (iii) rising incomes raise demand for eating out, tourism, private schools (iv) new IT-based services.

Q15. Distinguish between the organised and unorganised sectors on three points. 3M Board fav

Ans. Organised: registered, follows laws (Factories Act, Minimum Wages Act); regular, secure jobs; paid leave, PF, gratuity, medical benefits. Unorganised: small scattered units outside govt control; low-paid, irregular work; no leave or security, can be removed any time.

Q16. Distinguish between the public and private sectors. 3M

Ans. Public: govt owns assets and provides services; motive welfare; e.g. railways, post office. Private: assets and services (contd.) owned by individuals or companies; motive profit; e.g. TISCO, Reliance.

Q17. Explain how the three sectors are interdependent with an example. 3M

Ans. Sugar mill depends on farmers for sugarcane (secondary on primary); farmers depend on factories to buy cotton (primary on secondary); transport, storage and trade (tertiary) move goods for both; a truck strike hits all three.

Q18. "The primary sector is still the largest employer in India." Why has it not shifted? 3M

Ans. Secondary and tertiary output grew much faster than jobs: industry output 9+ times, employment 3 times; services output 14 times, employment 5 times. So over half of workers remain in agriculture, producing only about one-sixth of output, with disguised unemployment.

Q19. What is disguised unemployment? Give one rural and one urban example. 2M Board fav

Ans. Situation where more people work than needed, so each works below potential; removing some does not cut output. Rural: 5 family members on a plot needing 3. Urban: painters, plumbers, street vendors getting work only some days.

Q20. Distinguish between disguised and seasonal unemployment. 2M

Ans. Disguised: more workers than needed on a job throughout; extra ones add nothing. Seasonal: no work for some months of the year, e.g. farm workers after sowing and harvesting.

Q21. How do big private companies help in the development of a country? 2M

Ans. They increase production of industrial goods and services, create jobs, bring investment and technology; but their motive is profit, so govt must regulate them.

Q22. What is MGNREGA 2005? State its main features. 3M Board fav

Ans. Mahatma Gandhi National Rural Employment Guarantee Act, 2005: implements Right to Work; guarantees 100 days of work a year to all able and needy rural people; unemployment allowance if govt fails; preference to work that raises land productivity; reduces disguised unemployment.

Q23. Why are workers in the unorganised sector exploited? Give three reasons. 3M

Ans. No registration or govt control; rules not followed; low, irregular wages; no paid leave, PF or security; can be removed any time; mostly poor SC, ST, backward and women workers with little bargaining power.

Q24. Name two laws organised sector enterprises must follow and two benefits workers get. 2M

Ans. Laws: Factories Act, Minimum Wages Act, Payment of Gratuity Act, Shops and Establishments Act (any two). Benefits: paid leave, provident fund, gratuity, medical benefits, pension (any two).

Long answer (5 marks)

Q25. How can workers in the unorganised sector be protected? Explain. 5M Board fav

Ans. (i) Fix minimum wages and working hours and enforce

(contd.) them (ii) small farmers: support for seeds, fertilisers, credit, storage, marketing (iii) small industries: help with raw material and marketing (iv) casual workers: regular jobs, health and social security (v) special protection for SC, ST, backward communities and women, who form most of this sector.

Q26. Suggest ways to create more employment in rural areas. 5M Board fav

Ans. (i) Cheap credit for wells/irrigation: second crop (ii) dams, canals, rural roads, transport (iii) cold storage and marketing (iv) bank credit at fair rates; agro-processing, tourism (35 lakh jobs/year), crafts, IT (v) MGNREGA: 100 days guaranteed work, unemployment allowance.

Q27. Why is the public sector needed? Explain with examples. 5M

Ans. (i) Huge spending on roads, bridges, railways, harbours, power, dams beyond private firms (ii) cheap electricity to support small industries (iii) buys foodgrains at fair price, sells cheap via ration shops (iv) schools, health, nutrition for all; reduce IMR, illiteracy (v) motive welfare, raises money by taxes.

Q28. "Production shifted to the tertiary sector but employment did not." Explain with data and suggest remedies. 5M

Ans. (i) Tertiary is the largest producing sector by 2017-18 (ii) employment share: primary 71% (1977-78) to 44% (2017-18), still largest employer (iii) industry output 9+ times vs jobs 3 times; services 14 vs 5 times (iv) over half of workers in agriculture produce about one-sixth of output: disguised unemployment (v) remedies: irrigation, rural roads, storage, credit, agro-processing, tourism, MGNREGA.

Q29. Explain the role of the tertiary sector and its limits in India's development. 5M

Ans. (i) Supports primary and secondary: transport, storage, trade, banking (ii) basic services: health, education, police, courts (iii) largest producing sector, IT and finance grew fast (iv) but not all services grew: many small shopkeepers, repair and transport workers earn little (v) did not create jobs as fast as output; job creation in services must improve.

Source based (4 marks)

Q30. "Kanta works in an office from 9.30 a.m. to 5.30 p.m. She gets salary every month, provident fund, medical allowance and paid leave. Kamal is a daily wage labourer paid only for the days he works." (i) Sectors of Kanta and Kamal? (ii) Two benefits Kanta gets that Kamal does not. (iii) One way to protect workers like Kamal. 4M

Ans. (i) Kanta: organised; Kamal: unorganised (ii) monthly salary, PF, medical allowance, paid leave, fixed hours (any two) (iii) fix and enforce minimum wages and working hours / give health and social security.

Q31. Share in employment (%): 1977-78 Primary 71, Secondary 11, Tertiary 18; 2017-18 Primary 44, Secondary 25, Tertiary 31. (i) Which sector is the largest employer in both years? (ii) Which sector's share grew the most? (iii) What problem in the primary sector does this suggest? 4M

Ans. (i) Primary (ii) Secondary: 11 to 25 (+14 points); tertiary (contd.) close behind, 18 to 31 (+13) (iii) too many workers still in agriculture producing a small share of output: disguised unemployment and low income.

Case based and competency (4 marks)

Q32. Value of output (hypothetical, Rs crore). Year 1: Primary 400, Secondary 200, Tertiary 300. Year 10: Primary 500, Secondary 450, Tertiary 850. (i) Find GDP in Year 10. (ii) Which sector grew the most? (iii) What does the change suggest about the stage of development? (iv) Should jobs be expected to follow the same pattern in India? Why? 4M

Ans. (i) 500 + 450 + 850 = Rs 1800 crore (ii) Tertiary: 300 to 850 (nearly 3 times) (iii) economy moving towards a service-based stage, like developed countries (iv) not necessarily: in India output shifted to tertiary but primary is still the largest employer (44% in 2017-18).

Q33. "Under the Act, all those who are able to, and are in need of, work in rural areas are guaranteed 100 days of employment in a year. If the government fails, it gives unemployment allowance." (i) Name the Act and its year. (ii) Which right does it implement? (iii) Give two ways it helps a village. 4M Board fav

Ans. (i) MGNREGA, 2005 (ii) Right to Work (iii) income to the rural poor in the lean season; reduces disguised unemployment and migration; builds assets like ponds, wells, roads that raise farm production (any two).

Q34. A farmer sells cotton for Rs 500 to a mill; the mill makes cloth sold for Rs 1,500 to a tailor, who sells shirts for Rs 3,000. What value enters GDP and why? Name the sector of each person. 3M

Ans. Rs 3,000 only: shirts are the final good; cotton and cloth are intermediate goods already included, so adding them is double counting. Farmer: primary; mill: secondary; tailor (making shirts): secondary; a shop selling the shirts would be tertiary.

Q35. Sohan, a mill worker for 15 years, loses his job when the mill closes and now sells vegetables on a cart. Which sector change is this? List three things he loses. 3M

Ans. Organised to unorganised sector (a trend seen since the 1990s). He loses: job security, regular monthly salary, paid leave, PF, gratuity, medical benefits (any three); now earnings are low and irregular.

Q36. Classify by all three bases: (a) a govt-run bus service (b) a street vendor selling fruit (c) a private car factory. 3M

Ans. (a) Tertiary, organised, public (b) tertiary, unorganised, private (c) secondary, organised, private.

Q37. "Tourism can give jobs to many people in a region." Use this idea for a hill state: name two ways tourism creates jobs and the sector they belong to. 3M

Ans. Hotels, guides, taxis, homestays, food stalls and handicraft shops get work (tertiary); local crafts, food processing and construction of facilities also grow (secondary). Planning Commission study: tourism can give jobs to more than 35 lakh people every year.

Most asked: barter, terms of credit, formal vs informal, SHGs

Money and Credit

1. Money as a Medium of Exchange

Barter system: goods exchanged directly for goods, without money. Needs a **double coincidence of wants**: what one person wants to sell is exactly what the other wants to buy.

Shoe maker wants wheat; must find a farmer who sells wheat **and** wants shoes (rare!)

↓

With money: shoe maker sells shoes for **money**

↓

Uses money to buy wheat from any farmer

↓

No double coincidence needed: money = **medium of exchange**

Problems of barter	How money solves it
Double coincidence of wants is rare and hard to find.	Accepted by all: sell to anyone, buy from anyone.
No common measure of value (how many shoes = 1 bag of wheat?).	Prices in rupees make values easy to compare.
Goods hard to store and carry; many perish (wheat, milk).	Money is light, durable, easy to keep and carry.
Goods cannot be divided (half a cow?).	Notes and coins come in small units.

Money acts as an **intermediate** in the exchange process; anyone with money can exchange it for any good or service.

Barter system needs double coincidence of wants: both parties must want what the other has

2. Modern Forms of Money

- **Early India** grains and cattle used as money
- **Then** metallic coins: gold, silver, copper (continued well into the last century)
- **Now** paper notes and coins; bank deposits; digital payments

→ Modern currency has **no use of its own** (unlike gold); accepted because it is **authorised by the government**.

→ **RBI issues currency notes** on behalf of the central govt; no other individual or organisation can.

→ Law legalises the rupee as a medium of payment: no one in India can legally refuse payment in rupees.

Deposits with banks

→ People keep extra cash in bank accounts and earn **interest**; money is safe.

→ **Demand deposits:** can be withdrawn on demand. Payments made by **cheque** (and digitally) without cash, so demand deposits share the essential feature of money: **medium of exchange**.

→ Modern forms of money = **currency + deposits with banks.** Digital: bank transfers, ATM/debit and credit cards, POS machines, UPI QR codes.

Cheque

A paper instructing the bank to pay a **specific amount** from the person's account to the person in whose name the cheque has been issued. Cheque itself is not money; it transfers the deposit.

Salim writes a cheque to Prem (supplier)

↓

Prem deposits it in his bank

↓

Amount moves from Salim's account to Prem's

Yaad karo: "Gaay, Gold, Note, Bank, UPI"

Gaay (cattle) and grain | **Gold**, silver, copper coins | paper **Note**s and coins (RBI) | **Bank** deposits and cheques | digital: cards, **UPI**. Har step pe exchange aasaan.

3. Loan Activities of Banks

Depositors earn interest → **Bank** keeps small cash → **Borrowers** pay higher interest

→ Banks keep only a small part of deposits as cash: **about 15 per cent** (NCERT figure; a few newer guides print 5%, so follow your textbook) for withdrawals, since on any day only a few depositors withdraw.

→ Major portion used to **extend loans**: banks **mediate** between those with surplus funds and those who need funds.

→ Interest on loans > interest on deposits: the **difference is the main source of income** of banks.

4. Two Different Credit Situations

Credit (loan)

An agreement in which the lender supplies the borrower with **money, goods or services** in return for the **promise of future payment**.

Salim: credit helps	Swapna: debt trap
Shoe manufacturer gets a big festival order; loan for **working capital** (raw material, wages); finishes on time, earns **profit**, repays.	Small farmer borrows from moneylender; **crop fails** (pests); cannot repay, takes fresh loan, **sells part of land**. Worse off.

Swapna borrows from moneylender for cultivation

↓

Crop fails (pests); no income

↓

Takes a fresh loan to repay; interest piles up

↓

Sells part of her land: **debt trap**

Whether credit helps depends on **risks** and **support in case of loss**. Debt trap: failure to repay leaves the borrower worse off than before.

5. Terms of Credit

★ **Interest rate** paid with the **principal**.

★ **Collateral**: asset owned by the borrower (land, building, vehicle, livestock, bank deposits) used as a **guarantee** until the loan is repaid; lender can sell it if not repaid.

★ **Documentation** required and **mode of repayment**.

Together = **terms of credit**; vary with lender and borrower. Poor have no collateral, so they turn to moneylenders.

Megha's home loan (NCERT)	Term of credit
Rs 5 lakh from a bank	Principal
12% a year	Interest rate
Salary and employment records shown	Documentation
Papers of the new house kept by bank	Collateral
10 years, monthly instalments	Mode of repayment

Credit in Sonpur (NCERT case)

Shyamal (small farmer): moneylender at **5% per month** (60% a year). **Arun** (7 acres): bank loan at **8.5% per annum**. **Rama** (landless labourer): loan from landowner, repays by working on his fields. Lesson: poor pay the highest interest.

Yaad karo: Terms of credit = "I-C-D-M"

Interest rate | **C**ollateral (land, building, vehicle, livestock, deposits) | **D**ocumentation required | **M**ode of repayment. "I Can Do Money".

6. Formal and Informal Credit

Formal sources	Informal sources
Banks and cooperatives.	Moneylenders, traders, employers, relatives, friends.
Supervised by the **RBI**.	No organisation supervises them.
Lower, reasonable interest.	Very high interest; harsh ways of recovery.
Need collateral and documents.	Little or no collateral; know borrowers personally.
Mostly used by richer households.	Poor households depend largely on them; risk of debt trap.

Why poor depend on informal lenders

→ Banks are **not present everywhere** in rural India; getting a bank loan is harder.

→ Bank loans need **proper documents and collateral**; poor have neither.

→ Moneylenders **know borrowers personally**, lend without collateral, quickly, even for consumption.

→ Result: high interest eats up income; debt trap; borrower may have to sell land or work for the lender.

Debt cycle: high interest → more income goes in repayment → less left for the borrower → more borrowing → debt trap.

How RBI supervises formal lenders

✓ Checks that banks keep the **minimum cash balance** out of deposits.

✓ Sees that banks lend not just to profit-making businesses and traders but also to **small cultivators, small industries, small borrowers**.

✓ Banks report **how much they lend, to whom, at what interest rate**.

Rural credit sources, 2019	%	Source	%
Commercial banks	51	Moneylenders	23
Cooperatives	10	Relatives, friends	7
Other formal	5	Other informal	3
Formal total = 66% (about two-thirds)		Landlords	1

↳ Source: NCERT graph (All India Debt and Investment Survey 2019). Cheap, affordable credit is crucial for development: banks and cooperatives must lend more, especially to the poor.

Cooperative society

Members pool resources (e.g. farmers, weavers, workers); accept deposits from members and give loans at reasonable rates, e.g. for equipment, cultivation, trade, housing.

Meme samjho

Saahukar (moneylender) to garib kisan: "Loan doonga, par 3% mahina byaaj aur fasal mujhe hi bechoge. Humare liye kaam karoge?"

Asli baat: Informal lenders charge very high interest, have no rules and often force borrowers into a debt trap; that is why cheap formal credit (banks, cooperatives, SHGs) must reach the poor.

7. Self Help Groups (SHGs) for the Poor

✓ Typical SHG: **15 to 20 members**, usually women from one neighbourhood; meet and save regularly (**Rs 25 to Rs 100** or more per member).

✓ Members take **small loans from the group** at interest lower than moneylenders.

✓ After 1 to 2 years of regular saving, group gets a **bank loan without collateral** in its name, for self-employment (sewing, small business, livestock).

✓ Group decides savings and loans: purpose, amount, interest, repayment; non-repayment is followed up by members.

✓ Helps women become **financially self-reliant**; regular meetings = platform for social issues (health, nutrition, domestic violence). Building blocks of organisation of the rural poor.

Grameen Bank of Bangladesh

Started in the 1970s; in 2018 over **9 million members in about 81,600 villages**, almost all women. Founder **Prof. Muhammad Yunus**: **Nobel Peace Prize 2006**.

Yaad karo: SHG = "Sakhi Bachat Loan Leti"

Sakhi: 15–20 women of one area | **Bachat**: regular saving | **Loan**: small loans to members at low interest | **Leti**: group takes bank loan without collateral after 1–2 years, for self-employment.

Key terms (1-markers)

Principal: the amount borrowed. **Interest**: extra paid to lender for using the money. **Working capital**: money for raw material, wages and other running costs. **Debt trap**: unable to repay, borrower ends worse off. **Medium of exchange**: what is accepted in payment for goods and services.

Exam Alert

Terms of credit = interest + collateral + documents + repayment. RBI issues notes, supervises formal lenders. Demand deposits = money (medium of exchange); cheque = instruction, not money.

A Self Help Group meeting: 15–20 women save regularly, give small loans to members, and later get bank loans as a group

MOST IMPORTANT QUESTIONS

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. In India, currency notes are issued on behalf of the central government by: 1M Board fav
(a) SBI (b) Ministry of Finance (c) RBI (d) Commercial banks
Ans. (c) Reserve Bank of India.

Q2. Miss S gave the bank the papers of her house as a guarantee until her loan is repaid. This asset is: 1M Board fav
(a) Principal (b) Collateral (c) Interest (d) Working capital
Ans. (b) Collateral.

Q3. **A:** Formal sector loans are generally cheaper than moneylenders' loans. **R:** The RBI supervises the functioning of formal sources of loans. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true and R explains A.

Q4. **A:** Rich households depend mostly on informal sources of credit. **R:** Informal lenders often charge very high interest. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (d) A false (rich use formal sources), R true.

Q5. A typical SHG has how many members? 1M
Ans. 15 to 20, mostly women.

Q6. Who founded the Grameen Bank of Bangladesh? 1M
Ans. (contd.) Prof. Muhammad Yunus (Nobel Peace Prize, 2006).

Q7. Deposits that can be withdrawn whenever the account holder wants are called: 1M
(a) Demand deposits (b) Fixed deposits (c) Collateral (d) Time deposits
Ans. (a) Demand deposits.

Q8. Which is NOT a part of the terms of credit? 1M
(a) Interest rate (b) Collateral (c) Mode of repayment (d) Interest on savings deposits
Ans. (d) Interest the bank pays on savings is not a loan condition.

Short answer (2–3 marks)

Q9. What is double coincidence of wants? How does money solve it? 3M Board fav
Ans. Both parties must want what the other has to sell (shoe maker wants wheat; farmer must want shoes). Money is a medium of exchange: one sells for money and buys anything with it, so the coincidence is not needed.

Q10. Why are demand deposits considered a part of money? 3M Board fav
Ans. They can be withdrawn on demand; payments can be made by cheque or digitally without cash; widely accepted as a medium of exchange, the essential feature of money; with currency they form modern money.

Q11. What are the terms of credit? Why do they matter for the poor? 3M
Ans. Interest rate, collateral, documentation and mode of repayment agreed before a loan. The poor lack collateral and documents, so banks refuse them; they borrow from moneylenders at high interest and risk a debt trap.

Q12. How does the RBI supervise the formal sources of loans? 3M Board fav
Ans. Checks banks keep the minimum cash balance; ensures lending to small cultivators, small industries and small borrowers, not only to profitable businesses; banks report how much they lend, to whom and at what interest.

Q13. Why do most poor households depend on informal sources of credit? 3M
Ans. No collateral; lack documents banks need; banks absent or far in villages; moneylenders know them personally, lend quickly without collateral, even repeatedly.

Q14. "Credit can help or push into a debt trap." Explain with examples. 3M
Ans. Salim: loan as working capital for a festival order, profit, repays: credit helps. Swapna: crop fails, cannot repay moneylender, fresh loan, sells land: debt trap. Outcome depends on risk and support in case of loss.

Q15. Why can no one in India refuse payment in rupees? What backs modern currency? 2M
Ans. The law legalises the rupee as a medium of payment; currency is authorised by the government and issued by RBI on its behalf; it has no use of its own, its value rests on this authority.

Q17. What is working capital? Give an example. 2M

(contd.) Money needed for day-to-day production: buying raw materials and paying wages. E.g. Salim borrows to buy leather and pay workers to finish a festival shoe order.

Q16. What is a cooperative society? How does it help borrowers? 2M

Ans. A society whose members pool resources (farmers, weavers, workers); it accepts deposits from members and gives them loans at reasonable rates for cultivation, equipment, trade or housing.

Q18. Give two reasons why banks are unwilling to lend to small farmers. 2M

Ans. Small farmers often lack collateral (land papers, assets) and documents; their income is risky due to crop failure, so banks fear non-repayment.

Long answer (5 marks)

Q19. Distinguish formal and informal credit. Why should formal credit be expanded in rural India? 5M Board fav

Ans. Formal: banks, cooperatives, RBI-supervised, lower interest, need collateral. Informal: moneylenders, traders, relatives, unsupervised, high interest, debt trap. Expand: cheaper credit raises incomes; investment in farming and small business; reduces exploitation; reaches the poor (34% rural credit still informal); development.

Q20. How do Self Help Groups help the rural poor, especially women? 5M Board fav

Ans. (i) 15-20 members save regularly (ii) small loans from the group at low interest (iii) bank loans without collateral after 1-2 years for self-employment (iv) group decides terms; peer pressure ensures repayment (v) women become self-reliant; platform for social issues like health, nutrition, domestic violence.

Q21. "Deposits with banks are useful for depositors as well as for the country." Explain. 5M

Ans. (i) Money is safe and earns interest (ii) can withdraw any time; pay by cheque or digitally (iii) depositors can also borrow when needed (iv) banks keep a small part as cash and lend the rest to farmers, traders, industries (v) link between savers and borrowers: production, jobs, development.

Q22. Why do banks ask for collateral? Give two examples. 2M

Ans. Collateral is an asset (land, building, vehicle, livestock, bank deposits) the borrower owns and gives as a guarantee until the loan is repaid; if the borrower fails to repay, the lender can sell it to recover the money.

Source based (4 marks)

Q23. "Banks keep only a small proportion of their deposits as cash with themselves. They use the major portion of the deposits to extend loans." (i) Why do banks keep some cash? (ii) What is the main source of a bank's income? (iii) How do banks link savers and borrowers? 4M

Ans. (i) To pay depositors who come to withdraw on any day (ii) the difference between interest charged on loans and interest paid on deposits (iii) they take deposits from those with surplus funds and lend to those who need funds.

Q24. "In 2019, commercial banks gave 51% of rural credit, cooperatives 10%, other formal sources 5%; moneylenders gave 23%." (i) What share came from formal sources? (ii) Why is dependence on moneylenders harmful? (iii) Suggest two ways to cut it. 4M

Ans. (i) 66%, about two-thirds (ii) very high interest, harsh recovery, no supervision, risk of debt trap; borrowers' income goes in repayment (iii) more bank and cooperative lending in villages, especially to the poor; SHGs giving collateral-free credit.

Case based and competency (4 marks)

Q25. "Megha took a loan of Rs 5 lakh from a bank to buy a house at 12% interest a year, to be repaid in 10 years in monthly instalments. She showed her salary records, and the bank kept the papers of the new house." (i) What is the collateral here? (ii) Name two other terms of credit in the passage. (iii) Why would a landless labourer find it hard to get such a loan? 4M Board fav

Ans. (i) Papers of the new house (ii) interest rate 12% a year; documentation (salary/employment records); mode of repayment (monthly instalments over 10 years) (any two) (iii) he has no collateral and no regular salary documents, so banks hesitate; he must go to informal lenders.

Q26. Shyamal borrows Rs 10,000 from a moneylender at 5% per month; Arun borrows Rs 10,000 from a bank at 8.5% per year. Find the interest each pays for one year (simple interest) and state what this shows. 3M

Ans. Shyamal: 5% x 12 = 60% a year = Rs 6,000. Arun: 8.5% = Rs 850. The poor (small farmers) pay about 7 times more interest because they depend on informal lenders; formal credit must reach them.

Q27. Ravi, a shoe maker, wants wheat but the wheat farmer wants cloth, not shoes. (i) Name the problem. (ii) How does money remove it? (iii) Why is a Rs 100 note accepted though paper has little value? 3M

Ans. (i) Lack of double coincidence of wants (barter) (ii) Ravi sells shoes for money to anyone and buys wheat with money: money is the medium of exchange (iii) it is authorised by the govt, issued by the RBI, and legal tender: no one in India can refuse it.

Q28. "A typical SHG has 15-20 members who save regularly. After a year or two the group gets a bank loan without collateral." (i) Who usually forms SHGs? (ii) Why do banks lend to the group without collateral? (iii) Give two social benefits of SHGs. 4M

Ans. (i) Poor women of one neighbourhood (ii) the group's regular savings act as security and members themselves follow up repayment, so risk is low (iii) women become financially self-reliant; regular meetings let them discuss health, nutrition, domestic violence; organise the rural poor (any two).

Q29. Why is cheap and affordable credit important for a country's development? 2M

Ans. It lets farmers and small producers invest in crops, business and industry, raising production, income and jobs; high-cost credit only increases debt and pushes the poor into a debt trap.

GLOBALISATION AND ECONOMY

Board scope 2026-27

Board exam: only **What is Globalisation**, **Factors that have Enabled Globalisation** (technology, liberalisation, WTO) and **India and the G20**. Baaki sections (section 5) project/understanding ke liye, short mein.

1. What is Globalisation?

Key terms

MNC (Multinational Corporation): a company that owns or controls production in more than one nation; sets up factories and offices where it gets cheap labour and other resources, to earn greater profits.

Foreign investment: investment made by MNCs (buying assets like land, buildings, machines).

Globalisation: the process of rapid integration or interconnection between countries.

→ Last two to three decades: **foreign investment by MNCs** and **foreign trade** rising fast; a large part of foreign trade is controlled by MNCs.

→ E.g. **Ford Motors** plant near Chennai makes cars for Indian markets, exports cars to other developing countries and components to its factories worldwide.

→ Countries connected through movement of **goods, services, investments, technology and people** (for better income, jobs, education). Movement of people is still restricted.

→ Result: greater **integration of production and markets**; MNCs play a major role.

Moves between countries	Example
Goods	Chinese toys, Korean phones in Indian shops
Services	Call centres and IT work done in India for US firms
Investment	MNC sets up a factory in another country
Technology	New machines, software shared with partner firms
People (least free)	Move for better jobs, income, education; visas restrict

Yaad karo: what moves = "GSITP"

Goods | Services | Investment | Technology | People. "Globe Se India Tak Pahuncho".

Foreign trade + MNC investment → Integration

Yaad rakho WTO aims to liberalise international trade; India became a member and removed many trade barriers.

2. Factors Enabling Globalisation

(a) Technology

✓ **Transport:** faster delivery over long distances at lower cost. Containers: goods loaded intact onto ships, railways, planes, trucks; huge reduction in port handling costs, faster exports. Air transport cheaper.

✓ **Information and communication technology:** telecom, computers, internet, mobile phones, fax, e-mail; instant information, talk across the world at **negligible cost**. E.g. a magazine for a London company designed and printed in **Delhi**, text sent over the internet; bank payment from New York.

✓ **Result:** services like call centres, data entry, design, accounting can be done from far away; production can be organised across countries.

(b) Liberalisation of foreign trade and investment policy

→ **Trade barrier:** restriction set up by govt, e.g. tax on imports; regulates what and how much comes in.

→ After Independence India put barriers to **protect domestic producers** (industries were just coming up); only essentials (machinery, fertilisers, petroleum) imported.

→ Around 1991: policy changed; Indian producers should **compete globally**, competition improves performance and quality. Barriers removed to a large extent.

→ **Liberalisation:** removing barriers or restrictions set by the govt. Businesses decide freely what to import or export.

Before 1991 (protection)	After 1991 (liberalisation)
High import taxes, quotas; few imports.	Barriers on trade and investment largely removed.
Domestic producers protected from foreign competition.	Indian firms compete with foreign goods; quality must improve.
Foreign investment strictly limited.	MNCs invited to invest and set up production.

Key terms

Quota: limit on the quantity of a good that can be imported. **Import duty / tariff:** tax on imported goods. **Domestic producer:** a firm producing within the country.

(c) World Trade Organisation (WTO)

→ Liberalisation supported by powerful international organisations; **WTO** aims to liberalise international trade.

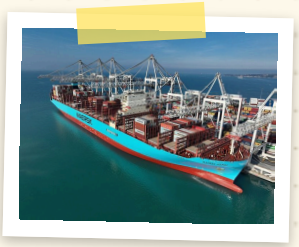

→ Started at the initiative of **developed countries**; sets rules for international trade and sees they are obeyed. About **160 member countries**.

→ Unfair in practice: developed countries kept their own trade barriers; developing countries forced to remove theirs. E.g. **US farmers get huge subsidies**, sell farm products abroad at low prices, hurting farmers of other countries (agri trade debate).

→ Developing countries ask: why should we remove barriers when rich nations protect their own farmers? Fair rules, not just free trade, are needed.

Shivam Bhaiya says
Globalisation ke do engine: **Technology** (containers, internet) aur **Liberalisation** (1991). Teesra player **WTO**. 3-marker mein har engine ke 2 points + 1 example.

Containers: goods loaded in standard containers cut port handling costs and made exports faster

Yaad karo: Enabling factors = "T-L-W"
Technology (transport: containers, faster ships and planes; IT: telecom, internet, computers) | **L**iberalisation of trade and investment (1991: removal of barriers) | **W**TO (1995) pushing free trade rules. "Teen Log Waiting".

3. India and the G20

G20 (Group of Twenty)
Forum of **19 countries + European Union**; African Union joined as permanent member in **2023**. Started **1999** as a meeting of finance ministers (after Asian financial crisis); leaders' summits from **2008**. Members = about **85% of world GDP, 75% of world trade, two-thirds of world population**.

↳ Members: Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, South Korea, Mexico, Russia, Saudi Arabia, South Africa, Turkiye, UK, USA + EU + AU.

- **1 Dec 2022 to 30 Nov 2023** India's **G20 Presidency**; meetings in many cities across India
- **Theme "Vasudhaiva Kutumbakam: One Earth, One Family, One Future"**
- **9-10 Sep 2023** New Delhi Summit, **Bharat Mandapam**: New Delhi Leaders' Declaration adopted by **consensus**; African Union made permanent member

India's priorities	Why it matters for India
Green development, **LiFE** (Lifestyle for Environment); inclusive, resilient growth; faster progress on **SDGs**; digital public infrastructure; **women-led development**; reformed multilateral institutions.	Voice of the **Global South**; showcased digital public infrastructure (UPI); boost to trade, investment, tourism; bigger role in shaping global economic rules.

Yaad karo: G20 numbers
19 + EU + AU | **1999 / 2008** | **85-75-2/3** (GDP, trade, population) | India 2022-23 | Delhi Sept 2023.

Meme samjho
Ford Motors: India mein cars banao, saste parts yahan se lo, aur doosre desho ko bhi export karo. *Smart move!*
Asli baat: MNCs set up production where it is cheaper and close to markets: Ford Motors came to India in 1995 (Chennai, with Mahindra) and exports car parts; Cargill bought Parakh Foods.

4. Interlinking Production (MNCs)

MNCs choose places with: **nearness to markets**, **cheap skilled and unskilled labour**, availability of other factors, and **favourable govt policies**.

Joint production with local companies: money + new technology (Ford Motors + Mahindra and Mahindra, near Chennai)
↓
Buying local companies: Cargill Foods (USA) bought Parakh Foods
↓
Orders to small producers: garments, footwear, sports items sold under MNC brand names
↓
Production spread: designed in USA, parts in China, assembled in Mexico/Eastern Europe, customer care from **India**

Foreign trade integrates markets: producers sell beyond domestic markets; buyers get more choice (Chinese toys in Indian markets: cheaper, new designs; Indian toy makers lose).

5. Impact of Globalisation (brief)

Benefits	Problems
Consumers (well-off urban): more choice, better quality, lower prices.	**Small producers** hit hard: batteries, capacitors, plastics, toys, tyres, dairy, vegetable oil units shut; workers jobless.
MNC investment in cell phones, automobiles, electronics, soft drinks, fast food, banking: new jobs.	**Workers:** flexible labour laws; temporary jobs, long hours, low wages, no security.
Top Indian firms grew; some became MNCs: **Tata Motors, Infosys, Ranbaxy, Asian Paints, Sundaram Fasteners.**	Benefits unequal: educated, skilled, wealthy gained most.
New services: IT, data entry, accounting, engineering.	Developed countries keep barriers (WTO unfair).

→ **SEZs (Special Economic Zones):** industrial zones with world-class facilities (electricity, water, roads, transport, storage); no taxes for an initial **5 years**, to attract foreign companies.
→ **Fair globalisation:** opportunities for all; govt protects workers' rights and small producers, uses trade and investment barriers if needed, negotiates fair WTO rules; people's movements (e.g. against WTO).

Quick fact Investment = money spent to buy assets such as land, building, machines; foreign investment = investment by MNCs.

Most Important Questions

60-Day book se chune hue | answers green mein

Objective (1 mark)

Q1. Globalisation is best described as: 1M Board fav
(a) Rapid integration between countries (b) Growth of trade within a state (c) Govt control over imports (d) Migration from villages to cities
Ans. (a) Rapid integration or interconnection between countries.

Q2. A tax on imported toys so that Indian toy-makers prosper is an example of: 1M
(a) Liberalisation (b) Trade barrier (c) Globalisation (d) Foreign investment
Ans. (b) A trade barrier.

Q3. **A:** Rapid improvement in technology has stimulated globalisation. **R:** Containers and cheaper air transport made faster delivery over long distances possible at lower cost. 1M Board fav
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (a) Both true and R explains A.

Q4. **A:** Globalisation is the process of rapid integration within a country. **R:** MNCs play a major role in globalisation. 1M
(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false (d) A false, R true
Ans. (d) A false (integration between countries), R true.

Q5. What was the theme of India's G20 Presidency? 1M Board fav
Ans. "Vasudhaiva Kutumbakam: One Earth, One Family, One Future".

Q6. Which organisation became a permanent member of the G20 at the New Delhi Summit, 2023? 1M
(a) ASEAN (b) SAARC (c) African Union (d) European Union
Ans. (c) African Union.

Q7. Removing barriers or restrictions set by the government on trade is called: 1M
(a) Privatisation (b) Nationalisation (c) Liberalisation (d) Protection
Ans. (c) Liberalisation.

Q8. Which MNC bought the Indian company Parakh Foods? 1M
Ans. Cargill Foods (USA).

Q9. G20 members together account for about what share of world GDP and world trade? 1M
Ans. About 85% of world GDP and 75% of world trade (and two-thirds of world population).

Q10. The use of containers in transport has led to: 1M
(a) Higher port costs (b) Lower port handling costs (c) Slower exports (d) End of air transport
Ans. (b) A huge reduction in port handling costs and faster exports.

Short answer (2-3 marks)

Q11. What is globalisation? How has technology helped the process? 3M Board fav
Ans. Rapid integration of countries through goods, services, investment, technology and people. Technology: containers cut (contd.) port handling costs, faster exports; cheaper air transport; telecom, computers, internet give instant information at negligible cost (magazine for London printed in Delhi).

Q12. What is liberalisation? Why did India liberalise its trade policy around 1991? 3M Board fav
Ans. Removing barriers or restrictions set by govt on trade and investment. India had barriers after Independence to protect producers; by 1991 govt felt competition with global producers would improve performance and quality of Indian producers.

Q13. What is the WTO? State two criticisms of it. 3M Board fav
Ans. World Trade Organisation, started by developed countries, aims to liberalise international trade, sets and enforces trade rules (about 160 members). Criticism: developed countries kept their own barriers (US farm subsidies); developing countries forced to remove theirs.

Q14. What is an MNC? What factors does an MNC consider before setting up production? 3M
Ans. A company owning or controlling production in more than one nation. Factors: nearness to markets; cheap skilled and unskilled labour; availability of other resources; favourable govt policies.

Q15. What is a trade barrier? Why did India put trade barriers after Independence? 2M
Ans. A govt restriction on foreign trade, e.g. tax on imports. To protect domestic producers from foreign competition when industries were just starting; only essentials like machinery, fertilisers, petroleum imported.

Q16. How does foreign trade integrate markets of different countries? 2M
Ans. Producers can sell beyond domestic markets; buyers get a wider choice of goods; prices of similar goods tend to become equal; e.g. Chinese toys sold in India gave buyers cheaper new designs, Indian toy makers faced competition.

Q17. What are Special Economic Zones (SEZs)? 2M
Ans. Industrial zones set up by govt with world-class facilities (electricity, water, roads, transport, storage, recreation); companies there pay no taxes for an initial five years; aim: attract foreign investment.

Q18. Give any three ways in which globalisation has benefited Indian consumers and companies. 3M
Ans. Consumers (well-off urban) get more choice, better quality, lower prices; MNC investment created new jobs in cell phones, automobiles, electronics; top Indian firms grew and some became MNCs (Tata Motors, Infosys, Ranbaxy); new IT-based services.

Q19. What is meant by "fair globalisation"? 2M
Ans. Globalisation that creates opportunities for all and shares benefits better: govt protects workers' rights and small producers, uses trade barriers if needed, negotiates fair WTO rules.

Long answer (5 marks)

Q20. Explain the significance of India's G20 Presidency (2022-23). 5M Board fav
Ans. (i) 1 Dec 2022 to 30 Nov 2023; theme Vasudhaiva Kutumbakam (ii) meetings across many Indian cities (iii) New Delhi Summit, Sep 2023: Leaders' Declaration by consensus (iv) African Union made permanent member: voice for Global South (v)

(contd.) priorities: green development and LiFE, inclusive growth, SDGs, digital public infrastructure, women-led development; boosted India's image, trade, tourism.

Q21. Explain the factors that have enabled globalisation. 5M

Ans. (i) Transport technology: containers, cheaper air transport (ii) ICT: telecom, computers, internet; services produced anywhere (iii) liberalisation: removal of trade and investment barriers (India, 1991) (iv) WTO pushing free trade with common rules (v) MNCs' foreign investment spreading production across countries.

Q22. How do MNCs interlink production across countries? Explain with examples. 5M

Ans. (i) Set up factories where markets are near, labour cheap, policies favourable (ii) joint production with local firms, giving money and technology (Ford + Mahindra and Mahindra) (iii) buy local companies (Cargill bought Parakh Foods) (iv) place orders with small producers (garments, footwear, sports items) and sell under own brands (v) spread stages: design in USA, parts in China, assembly in Mexico, customer care in India.

Source based (4 marks)

Q23. "The WTO aims to liberalise international trade. It was started at the initiative of developed countries. It sets rules for international trade and sees that these are obeyed. In practice, developed countries have unfairly retained trade barriers." (i) Main aim of the WTO? (ii) Who started it? (iii) Two shortcomings. 4M

Ans. (i) Liberalise international trade by removing barriers, with common rules (ii) developed countries (iii) developed countries kept their own barriers and subsidies (US farmers); developing countries forced to remove barriers, hurting their producers.

Case based and competency (4 marks)

Q24. "India held the G20 Presidency from 1 December 2022 to 30 November 2023 under the theme Vasudhaiva Kutumbakam: One Earth, One Family, One Future. At the New Delhi Summit the African Union became a permanent member." (i) What is the G20? (ii) What does the theme mean? (iii) Why was the African Union's entry important for the Global South? 4M Board fav

Ans. (i) A forum of 19 countries + the EU (now also the AU) whose members make up about 85% of world GDP, 75% of world trade and two-thirds of world population (ii) the whole world is one family: growth must be shared, green and inclusive (iii) it gives African developing countries a direct voice in shaping global economic rules; India championed the Global South.

Q25. "Cargill Foods, a large American MNC, bought Parakh Foods, a small Indian company with a wide marketing network and a well-known brand. Cargill is now the largest producer of edible oil in India." (i) Which way of spreading production does this show? (ii) Why would an MNC buy a local company? (iii) Name two other ways MNCs spread production. 4M

Ans. (i) Buying up local companies (ii) to get its brand, marketing network, plants and customers quickly, and expand production and profit (iii) joint production with local firms (Ford Motors with Mahindra and Mahindra); placing orders with small producers (garments, footwear, sports items).

Q26. An Indian toy maker's sales fall when cheaper Chinese toys fill the market after import taxes are cut. (i) Which policy change caused this? (ii) Who gains and who loses? (iii) Suggest one step the govt could take for fair globalisation. 3M

Ans. (i) Liberalisation of trade (removal of trade barriers) (ii) buyers gain (more choice, lower prices); Indian toy makers and their workers lose (iii) support small producers to improve quality and technology / use trade barriers where needed / negotiate fairer WTO rules.

Q27. A London company gets its magazine designed and printed in Delhi, and the text is sent over the internet. Which enabling factor of globalisation does this show? Explain in two points. 3M

Ans. Information and communication technology: (i) computers, internet and telecom let information move instantly at negligible cost (ii) so services can be done in a country with cheaper skilled labour and the product sent back fast; this integrates production across countries.

Q28. "Containers changed world trade." Give two reasons. 2M

Ans. Goods are packed in standard containers and moved intact onto ships, trains, planes and trucks: port handling costs fall sharply and exports reach markets faster, so long-distance trade becomes cheaper.

Q29. Ford Motors set up a plant near Chennai with Mahindra and Mahindra. Give three reasons why MNCs choose a country like India. 3M

Ans. (i) Large and growing market: nearness to buyers (ii) cheap skilled and unskilled labour, e.g. engineers and workers (iii) availability of parts and other factors of production (iv) favourable govt policies after liberalisation (any three).

Q30. Name two Indian companies that became MNCs due to globalisation, and one service sector that grew in India. 2M

Ans. Tata Motors, Infosys, Ranbaxy, Asian Paints, Sundaram Fasteners (any two); IT and IT-enabled services (call centres, data entry, accounting, engineering).

Q31. What is a quota? How is it different from an import tax? Why are both called trade barriers? 2M

Ans. Quota: a limit on the quantity of a good that can be imported; import tax: a tax that makes imported goods costlier. Both are govt restrictions that regulate how much foreign goods come in, so they are trade barriers.

Q32. Why has the movement of people between countries not grown as much as trade in goods and investment? 2M

Ans. Countries put restrictions (visas, work permits, immigration rules) on people coming in, while barriers on goods and investment were removed; so goods and money move freely but people far less.

Q33. In which year was the WTO set up, and roughly how many member countries does it have? 1M

Ans. 1995; about 160 member countries.

Do you know? Liberalisation: removing barriers or restrictions set by the government.

LAST-NIGHT REVISION Whole syllabus in 3 pages

Exam se pehli raat: sirf ye 3 pages padho
har line = 1 mark wala fact

ONE-LINERS + DATES

1. History dates timeline

Ch1 Nationalism in Europe

- **1789** French Revolution: first clear expression of nationalism; sovereignty transferred from monarch to citizens (la patrie, le citoyen).
- **1797** Napoleon invades Italy. **1804** Civil Code (Napoleonic Code): equality before law, right to property, end of feudal privileges.
- **1814–15** Fall of Napoleon; Congress of Vienna hosted by Austrian Chancellor Duke Metternich; Treaty of Vienna 1815 restores monarchies (Bourbons in France).
- **1821** Greek struggle for independence begins. **1832** Treaty of Constantinople: Greece independent.
- **1830** July Revolution in France (Louis Philippe, constitutional monarch); Belgium breaks away from the United Kingdom of the Netherlands.
- **1834** Zollverein (customs union) formed at the initiative of Prussia.
- **1831, 1848** Mazzini's Young Italy (1831); revolutions of liberals in 1848; Frankfurt Parliament (18 May 1848, St Paul's Church) fails.
- **1859–70** Unification of Italy: Cavour, Garibaldi (Red Shirts, 1860); 1861 Victor Emmanuel II king of united Italy; 1871 Rome becomes the capital.
- **1866–71** Prussia's three wars (Austria, Denmark, France); 18 January 1871: Kaiser William I proclaimed German Emperor at Versailles.
- **1707** Act of Union: England + Scotland = United Kingdom of Great Britain. **1801** Ireland forcibly joined.
- **1871–1914** Balkans: "powder keg of Europe"; rivalry of big powers leads to the First World War (1914).

Ch2 Nationalism in India

- **1915** Gandhiji returns from South Africa (January).
- **1917** Champaran (Bihar): indigo planters. **1917** Kheda (Gujarat): peasants, revenue relief. **1918** Ahmedabad: cotton mill workers.
- **1919** Rowlatt Act (detention without trial for 2 years); 6 April hartal; 13 April Jallianwala Bagh massacre (General Dyer).
- **1920** Khilafat + Non-Cooperation: Calcutta session September 1920 proposes, Nagpur session December 1920 adopts NCM.
- **1920–22** Awadh Kisan Sabha (October 1920: Nehru, Baba Ramchandra); Gudem Hills (Andhra) revolt under Alluri Sitaram Raju; Assam plantation workers defy the Inland Emigration Act of 1859.
- **1922** Chauri Chaura (February): violence, Gandhiji withdraws NCM.
- **1928** Simon Commission arrives, greeted with "Go back Simon". Bardoli satyagraha (Vallabhbhai Patel).
- **1929** October: Lord Irwin's vague offer of dominion status; December: Lahore Congress (Nehru) demands Purna Swaraj.
- **1930** 26 January Independence Day; 31 January Gandhiji's 11 demands; 12 March to 6 April Dandi March (240 miles, 24 days, from Sabarmati); CDM begins.
- **1931** 5 March Gandhi–Irwin Pact; December Second Round Table Conference fails; CDM relaunched.
- **1932** Poona Pact (September): Gandhiji and Dr B.R. Ambedkar; reserved seats for Depressed Classes in councils, voted by the general electorate.
- **1927 / 1934** Madras INC session (1927); CDM finally lost momentum by 1934.

Ch3 + Ch5 key dates

- **594 AD** Hand printing in China (woodblocks); **768–770** Buddhist missionaries bring print technology to Japan; **868** Diamond Sutra, oldest Japanese printed book.
- **1295** Marco Polo brings knowledge of woodblock printing to Italy.
- **1430s–1448** Gutenberg (Strasbourg) develops the printing press; first book: the Bible.
- **1517** Martin Luther's 95 Theses; **1558** Roman Church's Index of Prohibited Books.
- **Mid-1500s** Portuguese missionaries bring the press to Goa; **1780** James Augustus Hickey's Bengal Gazette.
- **1810** Calcutta printing of Ramcharitmanas; **1821** Sambad Kaumudi (Raja Rammohun Roy); **1871** Gulamgiri (Jyotiba Phule).
- **1876** Amar Jiban by Rashsundari Debi, first full-length autobiography in Bengali; **1878** Vernacular Press Act.
- **Pre-modern** Silk Routes (before Christian era to 15th century); 16th century: Europeans reach America, potato, maize, chillies travel to Europe and Asia.

Yaad karo: date ka jod

1919 Rowlatt + Jallianwala, **1920** NCM, **1922** Chauri Chaura, **1928** Simon, **1929** Lahore, **1930** Dandi, **1931** Pact, **1932** Poona. "9 se 2 tak sab yaad, har saal ek kaam".

2. History one-liners

→ **Nation-state:** citizens and rulers share a common identity, history and descent.

→ **Liberalism** (Latin liber = free): individual freedom, equality before law, government by consent; economically, free markets and end of state restrictions.

→ **Conservatism:** stressed tradition, monarchy, Church, social hierarchy (Vienna 1815).

- **Allegory:** abstract idea expressed through a person (Marianne = France, Germania = Germany; Germania wears a crown of oak leaves = heroism).
- **Ethnic:** common racial, tribal or cultural origin. **Plebiscite:** direct vote by all people of a region.
- **Satyagraha:** power of truth; non-violent, appeals to the conscience of the oppressor.
- **Begar:** forced labour without payment. **Picketing:** protest blocking entry to a shop or office.
- **Boycott** of foreign cloth: import halved between 1921 and 1922 (from 102 crore to 57 crore rupees).
- **Hind Swaraj** (1909): British rule survived only with Indian cooperation.
- Bharat Mata image first created by **Bankim Chandra Chattopadhyay** (Vande Mataram); painted by **Abanindranath Tagore**.
- Swaraj flag 1921: red, green, white with spinning wheel (Gandhiji).
- **Calico:** cotton cloth; **Vellum:** parchment from animal skin; **Protestant Reformation:** 16th century movement to reform the Catholic Church.
- **Chapbooks:** pocket-size books sold by pedlars (chapmen); **Bibliotheque Bleue:** low-priced small books in France.
- Kashibaba (Kanpur mill worker) wrote **Chhote Aur Bade Ka Sawal** (1938) on caste and class exploitation.
- Silk Routes, cowries (seashells used as currency) and the movement of food crops = the **pre-modern** global world.

3. Geography one-liners

- **Resources:** biotic/abiotic; renewable/non-renewable; individual, community, national, international; potential, developed, stock, reserves.
- Land use: net sown area is over 80% in Punjab and Haryana but under 10% in Arunachal, Mizoram, Manipur, A and N Islands; forest should be 33% of area (National Forest Policy 1952), India has far less.
- Soil erosion types: **gullies** (ravines, Chambal basin = bad land), **sheet erosion**; conservation: contour ploughing, terrace farming, strip cropping, shelter belts.
- **Black soil** = regur, cotton; **laterite** = high rain + temperature, tea/coffee/cashew; **arid** = kankar layer.
- Forest types: reserved (more than half of total forest), protected (one-third), unclassed. Wildlife Protection Act 1972; Project Tiger 1973.
- Multipurpose projects: irrigation + power + flood control + fish breeding; problems: displacement, sedimentation, Narmada Bachao Andolan.
- Cropping seasons: **Rabi** (sown Oct-Dec, harvested Apr-June: wheat, gram, mustard), **Kharif** (with monsoon: rice, maize, jowar, cotton, jute), **Zaid** (summer: watermelon, cucumber).
- Jhumming (slash and burn) = primitive subsistence; plantation = single crop on a large area (tea, coffee, rubber, sugarcane, banana).
- Golden fibre = **jute**; India = largest producer of pulses; second largest of rice and sugarcane.
- Minerals: **magnetite** (up to 70% iron) is the finest iron ore; **bauxite** = aluminium; **mica**: Koderma-Gaya-Hazaribagh belt.
- Coal types: **anthracite** (highest quality), bituminous (commercial), lignite (Neyveli), peat.
- Manufacturing contribution to GDP: about 17% (aim was 25%); NMCC set up to improve productivity.
- Iron and steel = **basic industry**; India = second largest crude steel producer; Chota Nagpur plateau = maximum concentration.
- NTPC: a **Maharatna** company, power generation with care for the environment.

Shivam Bhaiya ki last-night tip

Geography mein **number + example** likho (e.g. "magnetite, up to 70% iron, Bailadila"). Examiner ko aisi line dikhte hi full marks dene ka mann karta hai.

4. Political Science one-liners

- **Belgium:** Dutch 59%, French 40%, German 1%; Brussels: 80% French; constitution amended 4 times (1970-1993); third tier: community government.
- **Sri Lanka:** Sinhala 74%, Tamils 18%; 1956 Act: Sinhala the only official language: majoritarianism leads to civil war.
- Power sharing forms: horizontal (organs), vertical (levels), among social groups, among parties/pressure groups.
- **Prudential reason:** reduces conflict; **moral reason:** spirit of democracy.
- Federalism: two or more levels; jurisdiction in the Constitution; changes need consent of both levels; courts as umpire.
- Union List (defence, foreign affairs, banking, currency); State List (police, agriculture, trade within state); Concurrent (education, forest, marriage, adoption); residuary = Union.
- Language: **22 scheduled languages**; Hindi is the mother tongue of less than half of Indians, so no national language; English continues with Hindi for official use.
- 73rd/74th Amendments (1992): regular elections, one-third seats for women, reservation for SC/ST/OBC, State Election Commission.
- Gender: women in Lok Sabha crossed 14% only in 2019; Women's Reservation Act (2023): one-third seats in Lok Sabha and state assemblies.
- Communalism: religion as the basis of nation; India is secular: no official religion (Articles on freedom of religion).
- Political party = leaders, active members, followers; Election Commission recognises national and state parties and gives them a unique symbol.
- Challenges to parties: lack of internal democracy, dynastic succession, money and muscle power, no meaningful choice.
- Outcomes: democracy produces accountable, responsive and legitimate government; slower decisions but better decisions.

5. Economics one-liners

- → Development goals differ: landless labourers want more days of work; urban girl wants freedom and education.
- → **Per capita income** = national income / population; HDI (UNDP) also uses health and education.
- → **IMR** = deaths of children under 1 year per 1000 live births; **literacy rate** = literate population aged 7+; **NAR** = children 14–15 attending school.
- → Sectors: primary (natural products), secondary (manufacturing), tertiary (services); GDP = final goods and services, not intermediate.
- → Tertiary sector is largest in production; primary employs the most (underemployment / disguised unemployment).
- → MGNREGA 2005: **100 days** of guaranteed work a year, else unemployment allowance.
- → Organised sector: registered, terms of employment, job security; unorganised: small scattered units, low pay, no security.
- → Money = medium of exchange; removes double coincidence of wants; demand deposits and cheques are modern forms.
- → Banks keep about **15%** of deposits as cash; RBI supervises banks and issues notes.
- → Terms of credit: interest rate, collateral, documentation, mode of repayment. Formal sources: banks, cooperatives; informal: moneylenders, traders, relatives.
- → Grameen Bank of Bangladesh (Muhammad Yunus, Nobel Peace Prize 2006): credit for the poor.
- → Globalisation = rapid integration of countries through MNCs, trade, investment; enabled by technology, liberalisation, WTO.
- → India held the **G20** Presidency in 2023 (New Delhi Summit, "One Earth, One Family, One Future"); African Union became a permanent member.

6. 1-mark terms: ek line mein

Term	Meaning (board language)
Absolutist	Unrestricted, despotic, authoritarian monarchy
Utopian	A vision of an ideal society, unlikely to actually exist
Suffrage	The right to vote
Feminist	Awareness of women's rights and interests based on the belief of equality of genders
Ideology	System of ideas reflecting a particular social and political vision
Forced recruitment	Process by which the colonial state forced people to join the army
Boycott	Refusal to deal and associate with people, or participate in activities, or buy and use things
Indentured labour	Bonded labourer under contract to work for an employer for a specific time, to pay off his passage
Ulama	Scholars of Islamic learning
Denominations	Sub-groups within a religion
Majoritarianism	Belief that the majority community should rule the way it wants, disregarding the minority
Civil war	Violent conflict between opposing groups within a country
Jurisdiction	Area over which someone has legal authority (geographical or subjects)
Coalition government	Government formed by two or more parties coming together
Sexual division of labour	Work inside the home done by women, outside by men
Patriarchy	A system that values men more and gives them power over women
Caste hierarchy	Ladder-like formation: "highest" castes at the top, "untouchables" at the bottom
Defection	Changing party allegiance from the party on which one got elected
Affidavit	Signed document in which a person makes a sworn statement
Transparency	Right and means to examine the process of decision making
Sustainable development	Development without damage to the environment, without compromising the needs of future generations
Intermediate goods	Goods used up in producing final goods and services
Underemployment	People work less than their potential; also disguised unemployment
Double coincidence of wants	What one person wants to sell is exactly what the other wishes to buy
Debt trap	Failure to repay a loan pushes the borrower into a worse situation than before
Trade barrier	Restriction on foreign trade, e.g. a tax on imports
Fair globalisation	Globalisation that creates opportunities for all and ensures its benefits are better shared
Bhabar / Bhangar / Khadar	Pebbly foothill belt / old alluvium / new alluvium (more fertile)
Hydraulic structures	Dams, canals, wells, tanks built to store and channel water
Primitive subsistence farming	Small patches, primitive tools, family labour; e.g. jhumming

Yaad karo: 3 Rs of resource use

Reduce, Reuse, Recycle: har resource answer ke end mein ek line likho, sustainable development ka point mil jata hai.

Exam morning checklist

Admit card, 2 blue pens, pencil + eraser for maps, scale. 15 min reading time: pehle map question aur case-based dekh lo. Har answer mein headings + underline.

MAP LIST QUICK CHECK CBSE 2026-27 map list

Map Quick Check

Tick karo jo map par bina dekhe laga sako sab Maps A to J (Map Work) mein

OK	Ch	Item	What / where	State / count
☐	H2	Calcutta	INC session Sep 1920 (NCM proposed)	West Bengal
☐	H2	Nagpur	INC session Dec 1920 (NCM adopted)	Maharashtra
☐	H2	Madras	INC session 1927	Tamil Nadu
☐	H2	Champaran	Indigo planters, 1917	Bihar
☐	H2	Kheda	Peasant satyagraha, 1917	Gujarat
☐	H2	Ahmedabad	Cotton mill workers, 1918	Gujarat
☐	H2	Amritsar	Jallianwala Bagh, 1919	Punjab
☐	H2	Dandi	Salt March end, 1930	Gujarat
☐	G1	Soil types	Alluvial, black, red and yellow, laterite, arid, forest (identify)	All India
☐	G3	Salal	Dam on Chenab	J and K
☐	G3	Bhakra Nangal	Dam on Satluj	Himachal / Punjab
☐	G3	Tehri	Dam on Bhagirathi	Uttarakhand
☐	G3	Rana Pratap Sagar	Dam on Chambal	Rajasthan
☐	G3	Sardar Sarovar	Dam on Narmada	Gujarat
☐	G3	Hirakud	Dam on Mahanadi	Odisha
☐	G3	Nagarjuna Sagar	Dam on Krishna	Telangana / AP
☐	G3	Tungabhadra	Dam on Tungabhadra	Karnataka
☐	G4	Rice and wheat areas	Rice: WB, UP, Punjab; wheat: Punjab, Haryana, UP, MP (identify)	North plains
☐	G4	Largest producers	Sugarcane UP; tea Assam; coffee Karnataka; rubber Kerala; cotton Gujarat/Maharashtra; jute WB	Identify
☐	G5	Iron ore	Mayurbhanj (Odisha), Durg and Bailadila (Chhattisgarh), Bellary and Kudremukh (Karnataka)	5 mines
☐	G5	Coal	Raniganj (WB), Bokaro (Jharkhand), Talcher (Odisha), Neyveli (TN)	4 mines
☐	G5	Oil fields	Digboi, Naharkatia (Assam); Mumbai High, Bassien (offshore Maharashtra); Kalol, Ankaleshwar (Gujarat)	6 fields
☐	G5	Thermal	Namrup (Assam), Singrauli (MP), Ramagundam (Telangana)	3 plants
☐	G5	Nuclear	Narora (UP), Kakrapara (Gujarat), Tarapur (Maharashtra), Kalpakkam (TN)	4 plants
☐	G6	Cotton textile	Mumbai, Indore, Surat, Kanpur, Coimbatore	5 centres
☐	G6	Iron and steel	Durgapur, Bokaro, Jamshedpur, Bhilai, Vijayanagar, Salem	6 plants
☐	G6	Software parks	Noida, Gandhinagar, Mumbai, Pune, Hyderabad, Bengaluru, Chennai, Thiruvananthapuram	8 STPs
☐	G7	Major ports	Kandla, Mumbai, Marmagao, New Mangalore, Kochi, Tuticorin, Chennai, Visakhapatnam, Paradip, Haldia	10 ports
☐	G7	Intl airports	Amritsar, Delhi, Mumbai, Chennai, Kolkata, Hyderabad	6 airports

Yaad karo: dams north se south

"Sal Bha Teh Ra Sar Hira Naga Tunga": Salal, Bhakra Nangal, Tehri, Rana Pratap Sagar, Sardar Sarovar, Hirakud, Nagarjuna Sagar, Tungabhadra.

Yaad karo: steel plants

"Durga Bo Jam Bhi Vijay Salem": Durgapur, Bokaro, Jamshedpur, Bhilai, Vijayanagar, Salem.

Map marks kahan katte hain

- → Kheda and Dandi both in Gujarat; Champaran is in Bihar (not UP).
- → Mumbai High and Bassien are offshore: dot in the sea.
- → Tuticorin is in Tamil Nadu, Marmagao in Goa, New Mangalore in Karnataka.
- → Neyveli = lignite coal (Tamil Nadu); Kalpakkam = nuclear (Tamil Nadu).
- → Write the name beside the symbol; use the symbol asked (dot, triangle, star).

Shivam Bhaiya says

Roz 10 minute blank map par 10 items lagao. 5 din mein poori list pakki: map ke marks sabse aasaan marks hain.

SST One Shot

Social Science | One Shot Handwritten Notes | Class 10

Is notebook mein kya hai

- ✓ History, Geography, Political Science, Economics: poora CBSE 2026-27 syllabus
- ✓ Dense handwritten-style notes, flowcharts, tables, timelines
- ✓ "Yaad karo" mnemonics and meme boxes for fast recall
- ✓ Most Important Questions with answers after every chapter
- ✓ All CBSE map items, redrawn clean, with practice maps
- ✓ Case-based and source-based questions with answers
- ✓ Last-night revision: dates, one-liners, 1-mark terms + map quick check

Shivam Bhaiya ka message

Exam se pehle is notebook ko kam se kam 3 baar padho: pehli baar samjho, doosri baar highlight yaad karo, teesri baar sirf "Yaad karo" boxes aur questions. Maps roz 5 minute. All the best!

Eduspark | Shivam Bhaiya
